I. Statement of comprehensive income of Erste Group for the year ended 31 December 2010

Income statement

in EUR thousand Notes	2010	2009
Interest and similar income	8,794,910	10,272,166
Interest and similar expenses	(3,403,422)	(5,063,964)
Income from associates accounted for at equity	21,015	12,701
Net interest income 1	5,412,503	5,220,903
Risk provisions for loans and advances 2	(2,031,147)	(2,056,568)
Fee and commission income	2,488,386	2,320,092
Fee and commission expenses	(552,388)	(547,291)
Net fee and commission income 3	1,935,998	1,772,801
Net trading result 4	456,201	585,097
General administrative expenses 5	(3,816,782)	(3,807,396)
Other operating result 6	(439,327)	(355,807)
Result from financial assets - at fair value through profit or loss 7	(6,025)	113,153
Result from financial assets - available for sale	9,244	(204,114)
Result from financial assets - held to maturity 9	(5,535)	(6,789)
Pre-tax profit from continuing operations	1,515,130	1,261,280
Taxes on income 10	(328,693)	(284,651)
Post-tax profit from continuing operations	1,186,437	976,629
Profit from discontinued operations net of tax	0	0
Net profit for the year	1,186,437	976,629
attributable to		
non-controlling interests	171,018	73,239
owners of the parent 11	1,015,419	903,390

Earnings per share

Earnings per share constitute net profit for the year attributable to owners of the parent divided by the average number of ordinary shares outstanding. Diluted earnings per share represent the maximum potential dilution (through an increase in the average number of shares) which would occur if all subscription and conversion rights granted were exercised (also see Note 30, Total equity).

V. Notes to the Financial Statements of Erste Group

A. GENERAL INFORMATION

Erste Group Bank AG is Austria's oldest savings bank and the largest wholly privately-owned Austrian credit institution listed on the Vienna Stock Exchange. It is also quoted on the Prague Stock Exchange (since October 2002) and on the Bucharest Stock Exchange (since 14 February 2008). The registered office of Erste Group Bank AG is located at Graben 21, 1010 Vienna, Austria.

Erste Group offers a complete range of banking and other financial services, such as savings accounts, asset management (including investment funds), consumer credit and mortgage lending, investment banking, securities and derivatives trading, portfolio management, project finance, foreign trade financing, corporate finance, capital market and money market services, foreign exchange trading, leasing and factoring.

The consolidated financial statements of Erste Group for the 2010 financial year and the comparable data for 2009 were prepared in compliance with applicable International Financial Reporting Standards (IFRS) and International Accounting Standards (IAS) published by the International Accounting Standards Board (IASB) and with their interpretations issued by the International Financial Reporting Interpretations Committee (IFRIC, formerly Standing Interpretations Committee or SIC) as adopted by the European Union, thus satisfying the requirements of Section 59a Austrian Banking Act and Section 245a Austrian Commercial Code.

Except as otherwise indicated, all amounts are stated in millions of euros. The tables in this report may contain rounding differences.

It is planned for the Management (following a presentation to the Supervisory Board) to approve the consolidated financial statements on 1 March 2011 for publication.

B. ACQUISITIONS AND DISPOSALS

Acquisitions in 2010

Erste Group did not make any significant acquisitions and disposals during 2010.

Acquisitions in 2009

Erste & Steiermärkische Bank d.d Rijeka acquired a total of 100.0% (65.35% of shares directly and indirectly held by Erste Group Bank AG) of Erste Bank ad, Podgorica (former Opportunity Bank). Erste Bank ad, Podgorica was fully consolidated in the financial statements of Erste Group with effect from 31 March 2009.

The total purchase price for the acquisition of the shares of Erste Bank ad, Podgorica including transaction costs, was about EUR 13.5 million. The resulting negative goodwill amounting to HRK 65.6 million or EUR 9.0 million was recognised directly in Other operating result.

Erste Group acquired 95.0% of asset management business (Ringturm Kapitalanlagegesellschaft m.b.H) of Vienna Insurance Group (VIG), during the course of the sell of its insurance activities, with a view to cooperating more closely with the VIG Ringturm Kapitalanlagegesellschaft m.b.H was fully consolidated in the financial statements of Erste Group with effect from 31 March 2009.

The total purchase price for the acquisition of the shares of Ringturm Kapitalanlagegesellschaft m.b.H was EUR 100 million with the resulting goodwill amounting to EUR 36.3 million.

Customer relationships were recognised separately from goodwill. Upon consolidation, customer relationships were valued at EUR 84.8 million and are being amortised on a straight line basis over the expected useful life of about 20 years.

With effect from 21 January 2009, Sparkasse Kufstein AG joined the Haftungsverbund of the Austrian savings banks. Since that date, the savings bank has been included in the consolidated financial statements of Erste Group. Erste Group holds no equity interest in this savings bank.

Shareholdings in significant companies and their representation in the consolidated financial statements are detailed in Note 46

C. ACCOUNTING POLICIES

a) BASIS OF CONSOLIDATION

Subsidiaries

All subsidiaries directly or indirectly controlled by Erste Group Bank AG are consolidated in the group financial statements, on the basis of the subsidiaries' annual accounts at and for the year ended 31 December 2010.

Subsidiaries are consolidated from the date on which control is transferred to the Bank. Control is achieved when the Bank has the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities. The results of subsidiaries acquired or disposed of during the year are included in the consolidated statement of comprehensive income from the date of acquisition or up to the date of disposal. The financial statements of the Bank's subsidiaries are prepared for the same reporting year as Erste Group Bank AG, by using consistent accounting policies. All intra-group balances, transactions, income and expenses as well as unrealised gains and loss and dividends are eliminated. Non-controlling interests represent the portion of total comprehensive income and net assets, which are not attributable to the group.

Erste Group Bank AG is a member of the Haftungsverbund of the Austrian savings bank sector. At the balance sheet date almost all of Austria's savings banks, in addition to Erste Group Bank AG and Erste Bank der oesterreichischen Sparkassen AG, formed part of this Haftungsverbund.

The provisions of the agreement governing the Haftungsverbund are implemented by the steering company Haftungsverbund GmbH. Erste Group Bank AG indirectly always holds at least 51% of the subscribed capital of the steering company, through Erste Bank der oesterreichischen Sparkassen AG. Two of the four members of the steering company's management, including the CEO, who has the casting vote, are appointed by Erste Bank der oesterreichischen Sparkassen AG. The steering company is vested with the power to monitor the common risk policies of its members. If a member encounters serious financial difficulties – specific key indicators are continually monitored - the steering company has the mandate to provide support measures and/or to intervene, as required, in the business management of the affected member savings bank. As Erste Group Bank AG owns the controlling interest in the steering company, it exercises control over the members of the cross-guarantee system. In accordance with IFRS, all Haftungsverbund members are therefore fully consolidated.

Investments in associates

Investments in companies over which Erste Group Bank AG exercises a significant influence ('associates') are accounted for under the equity method. As a general rule, significant influence is presumed by an ownership interest of between 20% and 50%. Joint ventures are also included using the equity method. Under the equity method, an interest in an associate is recognised in the balance sheet at cost plus post-acquisition changes in the group's share of the net assets of the entity. The group's share of the associate's profit or loss is recognised in the income statement. Entities accounted for under the equity method are recognised largely on the basis of annual financial statements at – and for the year ended on – 31 December 2010.

b) ACCOUNTING AND MEASUREMENT METHODS

In order to improve transparency, Erste Group has enhanced the balance sheet structure by introducing an additional line item "Derivative financial instruments", both for the assets and liabilities sides of the balance sheet. This new disclosure is felt to be more appropriate and of greater relevance. The positive and negative fair values of derivative instruments previously shown under "Trading assets / liabilities" and "Other assets / liabilities" are now reported under the single line item "Derivative financial instruments". The comparative figures have been amended as follows:

in EUR million	31.12.2009	01.01.2009
ASSETS	-	
Trading assets	2,586	2,532
Other assets	2,127	837
Derivative financial		
instruments	4,713	3,369
LIABILITIES AND EQUITY		
Trading liabilities	2,436	2,290
Other liabilities	1,313	597
Derivative financial		
instruments	3,749	2,887

Derivatives are shown on a gross basis. The change had no impact on the consolidated statement of comprehensive income.

Foreign currency translation

The consolidated financial statements are presented in euro which is the functional currency of Erste Group Bank AG. The functional currency is the currency of the primary business environment in which an entity operates. Each entity in the group determines its own functional currency and items included in the financial statements of each entity are measured using that functional currency.

For foreign currency translation, exchange rates quoted by the central banks in each country are used. For group entities with the euro as functional currency, these are the ECB reference rates.

(i) Transactions and balances in foreign currency

Transactions in foreign currencies are initially recorded at the functional currency exchange rate effective at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency rate of exchange at the balance sheet date. All resulting exchange differences that arise are recognised in the income statement. Nonmonetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions.

(ii) Group companies

Assets and liabilities of foreign subsidiaries are translated into Erste Group's presentation currency euro at the rate of exchange as at the balance sheet date (closing rate). Their statements of comprehensive income (including other comprehensive income) are translated at monthly average exchange rates. Goodwill and fair value adjustments to the carrying amounts of assets and liabilities arising on the acquisition (including the recognition of intangible assets such as customer relationships and brand) are treated as assets and liabilities of the foreign subsidiaries and are translated at the closing rate. Exchange differences arising on translation are recognised in other comprehensive income. On disposal of a foreign subsidiary, the cumulative amount recognised in other comprehensive income relating to that particular foreign subsidiary is recognised in the income statement.

Financial instruments - recognition and measurement

A financial instrument is a contract which automatically produces a financial asset for the one company and a financial liability or equity instrument for the other. In accordance with IAS 39, all financial assets and liabilities – which also include derivative financial instruments – have to be recognised in the balance sheet and measured in accordance with their assigned category.

Erste Group uses following measurement categories:

- _ financial assets or financial liabilities at fair value through profit or loss,
- _ available-for-sale financial assets
- _ held-to-maturity investments
- _ loans and receivables
- _ financial liabilities measured at amortised cost (which are defined in addition to the above mentioned measurement categories according to IAS 39)

IAS 39 measurement categories are not necessarily the line items presented in the balance sheet. Specific relationships between the balance sheet line items and measurement categories are described in the table of the point (xi).

Basically it has to be distinguished between two measurement methods:

- amortised cost
- fair value

(i) Date of recognition

Financial instruments are initially recognised when Erste Group becomes a party to the contractual provisions of the instrument. Regular way (spot) purchases and sales of financial assets are recognised at settlement date which is the date that an asset is delivered.

(ii) Initial measurement of financial instruments

The classification of financial instruments at initial recognition depends on the purpose and the management's intention for which the financial instruments were acquired and their characteristics. Financial instruments are measured initially at their fair value plus transaction costs. However in the case of financial assets and financial liabilities designated at fair value through profit or loss, transaction costs are not included.

(iii) Cash and balances with central banks

Balances with central banks include only claims (deposits) against central banks which are repayable on demand. Repayable on demand means that it may be withdrawn at any time or with a term of notice of only one business-day or 24 hours. Mandatory minimum reserves are also shown under this position.

(iv) Derivatives

Derivatives used by Erste Group include mainly interest rate swaps, futures, forward rate agreements, interest rate options, currency swaps and currency options. Derivatives are measured at fair value. Changes in fair value are recognised in the income statement except those resulting from cash flow hedges accounted in accordance with hedge accounting principles. Derivatives are carried as assets when their fair value is positive and as liabilities when their fair value is negative. All kind of derivatives disregarding their internal classification are disclosed under the line item 'Derivative financial instruments" which can be found both on assets and liabilities side of the balance sheet. It means that the line item 'Derivative financial instruments" contains both derivatives held in trading book and banking book and includes also derivatives which are officially designated for hedge accounting.

(v) Financial assets and financial liabilities held-for-trading

Financial assets and financial liabilities held-for-trading are recorded at fair value in the balance sheet. Changes in fair value including interest income and expenses as well as dividend income resulting from financial instruments held-for-trading are reported in 'Net trading result'. Included in held-for-trading are debt securities, equity instruments acquired or issued principally for the purpose of selling or repurchasing in the near term. They are presented as 'Trading assets' or 'Trading liabilities' in the balance sheet.

(vi) Financial assets or financial liabilities designated at fair value through profit or loss

Financial assets or financial liabilities classified in this category are those that have been designated by management on initial recognition (Fair Value Option).

Erste Group uses the fair value through option in case of financial assets managed on fair value basis. In accordance with a documented investment strategy, the performance of the portfolio is evaluated and regularly reported to the management board. The portfolio consists largely of relatively low credit risk investments in bonds issued by EU governments and EU municipalities. They also have very low interest risk as most of them are floating rate bonds linked to EURIBOR.

Financial assets designated at fair value through profit or loss are recorded in the balance sheet at fair value in the line 'Financial assets – at fair value through profit or loss' with changes in fair value recognised in the income statement 'Result from financial assets – at fair value through profit or loss'. Interest earned on debt instruments is shown in 'Interest and similar income' Also, dividend income on equity instruments is presented in 'Interest and similar income' when the right to the payment has been established.

If financial liabilities are designated at fair value through profit or loss then they are reported under respective financial liabilities positions 'Deposits by banks', 'Customer deposits' or 'Debt securities in issue'. Changes in fair value are recognised in 'Result from financial assets – at fair value through profit or loss'. Interest incurred is shown as 'Interest and similar expenses'.

(vii) Available-for-sale financial assets

Available-for-sale assets include equity and debt securities as well as other investments in non-consolidated companies. Equity investments classified as available-for-sale are those which are neither classified as held-for-trading nor designated at fair value through profit or loss. Debt securities in this category are those which are intended to be held for an indefinite period of time and which may be sold in response to needs for liquidity or in response to changes in market conditions.

After initial measurement, available-for-sale financial assets are subsequently measured at fair value. Unrealised gains and losses are recognised directly in other comprehensive income and reported in the 'Available-for-sale reserve' until the financial asset is disposed of or impaired. If available-for-sale assets are disposed of or impaired, the cumulative gain or loss previously recognised directly in other comprehensive income is reclassified to profit or loss and reported under the line item 'Result from financial assets – available for sale'. In the balance sheet, available-for-sale financial assets are disclosed in the line item 'Financial assets – available for sale'.

If the fair value of investments in non-quoted equity instruments cannot be measured reliably, they are recorded at cost. There is no market for such investments. Erste Group does not have any specific plan to dispose such investments

Interest and dividend income on available-for-sale financial assets are reported in the income statement as 'Interest and similar income'.

(viii) Held-to-maturity financial investments

Held-to-maturity financial investments reported as 'Financial assets – held to maturity' in the balance sheet are non-derivative financial assets with fixed or determinable payments and fixed maturities, if Erste Group has the intention and ability to hold them until maturity. After initial recognition held-to-maturity financial investments are subsequently measured at amortised cost including impairment. Interest earned on financial assets held-to-maturity is reported in 'Interest and similar income'. Losses arising from impairment of such investments as well as realised gains or losses from selling are recognised in the income statement in the line 'Result from financial assets – held to maturity'.

(iv) Loans and advances

The balance sheet line items 'Loans and advances to credit institutions' and 'Loans and advances to customers' meet the definition of loans and receivables category. Loans and advances include non-derivative financial assets with fixed or determinable payments that are not quoted in an active market, other than:

- those that Erste Group intends to sell immediately or in the near term and those that Erste Group upon initial recognition designates as at fair value through profit or loss;
- those that Erste Group, upon initial recognition, designates as available for sale; or
- those for which Erste Group may not recover substantially all of its initial investment, other than because of credit deterioration

After initial measurement, loans and advances are subsequently measured at amortised cost including impairment. Interest income earned is included in 'Interest and similar income' in the income statement. Allowance for impairment is reported in the balance sheet line 'Risk provisions for loans and advances'. Losses arising from impairment are recognised in the income statement line 'Risk provisions for loans and advances'.

(x) Deposits and other liabilities

Financial liabilities are measured at amortised cost, unless they are measured at fair value through profit or loss. Financial liabilities are reported in the lines 'Deposits by banks', 'Customer deposits' 'Debt securities in issue' or 'Subordinated liabilities' except for those which are not held for trading. Interest expenses incurred are reported in the line 'Interest and similar expenses' in the income statement.

(xi) Relationships between balance sheet positions and measurement categories and classes for risk disclosures

Balance sheet positions	Me	easurement value	Measurement category	
		At amortised

Subordinated liabilities		Х		Financial liabilities

For the purposes of risk disclosures under IFRS 7 Erste Group splits balance sheet positions for financial instruments into classes – disaggregated according to industries (see note 37.5).

Derecognition of financial assets and financial liabilities

A financial asset (or, where applicable a part of a financial asset or part of a group of similar financial assets) is derecognised when:

- _ the rights to receive cash flows from the asset have expired; or
- _ as Erste Group has transferred its rights to receive cash flows from the asset or
- has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement;
- _ and either:
 - has transferred substantially all the risks and rewards connected with the ownership of the asset, or
 - _ has neither transferred nor retained substantially all the risks and rewards connected with the ownership of the asset, but has transferred control of the asset.

A financial liability is derecognised when the obligation under the liability is discharged, cancelled or expires.

Repurchase and reverse repurchase agreements

Securities sold under agreement to repurchase at a specified future date are not derecognised from the balance sheet as Erste Group retains substantially all the risks and rewards of ownership. Such transactions are also known as 'repos' or 'sale and repurchase agreement'. The corresponding cash received is recognised in the balance sheet as an asset with a corresponding obligation to return it as a liability in the respective lines 'Deposits by banks' or 'Customer deposits' reflecting the transaction's economic substance as a loan to Erste Group. The difference between the sale and repurchase prices is treated as interest expense and recorded in the line 'Interest and similar expenses' and is accrued over the life of agreement. Financial assets transferred out by Erste Group under repurchase agreements remain on the group's balance sheet and are measured according to the rules applicable to the respective balance sheet item.

Conversely, securities purchased under agreements to resell at a specified future date are not recognised in the balance sheet. Such transactions are also known as 'reverse repos'. The consideration paid is recorded in the balance sheet in the respective lines 'Loans and advances to credit institutions' or 'Loans and advances to customers', reflecting the transaction's economic substance as a loan by Erste Group. The difference between the purchase and resale prices is treated as interest income and recorded in line 'Interest and similar income' and is accrued over the life of the agreement.

Securities lending and borrowing

In securities lending transactions, the lender transfers ownership of securities to the borrower on the condition that the borrower will retransfer, at the end of the agreed loan term, ownership of instruments of the same type, quality and quantity and will pay a fee determined by the duration of the lending. Similarly to 'reverse repos', the transfer of the securities to counterparties via securities lending does not result in derecognition unless the risks and rewards of ownership are also transferred. Securities borrowed are not recognised on the balance sheet, unless they are then sold to third parties.

Determination of fair value

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.

The best indication of the fair value of financial instruments is provided by quoted market prices in an active market. Where quoted market prices in an active market are available, they are used to measure the financial instrument (level 1 of fair value hierarchy). The measurement of fair value at Erste Group is based primarily on external sources of data (stock market prices or broker quotes in highly liquid market segments). Where no market prices are available, fair value is determined on the basis of valuation models that are based on observable market information (level 2 of fair value hierarchy). In some cases, the fair value of financial instruments can be determined neither on the basis of market prices nor of valuation models that rely entirely on observable market data. In this case, individual valuation parameters not observable in the market are estimated on the basis of reasonable assumptions (level 3 of fair value hierarchy).

Erste Group employs only generally accepted, standard valuation models. Net present values are determined for linear derivatives (e.g. interest rate swaps, cross currency swaps, foreign exchange forwards and forward rate agreements) by discounting the recurring cash flows. Plain vanilla OTC options (on shares, currencies and interest rates) are valued using option pricing models of the Black-Scholes class; complex interest rate derivatives are measured using Hull-White and/or Brace Gatorek Musiela (BGM) models. Erste Group uses only valuation models which have been tested internally and for which the valuation parameters (such as interest rates, exchange rates and volatility) have been determined independently.

Impairment of financial assets

Erste Group assesses at each balance sheet date whether there is any objective evidence that a financial asset or a group of financial assets is impaired. A financial asset or a group of financial assets is deemed to be impaired if, and only if, there is objective evidence of impairment as a result of one or more events that have occurred after the initial recognition of the asset (an incurred 'loss event') and that loss event (or events) has an impact on the estimated future cash flows of the financial asset or the group of financial assets that can be reliably estimated.

Evidence of impairment may include indications that the borrower or a group of borrowers is experiencing significant financial difficulty, the probability that they will enter bankruptcy or other financial reorganisation, default or delinquency in interest or principal payments and where observable data indicates that there is a measurable decrease in the estimated future cash flows, such as changes in arrears or economic conditions that correlate with defaults.

(i) Financial assets carried at amortised cost

If there is objective evidence that an impairment loss has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future expected credit losses that have not yet been incurred). The calculation of the present value of the estimated future cash flows of a collateralised financial asset reflects the cash flows that may result from foreclosure less costs for obtaining and selling the collateral.

In case of loans and advances, any impairment is reported in the allowance account referred to as 'Risk provisions for loans and advances' in the balance sheet and the amount of the loss is recognised in the income statement line 'Risk provisions for loans and advances'. Risk provisions for loans and advances include specific risk provisions for loans and advances for which objective evidence of impairment exists. In addition, risk provisions for loans and advances include portfolio risk provisions for which no objective evidence of impairment exists in single observation. For held-to-maturity investments impairment is recognised directly by reduction of asset account and in the income statement line 'Result from financial assets - held to maturity'. Interest income for individually impaired assets continues to be accrued on the reduced carrying amount and is accrued using the interest rate used to discount the future cash flows for the purpose of measuring the impairment loss. This interest income is recorded as part of 'Interest and similar income'.

Loans together with the associated allowance are derecognised when there is no realistic prospect of future recovery and all collaterals have been realised in Erste Group.

If, in a subsequent year, the amount of the estimated impairment loss increases or decreases because of an event occurring after the impairment was recognised, the previously recognised impairment loss is increased or reduced by adjusting the allowance account in case of loans and advances. In case of held-to-maturity investments the carrying amount is increased or decreased. Decreases of impairment losses are reported in the same line of income statement as the impairment loss itself.

(ii) Available-for-sale financial investments

In case of debt instruments classified as available-for-sale, Erste Group assesses individually whether there is objective evidence of impairment based on the same criteria as for financial assets carried at amortised cost. However, the amount recorded for impairment is the cumulative loss measured as the difference between the amortised cost and the current fair value, less any impairment loss on that investment previously recognised in the income statement. On recognising impairment any amount of losses retained in other comprehensive income item 'Available for sale reserve' is reclassified to the income statement and shown as impairment loss in 'Result from financial assets – available for sale'. If, in a subsequent period, the fair value of a debt instrument increases and the increase can be objectively related to credit event occurring after the impairment loss was recognised in the income statement, the impairment loss is reversed through the income statement in the line 'Result from financial assets – available for sale'. Impairment losses and their reversals are recognised directly against the assets in the balance sheet.

In case of equity investments classified as available-for-sale, objective evidence also includes a 'significant' or 'prolonged' decline in the fair value of the investment below its cost. For this purpose in Erste Group "significant" decline means a market price below 80% of the acquisition cost and "prolonged" decline refers to a market price which is permanently below acquisition cost for a period of 9 month up to the reporting date. Where there is evidence of impairment, the cumulative loss measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that investment previously recognised in the income statement is removed from' Available for sale reserve' in other comprehensive income and is reclassified and shown as impairment loss in 'Result from financial assets – available for sale'. Impairment losses on equity investments are not reversed through the income statement; increases in the fair value after impairment are recognised directly in other comprehensive income. Impairment losses and their reversals are recognised directly against the assets in the balance sheet.

(iii) Off-balance-sheet exposures

Provisions for off-balance sheet transactions (particularly warranties and guarantees as well as other credit commitments) are included in the balance sheet line 'Provisions', the related expense is reported in the income statement in line 'Risk provisions for loans and advances'.

Hedge accounting

Erste Group makes use of derivative instruments to manage exposures to interest rate risk and foreign currency risk. At inception of the hedge relationship, the Bank formally documents the relationship between the hedged item and the hedging instrument, including the nature of the risk, the objective and strategy for undertaking the hedge and the method that will be used to assess the effectiveness of the hedging relationship. Also at the inception of the hedge relationship, a formal assessment is undertaken to ensure the hedging instrument is expected to be highly effective in offsetting the designated risk in the hedged item. A hedge is expected to be highly effective if the changes in fair value or cash flows attributable to the hedged risk during the period for which the hedge is designated are expected to offset in a range of 80%

to 125%. Exact conditions for particular types of hedges applied by Erste Group are internally specified.

(i) Fair value hedges

Fair value hedges are employed to reduce market risk. For designated and qualifying fair value hedges, the change in the fair value of a hedging derivative is recognised in the income statement. Meanwhile, the change in the fair value of the hedged item attributable to the risk hedged is recorded as part of the carrying value of the hedged item and is also recognised in the income statement.

If the hedging instrument expires or is sold, terminated or exercised, or when the hedge no longer meets the criteria for hedge accounting, the hedge relationship is terminated. In this case the fair value adjustment of the hedged item shall be amortised to the income statement until maturity of the financial instrument.

(ii) Cash flow hedges

Cash flow hedges are used to eliminate uncertainty in the future cash flows in order to stabilise net interest income. For designated and qualifying cash flow hedges, the effective portion of the gain or loss on the hedging instrument is recognised in Other comprehensive income and reported under the 'Cash flow hedge reserve'. The ineffective portion of the gain or loss on the hedging instrument is recognised in the income statement in 'Net trading result'. When the hedged cash flow affects the income statement the gain or loss on the hedging instrument is reclassified into the corresponding income or expense line in the income statement.

When a hedging instrument expires, or is sold, terminated, exercised, or when a hedge no longer meets the criteria for hedge accounting, the hedge relationship is terminated. In this case the cumulative gain or loss on the hedging instrument that has been recognised in other comprehensive income shall remain separately in 'Cash flow hedge reserve' until the transaction occurs.

Offsetting financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if, and only if, there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the asset and settle the liability simultaneously.

Leasing

Lease is an agreement whereby the lessor conveys to the lessee in return for a payment or series of payments the right to use an asset for an agreed period of time. Finance lease of Erste Group is a lease that transfers substantially all the risks and rewards incidental to ownership of an asset. Remaining lease agreements in Erste Group are classified as Operating lease.

Erste Group as a lessor

The lessor in the case of finance lease reports a receivable against the lessee amounting to present value of the contractually agreed payments taking into account any residual value. In the case of operating leases the leased asset is reported by the lessor in 'property and equipment' or in 'investment property' and is depreciated in accordance with the principles applicable to the assets involved. Lease income is recognised on a straight-line basis over the lease term.

Lease agreements in which Erste Group is the lessor almost exclusively represent finance leases.

Erste Group as a lessee

From the side of a lessee, Erste Group has not entered into any leases fulfilling conditions of finance leases. Operating lease payments are recognised as an expense in the statement of comprehensive income on a straight line basis over the lease term.

Property and equipment

Property and equipment – land and buildings, furniture and equipment is measured at cost less accumulated depreciation and accumulated impairment in value. Borrowing costs for qualifying assets are capitalised into the costs of property and equipment.

Depreciation is calculated using the straight-line method to write down the cost of property and equipment to their residual values over their estimated useful lives. Land is not depreciated. The estimated useful lives are as follows:

·	Useful life in years
Buildings	20-50
Office furniture and equipment	5-20
Computer hardware	4-5

Property and equipment is derecognised on disposal or when no future economic benefits are expected from its use. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is recognised in 'Other operating result' in the statement of comprehensive income in the year the asset is derecognised.

Business combinations and goodwill

(i) Business combinations

Business combinations are accounted for using the purchase method of accounting. This involves recognising identifiable assets (including previously unrecognised intangible assets such as customer relationships and brand) and liabilities (including contingent liabilities and excluding future restructuring) of the acquired business at fair value. Any excess of the cost of acquisition over the fair values of the identifiable net assets acquired is recognised as goodwill. If the cost of acquisition is less than the fair value of the identifiable net assets acquired, the discount on acquisition is recognised in profit or loss in the line 'Other operating result' in the year of acquisition.

(ii) Goodwill and impairment testing

Goodwill is not amortised but tested for impairment annually in November with any impairment determined recognised in profit or loss. For reviewing the value of existing goodwill, an annual impairment test is carried out for each cash-generating unit (CGU) to which goodwill has been allocated. A cash-generating unit is the smallest identifiable group of assets that generates cash inflows that are largely independent of the cash inflows from other assets or groups of assets. For impairment testing purposes in Erste Group, all business segments distinguished in the segment reporting in the financial statements are defined as CGUs. Separate legal entities within these segments are treated as separate CGUs.

Goodwill is tested for impairment by comparing the recoverable amount of each cash-generating unit, to which goodwill has been allocated with its carrying amount. The carrying amount of a cash-generating unit is derived based on the amount of equity allocated to a cash-generating unit taking into account any goodwill and unamortised intangible assets recognised for the cash-generating unit according to the purchase prices allocation. The

recoverable amount is the higher of a CGU's fair value less costs to sell and its value in use. Where available, the fair value less costs to sell is determined based on recent transactions, market quotations or appraisals. The value in use is determined using a discounted cash flow model (DCF-model), which incorporates the specifics of the banking business and its regulatory environment. In determining value in use, the present value of future earnings distributable to shareholders is calculated.

The estimation of future earnings distributable to shareholders is based on financial plans for the CGUs as agreed by the management taking into account the fulfillment of the respective regulatory capital requirements. The planning period ranges between three and five years. After estimating earnings distributable to shareholders for the planning period they are discounted to their present values. Any earnings beyond the planning period are derived on the basis of the last year of the planning period and a long-term growth rate, which is based on macroeconomic parameters for each CGU. The estimated future earnings beyond the initial planning period are captured in the terminal value.

Long-term growth rates applied to estimate future earnings beyond the planning period are as follows:

		Growth rates
in %	2010	2009
Austria	2.0 – 3.3	2.0
CEE	2.0 – 4.3	2.0
Other	2.0	2.0

The discount rates applied to calculate the present values have been determined based on the capital asset pricing model (CAPM). According to the CAPM, the discount rate comprises a risk-free interest rate together with a market risk premium that itself is multiplied by a factor that represents the systematic market risk (beta factor). Furthermore, a country-risk premium is considered too. The values used to establish the discount rates are determined using external sources of information.

Discount rates applied to determine the value in use of the CGUs in 2010 and 2009 are as follows:

	ı	Discount rates	
in %	2010	2009	
Austria	8.1 – 9.0	9.4	
CEE	10.6 – 12.0	10.4 – 12.6	
Other	11.6 – 15.0	15.1 – 17.3	

Where the recoverable amount of a CGU is less than its carrying amount, the difference is recognised as an impairment loss in the line 'Other operating result'. The impairment loss is allocated first to writing down the CGU's goodwill. Any remaining impairment loss reduces the carrying amount of the CGU's other

assets, though not to an amount less than their fair value less costs to sell. There is no need to recognise an impairment loss if the recoverable amount of the CGU is higher than or equal to its carrying amount. Impairment losses relating to goodwill cannot be reversed in future periods.

(iii) Sensitivities

The value in use of a CGU is most sensitive to changes of the estimated future earnings distributable to shareholders, the discount rate and the long-term growth rate.

A decrease of approximately 20 % of the long-term growth rate or an increase of approximately 7 % of the discount rate applied to determine the value in use of BCR would have caused the value in use to equal the carrying amount of BCR. In doing so, it should be taken into account that changing the parameters might have compensatory impacts.

Investment properties

Investment property is property (land and building) held for the purpose of earning rental income or for capital appreciation. In case of partial own use, the property is investment property only if the owner-occupied portion is insignificant. Investment properties are measured at cost less accumulated straight-line depreciation based on useful life. Any impairment losses are recognised in the line 'Other operating result' as required. If the reasons which led to the impairment cease to apply, the previously recognised impairment loss is reversed to no more than the asset's carrying amount if no impairment loss had been recognised.

The useful life of investment properties is equal to those of property and equipment.

Non-current assets held for sale and liabilities associated with non-current assets held for sale

Non-current assets are classified as held for sale if they can be sold in their present condition and the sale is highly probable within 12 months of classification as held for sale. Assets classified as held for sale are reported under the balance sheet line 'Assets held for sale'. Non-current assets that are classified as held for sale are measured at the lower of carrying amount and fair value less costs to sell.

A disposal group is a group of assets, possibly with associated liabilities, which an entity intends to dispose of in a single transaction. The measurement basis as well as the criteria for classification as held for sale are applied to the group as a whole. Assets being part of a disposal group are reported under the balance sheet line 'Assets held for sale'. Liabilities associated with assets held for sale, which are liabilities that form part of a disposal group, are disclosed under the balance sheet line 'Liabilities associated with assets held for sale'.

Intangible assets

In addition to goodwill Erste Group's other intangible assets include computer software and customer relationships, brand and other intangible assets. An intangible asset is recognised only when its cost can be measured reliably and it is probable that the expected future economic benefits that are attributable to it will flow to the Bank.

Costs of internally generated software are capitalised if Erste Group can demonstrate technical feasibility and intention of completing the software, ability to use it, how it will generate probable economic benefits, availability of resources and ability to measure reliably the expenditures. Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less any accumulated amortisation and any accumulated impairment losses.

The cost of intangible assets acquired in a business combination is their fair value as at the date of acquisition. In the case of Erste Group these are brands, customer relationships and distribution networks and they are capitalised on acquisition if they can be measured with sufficient reliability.

Intangible assets with finite lives are amortised over their useful economic life. The amortisation period and the amortisation method are reviewed at least at each financial year-end and adjusted if necessary. The amortisation expense on intangible assets with finite lives is recognised in the statement of comprehensive income under 'General Administrative expenses' except for amortisation of customer relationships which is reported in 'Other operating result'.

Amortisation is calculated using the straight-line method to write down the cost of intangible assets to their residual values over their estimated useful lives as follows:

	Useful life in years
Computersoftware	4 – 6
Customer relationships	10 – 20
Distribution network	5.5

Brands are not amortised as they are assumed to have an indefinite useful life. An intangible asset has an indefinite useful life, if there are no legal, contractual, regulatory or other factors limiting the useful life. They are annually tested for impairment within cash generating units to which they belong. In the event of impairment, impairment losses are recognised in 'Other operating result'. Furthermore each period brands are reviewed whether current circumstances continue to support the conclusion about indefinite life.

Financial guarantees

In the ordinary course of business, Erste Group gives financial guarantees, consisting of some types of letters of credit and guarantees. According to IAS 39 a financial guarantee is a contract that requires the guarantor to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payment when due in accordance with original or modified terms of a debt instrument. If Erste Group is in a position of being a guarantee holder, the financial guarantee is not recorded in the balance sheet but is taken into consideration as collateral when determining impairment of the guaranteed asset.

Erste Group as a guarantor recognises financial guarantees in the financial statements. Financial guarantees are initially measured at fair value as soon as Erste Group becomes a contracting party, i.e., when the guarantee offer is accepted. Generally the initial measurement is the premium received for a guarantee. If no premium is received at contract inception the fair value of a financial guarantee for which the premium is not received at contract inception is nil, as this is the amount at which the transaction could be settled on a standalone arm's length transaction with an unrelated party. Subsequent to initial recognition the financial guarantee contract is reviewed for possible requirement for provisions under IAS 37.

The premium received is recognised in the statement of comprehensive income in 'Net fee and commission income' on a straight line basis over the life of the guarantee.

Defined employee benefit plans

Defined employee benefit plans operated by Erste Group, are for pensions, severance and jubilee benefits.

The defined benefit pension plans relate only to retired employees. The pension obligations for current employees were transferred to external pension funds in previous years. Remaining with Erste Group is a defined-benefit obligation for entitlements of former employees who were already retired as of 31 December 1998 before the pension reform took effect, and for those former employees who retired only in 1999 but remained entitled to a direct pension from Erste Group under individual agreements; and for entitlements to resulting survivor pensions.

Severance benefit obligations exist against Austrian employees who entered the group's employment before 1 January 2003. The severance benefit is a one-time remuneration to which employees are entitled when their employment relationship ends. The entitlement to this severance payment arises after three years of employment.

Defined benefit plans include also jubilee benefits to which Austrian employees are entitled. Jubilee payments (long service/loyal-service payments) are remuneration tied to the length of employees' service to an employer. The entitlement to jubilee benefits is established by collective agreement, which defines both the conditions and amount of the entitlement. In Central European subsidiaries further defined benefit plans exist.

Obligations resulting from defined employee benefit plans are determined using the projected unit credit method. Future obligations are determined based on actuarial expert opinions. The calculation takes into account not only those salaries, pensions and vested rights to future pension payments known at the balance sheet date, but also anticipated future rates of increase in salaries and pensions.

As of 31 December 2010, for all domestic subsidiaries, the most important actuarial assumptions used in the computation were adjusted to reflect the situation at year-end 2010. Thus, the actuarial calculation of pension, severance and jubilee benefit obligations is based on a discount rate (long-term capital market interest rate) of 4.25% per annum (previously: 5.0%). The statutory increase in pension benefits is assumed to be 2.0% per year (previously: 2.5%) and severance and jubilee benefits are calculated based on an expected annual increase of 3.0% per year in salaries (previously: 3.8%). Obligations were calculated in accordance with the Pagler & Pagler mortality tables titled 'AVÖ 2008 P – Rechnungsgrundlagen für die Pensionsversicherung'. The expected retirement age for each employee was individually calculated on the basis of the changes set out in the Budget Implementation Act of 2003 (Austrian Federal Law Gazette Vol. I No. 71/2003) regarding the increase in the minimum retirement age. The currently applicable legislation on the gradual raising of the retirement age for men and women to 65 was taken into consideration. For Central European subsidiaries the mandatory retirement age as well as the discount rates which range from 3.13% (previously: 4.27%) to 6.7% (previously: 7.5%) - depends on the particular country - is used.

The liability recognised from a defined-benefit plan represents the present value of the defined benefit obligation less the fair value of the plan assets available for the direct settlement of obligations. For all plans present value of the obligation exceeds the fair value of plan assets. Resulting defined benefit liability is reported in the balance sheet line 'Other provisions'. At Erste Group the plan assets consist of qualifying insurance policies purchased to back severance and jubilee benefit provisions.

Actuarial gains or losses of pension and severance benefit obligations and of plan assets available to settle these obligations are recognised directly in equity for the period in which they occur. Actuarial gains or losses of provisions for jubilee benefits are recognised in the income statement in the period during which they occur.

Based on actually realized returns of portfolios and forecasts on the development of assessment included in these portfolios, at 31 December 2010 an interest rate of 4.25% (2009: 5%) was assumed for the expected return on plan assets.

Provisions

Provisions are recognised when the group has a present obligation as a result of a past event, and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. In the balance sheet, provisions are reported under the line 'Other provisions'. They include credit risk provisions for off-balance-sheet transactions (particularly warranties and guarantees) as well as provisions for litigations and restructuring. Expenses or income from release relating to credit risk provisions for off-balance-sheet items are presented in income statement in the line 'Risk provisions for loans and advances', all other expenses or income from releases related to provisions are reported in the line 'Other operating result'.

Share-based payment transactions

Erste Group grants shares and share options to employees and managers as compensation for their services, under the employee share ownership plan (ESOP) and the management share option (MSOP) plans. Both take the form of equity-settled share-based payment transactions.

The cost of equity-settled transactions with employees is measured by reference to the fair value at the date on which they are granted. Under ESOP, Erste Group shares are offered to employees at a discounted price; therefore, the fair value results from the discount at which employees purchase Erste Group shares. Any expense incurred from this fair value is immediately recognised in personnel expenses under the line 'General administrative expenses'. Under MSOP, Erste Group share options are granted to managers and other key personnel. For MSOP initial fair value of the options granted is determined by means of generally accepted option pricing models (Black and Scholes, Binomial model). Expense from this fair value is spread over the vesting periods (the period between the grant date and the first permitted exercise date). Expense is recognised in personnel expenses under the line 'General administrative expenses' together with a corresponding increase in equity.

Taxes

(i) Current tax

Current tax assets and liabilities for the current and prior years are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted by the balance sheet date.

(ii) Deferred tax

Deferred tax is recognised for temporary differences between the tax bases of assets and liabilities and their carrying amounts at the balance sheet date. Deferred tax liabilities are recognised for all taxable temporary differences. Deferred tax assets are recognised for all deductible temporary differences and unused tax losses, to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry

forward of unused tax losses can be utilised. Deferred taxes are not recognised on temporary differences arising from the initial recognition of goodwill or of an asset or liability in a transaction that is not a business combination.

The carrying amount of deferred tax assets is reviewed at each balance sheet date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are reassessed at each balance sheet date and are recognised to the extent that it has become probable that future taxable profit will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted at the balance sheet date. For the subsidiaries local tax environment applies.

Deferred tax relating to items recognised in other comprehensive income is also recognised in other comprehensive income and not in the income statement.

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxation authority.

Own shares and contracts on own shares

Own equity instruments of Erste Group which are acquired by it or by any of its subsidiaries (treasury shares) are deducted from equity. Consideration paid or received on the purchase, sale, issue or cancellation of Erste Group's own equity instruments is recognised directly in equity. No gain or loss is recognised in the income statement on the purchase, sale, issue or cancellation of own equity instruments.

Fiduciary assets

The group provides trust and other fiduciary services that result in the holding or investing of assets on behalf of its clients. Assets held in a fiduciary capacity are not reported in the financial statements, as they are not the assets of the group.

Dividends on ordinary shares

Dividends on ordinary shares are recognised as a liability and deducted from equity when they are approved by Erste Group's shareholders.

Regaring dividends on participation capital see note 30.

Recognition of income and expenses

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the entity and the revenue can be reliably measured. As regards the lines reported in the income statement their description and revenue recognition criteria are following:

(i) Net interest income

Interest and similar income mainly includes interest income in the narrow sense on loans and advances to credit institutions and customers, on balances with central banks and on bonds and other interest-bearing securities. Interest and similar expenses mainly include interest paid on deposits by banks and customer deposits, deposits of central banks, debt securities in issue and subordinated debt (including hybrid issues).

For all financial instruments measured at amortised cost, interest-bearing financial assets classified as available for-sale and financial instruments designated at fair value through profit or loss, interest income or expense is recorded using the effective interest rate (EIR). The calculation includes fees or incremental costs that are directly attributable to the instrument and are an integral part of the EIR, but not future credit losses. Interest income from individually impaired loans is calculated by applying the original effective interest rate used to discount the estimated cash flows for the purpose of measuring the impairment loss.

Also reported in interest and similar income is current income from shares and other equity-related securities (especially dividends), income from other investments in companies and non-consolidated subsidiaries categorised as available-for-sale. Such dividend income is recognised when the right to receive the payment is established.

Net interest income also includes rental from investment properties. As such, rental income from rental agreements constituting operating leases is recognised on a straight-line basis over the lease term.

Income from associates recorded by applying the equity method (share of profit or loss in associates) is also included in the total of net interest income. Impairment losses, reversal of impairment losses, and realised gains and losses on investments in associates accounted for at equity are reported in 'Other operating result'.

(ii) Risk provisions for loans and advances

This item includes allocations to and releases of specific and portfolio risk provisions for loans and advances for both onbalance-sheet and off-balance-sheet transactions. Also reported in this item are direct write-offs of loans and advances as well as recoveries on loans written off.

(iii) Net fee and commission income

The Bank earns fee and commission income from a diverse range of services it provides to its customers. It includes income and expenses mainly from fees and commission payable or receivable for payment transfers, securities business and lending business, as well as from insurance brokerage, building society brokerage and foreign exchange transactions.

Fees earned for the provision of services over a period of time are accrued over that period. These fees include guarantee fees, commission income from asset management, custody and other management and advisory fees.

Fee income earned from providing transaction services, such as the arrangement of the acquisition of shares or other securities or the purchase or sale of businesses, is recognised on completion of the underlying transaction.

(iv) Net trading result

Results arising from trading activities include all gains and losses from changes in fair value, dividends and interest income or expense on financial assets and financial liabilities classified as 'Held-for-trading'. It also includes any ineffective portions recorded in hedging transactions as well as foreign exchange gains and losses.

(v) General administrative expenses

General administrative expenses represent the following expenses accrued in the reporting period: personnel and other administrative expenses, as well as depreciation and amortisation. Not included is any amortisation of customer relationships nor impairment of goodwill.

Personnel expenses include wages and salaries, bonuses, statutory and voluntary social security contributions, staff-related taxes and levies. They also include expenses and income for severance payments, pension and jubilee obligations (covering service cost, interest cost, expected return on plan assets and actuarial gains and losses for jubilee obligations).

Other administrative expenses include information technology expenses, expenses for office space, office operating expenses, advertising and marketing, expenditures for legal and other consultants as well as sundry other administrative expenses.

(vi) Other operating result

Other operating result reflects all other income and expenses not attributable to Erste Group's ordinary activities. This includes especially impairment losses or any reversal of impairment losses as well as results on the sale of property and equipment, amortisation and impairment of customer relationships, any impairment losses on goodwill, and impairment losses (and any reversal of impairment losses) on other intangible assets. In addition, Other operating result encompasses the following: expenses for other taxes and for deposit insurance contributions; income from the release of and expenses for allocations to other provisions; impairment losses (and their reversal if any) on investments in associates accounted for at equity and realised gains and losses from the disposal of equity-accounted investments.

Significant accounting judgements, assumptions and estimates

The consolidated financial statements contain amounts that have been determined on the basis of judgements and by use of estimates and assumptions. The estimates and assumptions used are based on historical experience and other factors, such as planning as well as expectations and forecasts of future events that are currently deemed to be reasonable. As a consequence of the uncertainty associated with these assumptions and estimates, actual results could in future periods lead to adjustments in the carrying amounts of the related assets or liabilities. The most significant use of judgment, assumption and estimates are as follows:

Going concern

The Erste Group's management has made an assessment of Erste Group's ability to continue as a going concern and has concluded that Erste Group has the resources to continue in business for the foreseeable future. The management is not aware of any material uncertainties that may cast significant doubt upon Erste Group's ability to continue as a going concern. Therefore, the consolidated financial statements continue to be prepared on the going concern basis.

Fair value of financial instruments

Where the fair values of financial assets and financial liabilities recorded on the balance sheet cannot be derived from active markets, they are determined using a variety of valuation techniques that include the use of mathematical models. The inputs to these models are derived from observable market data where possible, but where observable market data is not available, judgment is required to establish fair values. Disclosures for valuation models, fair value hierarchy and fair values of financial instruments can be found in the Note 39) Fair value of financial instruments.

Impairment of financial assets

Erste Group reviews its financial assets not measured at fair value through profit or loss at each balance sheet date to assess whether an impairment loss should be recorded in the income statement. In particular, it is required to determine whether there is objective evidence of impairment as a result of loss event occurring after initial recognition and to estimate the amount and timing of future cash flows when determining the impairment loss.

Disclosures concerning impairment are in the note 37) Risk Management in the part Credit risk – Non-performing assets and risk provisions. Development of loan loss provisions is described in the note 15) Risk provisions for loans and advances.

Impairment of non-financial assets

Erste Group reviews its non-financial assets at each balance sheet date to assess whether there is an indication of impairment loss which should be recorded in the income statement. This is especially relevant for cash generating units which contain goodwill which have to be tested for impairment annually. Judgement and estimates are required to determine the value in use by estimating the timing and amount of future expected cash flows and the discount rates. Assumptions and estimates used for impairment on non-financial assets calculations are described in the part Business combination and goodwill of the accounting policies. Deferred tax assets

Deferred tax assets are recognised in respect of tax losses and deductible temporary differences to the extent that it is probable that taxable profit will be available against which the losses can be utilised. Judgement is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and level of future taxable profits, together with future tax planning strategies. Disclosures concerning deferred taxes are in the note 20) Tax assets and liabilities.

Defined benefit obligation plans

The cost of the defined benefit pension plan is determined using an actuarial valuation. The actuarial valuation involves making assumptions about discount rates, expected rates of return on assets, future salary increases, mortality rates and future pension increases. Assumption and estimates used for the defined benefit obligation calculations can be found in the part Defined benefit plans of accounting policies. Quantitative data for long-term employee provisions are in the note 27) Other provisions.

Leases

From Erste Group's perspective as a lessor, judgement is required to distinguish whether the lease is a finance or operating lease based on the transfer of substantially all the risk and rewards from the lessor to the lessee.

c) APPLICATION OF AMENDED AND NEW IFRS/IAS

The accounting policies adopted are consistent with those used in the previous financial year except that Erste Group has adopted the following standards, amendments and interpretations which became effective for financial years beginning on or after 1 January 2010.

Effective standards and interpretations

IFRS 3 (Revised 2008) Business Combinations and IAS 27 (Revised 2008) Consolidated and Separate Financial Statements The revised standards were issued in January 2008 and became effective for financial years beginning on or after 1 July 2009. IFRS 3 reconsiders the application of acquisition accounting for business combinations and IAS 27 mainly relates to changes in the accounting for noncontrolling interests and the loss of control of a subsidiary. Under IFRS 3, the acquirer can elect to measure any non-controlling interest on a transaction-by-transaction basis, either at fair value as at the acquisition date or its proportionate interest in the fair value of the identifiable assets and liabilities of the acquiree. When an acquisition is achieved in successive share purchases (step acquisition), the identifiable assets and liabilities of the acquiree are recognized at fair value when control is obtained. A gain or loss is recognized in profit or loss for the difference between the fair value of the previously held equity interest in the acquiree and its carrying amount. IAS 27 also requires the effects of all transactions with noncontrolling interests to be recorded in equity if there is no change in control. Transactions, resulting in a loss of control result in a gain or loss being recognized in profit or loss. Application of this standard does not have any significant impact on Erste Group's financial statements

Amendment to IAS 39 Financial Instruments: Recognition and Measurement' – Eligible Hedged Items

This amendment to IAS 39 was issued in July 2008 and became effective for financial years beginning on or after 1 July 2009. The amendment clarifies how the principles of IAS 39 for establishing a hedge relationship should be applied for designation of one-sided risk and inflation risk of a hedged item. Application of this amendment does not have any significant impact on Erste Group's financial statements.

Amendments to IAS 39 and IFRIC 9 Embedded derivative

Amendments were issued in March 2009 and are effective for financial years beginning on or after 1 July 2009. The amendments require entities to assess whether they need to separate out an embedded derivative from a hybrid financial instrument when financial assets are reclassified out of the fair value through profit or loss category. When the fair value of an embedded derivative that needs be separated cannot be measured reliably, the reclassification of the hybrid financial asset out of the fair value through profit or loss category is not permitted. Application of these amendments does not have any significant impact on Erste Group's financial statements.

Improvements to IFRSs

In April 2009, the IASB issued a set of amendments to various standards. The particular amendments are effective for financial years beginning either on or after 1 July 2009 or on or after 1 January 2010. Application of these amendments does not have any significant impact on Erste Group's financial statements.

IFRS 1 (revised 2008) First-time Adoption of International Financial Reporting Standards

The revised standard was issued in November 2008 and became effective for financial years beginning on or after 1 July 2009. The changes concern solely the formal structure of IFRS 1. The objective is to improve the the clarity and the applicability of the Standard. Application of this amendment does not have any significant impact on Erste Group's financial statements as Erste Group is not the first time adopter of IFRSs.

Amendment to IFRS 2 Group Cash-settled Share-based Payment Transactions

This amendment to IFRS 2 was issued in June 2009 and is effective for financial years beginning on or after 1 January 2010. The amendment clarified the scope of IFRS 2. The entity which receives the goods or services (receiving entity) should generally account for a grant as cash-settled share-based payment transactions in accordance with the requirements of IFRS 2 unless the grant is settled with equity instruments of the receiving entity or unless the receiving entity is not obliged to settle the grant. The entity which is obliged to settle the share-based payment transaction (settling entity) accounts for the transaction

depending on the nature of the settlement. If the share-based payment is settled with equity instruments, the grant is accounted for as an equity-settled share-based payment transaction. If the grant is settled in cash, it is accounted for in accordance with the IFRS 2 requirements for cash-settled share-based payment transactions. The term 'group' has the same meaning as in IAS 27, i.e. includes only parent and its subsidiaries. Application of this amendment does not have any significant impact on Erste Group's financial statements.

Amendment to IFRS 1 Additional Exemptions for First-time Adopters

This amendment to IFRS 1 was issued in July 2009 and is effective for financial years beginning on or after 1 January 2010. The amendment provides additional exemptions from the generally mandatory full retrospective application of International Financial Reporting Standards. Application of this amendment does not have any impact on Erste Group's financial statements.

IFRIC 17 Distributions of Non-cash Assets to Owners

IFRIC 17 was issued in November 2008 and is effective for financial years beginning on or after 1 July 2009. IFRIC 17 deals with the initial recognition and measurement of dividends payable as well as with accounting at the moment the assets are distributed. As Erste Group does not pay dividends in the form of non-cash assets application of this IFRIC does not have any impact on Erste Group's financial statements.

IFRIC 18 Transfers of Assets from Customers

IFRIC 18 was issued in January 2009 and is effective for financial years beginning on or after 1 July 2009. This interpretation specifies the accounting for transfers of items of property, plant and equipment by entities that receive such transfers from their customers. In the scope of this interpretation are agreements in which an entity receives from a customer an item of property, plant and equipment (or cash from customers for the acquisition or construction of such items of property, plant and equipment) that the entity must then use either to connect the customer to a network or to provide the customer with ongoing access to a supply of goods or services (such as electricity, gas or water), or to do both. Erste Group is not involved in such types of transactions, and therefore, the IFRIC does not have any effect on its financial statements.

Standards and interpretations not yet effective

IAS 24 (revised 2009) Related party disclosures

The revised standard was issued in November 2009 and becomes effective for financial years beginning on or after 1 January 2011. IAS 24 provides a partial exemption from the disclosure requirements for government-related entities and clarifies the definition of a related party. The amendment is not expected to have material effect on financial statements of Erste Group. Erste Group decided not to apply the revised standard before it becomes effective.

IFRS 9: Financial Instruments

The new IFRS 9 standard was issued in November 2009 and becomes effective for financial years beginning on or after 1 January 2013. Earlier application is permitted. However, as the EU has not yet endorsed the standard, it is therefore not yet applicable for EU entities for the 2010 financial year.

An amendment concerning accounting for financial liabilities issued in October 2010 supplemented the existing requirements for classification and measurement of financial assets, which were omitted in the version of IFRS 9 Financial instruments issued in November 2009.

IFRS 9 introduces two classification criteria for financial assets:

1. An entity's business model for managing the financial assets and 2. the contractual cash flow characteristics of the financial assets. As a result, a financial asset is measured at amortised cost only if both conditions are met: a) the asset is held within a business model whose objective is to hold assets in order to collect contractual cash flows and b) the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal outstanding. All other financial assets are measured at fair value with changes recognised in profit or loss.

Based on changes in the business model an entity shall reclassify all affected assets from fair value to amortised cost category or vice versa.

IFRS 9 eliminates the concept of embedded derivatives for financial assets. Application of the classification criteria results in the fact that all structured financial instruments have to be fair valued (except for narrowly defined cases e.g. for interest rate caps or floors, prepayment, put, call, prolongation options).

For investments in equity instruments which are not held for trading, an entity may make an irrevocable election at initial recognition to measure them at fair value with changes recognised in other comprehensive income. Gains and losses once recognised in other comprehensive income are never recycled into profit or loss even when the equity instruments are sold.

Investments in tranches resulting from securitisation (referred to as contractually-linked instruments) are subject to a 'look through' approach in order to determine if they are measured at fair value or amortised cost. It means that risk and cash flow characteristics of the underlying pool of instruments and the tranches are compared according to the defined criteria. If the look-through approach is not possible, tranches have to be fair valued.

IFRS 9 requires that an entity which applies fair value option for its financial liabilities recognises the fair value changes resulting from its own credit risk in Other comprehensive income rather that in the income statement. This principle is not applied if such

recognition would create or enlarge accounting mismatch in profit or loss. Such assessment has to be done upon the initial recognition of the financial liability. Recycling from other comprehensive income into profit or loss is not allowed.

This standard will have significant effect for balance sheet positions and measurement methods of financial instruments. As IFRS 9 has not been published in the final version yet quantification of its impact is not possible.

Amendment to IAS 32 – Classification of Rights Issues

This amendment to IAS 32 was issued in October 2009 and is effective for financial years beginning on or after 1 February 2010. The amendment addresses the classification of rights, options or warrants to acquire a fixed number of the entity's own equity instruments for a fixed amount of foreign currency. These rights are to be classified as equity instruments if the entity offers the rights, options or warrants pro rata to all of its existing owners of the same class. The amendment is not expected to have material effect on financial statements of Erste Group. Erste Group has decided not to apply the amendment before it becomes effective.

Amendment to IFRS 1 Limited Exemption from Comparative IFRS 7 Disclosures for First-time Adopters

This amendment was issued in January 2010 and is effective for financial years beginning on or after 1 July 2010. The amendment relieves first-time adopters of IFRSs from providing the additional disclosures introduced in March 2009 by Improving Disclosures about Financial Instruments. The standard will have no effect on the Erste Group 2011 financial statements as Erste Group is not a first time adopter of IFRSs.

Improvements to IFRSs

In May 2010, the IASB issued a set of amendments to various standards. None of the amendments are mandatory for 2010 . The particular amendments are effective for financial years beginning either on or after 1 July 2010 or on or after 1 January 2011. The amendment is not expected to have an effect on the financial statements of Erste Group.

Amendments to IFRS 7 - Disclosures—Transfers of Financial Assets

Amendment of IFRS 7 was issued in October 2010 and is effective for financial years beginning on or after 1 July 2011. The new disclosure requirements are focused on relationship between transferred assets and related financial liabilities. Moreover for derecognised financial assets the nature and especially risks of continuing involvement should be evaluated. The term continuing involvement is used with different and much wider meaning compared to IAS 39.

The aim of new disclosures is that users are able to understand relationships between transferred financial assets (which are not derecognised) and associated liabilities resulting from such transfers. The disclosure requirments also enable users to evaluate the nature and risks retained in those transferred financial assets which are derecognised.

The amendment is not expected to have material effect on financial statements of Erste Group. It will only result in new disclosures. Erste Group decided not to apply the amendment before it becomes effective.

IFRIC 19 Extinguishing Financial Liabilities with Equity Instruments

IFRIC 19 was issued in November 2009 and is effective for financial years beginning on or after 1 July 2010. IFRIC 19 addresses the accounting when the terms of a financial liability are renegotiated and result in the entity issuing equity instruments to a creditor of the entity to extinguish all or part of the financial liability (debt for equity swaps). IFRIC 19 clarifies the accounting for such situations by the debtor (issuer of the equity instruments). According to that, the equity instruments issued for the purpose of extinguishing all or part of a financial liability are part of consideration paid. The equity instruments are to be measured at their fair value. If the fair value of the equity instrument is to be measured to reflect the fair value of the financial liability fully or partly extinguished. IFRIC 19 states that any difference between the carrying amount of the financial liability (or part of a

financial liability) extinguished, and the initial measurement amount of the equity instruments issued, is to be recognized in profit or loss. This interpretation is not expected to have an effect on financial statements of Erste Group.

Amendment to IFRIC 14 IAS 19 - The Limit on a Defined Benefit Asset, Minimum Funding Requirements and their Interaction The amendment to IFRIC 14 was issued in November 2009 and is effective for financial years beginning on or after 1 January 2011. IFRIC 14 specifies additional criteria regarding the amount of a defined benefit surplus that can be recognized as an asset under IAS 19. Under it, a surplus must be unconditionally available for a refund or reduction in future contributions for an entity to recognize an asset. IFRIC 14 also aims to avoid the possibility of statutory minimum funding requirements being onerous for the entity. On the other hand, additional liabilities must be recognized if an entity has a statutory obligation to cover an existing shortfall for past service on the minimum funding basis. The amendment is not expected to have effect on the financial statements of Erste Group. Erste Group has decided not to apply the interpretation before it becomes effective.

D. NOTES TO THE STATEMENT OF COMPREHENSIVE INCOME AND THE BALANCE SHEET OF ERSTE GROUP

1) Net interest income

in EUR million	2010	2009
Interest income		
Lending and money market transactions with credit institutions	1,090.9	1,691.3

IT expenses	(282.0)	(333.1)
Expenses for office space	(281.9)	(275.0)
Office operating expenses	(210.9)	(196.3)
Advertising/marketing	(182.7)	(177.1)
Legal and consulting costs	(86.6)	(101.3)
Sundry administrative expenses	(121.8)	(119.5)
Total	(1,165.9)	(1,202.3)

Operating expenses (incl. repair and maintenance) for investment properties held for rental income totalled EUR 4.5 million (2009: EUR 3.5 million).

Depreciation and amortisation

in EUR million	2010	2009
Software and other intangible assets	(158.4)	(161.4)
Real estate used by the Group	(86.4)	(79.6)
Office furniture and equipment and		
sundry property and equipment	(142.3)	(136.6)
Total	(387.1)	(377.6)

Amortisation of customer relationships is not included in the item depreciation and amortisation, but in other operating result.

6) Other operating result

in EUR million	2010	2009
Other operating income	157.4	195.4
Other operating expenses	(596.7)	(551.2)
Total	(439.3)	(355.8)
Result from real estates/moveables/properties/software	(77.9)	(86.7)
Allocation/release of other provisions/risks	(17.2)	(10.8)
Expenses for deposit insurance contributions	(66.2)	(55.9)
Amortisation of customer relationships	(69.5)	(67.2)
Other taxes	(71.9)	(24.8)
Impairment of goodwill	(51.9)	(28.0)
Result from other operating expenses/income	(84.7)	(82.4)
Total	(439.3)	(355.8)

Operating expenses (incl. repair and maintenance) for investment properties not held for rental income totalled EUR 9.8 million (2009: EUR 7.1 million).

The amount of impairment on assets held for sale recognised in the result from real estates/moveables/properties/software is EUR (17.1) million (2009: EUR (5.9) million)

7) Result from financial assets – at fair value through profit or loss

in EUR million	2010	2009
Gain / (loss) from measurement / sale of financial assets at fair value through		
p&I	(6.0)	113.2

8) Result from financial assets - available for sale (AfS)

in EUR million	2010	2009
Gain / (loss) from sale of financial assets available for sale	67.6	(14.1)
Impairment / reversal of impairment of financial assets available for sale	(58.4)	(190.0)
Total	9.2	(204.1)

During the reporting period the amount removed from Other comprehensive income to Result from financial assets – available for sale was EUR 34.4 million (2008: EUR 21.9 million).

The carrying amount of investments in equity instruments measured at cost which were sold during the period was EUR 0.1 million. The resulting gain on sale was EUR 2.7 million.

9) Result from financial assets - held to maturity (HtM)

2010	2009
6.6	3.2

¹⁾ Investment properties and movable other property are reported in other assets.

²⁾ Including amortisation and depreciation reported by non-bank companies which is reflected in other operating result.

³⁾ Impairment losses are included in other operating result.

Goodwill at 31 December 2010 comprised predominantly goodwill of EUR 1,809.8 million (2009: EUR 1,820.7 million) from Banca Comercială Română S.A, goodwill of EUR 543.1 million (2009: EUR 543.1 million) from Česká spořitelna a.s., goodwill of EUR 312.7 million (2009: EUR 312.7 million) from Erste Bank Hungary Nyrt., goodwill of EUR 226.3 million (2009: EUR 226.3 million) from Slovenská sporitel'ňa a.s. as well as goodwill from Erste Asset Management GmbH of EUR 36.3 million (2009: 36.3 million)

At 31 December 2010, customer relationships included the customer relationships of Banca Comercială Română at EUR 375.3 million (2009: EUR 433.4 million), the customer relationship and distribution network of Erste Card Club d.d. Croatia at EUR 24,5 million (2009: EUR 31.7 million), as well as the customer relationships of Ringturm Kapitalanlagegesellschaft m.b.H at EUR 77.2 million (2009: EUR 81.5 million). The remaining amortisation period of customer relationships in Banca Comercială Română is 6.7 years, in Erste Card Club d.d. Croatia 3.6 years and in Ringturm Kapitalanlagegesellschaft m.b.H 17.8 years.

The item brand at 31 December 2010 consisted of the brand of Banca Comercială Română, at EUR 303.00 million (2009: EUR 304.8 million).

Impairment losses recognised in 2010 for other intangible assets, shown in the movements in the fixed assets schedule, relate to the core banking systems in Slovenská sporiteľňa, a.s. and Erste Bank Ukraine. Impairment losses recognised in 2010 and 2009 for investment property come from real estate funds managed by Česká spořitelna, a.s. Impairment losses recognised for goodwill in 2010 come from Kärtner Sparkasse AG, Sparkasse Waldviertel AG, ABS Banka d.d., Bosnia-Herzegovina and Investbanka a.d. Skopje, Macedonia and in 2009 from Tiroler Sparkasse AG and ABS Banka d.d. in Bosnia-Herzegovina. All these impairments were allocated based on value in use of the assets.

Current taxes	116	124	(68)	(30)
Total taxes	534	577	(396)	(361)

In compliance with IAS 12.39, no deferred tax liabilities were recognised for temporary differences relating to investments in subsidiaries in the amount of EUR 356 million (31 December 2009: EUR 356 million), as they will not reverse in the foreseeable future.

No deferred taxes were recognised for tax loss carryforwards of EUR 888 million (31 December 2009: EUR 941 million), as they will not be realised in the foreseeable future.

21) Assets held for sale

in EUR million	2010	2009
Assets held for sale	52	58
Disposal group	0	0
Total	52	58

Assets held for sale include mainly cars and buildings.

22) Other assets

in EUR million	2010	2009
Accrued interest and		
commissions	1,370	1,307
Deferred income	213	240
Investment properties	1,163	1,181
Sundry assets	1,886	2,568
Total	4,632	5,296

Sundry assets consist mainly of clearing items from the settlement of securities and payment transactions.

The fair value of investment properties totalled EUR 1.2 billion (2009: EUR 1.2 billion).

The determination of fair values in Austria is widely conducted by internal experts: in the CEE-countries on the basis of external expert opinions. The determined market values are then crosschecked with observed market values.

The carrying amount of expenditure recognized in the line: fixed assets and investment properties during their construction is EUR 339.7 million (2009: EUR 370.0 million). The contractual commitments for purchase of investment properties are EUR 206.2 million (2009: EUR 261.4 million).

23) Deposits by banks

in EUR million	2010	2009
Deposits by banks - domestic credit institutions	5,680	9,239
Deposits by banks - foreign credit institutions	14,474	17,056
Total	20,154	26,295

24) Customer deposits

in EUR million	Domestic 2010	Domestic 2009	Abroad 2010	Abroad 2009	Total 2010	Total 2009

Total	58,994	57,463	58,022	54,579	117,016	112,042

Customer deposits include a total of EUR 368 million (2009: EUR 155 million) of liabilities to which the fair value option was applied. The total amount repayable on these liabilities at 31 December 2009 was EUR 363 million (2009: EUR 152 million). The difference between the fair value of these liabilities and the amount repayable at 31 December 2010 totalled EUR 5 million (2009: EUR 3 million). In the reporting period 2010 the amount of fair value changes that are attributable to the changes in the credit risk is EUR (0.2) million (2009: EUR 0.9 million). Fair value changes attributable to the changes in credit risk are equal to the fair value changes which do not result from the changes in the risk-free interest rates.

25) Debt securities in issue

in EUR million	2010	2009
Bonds	19,754	20,982
Certificates of deposit	3,761	3,473
Other certificates of deposits/

Total	31,298	29,612

In 1998, Erste Group Bank AG launched a debt issuance programme (DIP); amounting to EUR 30 billion. The DIP is a programme for issuing debt instruments in various currencies, with a wide array of available structures and maturities.

In 2010 81 new issues with total volume of about EUR 3.2 billion were floated under the DIP in 2010.

Furthermore in July 2010, a programme to float bonds to retail customers was released. 63 new issues with total volume of about EUR 800 million were floated.

The euro commercial paper and certificates of deposit programme of August 2008 has an overall size of EUR 10 billion. In all, 257 issues amounting to EUR 29.5 billion were placed in 2010; issues totalling approximately EUR 27.5 billion were redeemed over the same period.

Outstanding debt securities included EUR 89 million (2009: EUR 74 million) in liabilities to which the fair value option was applied. The total amount repayable on these liabilities at 31 December 2010 was EUR 119 million (2009: EUR 91 million). The difference between the fair value of these liabilities and the amount repayable at 31 December 2009 was EUR (30) million (2009: EUR (17) million). In the reporting period 2010 the amount of fair value changes that are attributable to the changes in the credit risk is EUR 0.3 million (2009: EUR 1.5 million). Fair value changes attributable to the changes in credit risk are equal to the fair value changes which do not result from the changes in the risk-free interest rates.

The realised profit of own issues is EUR 5.6 million.

30) Total equity

in EUR million	2010	2009
Subscribed capital	2,513	2,517
Share capital	756	756
Participation capital	1,757	1,761
Additional paid-in capital	6,177	6,171
Retained earnings and other reserves	4,895	4,021
Owners of the parent	13,585	12,709
Non-controlling interests	3,544	3,414
Total ¹⁾	17,129	16,123

¹⁾ Details on equity are provided in Section III, Consolidated Statement of Changes in Total Equity.

At 31 December 2010, subscribed capital (also known as called up and fully paid share capital – the capital paid in by shareholders) consisted of 378,176,721 (2009: 377,925,086) voting bearer shares (ordinary shares). The par value of each ordinary share was EUR 2.00. Additional paid-in capital (or share premium) represents the amount by which the issue price of the shares exceeded their accounting par value. Retained earnings and other reserves represent accumulated net profit brought forward, as well as income and expenses recognised in other comprehensive income.

In April 2009, Erste Group Bank AG issued participation capital-for subscription. Within the context of this offer, Erste Group-Bank AG placed EUR 540 million of participation capital with-private and institutional investors. In March, the Republic of Austria subscribed to EUR 1.0 billion of participation capital and in May, another EUR 224 million of participation certificates. In total, the participation capital issued during the course of the measures package amounts to a volume of EUR 1.76 billion. The notional amount of each participation capital security has is EUR 1,000.00. The Participation Capital Securities are perpetual and non-transferable. Erste Group is entitled to repay the participation capital securities only if the repayment amount would not be below 100% (resp. 150% after 1 January 2019) of the nominal amount).

Participation capital participates in losses of the Erste Group in the same manner as share capital, but the holders of participation capital do not have any voting rights. The participation capital securities do not confer any conversion right for ordinary shares of the Erste Group. Dividend payments to holders of participation capital securities are made prior to distributions of dividends to shareholders of the Erste Group. Erste Group shall not be obliged to pay unpaid dividends.

The dividend on the participation capital is 8.0% per annum for the business years 2009 to 2013. For the business years starting from 2014, the dividend is stepped-up in the following way: 2014 8.5% p.a., 2015 9.0% p.a., 2016 9.75% and from 2017 1% increase each year. However the dividend must not ever exceed 12-Month-EURIBOR plus 10% per annum.

In November 2009, Erste Group increased equity by public placement of ordinary shares in a total nominal amount of EUR 1.74 bn. in order to increase the tier-1 ratio and to improve the quality of the capital. 60 million new shares were issued at a price of EUR 29.0 per share. The price was determined according to market conditions at the time of the issue.

Employee share ownership plan and management share option plan

Under the **ESOP 2010**, between 3 and 14 May 2010, a total of 251,635 shares were subscribed for at a price of EUR 26.50. The resulting issue proceeds of EUR 6,668,327.50 plus EUR 92,931.75 (resulting from the difference between the issue price of EUR 26.50 and the quoted price of EUR 29.59 on the 27 May 2010 value date when 30,075 shares were subscribed for by employees of Erste Group Bank AG and subsequently charged to personnel expenses in the income statement) totalled EUR 6,761,259.25. Of this amount, EUR 503,270.00 was allocated to subscribed capital and EUR 6,257,989.25 to additional paid-up capital.

Personnel expenses include EUR 0.8 million (prior year: EUR 4.7 million) related to the ESOP and profit-sharing.

MSOP 2005: The MSOP comprises a maximum of 2,000,000 ordinary shares of Erste Group Bank AG, represented by 2,000,000 options. The distribution of vested options among management board members, managers and eligible other staff of the Erste Group Bank AG group is shown in the tables below.

Terms of MSOP 2005: Each of the options, which are granted free of charge, entitles the holder to receive one share; the transfer of options inter vivos is not permitted. The 2005 option grant dates were as follows: for the management board and other managers, 1 June 2005; for other key personnel, the grants occurred in three tranches, on 1 September 2005, 1 September 2006 and 31 August 2007. For all recipients the options were vested in three tranches, at which time they were credited to recipients' accounts: 1 September 2005, 1 September 2006 and 31 August 2007. The exercise price for all three tranches was set at the average market price of Erste Group Bank AG shares quoted in April 2005 plus a 10% premium, rounded down to the nearest half euro. The resulting exercise price was EUR 43.00 per share. The option term begins at the grant date and ends on the value date of the last exercise window of the fifth calendar year after the year in which the option vested. Every year, notices of intention to exercise may be submitted within 14 days from the day of publication of the quarterly results for the first, second and third quarter of each financial year (three exercise windows per year). The holding period runs for one year from the value date of the share purchase. Up to 25% of the purchased shares may be sold during this holding period.

The MSOP 2005 options granted, vested and exercised had the following distribution among recipients:

	Outstanding / Excercisable 01.01.2010	Forfeited in 2010	Expired in 2010	Outstanding / Exercisable 31.12.2010
Management board members	34,000	0	4,000	30,000

Christian Havelka	1,851
Andreas Lachs	52
Friedrich Lackner	500
Bertram Mach	95
Barbara Smrcka	281
Karin Zeisel	35
Markus Haag	160

At 31 December 2010, supervisory board members did not hold options in Erste Group Bank AG shares.

As far as can be determined, persons related to members of the management board or supervisory board held 6,920 shares of Erste Group Bank AG as of 31 December 2010.

Supervisory board members held the following numbers of Participation capital at the balance sheet date of 31 December 2010:

Supervisory Board member	Notional amount
Heinz Kessler	30,000
Georg Winckler	5,000
Wilhelm Rasinger	28,000
Friedrich Rödler	82,000
Elisabeth Gürtler	59,000

As of 31 December 2010 persons related to members of the management board or supervisory board held participation capital of Erste Group Bank AG in notional amount of EUR 81,000.

Authorised but unissued capital remaining at 31 December 2010, and participation capital at that date:

Clause 5 of the articles of association authorises the management board until 12 May, 2015, subject to approval by the supervisory board to increase – if necessary in several tranches – the subscribed capital of Erste Group Bank AG up to EUR 200,000,000.00 by issuing up to 100,000,000 shares as follows (type of share, issuing price, terms of issuing, and – if intended – exclusion of subscription rights are assigned by the management board with approval by the supervisory board): by issuing of shares by cash contributions without exclusion of subscription rights of existing shareholders; if, however, the capital increase is used for the issue of shares to employees, management or members of the management board of Erste Group Bank AG or a subsidiary while excluding the subscription rights of existing shareholders; by issuing of shares by contribution in kind while excluding the subscription rights of existing shareholders.

Under clause 6.3 of the articles of association of decision-making by the management board there remains (in the financial years from 2002 to 2010) contingent capital of EUR 22,502,590.00, which may be utilised by issuing up to 11,251,295 bearer or registered shares at an issue price of at least EUR 2.00 (payable in cash) while excluding the subscription rights of existing shareholders. This contingent capital is used for granting options to other staff, other management and Management Board members of the entity or one of their related party.

According to clause 6.4 of the articles of association, the company has contingent capital of EUR 124,700,000 available, which may be utilised by issuing up to 62,350,000 bearer shares. This contingent capital can be used for granting conversion or subscription rights to holders of convertible bonds.

According to clase 7 of the articles of association currently no authority for granting contingent capital is available.

31) Segment reporting

The segment reporting of Erste Group follows the presentation and measurement requirements of IFRS.

New segment structure

In the interest of a clearer presentation of the group structure, the segment reporting has been aligned with the structure of Erste Group and is now divided into four primary segments: Retail & SME, Group Corporate & Investment Banking, Group Markets and Corporate Center.

Basis for Erste Group's controlling of individual segments is the average attributed equity as well as the average risk-weighted assets. For the measurement and rating of the profitability of segments, RoE as well as cost/income ratio is used.

Retail & SME

The Retail & SME segment includes the individual, retail-focused regional banks of Erste Group. To enhance transparency and maintain continuity with the existing segmentation, the Austria division is divided into two subsegments, Erste Bank Oesterreich (including local subsidiaries) and Savings Banks. The latter subsegment consists of those savings banks which as a result of their membership in the Haftungsverbund are consolidated in the Erste Group accounts; the Savings Banks subsegment is thus unchanged from the past segmentation. In the Segment Central and Eastern Europe the individual subsidiaries continue to be reported separately.

Group Corporate & Investment Banking

The Group Corporate & Investment Banking segment (GCIB) includes all large corporate customers operating in the markets of

Erste Group and having revenue of more than EUR 175 million. Also part of Group Corporate & Investment Banking segment is the former International Business excluding treasury activities; the real estate business of Erste Group including the leasing subsidiary, Immorent; and investment banking (including equity capital markets).

Group Markets

The Group Markets (GM) segment comprises the divisionalised business units Group Treasury and Capital Markets (which includes all capital markets activities except equity capital markets). Besides Erste Group Bank's own treasury activities, it also includes the Capital Market units of the CEE subsidiaries and of the foreign branches in Hong Kong and New York, as well as the Capital Market activities of the investment banking subsidiaries Erste Securities Polska, Erste Bank Investment Hungary, Erste Securities Zagreb and Erste Securities Istanbul and the asset management activities of Erste Asset Management GmbH

Corporate Center segment

The Corporate Center segment continues to include group-wide services in the Marketing, Organisation, Information Technology and other departments that support the implementation of corporate strategy at group level. Consolidation effects and non-operating exceptional items are also recorded in this segment. Additionally, the Balance Sheet Management unit forms part of the Corporate Center segment. The results of the local asset/liability business units continue to be reported in the individual subsegments.

Also recorded in Corporate Center is the amortisation of customer relationships at BCR, Erste Card Club d.d. and Ringturm KAG totalling EUR 67.4 million (2009: EUR 65.9 million).

32) Assets and liabilities denominated in foreign currencies and outside Austria

Assets and liabilities not denominated in EUR were as follows:

in EUR million	2010	2009
Assets	85,965	85,319
Liabilities	59,283	58,760

The assets and liabilities outside Austria are given below:

in EUR million	2010	2009
Assets	110,715	108,671
Liabilities	86,026	86,195

33) Leases

a) Finance leases

Erste Group leases both movable property and real estate to other parties under finance lease arrangements. For the finance lease receivables included in this item, the reconciliation of the gross investment in leases to the present value of the minimum lease payments is as follows:

in EUR million	2010	2009
Outstanding minimum lease payments	5,831	6,477
Non-guaranteed residual values	1,149	1,226
Gross investment	6,980	7,703
Unrealised financial income	1,017	1,250
Net investment	5,963	6,453
Present value of non-guaranteed		
residual values	778	797
Present value of minimum lease		
payments	5,185	5,656

The maturity analysis of gross investment in leases and present values of minimum lease payments under non-cancellable leases is as follows (residual maturities):

	Gross inves	Present value of minimum lease payments		
in EUR million	2010	2009	2010	2009
< 1 year	1,250	1,441	1,085	1,214
1-5 years	3,150	3,461	2,479	2,757
> 5 years	2,580	2,801	1,563	1,685
Total	6,980	7,703	5,127	5,656

In the reporting period, the total amount of accumulated allowance for uncollectable minimum lease payments is as follows EUR 66 million (2009: 52 million).

The total amount of contingent rents from finance leases recognised as income in the period was EUR 29 million (2009: 45 million).

b) Operating leases

Under operating leases, Erste Group leases both real estate and movable property to other parties.

Related-party transactions and principle shareholders

Besides of principal shareholders, Erste Group defines as related parties also other investments and associates which are included in the consolidated financial statements by using the equity method. Furthermore related parties consist of Mangement and Supervisory Board Members as well as companies over which these persons have control or significant influence. On top of that Erste Group Bank AG defines also close family members of Management and Supervisiory Board Members as related parties.

Transactions between Erste Group Bank AG and fully consolidated companies are not recognised in the consolidated financial statements since they are eliminated.

Principal shareholders

At the end of 2010, DIE ERSTE oesterreichische Spar-Casse Privatstiftung, a foundation, held approximately 25.3% of the shares of Erste Group Bank AG, making the foundation the largest shareholder.

In 2010, the foundation received a dividend of EUR 64.1 million (2009: EUR 64.1 million) on its shareholding in Erste Group Bank AG (for the 2009 financial year). The purpose of the foundation, which is intended to be achieved particularly by holding a substantial equity interest in Erste Group Bank AG, is to support social, scientific, cultural and charitable institutions as well as to generally promote the guiding principles of the savings bank philosophy. At 31 December 2010, the members of the foundation's management board were Andreas Treichl (chairman of the management board of Erste Group Bank AG), Dietrich Karner, Richard Wolf and Boris Marte. At that date, the foundation's supervisory board had ten members, two of whom where also members of the supervisory board of Erste Group Bank AG.

Under clause 15.1. of the articles of association, DIE ERSTE österreichische Spar-Casse Privatstiftung is entitled – as long as, under Section 92 (9) of the Austrian Banking Act, it guarantees all present and further liabilities of Erste Group Bank AG in the event of the latter's insolvency – to delegate up to one-third of the supervisory board of members to be elected by the annual general meeting. To date, this right of delegation has not been excercised.

At 31 December 2010, in respect of the foundation, Erste Group had accounts payable of EUR 290.2 million and accounts receivable of EUR 276.1 million. In addition, standard derivative transactions on normal market terms were in place for hedging purposes between Erste Group and foundation at the end of 2010. These were interest rate swaps with caps and floors in the notional amount of 247.4 million each as well as interest rate swaps with caps in the notional amount of EUR 103.0 million.

In 2010, Erste Group accrued interest income of EUR 18.9 million receivable from and interest expenses of EUR 2.9 million payable to the foundation from accounts receivable and payable and from the derivative transactions outlined.

At the end of 2010, Criteria Caixa Corp S.A. with head office in Barcelona, Spain, held 38,170,433 Erste Group Bank shares, which is relating to 10.10% participation of Erste Group Bank AG's share capital. Juan Maria Nin, Deputy Chairman of Criteria Caixa Corp. S.A. is member of the supervisory board of Erste Group Bank AG.

Compensations to Management and Supervisory Board Members

Breakdown of management board compensation:

in EUR thousand	2010	2009
Performance-related salaries	3,684	0
Fixed salaries	4,122	3,779
Other compensations	1,021	892
Total	8,827	4,671

In the year under review, management board members who held office in 2010 received remuneration (including compensation in kind) totalling EUR 8,827 thousand (2009: EUR 4,671 thousand). This represented 0.4% of the total personnel expenses of the Erste Group. In the 2010 financial year, EUR 924 thousand (2009: EUR 916 thousand) was paid to former members of the management board or their surviving dependants.

The item other compensation includes pension fund contributions (at severance payments – new) and various compensations.

In 2010, the management board of Erste Group Bank AG did not receive board emoluments or other compensation from fully consolidated subsidiaries of Erste Group Bank AG. The compensation of management board members is based on the individual's responsibilities, the achievement of corporate targets and the group's financial situation.

Breakdown of supervisory board compensation:

in EUR thousand	2010	2009
Supervisory Board		
compensation	350	325
Meeting fees	162	154
Total	512	479

In 2010, the members of the supervisory board of Erste Group Bank AG were paid a combined total of EUR 512 thousand (2009: EUR 479 thousand) in this capacity. Members of the supervisory board received the following compensation for board positions in fully consolidated subsidiaries of Erste Group Bank AG: Heinz Kessler: EUR 43,980; Friedrich Rödler: EUR 13,000; Werner Tessmar-Pfohl: EUR 24,000 and Georg Winckler: EUR 800.

There were no other transactions with members of the supervisory board.

Based on a resolution of the annual general meeting held on 12 May 20010, the supervisory board at its constituting meeting set out the following annual compensation structure for the fiscal year 2009:

in EUR	Number	Allowance per person	Total allowance
President	1	50,000	50,000
Vice Presidents	2	37,500	75,000
Members	9	25,000	225,000
Total	12		350,000

The supervisory board must consist of at least three and at most 12 members elected by the general meeting. DIE ERSTE österreichische Spar-Casse Privatstiftung, a foundation, has the right to delegate up to one-third of the members of the supervisory board, elected by the general meeting, as long as the foundation guarantees acc. to Section 92 (9) Austrian Banking Act all existing and future liabilities of the company in case of illiquidity. Participation in the supervisory board ends in case of death, recall, demission, or if a defined obstruction reason occurs. For recall, a majority of three quarters of the valid votes cast and a majority of at least three quarters of the attending members representing the ordinary share capital are necessary.

Loans and advances to related parties

At the end of 2010, loans and advances to members of the management board totalled EUR 166 thousand (2009: EUR 889 thousand). Loans and advances to persons related to members of the management board totalled EUR 26 thousand at 31 December 2010 (2009: EUR 24 thousand). Loans to members of the supervisory board totalled EUR 251 thousand (2009: EUR 259 thousand). Loans and advances to persons related to members of the supervisory board totalled EUR 11 thousand (2009: EUR 418 thousand). The applicable interest rates and other terms (maturity dates and collateral) represent market terms. In 2010 the repayments for loans and advances to members of the management board totalled EUR 429. As regards loans and advances to member of the supervisory board, there were no material loan repayments.

Other transactions with related parties

Companies related to members of the supervisory board invoiced the following amount from other transactions:

In 2010, DORA BRUGGER JORDIS Rechtsanwälte GmbH, a law firm in which Theresa Jordis is a partner, invoiced Erste Group Bank AG a total of EUR 348,775.69 for several mandates.

Friedrich Rödler is senior partner at PricewaterhouseCoopers Austria. Companies of this group invoiced in 2010 Erste Group Bank AG in total EUR 54,726.00 for consulting mandates.

The compensation of the supervisory board members depends on the individual's responsibilities, the business volume and the company's financial situation.

35) Collateral

The following assets were pledged as security for liabilities:

in EUR million	2010	2009
Loans and advances to credit		
institutions	894	740
Loans and advances to		
customers	6,480	4,824
Trading assets	92	920
Other financial assets ¹⁾	5,464	7,662
Total	12,930	14,146

Other financial assets mainly consist of financial assets held to maturity, available for sale, at fair value through profit or loss.

The specific compensation of each member is calculated by dividing the annual allowance by twelve and multiplying the result by the number of months, served in the respective position during the year.

Collaterals were pledged in connection with securities repurchase transactions, securities lending with cash collateral and other collateral agreements.

The fair value of collateral received that may be repledged or resold even without the security provider's default was EUR 4,470 million (2009: EUR 3,196 million). Of this total, collateral with a fair value of EUR 25 million (2009: EUR 78 million) was resold or repledged. The collateral comes from reverse repo transactions and securities borrowings.

36) Securities lending and repurchase transactions

	20	10	2009		
in EUR million	Carrying amount of assets pledged as collateral	Carrying amount of liabilities	Carrying amount of assets pledged as collateral	Carrying amount of liabilities	
Repurchase transactions	2,256	2,219	4,541	4,560	
Securities lending agreement	450	0	432	0	
Total	2,706	2,219	4,973	4,560	

Assets received and transferred by Erste Group under sale and repurchase agreements are largely securities.

37) Risk management

37.1. Risk policy and strategy

It is a core function of every bank to take risks in a conscious and selective manner and to professionally manage such risks. Erste Group's proactive risk policy and strategy aims at achieving an optimal balance of risk and return in order to achieve a sustainable, high return on equity.

Erste Group uses a control and risk management system that is proactive and tailored to Erste Group's business and risk profile, which is based on a clear risk strategy consistent with the group's business strategy, focusing on early identification and management of risks and trends. In addition to meeting the internal goal of effective and efficient risk management, Erste Group's control and risk management system has been developed to fulfil external, and in particular, regulatory requirements.

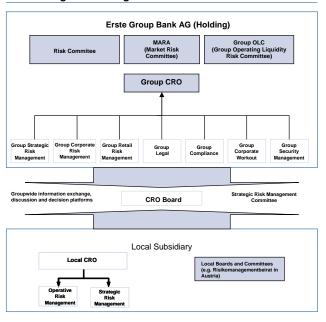

Given Erste Group's business strategy, the key risks for Erste Group are credit risk, market risk and operational risk. Erste Group also focuses on managing liquidity, concentration and business risks. In addition to managing these risks, Erste Group's control and risk management framework takes account of the range of other significant risks faced by Erste Group.

Erste Group Bank AG uses the Internet as the medium for publishing disclosures under section 26 Banking Act and the Disclosure Regulation. Details are available on the website of Erste Group at www.erstegroup.com/ir.

37.2. Risk management organisation

Risk monitoring and control is achieved through a clear organisational structure with defined roles and responsibilities, delegated authorities, and risk limits. The following diagram presents an overview of Erste Group's risk management and control governance and responsibility structure.

Risk Management - Organisation and decision bodies

Overview of Risk Management Structure

The Management Board, and in particular Erste Group's chief risk officer ("Group CRO"), has to perform its oversight function within Erste Group's risk management structure. Risk control and management functions within Erste Group are performed based on the business and risk strategies approved by the Management Board and the strategic risk framework. The Group CRO, working together with the chief risk officers of the subsidiaries, is responsible for the implementation of and adherence to the risk control and risk management strategies across all risk types and business lines. While the Management Board and, in particular, the Group CRO ensure the availability of appropriate infrastructure and staff as well as methods, standards and processes to that effect, the actual identification, measurement, assessment, approval, monitoring, steering, and setting limits for the relevant risks are performed at the operating entity level within Erste Group. At the group level, the Management Board is supported by several divisions established to perform operational risk control functions and exercise strategic management responsibilities:

- _ Group Strategic Risk Management;
- _ Group Retail Risk Management;
- _ Group Corporate Risk Management;
- _ Group Corporate Workout;
- _ Group Legal;
- _ Group Compliance; and
- _ Group Security Management.

Group Strategic Risk Management, which exercises the "risk control" function, is responsible for macro-managing the group's risk portfolios and the provision of adequate risk measurement methodologies and tools as well as an appropriate risk policy and control framework. This unit is comprised of the departments "Group OpRisk and Credit Risk Control", "Group Enterprisewide Risk Management and Reporting" and "Group Market and Liquidity Risk Management" as well as the corporate function "Basel II". See "Risk Control—Overview of Risk Control Governance Structure" for a further discussion of the risk control management structure of the Erste Group.

Group Corporate Risk Management is the operative credit risk management function for Erste Group's divisionalised corporate business (GCIB). It is responsible for the formal and material verification, recommendation and approval of all credit risks of Erste Group Bank as a holding company. Group Corporate Risk Management is also responsible for credit risk management for the GCIB segment as well as all credit applications where the amount involved exceeds the approval limits granted to the respective subsidiary. This unit covers country risks, sovereigns, other credit institutions, securitisations (ABS and CDO), large corporates, and real estate risks. Group Corporate Risk Management provides specific credit risk reports on the aforementioned centrally managed portfolios of Erste Group Bank as a holding company and is in charge of process development for credit risk management and of the implementation of group standards for these asset classes. This department is also responsible for establishing and monitoring appropriate credit analysis processes and systems for corporate business at the subsidiary level and coordinating and reviewing corporate credit and project analysis adopted across the business.

Group Retail Risk Management focuses on retail business, which is Erste Group's primary business. It coordinates at group level retail risk management processes and standards and also provides credit risk reports for Erste Group's retail business. Operative risk management functions for retail operations are performed at the local level.

Group Corporate Workout is responsible for restructuring of accounts in the GCIB segment. An important additional task for the division is to draw up a uniform procedure and policy on restructurings and work-outs for the whole Erste Group.

Group Legal, in performing the function of the central legal department of Erste Group Bank, mitigates legal risk by providing legal support and counselling for the business and center functions and by taking care of dispute resolution and litigation. Group Legal has a group-wide focus on legal risk management and reporting aiming at identifying and minimizing, limiting or avoiding legal risk. Legal support for the business of the banking subsidiaries in the jurisdictions in which they operate is performed at the local level.

Group Compliance includes the departments Securities Compliance, Anti Money-Laundering (AML) and Fraud Management and is accountable for addressing compliance risks. Compliance risks are risks of legal or regulatory sanctions, material financial loss, or loss to reputation Erste Group may suffer as a result of failure to comply with laws, regulations, rules and standards. Group Security Management is in charge of the strategy, the definition of security standards, quality assurance, monitoring as well as the further development of issues of relevance for security at Erste Group.

In addition to the risk management activities performed at the Erste Group Bank level in its special role as a holding company, each subsidiary also has a risk control and management unit, the responsibilities of which are tailored to the applicable local requirements. Each subsidiary's risk control and management unit is headed by the respective entity's chief risk officer.

Group Coordination of Risk Management Activities

With the purpose of carrying out risk management activities within Erste Group, certain committees have been established, including the following:

- _ Risk Committee;
- _ CRO Board;
- _ Strategic Risk Management Committee;
- _ Group Operational Liquidity Committee (Group OLC);
- _ Market Risk Committee (MARA).

The Risk Committee, which consists of the Management Board and senior managers of Erste Group Bank, is the most senior committee in Erste Group Bank. It is responsible for the approval of methods and processes of risk control and management as well as for the risk infrastructure. The Risk Committee also monitors the capital base and allocates capital at the macro level and determines the risk framework on a group-level. As the central risk control body, the Risk Committee is frequently and regularly briefed on the risk status, both retrospectively and prospectively, and across all risk types. The Risk Committee analyses the then current status as well as any trends and makes management decisions at the highest level.

The CRO Board and the Strategic Risk Management Committee are responsible for consistent coordination and implementation of risk management activities within Erste Group, including the Sparkassen Haftungsverbund. The CRO Board is made up of the Group CRO and the chief risk officers of the subsidiaries in the Erste Group. Chaired by the Group CRO, the CRO Board has responsibility for the group-wide coordination of risk management and for ensuring uniformity of risk management standards across Erste Group. The Strategic Risk Management Committee, which is made up of the division heads of the strategic risk management department at each subsidiary, provides support to the CRO Board in decision-making on current risk-related topics.

Erste Group has established committees at the holding level that are specifically responsible for monitoring and managing two key risk categories:

- The Group Operating Liquidity Committee ("Group OLC") is responsible for the day-to-day management of the global liquidity position of Erste Group. It analyses the liquidity situation of Erste Group on a regular basis and reports directly to the Group Asset Liability Committee ("Group ALCO"). It also proposes measures to the Group ALCO within the scope of the management policies and principles laid down in the Liquidity Risk Management Rule Book. Furthermore, members of the Group OLC are points of contact for other departments or Erste Group members for liquidity-related matters. Each local bank has its own local operational liquidity committee. The detailed roles and responsibilities of the Group OLC are described in the Liquidity Risk Management Rule Book. For additional information on the Group ALCO, see "Liquidity Risk - Organisation and reporting".
- The Market Risk Committee ("MRC") is the main steering body for all risks related to capital market trading operations in Erste Group. The MRC meets quarterly, approves groupwide market risk limits and elaborates on the current market situation. The members of the MRC are the Group CRO, the board member responsible for Group Capital Markets, the Head of Group Capital Markets, the Head of Group Strategic Risk Management, and the Head of Group Market and Liquidity Risk Management.

In addition, committees established at local level, e.g. the *Risiko-managementbeirat*, carry out a common risk approach in the Austrian savings banks.

As a result of the principle of segregation of risk origination and risk control, at every level of the risk management structure of Erste Group – particularly concerning market and credit risks – the risk management and control functions are exercised independently of the front office functions. Local operative risk management divisions carry out this control function.

37.3. Risk Control

Overview of Risk Control Governance Structure

The Group Risk Management unit performs the function of the central and independent risk control unit required by section 39 (2) of the Austrian Banking Act. One objective of Group Strategic Risk Management, a unit that is independent from the business units, is to ensure that all risks measured or taken are within the limits approved by the Management Board.

Group OpRisk and Credit Risk Control, which is a sub-unit of the Group Strategic Risk Management, is in charge of management of operational risks, key tasks regarding Erste Group's credit risk methods and rating models and monitoring compliance with relevant credit risk limits. The Group Enterprise-wide Risk Management and Reporting department, which is also a sub-unit of the Group Strategic Risk Management, has responsibility for the Enterprise-wide Risk Management, the group data pool and the group-wide credit risk reporting. Enterprise-wide Risk Management, which is a sub-unit of the Group Enterprise-wide Risk Management and Reporting, is in charge of the essential elements of the risk management framework and Erste Group's risk policy principles which ensure adequate guidance on all risk-related matters. Furthermore, this unit is responsible for Group's Internal Capital Adequacy Assessment Process (ICAAP), planning of risk and risk costs, risk-weighted asset management as well as stress testing and risk simulation. The group-wide daily calculation, analysis and reporting of market and liquidity risks is provided by the Group Market and Liquidity Risk Management department of Group Strategic Risk Management. Ongoing risk calculations are performed using models, the quality of which is continually refined by this department.

Risk control process

Erste Group's independent risk control process consists of five main steps:

Risk identification

Risk identification at Erste Group refers to the detection of all relevant existing and potential risks related to banking operations, with particular emphasis on the use of a systematic and structured approach towards risk identification. The aim of this process is the permanent, timely, rapid, complete and cost-effective identification of each individual risk that has a bearing on the achievement by Erste Group of its business targets. Risk identification process is concerned not only with the early detection of risks, but also with the recognition of all sources of risks in as comprehensive a manner as possible.

Risk measurement

Risk measurement at Erste Group refers to the valuation and analysis of all quantifiable risks using statistical methods. In addition, stress scenarios are defined, with the goal of quantifying the losses that may be triggered by extremely adverse, rare, however plausible events. The information gained from stress test scenarios complements Value-at-Risk ("VaR") results, making it easier to predict the effects of potential extreme market movements on Erste Group.

Risk aggregation

Risk aggregation at Erste Group refers to the compilation of the results of risk measurement for each individual risk type to determine the aggregate potential loss based on the assumption of all of the relevant individual risks. The resulting aggregate measure for potential loss is known as economic capital (representing VaR at a confidence level of 99.95% over a one-year time period).

Risk limit-setting

Erste Group refers to the setting of a loss ceiling by the management through the Risk Committee based on the periodic determination of risk-bearing capacity, which takes into account the group's equity base and profitability status.

Risk reporting

Risk reporting at Erste Group refers to the continuous reporting of the risk measurement results for each individual risk type to management.

Basel II / Basel III

Having passed the required audit conducted by the Austrian supervisory authority in 2006, Erste Group (including almost all Haftungsverbund savings banks and Česká spořitelna) successfully qualified for Basel II internal ratings based (IRB) approach to the measurement of credit risk, effective from the entry of the new regulations into force on 1 January 2007. For credit risk, Erste Group applies the Advanced IRB Approach in the retail segment and the Foundation IRB Approach in all other Basel segments. In 2008, these standards were also adopted by Erste Bank Hungary and Slovenská sporitel'ňa and since 1 July 2009 by Erste Bank Croatia.

According to the current rollout plan for Erste Group, the transition from the Standardised Approach to the IRB Approach was made in 2010 for s-Wohnbaubank in Austria.

For the operational risk Erste Group received regulatory approval to use the AMA (Advanced Measurement Approach) at group level for five entities (Erste Group Bank AG, Erste Bank der oesterreichischen Sparkassen AG, Česká spořitelna a.s., Slovenská sporitel'ňa a.s. and Erste Bank Hungary Nyrt) in the first half of 2009. Beginning of October 2010, additional three entities received the approval to use AMA (Banca Comerciala Roman S.A., Erste&Steiermärkische Bank d.d., Rijeka and Erste Leasing Hungary). Other major subsidiaries which are currently using the

Basic Indicator Approach intend to apply for the AMA in the future.

Planned regulatory changes for the coming years (commonly known as Basel III) are closely monitored be Erste Group. Erste Group participated in the Quantitative Impact Study (QIS) of Basel III in 2010 and has undertaken further analyses and preparation activities in order to ensure a timely implementation of those changes.

37.4. Group-wide risk and capital management

Overview

Erste Group's risk management framework is continuously evolving and improving, and not just as a reaction to the recent turbulence on the financial markets; in particular the Group Strategic Risk Management and its Enterprise-wide Risk Management (ERM) has been developed into a comprehensive framework with ICAAP as its principal driver, as required under Pillar 2 of the Basel framework.

The ERM framework is designed to support the bank's management in managing risk portfolios as well as the coverage potential to assure at all times an adequate capital capacity reflecting the nature and magnitude of the bank's risk portfolio. ERM is tailored to the group's business and risk profile, reflects the strategic goal of protecting share- and senior debt holders and ensuring sustainability of the organisation

ERM is a modular and comprehensive steering and management system within Erste Group and is integral to the bank's / group's overall steering and management system. The components necessary to ensure all aspects of ERM, regulatory requirements but particularly internal value adding needs, can be summarised as follows:

- _ Risk Strategy and Risk Appetite
- _ Portfolio & Risk Analytics e.g.
 - _ Risk Materiality Assessment
 - _ Risk Modelling & Stress Testing
 - _ Concentration Risk Management
- _ Risk-bearing Capacity Calculation
- _ Emergency Response Plan
- _ Risk Planning & Forecasting e.g.
 - _ RWA Management
 - _ Capital Allocation

Risk Strategy and Risk Appetite

A major focus of the risk strategy of Erste Group is to prevent excessive risks which could compromise the achievement of strategic goals.

Equally important is the Group Risk Limit Frame derived from the strategy of the Group and which consists of adequate topdown as well as bottom-up limits.

Portfolio and Risk Analytics

For the purpose of adequate management of the group's risk portfolios according to the strategy, risk are systematically analyzed within the scope of portfolio & risk analytics. Therefore Erste Group has developed adequate infrastructure, systems and processes with which it ensures extensive analysis. Risks are quantified, qualified and discussed in a consistent management process in order to decide on appropriate measures on time.

Risk Materiality Assessment

Its purpose is the systematic and continuous assessment of all relevant risk types and the identification of risks which are significant for the group. Erste Group has defined a clear and structured Risk Materiality Assessment approach which is based on defined quantitative and qualitative factors for each risk type.

This process constitutes the basis for the determination of material risk types to be included in the Risk-bearing Capacity Calculation. Insights generated by the assessment are also used to improve risk management practices per se to further mitigate risks within the group but also as an input for the design and definition of the group's Risk Appetite Statement.

Risk Modelling and Stress Testing

Modelling the existing risks and the detection of potential negative movements at an early stage as well as conducting Stress Tests is a major part of the ERM framework.

Erste Group performs besides the standardised Stress Tests also comprehensive, scenario-based Stress Tests. Due to a clearly defined governance and management process, scenarios and relevant stress parameters are shaped in that way that a maximum degree on information is derived for group steering.

The parameters applied for simulations are derived from the analysis of previous as well as current macroeconomic developments, forecast of the further development and potential stress events. Stress parameters are defined in especially for that purpose developed models and processes.

For stress testing Erste Group developed specific tools to support the process, which represents a combined bottom-up / top-down approach. In addition, Erste Group leverages the intimate knowledge of its professionals located in the different regions to further calibrate the model based stress parameters. Special attention is paid to consider adequate granularity and special characteristics

when defining the stress parameters e.g. to the particular developments in the respective region, industry, product type or segment. The adequacy of scenarios and stress parameters is reviewed on a quarterly basis.

Erste Group's most complex stress tests take comprehensive account of the impact of stress scenarios, including second round effects on all risk types (credit, market, operational and liquidity risks) and in addition impacts on the associated profit and loss sensitivities.

The findings from all Erste Group's stress tests are rigorously reviewed in order to decide on the most appropriate courses of action to take. Stress Test results are systematically reviewed in the contexts of the Risk-bearing Capacity and Maximum Risk Exposure Limit calculations for the group.

All stress tests performed in the reporting period clearly showed sufficient capital adequacy.

Erste Group additionally participated in a variety of stress test exercises, both at national (OeNB) and international (CEBS) level. The results of these stress tests showed as well that Erste Group's regulatory capital was adequate.

Concentration Risk Management

Erste Group has implemented an appropriate framework to identify, measure, control, report and manage concentration risks as this is essential to ensure the long-term viability of any financial institution, especially in case of stressed economic conditions.

Concentration risk management at Erste Group is based upon a comprehensive framework of processes, methodologies and reports covering both intra- and inter-concentrations. Erste Group regularly performs, qualifies and reports concentration analyses. Concentration risks are also integral part of stress tests analyses.

These analyses have not evidenced any material concentration risk in the group. This is the result of an efficient limit management as well as a consequence of the business strategy of Erste Group.

The group has a sovereign exposure of EUR 703 million to Greece which equals 2% of the group's total sovereign exposure or approx. 0.3% of the group's total credit risk exposure and hence does not form a concentration risk. The duration profile of this portfolio will lead to a substantial decrease (nearly 50%) until end of 2013 and is protected by the European measures put in place to prevent sovereign defaults. The group monitors public debt restructuring discussions and potential haircuts as well as includes the exposure in stress tests. Additionally, hedging opportunities are being observed and applied if deemed appropriate.

Risk-bearing Capacity Calculation

Within the Risk-bearing Capacity Calculation, Erste Group's material risks are compared to the capital/coverage potential according to internal ICAAP standards. The quarterly capital adequacy calculation undertaken by Erste Group serves not only as a tool to assess the actual capital adequacy of the group but also to provide a forward-looking picture, make recommendations and start taking actions as may be necessary for a sustainable sound capitalisation.

The Management Board and the risk management committees are briefed regularly and at least on a quarterly basis in relation to the results of the capital adequacy calculation. The report includes movements in risks and available capital / coverage potential after consideration of potential losses in stress situations, the degree of utilisation of the risk limit and overall status of ICAAP according to the traffic light system. The ICAAP report also includes a comprehensive forecast of risk-weighted assets and capital adequacy.

Based on the business and risk profile of Erste Group, currently the three main types of banking risks, credit risk, market risk and operational risk, are considered in the Risk-bearing Capital Calculation. Credit risk accounts for approximate 80% of the total economic capital requirement. Reflecting what management believes is the conservative risk management policy and strategy of Erste Group, Erste Group does not offset diversification effects between these three risk types. The economic capital requirement for unexpected losses is computed on a one-year time horizon with 99.95% confidence level, which reflects the implied default risk consistent with a long-term credit rating of AA (double A).

Other risk types, in particular liquidity, concentration and business risks, are managed by means of a proactive management framework that includes forward-looking elements, stress testing, trigger levels and traffic light systems..

The capital or coverage potential required to cover economic risks and unexpected losses is sub-divided based on the characteristic of their components, such as the legal qualification of the source of capital and the tenor of subordinated debt. The coverage potential must be sufficient to absorb unexpected losses resulting from the group's operations.

In addition to the credit limits set by the existing limit frame of the group, Erste Group has defined a Maximum Risk Exposure Limit ("MREL") which, along with the signal system, serves to ensure that there is sufficient time (at least one year) for the management to plan and execute actions to ensure capital adequacy and sustainability going forward.

Emergency Response Plan

In case of unforeseeable events, such as a crisis, an Emergency Response Plan ("ERP") has been defined by Erste Group. The ERP includes a predefined set of tools as well as processes, resources, roles and responsibilities, with the goal of responding immediately and effectively to any such crisis. Measures take into account not only capital, but also the liquidity position and strategy of Erste Group.

Risk Planning and Forecasting

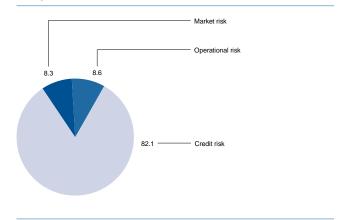

It lies within responsibility of Strategic Risk Management of the group and each subsidiary to ensure a sound risk planning and forecasting process. The relevant risk planning numbers flow directly into the group planning and steering process.

All insights from the ERM / ICAAP are taken into account in the process of allocating capital to entities and segments under risk / return considerations.

Erste Group's Aggregate Capital Requirement by Risk Type

The following diagram presents the composition of the economic capital requirement as of 31 December 2010 according to the type of risk:

Economic Capital Allocation in %, 2010

37.5. Credit risk

Definition and overview

Credit risk arises in Erste Group's traditional lending and investment business, comprising losses incurred as a result of default by the borrowers or by the need to set aside provisions as a result of the deteriorating credit quality of certain borrowers, as well as from trading in market risk instruments (counterparty risk). Country risks are also recognised implicitly in the calculation of credit risk. Operative credit decisions are made by the decentralised credit risk management units, namely, the Group Corporate Risk Management at group level and the credit risk management units at each of the banking subsidiaries. See 'Risk Management Organisation—Overview of Risk Management Structure' for a detailed explanation of the role and responsibilities of Group Corporate Risk Management.

The central database used for credit risk management is the group data pool. All data relevant to credit risk management, performance management and determination of risk-weighted assets and the regulatory capital requirement are regularly input into this database. Relevant subsidiaries not yet integrated into the GDP deliver regularly reporting packages.

The Group Enterprise-wide Risk Management and Reporting department uses the group data pool for centralised credit risk reporting. This ensures centralised analysis and application of ratios according to unified methods and segmentation across Erste Group. The credit risk reporting comprises of regular reports on Erste Group's credit portfolio for external and internal audiences and permits continuous monitoring of credit risk developments, enabling management to take control measures. Inhouse recipients of these reports include, above all, the Supervisory Board and Management Board of Erste Group Bank, as well as the risk managers, business unit directors and internal audit staff.

The organisational unit 'Credit Limit System' is in charge of the rollout and continual technical improvement of a group-wide online limit system for capping counterparty risk arising from treasury transactions, as well as for surveillance of credit risk from exposure to clients that fall into the asset segments 'financial institutions', 'sovereigns' and 'international large corporates' that work with several different members of Erste Group.

Internal rating system

Overview

Erste Group has business and risk strategies in place for lending policies and credit approval processes, which are reviewed and adjusted at least on a yearly basis. They cover the entire lending business, taking into account the nature, scope and risk level of the transactions and the counterparties involved. Credit approval is also based on the creditworthiness of the customer, the type of credit, collateral, covenant package and other risk mitigation factors involved.

The assessment of counterparty default risk within Erste Group is based on probability of default ('PD'). For each credit exposure and lending decision, Erste Group assigns an internal rating, which is a unique measure of counterparty default risk within each entity of the Erste Group (an 'Internal Rating'). Internal rating of each customer is updated at least on annual basis (Annual Rating Review). Rating of a customer in weaker rating classes is reviewed with higher frequency than the usual Annual Rating Review.

The main purpose of the Internal Ratings is to affect the decision-making for lending and the terms of the credit facility to be extended; however, Internal Ratings also determine the level of decision-making authority within Erste Group and the monitoring procedures for existing exposures. At a quantitative level, Internal Ratings drive the level of required risk pricing and risk provisions.

For IRB compliant entities of Erste Group, Internal Ratings are a key element of risk weighted assets' calculation and Internal Capital Adequacy Assessment Process ('ICAAP').

Internal Ratings take into account all available essential information for assessment of counterparty default risk. For non-retail borrowers, Internal Ratings take into account financial strength of the counterparty, possibility for external support, company information, and external credit history information, where available. For the wholesale segment, Internal Ratings also take into account market information such as access to capital markets linked to external ratings or credit spreads external rating or credit spreads. For retail clients, Internal Ratings are based mainly on behavioural and application scoring, but also utilise demographic and financial information, supplemented by credit bureau information, where available. Rating ceiling rules on credit quality are applied based on country domicile and membership in a group of economically related entities.

Internal Rating models and risk parameters are developed by internal teams of specialists. Rating development follows internal methodology formalised into a group wide methodology and documentation standard (White Paper). Rating models are developed based on relevant and most accurate data covering always the respective market. In such a way Erste Group established highly predictive rating models covering also the CEE region.

All scorecards, whether retail or non-retail, are regularly validated based on group-wide standard methodology. Validations are provided using statistical techniques in respect to default prediction performance, rating stability, data quality, completeness and relevancy and last but not least the review of documentation and user acceptance. The results of this validation process are reported to the management and regulatory bodies. In addition to the validation process, the Group applies monthly monitoring process on the performance of rating tools, reflecting the month-to-month new defaults and any early delinquencies.

A Holding Model Committee is established as an elementary steering and control body of the model development and maintenance process. The Holding Model Committee reports to the CRO Board. All new models (rating models and risk parameters) and methodology standards in the group are reviewed by the Holding Model Committee. Holding Model Committee ensures group-wide integrity and consistency of models and methodologies. Beside of review function of new models and methodologies, Holding Model Committee organises the group wide validation process, reviews validation results and approves remedy actions. All development and validation activities are coordinated by the organisational unit 'Group Rating Methods'.

Risk Grades and Categories

The classification of credit assets into risk grades is based on Erste Group's Internal Ratings. Erste Group uses two internal risk-scales for risk classification: for customers that have not defaulted, a risk scale of eight risk grades (for retail) and 13 risk grades (for all other segments) is used. Defaulted customers are classified in one risk grade. For newly acquired subsidiaries of Erste Group, the respective local risk classification is mapped to group standard classifications until internal rating systems are introduced.

For the purpose of external reporting, Erste Group developed a framework to map the risk grades into four different risk categories, as follows:

_Low risk: Typically regional customers with a well-established and rather long standing relationship with Erste Group or large internationally recognised customers. Strong and good financial health and no foreseeable financial difficulties. Retail clients with long relationship with the bank, or clients with a wide product pool use. No late payments currently or in the most recent twelve months. New business is generally with clients in this risk category.

_Management attention: Vulnerable non-retail clients, which may have overdue payments/defaults in their credit history or which may encounter debt repayment difficulties in the mediumterm. Retail clients with limited savings or probable past payment problems triggering early collection reminder. These clients typically have a good recent history and no current delinquency.

_Substandard: The borrower is vulnerable to negative financial and economic developments; such loans are managed in specialised risk management departments.

_Non-performing: One or more of the default criteria under Basel II are met: full repayment unlikely, interest or principal payments on a material exposure more than 90 days past due, restructuring resulting in a loss to the lender, realisation of a loan loss, or initiation of bankruptcy proceedings. For purposes of analysing non-performing loans, in Austria Erste Group applies the 'customer view'. Accordingly, if an Austrian customer defaults on one product then all of that customer's performing products are classified as non-performing. For corporate borrowers in CEE, the customer view is also applied. However, in the retail and SME segment in CEE, Erste Group uses the 'product view', so that only the product actually in default is counted as a NPL whereas the other products of the same customer are considered performing.

Erste Group assigns to each rating grade a distinct PD value within the calibration process. Calibration is performed individually for each rating method. PD values reflect the twelve month expectation of long term average default rates. Additionally to the PD values the bank assigns margin of conservatism dependent on the granularity of portfolios and relevant data history. Calibration of PD values are validated on yearly basis in line with all the rating methods validations. Any change in the calibration of the PD values must be approved in the Holding Model Committee together with all the model changes.

Credit Risk Review and Monitoring

Credit Monitoring

In order to manage the credit risk for large corporates, banks, sovereigns and country risk, credit limits are established to reflect the maximum exposure Erste Group is willing to take on that particular customer or the group of connected customers. All credit limits and the exposures booked within the limits are reviewed at least once a year. For small corporates and retail customers, monitoring and credit review is based on a rating model, which is updated monthly. For weaker small corporates (with a risk category of 'Management attention' or 'Substandard'), a continuous review process is undertaken.

Portfolio reports for asset classes and business lines are prepared on a regular basis. Watch-list meetings or remedial committee-meetings are held on a regular basis to discuss customers with weak ratings or to discuss pre-emptive measures to help a particular client avoid default. For retail business, local operational risk management is responsible to undertake these monitoring activities and fulfil the minimum requirements of Group Retail Risk Management.

Credit Exposure

Credit exposure relates to the following balance sheet items:

- _ loans and advances to credit institutions
- _ loans and advances to customers;
- _ debt securities held in trading, at fair value through profit or loss, available for sale and held-to-maturity
- _ derivatives and
- credit risks held off-balance sheet (including undrawn credit commitments).

The credit exposure comprises the gross amount without taking into account any collateral held, other credit enhancements or credit risk mitigating transactions. The total credit exposure of Erste Group increased by 1.5% or EUR 3.2 billion from EUR 220.3 billion at 31 December 2009 to EUR 223.5 billion at 31 December 2010.

Erste Group's total credit exposure is presented below divided into the following classes:

- _ by industry and balance sheet positions
- by risk category,
- _ by industry and risk category,
- _ by region and risk category, and
- _ by business segment and risk category.

Following this detailed breakdown of credit risk exposure, Erste Group presents a detailed breakdown

- _ of its non-performing assets and risk provisions, and
- _ of its loans and advances to customers by business segment.

Credit Risk Exposure by Industry and balance sheet positions

The following tables present Erste Group's credit risk exposure by industry, broken down by balance sheet positions, as of each period indicated.

Credit exposure by industry 2010

	•		Debt instruments

From 31 December 2009 to 31 December 2010, the percentage of credit risk exposure in the low risk and non-performing categories increased, while exposure decreased in the other two categories. Non-performing loans as a share of total exposure (*i.e.*, 'NPL ratio') showed an increase from 4.1% to 4.7%. Of Erste Group's

total credit exposure, 80.0% constituted the best risk category and 12.0% was in the management attention category; the combined proportion of the two poorer risk categories rose slightly from 7.7% to 8.0% from 31 December 2009 to 31 December 2010

Credit Exposure by Industry and Risk Category

The following tables present the total credit risk exposure of Erste Group broken down by industry and risk category as of 31 December 2010 and 31 December 2009, respectively.

Credit Exposure by Region and Risk Category

The geographic analysis of credit exposure is based on the risk country of the borrower. Accordingly, the distribution among Erste Group entities of the credit exposure by geography differs from the composition of credit risk in terms of reporting segments of Erste Group.

The following table presents the total credit risk exposure of Erste Group broken down by region as at 31 December 2010 and 31 December 2009, respectively.

Credit exposure by region and risk category in 2010

The increase in credit risk exposure by EUR 3.2 billion from 31 December 2009 to 31 December 2010 reflected an increase of EUR 2.8 billion, or 3.1% in the CEE core markets and in Austria

an increase of EUR 443 million, or 0.5%, coupled with an increase of EUR 358 million, or 1.2% in the other EU member states (EU 27 excluding core markets), a decrease in other indus-

trialised countries of EUR 364 million, or 5.7%, and a decrease of EUR 32 million, or 0.5%, in the emerging markets. The exposure increase in CEE mainly resulted from increases in the Czech Republic.

The countries of Erste Group's core market and the EU accounted for 96.7% of credit exposure. At 1.4%, credit exposure in emerging markets remained of minor significance for the Group total.

Credit Risk Exposure by Business Segment and Risk Category
This Section describes the composition of credit exposure based
on reporting segments. Exposure is classified into segments based
on the domicile of the Group entities that carry the credit risk on
their books.

The following tables present the total credit risk exposure of Erste Group broken down by reporting segment as at 31 December 2010 and 31 December 2009, respectively.

Non-performing assets and risk provisions

For the definition of non-performing (assets) please refer to the description of risk grades and categories.

Erste Group provisions for credit risk, with risk provisions divided into specific risk provisions, portfolio risk provisions and provisions for guarantees. Erste Group has established a common framework which defines minimum standards and principles for risk provisioning principles related to risk infrastructure, processes and quantification of risk provisioning. It also puts risk

provisioning into overall economic perspective in terms of financial planning and ratios relevant for the group's performance management. The policy describes also underlying methodological standards for specific risk provisions and portfolio risk provisions, respectively. Through a standardised process, risk provisions are created for the portion of exposure that is not covered by collateral or expected recoveries. This particularly includes methodologies, processes and guidance regarding necessary policies for operative risk management.

The following table shows the risk provisions divided into specific and portfolio provisions and provisions for guarantees:

in EUR million	2010	2009
Specific provisions	5,315	3,777
Portfolio provisions	804	1,177
Provision for guarantees	186	265
Total	6,305	5,219

Risk provisions covered 60.1% of reported NPL as of 31 December 2010. For the portion of NPL that is not covered by provisions, Erste Group believes there are sufficient levels of collateral and expected other recoveries.

In the twelve months ended 31 December 2010, NPL increased by EUR 1.5 billion, or 17.0%, from EUR 9 billion at 31 December 2009 to EUR 10.5 billion at 31 December 2010. Erste Group has experienced a declining growth rate of NPL formation during the second half of 2010. Risk provisions were increased by EUR 1.1 billion, or 20.8%, from EUR 5.2 billion at 31 December 2009 to EUR 6.3 billion at 31 December 2010. These movements resulted in a net increase of 1.8 percentage points in NPL provision coverage.

The following tables show the coverage of non-performing loans across the reporting segments by provisions (excluding collateral) as of 31 December 2010 and 31 December 2009, respectively. The differences in provisioning levels for the segments result from the risk situation in the respective markets, different levels of collateralisation as well as the local legal environment and regulatory requirements.

The NPL ratio is calculated by dividing non-performing exposure by total exposure. NPL coverage is calculated by dividing risk provisions by non-performing exposures. NPL coverage is calculated exclusive of any collateral and other recoveries.

Erste Group focuses on early identification of customers who are facing difficulties with payments or other loan-related obligations with the aim of restructuring their loans if the mid- to long-term outlook is positive. Erste Group believes that this can help to build customer loyalty for long-term relationships and cooperation. In principle, Erste Group follows a policy of restructuring by

lengthening maturity and/or by deferring capital repayment but insisting on payment of interest.

Collateral obtained in foreclosure procedures are made available for sale in an orderly fashion, with the proceeds used to reduce or repay the outstanding claim. Generally, Erste Group does not occupy repossessed properties for its own business use.

The major types of collateral are mortgages on residential and commercial real estate, as well as guarantees. Among the other types of collaterals, financial collateral is the most common. The valuation of security takes into account the requirements for risk mitigation under Basel II.

The carrying amount of assets for which during the year 2010 new terms were negotiated because they would otherwise have fallen into arrears or been impaired was EUR 2,650 million.

At 31 December 2010 and 31 December 2009, the balances of assets which were past due but for which specific provisions had not yet been established were as follows:

	Cr	edit risk exposur	е	thereof collateralised

At 31 December 2010 and 31 December 2009, specific provisions existed for the following exposures:

2010 in EUR million	Total loans under specific provisions	thereof 91-180 days past due	thereof more than 180 days past due
Loans and advances to credit institutions	46	0	46
Loans and advances to customers	8,201	948	5,425
Total	8,248	948	5,471

2009	Total loans under	thereof 91-180 days past	thereof more than 180 days
in EUR million	specific provisions	due	past due
Loans and advances to credit institutions	63	0	59
Loans and advances to customers	6,024	696	3,508
Total	6,087	696	3,566

All loans and other advances presented in the tables above were classified as non-performing. Provisions are as a rule established for loans and other advances that are more than 90 days past due. However, specific provisions are not established if the loans and other advances are covered by portfolio provisions or by adequate collateral.

Loans and advances to customers by business segment

The following tables present the customer loan book as at 31 December 2010 and 31 December 2009, excluding loans to financial institutions and commitments, by reporting segments, broken down by risk category, risk provisions, the non-performing loan coverage and NPL ratio. For the purpose of this section, 'NPL ratio' and 'NPL coverage' only relate to customer loans.

Loans and advances to customers by business segment

ABS and CDO portfolio

At 31 December 2010, Erste Group had a conservative portfolio of securitised assets and their derivatives. In compliance with internal risk standards before investing in such products Erste Group undertakes a fundamental analysis of the market environment, the economic conditions, the profitability and the related risk characteristics. In 2010 Erste Group did not make any investments in securitisations, all repayments were made as scheduled.

As at 31 December 2010, the carrying amount of Erste Group's total securitised asset portfolio was EUR 2.9 billion and so by EUR 0.3 billion lower than as of 31 December 2009. Changes in the carrying amount were caused by repayments, currency effects, changes in prices and disposals of assets. Although the proportion of the portfolio which was rated investment-grade decreased from 90% as of year-end 2009 to 84.6% as at 31 December 2010, the overall quality of the portfolio of securitised assets is still within satisfactory limits. Only 3.9% of the assets are rated CCC or below.

At 31 December 2010 and 31 December 2009 the composition of the total portfolio of securitised assets according to products and balance sheet line items is as follows:

-				Financial	assets	•

European and US collateralised loan obligations (CLOs)

CLOs are securitisations which are secured by a pool of corporate loans. The major part of CLOs held by Erste Group is still rated investment grade although rating-agencies significantly downgraded this kind of products. Moreover, according to Moody's the global speculative-grade default rate for these assets decreased steadily in 2010 and stood at 6.1% in June 2010 after reaching the highest level with 13% in December 2009. Moody's expects that the global speculative-grade default rate will decline further to 1.8% until second quarter 2011.

European prime residential mortgage backed securities (RMBS)

This portfolio consists primarily of British securitisations, which were strongly affected by the global economic crisis with an average decrease of prices by 21% during third quarter 2007, reaching the lowest level in first quarter 2009. From that time on prices slightly recovered by 6%. However, as in this market there is also the possibility to recourse to other assets of the debtor, Moody's expects the decrease of prices for residential property will have only a moderate negative impact on the credit rating of British prime RMBS

Commercial mortgage backed securities (CMBS)

CMBs are securitisations which are secured by pools of mortgages on commercial property (i.e. offices, retail and others). Erste Group mainly invested in British CMBS. Between July 2007 and July 2009 prices of commercial property fell sharply by 45%, showing a recovery by 15% afterwards. For 2011 a stabilization of the market is expected.

Other asset backed securities (ABS)

Other ABSs mainly comprise securitisations where the underlying assets are leases and loans to small and medium enterprises and other CDOs.

In addition, Erste Group has also invested in US collateralised mortgage obligations (CMOs) issued by Ginnie Mae, Fannie Mae and Freddie Mac. These issuers are considered US government-sponsored or US government-guaranteed institutions and have stable AAA ratings. Erste Group also holds investments in student loan securitisations, all of which are triple-A tranche securities. These securitisations are 97% guaranteed by the US Department of Education, while the remaining 3% are covered by subordination. Credit risk is therefore considered very remote.

37.6. Market risk

Definition and overview

Market risk is the risk of loss that may arise due to adverse changes in market prices and to the parameters derived therefrom. At Erste Group, market risk is divided into interest rate risk, currency risk, equity risk, commodity risk and volatility risk. This concerns both, trading as well as bank book positions.

Employed methods and instruments

At Erste Group, potential losses that may arise from market movements are assessed by using the 'value-at-risk' method. The calculation is done according to the method of historic simulation with a unilateral confidence level of 99%, a holding period of one to ten days and a simulation period of two years. Value-at-risk describes which losses may be expected as a maximum at a defined probability – the confidence level – within a certain holding period of the positions under normal market conditions.

Backtesting is used to constantly monitor the validity of the statistical methods. This process is conducted with a one-day delay to monitor if the model projections regarding losses have actually materialized. At a confidence level of 99% the actual loss on a single day should exceed the value-at-risk statistically only twice to three times a year (1% of around 250 workdays).

This shows one of the limits of the value-at-risk approach: On the one hand, the confidence level is limited to 99%, and on the other hand, the model takes into account only those market scenarios observed respectively within the simulation period of two years, and calculates the value-at-risk for the current position of the bank on this basis. In order to investigate any extreme market situations beyond this, stress tests are conducted at Erste Group.

These events include mainly market movements of low probability

The stress tests are carried out according to several methods: The 'historical worst case' is derived from the value-at-risk calculation, but a confidence level of 100% is assumed, i.e., the absolutely worst value of the simulation time series is used as result. In the 'extreme value theory', a Pareto distribution is adjusted to the extreme end of the loss distribution. In this manner a continuous function is created from which extreme confidence levels such as 99.95% can be evaluated. Finally, standard scenarios are calculated in which the individual market factors are exposed to extreme movements. Such scenarios are calculated at Erste Group for interest rates, stock prices, exchange rates and volatilities. Furthermore, since 2009, combination scenarios have been calculated in which the current position of the trading book is subjected to a historical worst case calculation over an interesting historical period. These analyses are made available to the management board and the supervisory board within the scope of the monthly market risk reports.

The value-at-risk model was approved by the Financial Market Authority (FMA) as an internal market risk model to determine the capital requirements of Erste Group pursuant to the Austrian Banking Act. The best possible multiplier of three is used in this case that was assigned by the Financial Market Authority (FMA) on the basis of an appraisal by Austrian National Bank.

Methods and instruments of risk mitigation

At Erste Group, market risks are controlled in the trading book by setting several layers of limits. The overall limit on the basis of value-at-risk for the trading book is decided by the board in the Risk Committee taking into account the risk-bearing capacity and projected earnings. A further breakdown is done on the basis of a proposal by the Risk Management Unit, 'Group Market & Liquidity Risk Management' in the Market Risk Committee (MARA).

All market risk activities of the trading book are assigned risk limits that are statistically consistent in their entirety with the value-at-risk overall limit. The value-at-risk limit is assigned in a top-down procedure to the individual trading units. This is done up to the level of the individual trading groups or departments. Additionally, in a bottom-up procedure, sensitivity limits are assigned to even smaller units all the way down to the individual traders. These are then aggregated upwards and applied as a second limit layer to the value-at-risk limits. The consistency between the two limit approaches are verified regularly.

Limit compliance is verified at two levels: by the appropriate local decentralised risk management unit and by Group Market & Liquidity Risk Management. The monitoring of the limits is done within the course of the trading day based on sensitivities. This can also be carried out by individual traders or chief traders on an ad hoc basis.

The value-at-risk is calculated every day at the Group level and made available to the individual trading units as well as to the superior management levels all the way up to the management board.

Within the course of the calculation, the trading book positions are valued independently of trading. This means that, on the one hand, the market data is collected by risk controlling itself, and on the other, that the valuation procedures and models are developed and validated independently of the trading units.

Apart from the trading book positions, once a month, the bank book positions are also subjected to a value-at-risk analysis. In this manner, the total value-at-risk is determined. The result of this calculation is presented in the monthly market risk report that is made available to the management board and the supervisory board

Analysis of market risk

Value at Risk of banking book and trading book

The following tables show the VaR amounts as of 31 December 2010 and 31 December 2009 at 99% confidence level, with a holding period of one day:

2010	Total	Interest	Currency	Shares	Commodity	Volatility
Erste Group	37,667	33,679	1,756	6,228	257	2,118
Banking book	30,767	30,076	1	1,274	0	0
Trading book	8,789	4,298	1,755	5,406	257	2,118

2009	Total	Interest	Currency	Shares	Commodity	Volatility
Erste Group	39,498	35,798	1,812	9,104	397	1,717
Banking book	36,559	36,134	18	1,899	0	0
Trading book	8,940	4,748	1,812	7,981	397	1,717

The method used is subject of limitations that may result in the information not fully reflecting the fair value of the assets and liabilities involved.

Interest rate risk of banking book

Interest rate risk is the risk of adverse change in the fair value of financial instruments caused by movement in market interest rates. This type of risk arises when mismatches exist between assets and liabilities (including off-balance-sheet items) in respect of their maturities or of the timing of interest rate adjustments.

In order to identify interest rate risk, all financial instruments, including transactions not recognised in the balance sheet, are grouped into maturity bands based on their remaining term to maturity or term to an interest rate adjustment.

The following tables list the open fixed-income positions held by Erste Group in the four currencies that carry significant interest rate risk: EUR, CZK, HUF and RON, as of 31 December 2010 and 31 December 2009.

Only the open fixed-income positions that are not allocated to the trading book are presented. Positive values indicate fixed-income risks on the asset side, i.e., a surplus of asset items; negative values represent a surplus on the liability side.

Open fixed-income positions not assigned to the trading book

2010					
	1-3	3-5	5-7	7-10	over 10

Fixed-interest gap in RON positions at 31 December 2009	203.6	315.5	72.2	155.8	4.7

Exchange rate risk

The bank is exposed to the several types of exchange rate-related risks.

Risk from open currency position

Risk from open currency positions is the exchange rate-related risk that derives from the mismatch between assets and liabilities, or from currency-related financial derivatives. These risks might originate from customer-related operations or proprietary trading and are monitored and managed on daily basis. Foreign currency exposure is subject to regulatory and internal limits. The internal limits are set by the Market Risk Committee.

Other exchange rate- related risks

Erste Group separately measures and manages other types of risks relating to the group's balance sheet and earnings structure. The translation risk related to the valuation of the balance sheet positions, earnings, dividends, participations/net investments in local currency or foreign exchange has an impact on consolidated

earnings and consolidated capital. Erste Group is also reducing the negative impact relating to volatility of foreign exchange on asset's performance (for example as a result of foreign exchange lending in the CEE countries).

In order to manage multi-currency earnings structure, Erste Group regularly discusses hedging opportunities and takes decision in the Group Asset Liability Committee (Group ALCO). The Asset Liability Management (ALM) uses as the usual source of information the current financial results and the financial budget prepared for the upcoming period to get as much information as possible on the future foreign cash flows. The proposal, which includes mainly the volume, the hedging level, the hedge ratio and the timeline of the hedging, is submitted by the ALM to the Group ALCO. The impact of translation on consolidated capital is monitored and reported to the Group ALCO. Group ALCO decisions are then implemented by the ALM and the implementation status is reported on monthly basis to Group ALCO.

The following tables shows the exchange rate open positions of Erste Group as of the dates indicated, respectively.

Exchange rate open positions

Exonarigo rato opon positiono		
in EUR thousand	2010	2009
US Dollar (USD)	(71,319)	11,656
Japanese Yen (JPY)	(17,125)	(40,993)
Swiss Franc (CHF)	(14,328)	(30,239)
Czech Koruna (CZK)	2,709	1,793

Hungarian Forint (HUF)	4,679	(7,375)
Romanian Lei (RON)	8,132	(54,632)

Hedging

Banking book market risk management consists of optimizing Erste Group's risk position by finding the proper trade-off between the economic value of the balance sheet and forecasted earnings. Decisions are based on the balance sheet development, the economic environment, competitive landscape, fair value of risk, effect on net interest income and appropriate liquidity position. The steering body responsible for interest rate risk management is the Group ALCO. The ALM submits proposals for actions to steer the interest rate risk to the Group ALCO and implements Group ALCO's decisions.

In order to achieve the goals of risk management, hedging activities focus on the two main control variables: net interest income and market value of equity risk. In a broader sense, hedging means an economic activity that mitigates risk, but does not necessarily qualify for IFRS hedge accounting. In a more narrow sense, hedging is the hedge accounting according to IFRS requirements. For economic fair value, hedging fair value option is used where it is applicable. For IFRS hedge accounting cash flow hedges, fair value hedges and hedges of a net investment are recognised. Most of the hedging within Erste Group concerns hedging of interest rate risk; the remaining is used to hedge foreign exchange rate risk. IFRS hedge accounting is one of the tools of steering the risk.

37.7. Liquidity risk

Definition and overview

The liquidity risk is defined in Erste Group in line with the principles set by the Basel Committee on Banking Supervision. Accordingly, a distinction is made between market liquidity risk, which is the risk that the Group entities cannot easily offset or eliminate a position at the market price because of inadequate market depth or market disruption, and funding liquidity risk, which is the risk that the banks in the Group will not be able to meet efficiently both expected and unexpected current and future cash flow and collateral needs without affecting either daily operations or the financial condition of the Group members.

Funding liquidity risk is further divided into insolvency risk and structural liquidity risk. The former is the short-term risk that current or future payment obligations cannot be met in full, on time in an economically justified way, while structural liquidity risk is the long-term risk of losses due to a change in the Group's own refinancing cost or spread.

In early 2009 a liquidity project was started in order to review the governance, policy and measurement of the already established liquidity risk management. In this Group-wide project all local Risk Management and Asset-Liability Management as well Money Market Departments were involved. As one of the results of the project, the liquidity risk stress testing methodology was improved and linked to the countermeasures in the contingency plan.

There has been no need to change the process of intraday liquidity management, and the access to the available facilities was enlarged due to increased collateral base.

Employed methods and instruments

The maturity profile of short-term funding on a currency level has been monitored on a detailed basis to ensure that they have been within the short-term liquidity limits. The short-term liquidity position is monitored on a daily basis. As the primary funding source for Erste Group is the stable customer deposit base, the share of short-term funding is relatively low. Erste Group is particularly focusing on the net cash outflow projection and its coverage by collateral. In 2010, the focus was set on further improvement of the collateral structure, which resulted in a stable amount of central bank eligible collateral in Erste Group.

Erste Group steers long-term (structural) liquidity risk through a multiple scenario approach, which is limited on both group and individual subsidiary level. Dynamic aspects of the renewal of existing balance sheet items are incorporated through certain set of assumptions describing the going concern situation besides crisis situations. Similarly, the modelling of customer business is adjusted according to the respective scenario. The purpose of the analysis is to determine the ability of Erste Group to withstand distressed situations before they actually occur. Additionally, the traditional liquidity gaps (depicting the going concern maturity mismatches on a currency level) of the subsidiaries and the whole group are reported and monitored regularly. Funding concentration risk is continuously analyzed in respect to counterparties. Erste Group's fund transfer pricing (FTP) system also proved to be an efficient steering tool for structural liquidity risk management

Methods and instruments of risk mitigation

General standards of liquidity risk controlling and management (standards, limits and analysis) have been defined and are continuously reviewed and improved by Erste Group Bank.

Both short- and long-term liquidity risk are limited by a traffic light system taking entities and currencies into account. Limit breaches are reported to ALCO. Another important channel for steering the liquidity risk within Erste Group Bank and towards its subsidiaries is the above mentioned FTP system and prices of intra-group funding. As the process of planning of funding needs provides important data for liquidity management, a detailed overview of funding needs is prepared for the planning horizon across Erste Group on quarterly basis.

The Comprehensive Contingency Plan ensures the necessary coordination of all involved parties in the liquidity management process in case of crisis and it is reviewed on a regular basis. The contingency plans of the subsidiaries are coordinated as part of the plan for the Erste Group.

Analysis of liquidity risk

Liquidity gap

The long-term liquidity position is managed using liquidity gaps, on the basis of expected cash flows. This liquidity position is calculated for each currency with material volume and based on the assumption of ordinary business activity.

The table shows contractual payments of principal - as they fall due at maturity or according to the amortisation schedule. For

products without contractual maturities (like demand deposits and overdrafts), modelled principal cash flows are assumed - the modelling relies on statistical analysis of historical volumes for such products.

The following table shows liquidity gaps as of 31 December 2010 and 31 December 2009:

in EUR million	< 1 moi	nth	1-12 mo	nths	1-5 yea	ars	> 5 yea	ırs
-	2010	2009	2010	2009	2010	2009	2010	2009
Liquidity GAP	23,426	20,477	(34,607)	(25,325)	(5,424)	(17,955)	16,605	22,696

Excess of assets over liabilities is disclosed with a positive algebraic sign, while excess of liabilities over assets is disclosed with a negative algebraic sign.

Liquidity buffer

Erste Group holds securities eligible at central banks to manage liquidity risk. Maturities of contractual, not discounted cash flows of these financial assets as of 31 December 2010 and 31 December 2009 are shown in the table below:

2010				
in EUR million	<1 month	1-12 months	1-5 years	> 5 years
Eligible securities	412	5,300	13,323	10,832
2009				
in EUR million	< 1 month	1-12 months	1-5 years	> 5 years
Eligible securities	1,223	4,907	12,837	8,669

Financial liabilities

Maturities of contractual, not discounted cash flows of financial liabilities were as follows:

2010						
in EUR million	Carrying amount	Contractual cash flows	< 1 month	1-12 months	1-5 years	> 5 years
Non-derivative liabilities	174,307	184,321	70,622	51,950	39,145	22,604
Deposits by banks	20,154	21,004	11,545	3,869	3,311	2,279
Customer deposits	117,016	119,568	55,418	42,386	16,229	5,535
Debt securities in issue	31,299	35,556	3,643	5,115	17,600	9,199
Subordinated liabilities	5,838	8,193	16	580	2,006	5,591
Derivative liabilities	1,902	1,481	57	374	597	453
Derivatives banking book	1,902	1,481	57	374	597	453
Total	176,209	185,802	70,679	52,324	39,742	23,057

The volume of customer deposits due on demand is EUR 45.3 billion, observation of the customer behaviour has shown that during ordinary course of business 93% of this volume is stable. This means that only a minor part of the on demand portfolio is withdrawn by the customer, whereas the major part remains generally in the bank.

37.8. Operational risk

Definition and overview

In line with Section 2 No 57d Banking Act, Erste Group defines operational risk as 'the risk of loss resulting from inadequacy or failure of internal processes, people or systems, or from external events including legal risks'. Both quantitative and qualitative methods are used to identify operational risks. Consistent with international practice, the responsibility for managing operational risk rests with the line management.

Employed methods and instruments

The quantitative measurement methods are based on internal loss experience data, which is collected across Erste Group using a standard methodology and entered in a central data pool. Additionally, in order to be able to model losses that have not occurred in the past but are nonetheless possible, scenarios and external data are also used. Erste Group sources external data from the Operational Riskdata eXchange Assotiation (ORX), a non-profit industry association and leading risk-loss data consortium.

Erste Group received regulatory approval for the AMA approach in 2009. AMA is a sophisticated approach to measure operational risk. Pursuant to AMA, the required capital is calculated using an internal VaR model, taking into account internal data, external data, scenario analysis, business environment and internal risk control factors.

Methods and instruments of risk mitigation

In addition to quantitative methods, qualitative methods are also used to determine operational risk, such as risk assessment surveys (Risk Control and Self Assessments). The results of and suggestions for risk control in these surveys taken by experts are reported to line management and thus help to reduce operational risks. Erste Group also reviews certain key indicators periodically to ensure early detection of changes in risk potential that may lead to losses.

Erste Group uses a group-wide insurance programme, which, since its establishment in 2004, has reduced the cost of meeting Erste Group's traditional property insurance needs and made it possible to buy additional insurance for previously uninsured banking-specific risks. This programme uses a captive reinsurance entity as vehicle to share losses within the group and access the external market.

To further enforce the management of security risks, the functions IT Security, Physical Security, and Business-Continuity Management have been combined in July 2010 to the new service unit "Group Security Management" which reports directly to the CRO. In December 2010 the new division "Group Compliance" has been created under the CRO which is responsible to deal with compliance risks and the group-wide coordination of anti-fraud measures. The existing units "Group Securities Compliance", "AML Compliance", and "Group Fraud Management" are part of this new division.

The quantitative and qualitative methods used, together with the insurance strategy and the modelling approaches described above form the operational risk framework of Erste Group. Information on operational risk is periodically communicated to the Management Board via various reports, including the quarterly top management report, which includes recent loss history, loss development, qualitative information from risk assessments and key risk indicators as well as the operational VaR for Erste Group.

Distribution of operational risk events

Detailed below is the percentage composition by type of event of operational risk sources as defined by the New Basel Capital Accord. The observation period lasts from 1 January 2006 to 31 December 2010.

The event type categories are as follows:

Internal fraud:

Losses due to acts of a type intended to defraud, misappropriate property or circumvent regulations, the law or company policy, excluding diversity/discrimination events, which involves at least one internal party.

External fraud:

Losses due to acts of a type intended to defraud, misappropriate property or circumvent the law, by a third party.

Employment practices and workplace safety:

Losses arising from acts inconsistent with employment, health or safety laws or agreements, from payment of personal injury claims, or from diversity/discrimination events.

Clients, products and business practices:

Losses arising from an unintentional or negligent failure to meet a professional obligation to specific clients (including fiduciary and suitability requirements), or from the nature or design of a product.

Damage to physical assets:

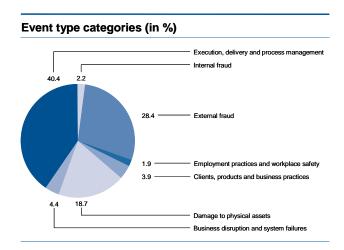

Losses arising from loss or damage to physical assets from natural disaster or other events.

Business disruption and system failures:

Losses arising from disruption of business or system failures.

Execution, delivery and process management:

Losses from failed transaction processing or process management, from relations with trade counterparties and vendors.

38) Derivative financial instruments

Fair value hedges are employed to reduce market risk. They are used to turn fixed-income or structured transactions into variable-income transactions. Erste Group's policy is to convert all substantial fixed single transactions bearing interest rate risk into variable transactions in order to separate the interest rate risk from such transactions. This policy is applied primarily to fixed or structured issued bonds, but also to the material fixed purchased bonds and generally, any material fixed transactions in the balance sheet. Group ALM is steering interest rate risk. Steering of interest rate risk is undertaken through issuance of bonds, loans or derivatives, whereas for derivatives IFRS hedge accounting is usually applied. Interest rate swaps are the main instruments used for fair value hedges. In connection with issuance, fair value is also hedged by means of cross-currency swaps, swaptions, caps, floors and other types of instruments.

Cash flow hedges are used to eliminate uncertainty in future cash flows in order to stabilise net interest income. Floors or caps are used to lock in levels of interest income in a changing interest rate environment. Interest rate swaps, caps and floors are used to hedge interest rate risk. Currency risk is hedged with spot transactions as well as currency swaps, FX forwards or balance sheet items denominated in a hedged currency.

In the reporting period, EUR 26 million (2009: EUR 5 million) was removed from the cash flow hedge reserve and recognised as income in the consolidated income statement; EUR (102) million (2009: EUR 13 million) was recognised directly in equity. The majority of the hedged cash flows is likely to occur within the next five years and will then be recognised in the consolidated income statement. Inefficiencies from cash flow hedges amounting to EUR 0.9 million (2009: EUR (10.6) million) are reported in the net trading result.

	201	2010		
in EUR million	Positive fair value	Negative fair value	Positive fair value	Negative fair value
Hedging instrument - fair value hedge	1,570	783	1,041	728
Hedging instrument - cash flow hedge	135	97	114	32

39) Fair value of financial instruments

Financial instruments for which fair value is determined on the basis of quoted market prices are mainly listed securities and derivatives as well as liquid OTC bonds.

Erste Group uses the following hierarchy for determining and disclosing the fair value of financial instruments by valuation technique:

Level 1: Financial instruments which are valued based on quoted (unadjusted) prices in active market for identical assets or liabilities. This includes financial instruments which are traded with a sufficient volume on an exchange, debt instrument quoted by several market participants with a sufficient depth or liquid derivatives which are traded on an exchange.

Level 2: Financial instruments which are valued based on quoted prices (in non-active markets or in active markets for similar assets or liabilities) and inputs other than quoted prices that are observable. This includes yield curves derived from liquid underlyings or prices from similar instruments.

Level 3 inputs are inputs which are not observable. This includes extrapolation of yield curves or volatilities, usage of historical volatilities, significant adjustment of quoted CDS spreads or equity prices.

The table below details the valuation methods used to determine the fair value of financial instruments (excl. derivatives in banking book) measured at fair value:

2010 in EUR million	Quoted market prices in active markets Level 1	Marked to model based on observable marked data Level 2	Marked to model based on non- observable inputs Level 3	Total
Financial assets - available for sale	10,704	6,385	160	17,249
Financial assets - at fair value through profit or loss	1,039	1,286	78	2,403
Trading assets - securities	2,905	2,619	0	5,524
Positive market value - derivatives	1	8,473	0	8,474
Total assets	14,649	18,763	238	33,650
Negative market value - derivatives	1	7,993	2	7,996
Other trading liabilities	105	111	0	216
Total liabilities and equity	106	8,104	2	8,212

2009	Quoted market prices in active markets	Marked to model based on observable marked data	Marked to model based on non- observable inputs	
in EUR million	Level 1	Level 2	Level 3	Total
Financial assets - available for sale	8,930	6,769	175	15,874
Financial assets - at fair value through profit or loss	1,252	1,620	95	2,967
Trading assets - securities	2,307	3,705	0	6,012
Positive market value - derivatives	2	4,709	2	4,713
Total assets	12,491	16,803	272	29,566
Negative market value - derivatives	0	3,746	3	3,749
Other trading liabilities	594	127	0	721
Total liabilities and equity	594	3,873	3	4,470

The volume of products whose fair values are determined using valuation models based on non-observable market data is driven in large part by illiquid bonds and securities not quoted in an active market.

Movements in Level 3 of financial instruments measured at fair value

The follwing tables show the development of fair value of securities for which valuation models are based on non observable inputs:

in EUR million	2009	Gain/loss in profit or loss	Gain/loss in other compre- hensive income	Pur- chases	Sales/ Settle- ments	Transfer into Level 3	Transfers out of Level 3	Currency trans- lation	2010
Financial assets - available for sale	175	(3)	1	10	(18)	3	(8)	0	160
Financial assets - at fair value through profit or									
loss	95	(4)	0	0	(20)	2	0	5	78
Trading assets	0	(1)	0	1	0	0	0	0	0
Trading liabilities	0	0	0	0	0	0	0	0	0
Total	270	(8)	1	11	(38)	5	(8)	5	238

in EUR million	2008	Gain/loss in profit or loss	Gain/loss in other compre- hensive income	Pur- chases	Sales/ Settle- ments	Transfer into Level	Transfers out of Level 3	Currency trans- lation	2009
Financial assets - available for sale	1,510	(19)	1	15	(92)	110	(1,348)	(2)	175
Financial assets - at fair value through profit or									
loss	267	(6)	0	1	(47)	80	(200)	0	95
Trading assets	62	(2)	0	2	(41)	0	(21)	0	0
Trading liabilities	0	0	0	0	0	0	0	0	0
Total	1,839	(27)	1	18	(180)	190	(1,569)	(2)	270

Gains or losses on level 3 securities held at the end of the reporting period, which are included in comprehensive income are as follows:

	•	2010		2009
in EUR million	Gain/loss in profit or loss	Gain/loss in other comprehensive income	Gain/loss in profit or loss	Gain/loss in other comprehensive income
Financial assets -				
available for sale	(4.0)	1.0	(1.0)	0.3
Financial assets -				
at fair value				
through profit or				
loss	(3.0)	0.0	(14.0)	0.0
Trading assets	(1.0)	0.0	(3.8)	0.0
Trading liabilities	0.0	0.0	0.0	0.0
Total	(8.0)	1.0	(18.8)	0.3

Movements between Level 1 and Level 2

Generally, the liquidity of the financial instruments held in the portfolio was excellent. For that reason the valuation for some financial instruments was changed to a price based valuation. Furthermore, reinvestment was mainly done in liquid instruments which resulted in an increase in level 1.

Movements in Level 3 financial instruments measured at fair value

As the portfolio quality in 2010 remained stable there was no material change in the level 3 category.

Sensitivity analysis of unobservable parameters

If the value of financial instruments is dependent on unobservable input parameters, the precise level for these parameters could be drawn from a range of reasonably possible alternatives. In preparing the financial statements, levels for the parameters are chosen from these ranges using judgment consistent with prevailing

market evidence. If all these unobservable parameters are moved simultaneously to the extremes of these ranges as of December 31, 2010, it could have increased fair value by as much as EUR 12 million or decreased fair value by as much as EUR 19.7 million. In estimating these impacts, mainly PDs (probability of default) and market values for equities were stressed.

The following table shows fair values of financial instruments not measured at fair value:

	2010	•	2009		
in EUR million	Fair value	Carrying amount	Fair value	Carrying amount	
ASSETS					
Cash and balances with central banks	5,839	5,839	5,996	5,996	
Loans and advances to credit institutions	12,464	12,412	13,118	13,067	
Loans and advances to customers	128,736	126,695	123,767	124,253	
Financial assets - held to maturity	14,355	14,235	14,810	14,899	
LIABILITIES					
Deposits by banks	20,289	20,154	26,352	26,295	
Customer deposits	116,912	116,648	111,821	112,042	
Debt securities in issue	31,573	31,210	29,643	29,612	
Subordinated liabilities	5,346	5,838	5,778	6,148	

The fair value of loans and advances to customers and credit institutions has been calculated by discounting future cash flows taking into consideration interest and risk effects. Loans and advances were grouped into homogeneous portfolios based on maturity and internal rating. The reduction in fair values compared to the carrying amount is driven by an adverse change in the risks of the assets.

For liabilities without contractual maturities, the carrying amount is recorded at fair value. The fair value of the other liabilities is estimated without assumed credit risk, but with changes in interest rates.

40) Financial instruments per category according to IAS 39

Accruals are reported in other assets.
 Accruals are reported in other liabilities.

41) Audit fees and tax consultancy fees

The following table contains fundamental audit fees and tax fees charged by the auditors (of Erste Group Bank AG and subsidiaries; the auditors primarily being Sparkassen-Prüfungsverband, Ernst & Young and Deloitte) in the fiscal years 2010 and 2009:

in EUR million	2010	2009
Audit fees	15.0	17.5 ¹⁾
Tax consultancy fees	1.9	2.5
Total	16.9	20.0

¹⁾ Fees for capital increase and participation capital amounted to EUR 4.2 million

For auditing services provided by the Group auditors EUR 7.2 million (2009: EUR 10.2 million) was paid by Erste Group. The Group auditors also performed tax consultancies for Erste Group with a value of EUR 0.5 million (2009: EUR 1.1 million).

42) Contingent liabilities

To meet the financial needs of customers, the Bank enters into various irrevocable commitments and contingent liabilities. These consist of financial guarantees, letters of credit and other undrawn commitments to lend amounting to EUR 33,873 million (2009: EUR 37,826 million). Even though these obligations may not be recognised on the balance sheet, they do contain credit risk and are therefore part of the overall risk of the Bank (see Note 37 credit exposure).

Legal proceedings

Erste Group Bank and some of its subsidiaries are involved in legal disputes, most of which have arisen in the course of its ordinary banking business. These proceedings are not expected to have a significant negative impact on the financial position or profitability of Erste Group and/or Erste Group Bank. Erste Group is also subject to the following ongoing proceedings:

Haftungsverbund

In 2002, Erste Group Bank formed the Haftungsverbund with the majority of the Austrian savings banks. The purpose of the Haftungsverbund is to establish a joint early-warning system as well as a cross-guarantee for certain liabilities of member savings banks and to strengthen the group's cooperation in the market.

In competition proceedings before the Austrian cartel court, both a competitor of Erste Group Bank and the Austrian federal competition authority requested the court to set aside the Haftungs-verbund agreements because of an alleged infringement of Article 81 of the EC Treaty (now Article 101 of The Treaty of the functioning of the European Union/TFEU).

In March 2007, the Supreme Court issued a decision confirming that the agreements that constitute the Haftungsverbund are for the most part in compliance with Article 81 of the EC Treaty.

However, the Supreme Court held certain provisions to be anticompetitive on their merits. In its findings, the Supreme Court did not cite any explicit measures that needed to be implemented by Erste Group Bank and the other parties. In April 2008, Erste Group Bank and the Cartel Court reached an understanding on the necessary adjustments to be made. This understanding (commitments within the meaning of section 27 Cartel Act relating primarily to the sharing of data that might have competitive value) was challenged by Erste Group Bank's competitor before the Supreme Court. In October 2008, the Supreme Court set aside the decision of the Cartel Court due to a procedural error and remanded the case to the Cartel Court for reconsideration. Neither the commitments (assuming they are upheld) nor the preceding decision of the Supreme Court affect the consolidation of the Qualifying Capital of the savings banks nor their inclusion as subsidiaries in the consolidated financial statements in accordance with IFRS of Erste Group Bank.

Stockholm Arbitration proceedings

In 2009 a former corporate borrower has initiated arbitration proceedings in Stockholm against a group of lenders, including Erste Group Bank. The plaintiff alleges that arrangements entered into at the peak of the financial crisis between the borrower and the lenders, following the borrower's default, which resulted in the forgiving of the loan - loan amount Erste Group Bank: SEK 400 million - and the transfer of ownership to the lenders of shares in a listed Swedish company should be declared null and void and that the total current value of the shares and compensation for further alleged losses following from such transfer are due to it. With regard to Erste Group Bank, the claimant requested payment in the region of SEK 1 bn, and has since varied its claims in different ways. Erste Group Bank rejects the claim in its entirety as unfounded.

Hungarian Holocaust litigation

In 2010 a group of attorneys has filed a complaint with a U.S. court on behalf of victims of the Holocaust or their heirs against several Hungarian banks in relation to the persecution of Jews in Greater Hungary in 1944. Also Erste Group Bank is named as a defendant. The plaintiffs essentially claim that Hungarian banks improperly benefited from wartime Jewish assets and held on to these assets until today. The assets claimed total \$2 billion in 1944 dollars. The plaintiffs allege that Erste Group Bank is the legal successor to a number of banks that were active during that time in Greater Hungary. Erste Group Bank rejects the claim. Neither Erste Group Bank nor its Hungarian subsidiary bank, which was founded only decades after the end of World War II, view themselves as legal successors to any of the banks mentioned in the complaint. Erste Group Bank does not see any basis for a U.S. court having jurisdiction in this matter.

Solvency ratio (in $\%$) ⁵⁾ 13.5 12.7		10.2	9.2
	Solvency ratio (in %) ⁵⁾	13.5	12.7

¹⁾ Tier-1 ratio - credit risk is the ratio of tier-1 capital (including hybrid capital pursuant to section 23 (4a) and (4b) Banking Act) to the risk weighted assets pursuant to section 22 (2) Banking Act.

The minimum capital requirement as determined under the Austrian Banking Act was fulfilled at all times during the year under review and the prior year.

²⁾ Core tier-1 ratio – total risk is the ratio of core tier-1 capital to the calculation base for the capital requirement pursuant to section 22 (1) Banking Act.

³⁾ Tier-1 ratio – total risk is the ratio of tier-1 capital to the calculation base for the capital requirement pursuant to section 22 (1) Banking Act.
4) Solvency ratio is the ratio of total qualifying capital to the calculation base for the capital requirement pursuant to section 22 (1) Banking Act.

The risk-weighted basis pursuant to section 22 (1) of the Banking Act and the resulting capital requirement are as follows:

in EUR million	20	2009		
	Calculation base/ total risk ¹⁾	Capital requirement ²⁾	Calculation base/ total risk ¹⁾	Capital requirement ²⁾
Risk pursuant to section 22 (1) 1 Banking Act ³⁾	103,950	8,316	106,383	8,510
a) Standardized approach	27,412	2,193	29,940	2,395
b) Internal ratings based approach	76,538	6,123	76,443	6,115
Risk pursuant to section 22 (1) 2 Banking Act ⁴⁾	4,668	373	5,048	404
Risk pursuant to section 22 (1) 3 Banking Act ⁵⁾	11	1	22	2
Risk pursuant to section 22 (1) 4 Banking Act ⁶⁾	11,215	897	12,438	995
Total	119,844	9,587	123,891	9,911

¹⁾ Internal calculation base used for calculation of the tier-1 ratio, core tier-1 ratio and the solvency ratio (capital requirement multiplied by 12.5).

45) Events after the balance sheet date

There were no significant events after the balance sheet date.

²⁾ Capital requirement pursuant to the Banking Act.

³⁾ Risk weighted assets - credit risk.

⁴⁾ Market risk (trading book).

⁵⁾ Commodities risk and foreign exchange-risk, including the risk arising from gold positions, each for positions outside the trading book.

⁶⁾ Operational risk

46) Details of the companies wholly or partly-owned by Erste Group at 31 December 2010

The tables below present material, fully-consolidated subsidiaries, associates accounted for at equity and other investments.

Since IMMORENT Aktiengesellschaft is disclosed here as a sub-group, the single subsidiaries are not listed separately.

AUDITOR'S REPORT (REPORT OF THE INDEPENDENT AUDITORS)¹⁾

REPORT ON THE CONSOLIDATED FINANCIAL STATEMENTS

Sparkassen-Prüfungsverband and Ernst & Young Wirtschaftsprüfungsgesellschaft m.b.H., Vienna, have audited the accompanying consolidated financial statements of Erste Group Bank AG, Wien and its subsidiaries (hereinafter referred to as "the Company"), for the financial year from 1 January 2010 to 31 December 2010. These consolidated financial statements comprise the consolidated balance sheet as at 31 December 2010, and the consolidated statement of comprehensive income, the consolidated cash flow statement and the consolidated statement of changes in equity for the year ended 31 December 2010, and a summary of significant accounting policies and other explanatory notes.

Management's Responsibility for the Consolidated Financial Statements and for the Group Accounting

The management of Erste Group Bank AG is responsible for the group accounting as well as the preparation and fair presentation of these consolidated financial statements in accordance with International Financial Reporting Standards (IFRS) as adopted by the EU. This responsibility includes: designing, implementing and maintaining internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error; selecting and applying appropriate accounting policies; and making accounting estimates that are reasonable in the circumstances.

Auditors' Responsibility and Description of the Type and Extent of the Statutory Audit

Our responsibility is to express an opinion on these consolidated financial statements based on our audit. We conducted our audit in accordance with laws and regulations applicable in Austria and in accordance with International Standards on Auditing, issued by the International Auditing and Assurance Standards Board (IAASB) of the International Federation of Accountants (IFAC). Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

Our audit did not give rise to any objections. Based on the results of our audit in our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the group as of 31 December 2010, and of its financial performance and its cash flows for the financial year from 1 January 2010 to 31 December 2010 in accordance with International Financial Reporting Standards (IFRS) as adopted by the EU.

Statement on the Consolidated Management Report

Laws and regulations applicable in Austria require us to perform audit procedures to determine whether the consolidated management report is consistent with the consolidated financial statements and whether the other disclosures made in the consolidated management report are misleading to the group's position. The audit report must also include a statement as to whether the consolidated management report is consistent with the consolidated financial statements and if the disclosures pursuant to section 243a UGB are appropriate. In our opinion, the consolidated financial statements. The disclosures pursuant to section 243a UGB are appropriate.

Vienna, 1 March 2011

Sparkassen-Prüfungsverband (Prüfungsstelle) (Austrian Savings Bank Auditing Association) (Audit Agency) (Bank auditor)

Gerhard Grabner mp Certified Public Accountant Elisabeth Glaser mp Certified Public Accountant

¹⁾ The report (in the German language, or translations into another language, including shortened or amended versions) may not be made public or used by third parties, when reference is made in part or in whole to the auditor's report, without the express written consent of the auditors.

STATEMENT OF ALL MEMBERS OF THE MANAGEMENT BOARD

We confirm to the best of our knowledge that the consolidated financial statements give a true and fair view of the assets, liabilities, financial position and profit or loss of the group as required by the applicable accounting standards and that the group management report gives a true and fair view of the development and performance of the business and the position of the Group, together with a description of the principal risks and uncertainties the Group faces.

Glossary

Average total shareholder return

Average of the annual total shareholder returns since the IPO in 1997.

Book value per share

Total equity attributable to owner of the parent, of a public company divided by the number of shares outstanding excluding treasury shares.

Cash return on equity

Also referred to as cash-ROE. Calculated as return on equity, but excluding the impact of non-cash items on net profit for the year attributable to owners of the parent such as goodwill impairment and amortisation of customer relationships.

Cash earnings per share

Calculated as earnings per share, but excluding the impact of non-cash items on net profit for the year attributable to owners of the parent, such as goodwill impairments and amortisation of customer relationships.

CEE (Central and Eastern Europe)

Covers the new member states of the EU that joined in 2004 and 2007 as well as the CIS countries and the states that evolved from the former Yugoslavia.

Core tier-1 ratio (total risk in %)

The ratio of tier-1 capital (excluding hybrid capital pursuant to section 23 (4a) and (4b) Banking Act) after regulatory deductions to the calculation base for the capital requirement pursuant to Section 22 (1) Banking Act.

Cost/Income Ratio

General administrative expenses as a percentage of operating income.

Coverage ratio (risk provisions)

Risk provisions as a percentage of non-performing loans excluding collateral.

Dividend yield

Dividend payment of the fiscal year as a percentage of the yearend closing price or the most recent price of the share.

Earnings per share

Net profit for the year attributable to owners of the parent, divided by average shares outstanding.

Interest-bearing assets

Total assets less cash, trading assets, tangible and intangible fixed assets, tax assets and other assets.

Net interest margin

Net interest income as a percentage of average interest-bearing assets, calculated on a monthly basis.

Operating income

Consists of net interest income, net commission income and trading result.

Operating result

Operating income less operating expenses (=general administrative expenses).

Price/earnings ratio

Closing share price of the fiscal year divided by earnings per share. Usually used for valuation comparisons.

Market capitalisation

Overall value of a company calculated by multiplying the share price by the number of shares outstanding.

NPL ratio

Non-performing loans as a percentage of total credit exposure.

Return on equity

Also referred to as ROE – net profit for the year attributable to owners of the parent, as a percentage of average equity. Average equity is calculated on the basis on month-end values.

Risk categories

The classification of credit assets into the risk classes is based on Erste Group's internal rating of customers. Erste Group employs internal rating systems that, for private individuals, have eight rating grades for customers not in default and one grade for customers in default; for all other clients, the internal rating systems have 13 rating grades for customers not in default and one rating grade for those in default.

Risk category - low risk

The borrower demonstrates a strong repayment capacity; new business generally involves clients in this risk class.

Risk category – management attention

The borrower's financial situation is rather good, but his/her repayment ability may be negatively affected by unfavourable economic conditions. New business with clients in this risk class requires adequate structuring of the credit risks, e.g. by way of collateral.

Risk category - substandard

The borrower is vulnerable to negative financial and economic impacts; such loans are managed in specialised risk management departments.

Risk category – non-performing

Non-performing: at least one of the default criteria under Basel II, e.g. total repayment unlikely, interest or principal payment more than 90 days past due, restructuring resulting in a loss to lender, realisation of a loan loss, or opening of bankruptcy proceedings.

Share capital

Total equity attributable to owners of the parent of a company, subscribed by the shareholders at par.

Solvency ratio

The ratio of the sum of tier-1, tier-2 and tier-3 capital, after regulatory deductions, to the calculation base for the capital requirement pursuant to section 22 (1) Banking Act.

Tax rate

Taxes on income as a percentage of pre-tax profit from continuing operations.

Tier-1 ratio (credit risk)

The ratio of tier-1 capital (including hybrid capital pursuant to section 23 (4a) and (4b) Banking Act) after regulatory deductions, to risk-weighted assets (pursuant to section 22 (2) Banking Act).

Tier-1 ratio (total risk)

The ratio of tier-1 capital (including hybrid capital pursuant to section 23 (4a) and (4b) Banking Act) after regulatory deductions, to the calculation base for the capital requirement pursuant to section 22 (1) Banking Act.

Total shareholder return

Annual performance of an investment in Erste Group Bank AG shares including all income streams, such as dividends.
