

## ICE Data Indices - Rules & Methodology

---

### *ICE BofA 1-10 Year Austria Government Index (G5H0)*

ICE BofA 1-10 Year Austria Government Index is a subset of ICE BofA Austrian Government Index including all securities with a remaining term to final maturity less than 10 years.

Inception date: August 31, 1996

### *ICE BofA Austrian Government Index (G0H0)*

ICE BofA Austrian Government Index tracks the performance of EUR denominated sovereign debt publicly issued by the Austrian government in the Austrian domestic or eurobond market. Qualifying securities must have at least 18 months to maturity at point of issuance, at least one year remaining term to final maturity, a fixed coupon schedule and a minimum amount outstanding of EUR 1 billion. Callable perpetual securities qualify provided they are at least one year from the first call date. Fixed-to-floating rate securities also qualify provided they are callable within the fixed rate period and are at least one year from the last call prior to the date the bond transitions from a fixed to a floating rate security. Bills, inflation-linked debt and strips are excluded from the Index; however, original issue zero coupon bonds are included in the index and the amounts outstanding of qualifying coupon securities are not reduced by any portions that have been stripped. Securities issued or marketed primarily to retail investors do not qualify for inclusion in the index.

Index constituents are market capitalization weighted. Accrued interest is calculated assuming next-day settlement. Cash flows from bond payments that are received during the month are retained in the index until the end of the month and then are removed as part of the rebalancing. Cash does not earn any reinvestment income while it is held in the index. Information concerning constituent bond prices, timing and conventions is provided in the ICE BofA Bond Index Guide, which can be accessed on our public website (<https://indices.theice.com>), or by sending a request to [iceindices@theice.com](mailto:iceindices@theice.com). The index is rebalanced on the last calendar day of the month, based on information available up to and including the third business day before the last business day of the month. New issues must settle on or before the calendar month end rebalancing date in order to qualify for the coming month. No changes are made to constituent holdings other than on month end rebalancing dates.

Inception date: August 31, 1996

The above rules take into account all revisions up to and including September 30, 2019
