- **Tighter lending criteria leading to improved quality of new loans**
 - Even lower LTV's as well as lower maximum loan sizes
 - Continued focus on cash-flow based lending
 - Strengthened rating models and customer authentication processes
- **Tailored and selective restructurings to help challenged customers with positive mid-to long-term outlook**
 - Building customer loyalty as a basis long-term relationship and cooperation
 - Restructuring principles: lengthening maturity and/or deferring capital repayment – but regular interest payments necessary

Asset quality analysis – Key definitions

– **Exposure is a measure of the entire credit risk of Erste Group, covering:**

- Loans and advances to customers and banks
- Fixed income securities in all portfolios (trading, fair value, available for sale, held to maturity)
- Derivative products
- Off-balance sheet credit risks, such as warranties, guarantees and letters of credit
- Unused credit lines

- Pros and cons
 - Pro: covers all credit risk of Erste Group
 - Contra: understates NPL ratio compared to customer loans as base

Risk category	Agency ratings
Low risk	AAA to BB / Aaa to Ba
Management attention	B
Substandard	CCC to C / Caa to C
Non-performing	D, R, RD, SD

– **Reported NPL and NPL coverage ratios exclude collateral**

– **Broad NPL definition**

- 90-day overdue or less than 90-day overdue if:
 - Customer unlikely to pay, e.g. because customer defaulted against third party
 - Customer view instead of product view has been adopted. The former is the case with all corporate customers and all retail customers in Austria. In CEE retail product view prevails. Accordingly, if an Austrian retail customer defaults on one product all performing products are classified as NPLs as well.
