

ERSTE RESPONSIBLE STOCK AMERICA

EAM ESG Rating

ERSTE RESPONSIBLE
STOCK AMERICA

69

Total Market

62

The graph represents the distribution of companies according to the EAM ESG rating for the fund and the Total Market. The EAM ESG ratings are weighted averages of the ESGenius Scores of the companies included.

ESG Performance Factors

Emission of Greenhouse Gases (E)

To what extent are greenhouse gases emitted directly (Scope 1) and indirectly from purchased energy (Scope 2) in relation to sales?

The CO2 intensity is an indicator of operational efficiency. Companies with lower emissions also have a lower risk when the regulatory environment is tightening.

Compliance with Labour Standards (S)

Is it possible for employees to organize in a union? Have collective agreements been put into force?

High employee standards reduce the operational risk in the production process and increase the productivity of the company.

Independence of the Board (G)

What is the proportion of independent Supervisory Board members with regard to personal/business relationships with the Management Board or the company?

By avoiding conflicts of interest, there can be better control in the interest of shareholders. This reduces the risk of corruption cases.

Top 5 Holdings by Weight

Company	GICS Sector	Country	CO2 Intensity	Collective Agreement	Independence of the Board	EAM ESG Rating
Apple Inc.	Information Technology	US	0,2	No	88,89%	65
Microsoft Corp.	Information Technology	US	29	Yes	91,67%	76
Alphabet Inc.	Communication Services	US	7,3	Yes	63,64%	57
NVIDIA Corp.	Information Technology	US	5,1	Yes	92,31%	74
The Procter & Gamble Co.	Consumer Staples	US	61,5	No	90,91%	65

The companies listed here have been selected as an example and do not serve as an investment advice.

What is the Sustainable Footprint?

For the sustainable footprint, three environmental, social and governance criteria have been identified that provide information on traditional measures and are easily measurable across all sectors at the portfolio level:

- CO2 intensity (tonnes of CO2/annual sales in Mln. \$) of the companies taking into account the portfolio weighting
- Share of independent supervisory board members at the company level, taking into account the portfolio weighting
- Share of companies with collective agreements, taking into account the portfolio weighting

How is the EAM-ESG rating calculated?

The ratings of the fund and of the Total Market are calculated as the weighted average of the ESGenius Scores of the respective companies, i.e. every company in the fund or in the Total Market has a sustainability rating based on our analysis and that of external research partners. Aggregated over portfolio holdings and considering the weightings, an overall rating is obtained.

Important Information

The fund employs an active investment policy and is not oriented towards a benchmark. The assets are selected on a discretionary basis and the scope of discretion of the management company is not limited.

Portfolio positions of funds disclosed in this document are based on market developments at the time of going to print. In the context of active management, the portfolio positions mentioned may change at any time.
