2 The base year values are based on available input data, such as sustainability reports, some of which only show CO₂ values. If, instead of the CO₂e intensity, only the CO₂ intensity per tonne of cement was available, this was used.

3 The savings banks segment was only included in the target setting for those sectors whose financed emissions were material.

OPERATING TRENDS

APPENDIX

Flat qoq loan development on negative FX impact, muted demand

As expected, slow start to 2024

- Retail business flat qoq with RO and HR as positive outliers, up 3.5% yoy driven by organic growth in HR and SK, inorganic growth in CZ
- Austrian retail demand impacted by government measures, passed by parliament in mid-April, including abolition of stamp duty for first time property buyers and renovation subsidies
- Corporate loans flat qoq, up 3.6% yoy
- FX impact of EUR -1.1bn ytd dented growth

2024 loan growth guidance confirmed at ~ +5% with growth pick-up expected in H2 24, especially in Austria

Q1 24 loan growth drivers

- CZ: qoq decline due to currency depreciation (EUR -0.9bn)
- HU: qoq, yoy decline mainly due to currency depreciation (EUR -0.2bn) and weaker large corporate demand
- HR: strong yoy, qoq performance supported by healthy retail loan demand
- AT/EBOe and AT/SB: expectation of macroprudential relaxation and government support measures weigh on retail loan demand

Customer deposits up 1.1% in Q1 24

Erste Group's favourable deposit mix is a key competitive advantage – overweight retail, sight, EUR deposits

Key Q1 24 deposit drivers

- **Core deposits** (Retail, SME & Savings Banks) stable qoq & yoy
- **Share of retail current account deposits** (of total Retail) slipped to **52.3%** (Q4 23: 53.8%, Q1 23: 57.1%) on continued gradual shift into term and savings deposits
- CZ: qoq increase attributable to volatility in public sector business
- AT/OA: yoy minor decline in Large Corporates

Deposits by clients *

Deposits by currency

*) Split by customer groups, not segments; Retail includes Savings Banks and their retail associated client groups; may contain rounding differences

NII consolidates near record levels

NII grows 4.7% yoy, up 2.6% qoq

- YoY increase driven by favourable interest rate backdrop
- QoQ increase due to strong CEE performance, more than offsetting declines in Austrian retail and SME segments

Key NII drivers in Q1 24

- AT/EBOe and AT/SB: qoq continued rise in deposit pass-through rates, stop of minimum reserve remuneration weigh on NII (yoy)
- AT/OA: qoq NII normalisation following technical adjustment in the previous quarter
- HU: yoy decline due to lower market interest rates, qoq increase driven by non-recurrence of Q4 23 rate cap modification loss one-off and interest cap on corporate deposits in Q1 24
- RS: qoq increase explained by modification loss one-off in Q4 23

Unchanged 2024 NII guidance

- Current projection is for NII to slip by ~3%, with potential pressures being **mostly neutral to bottom line** as mainly affecting the minority-owned savings banks, which benefitted most in the up cycle
- **Headwinds:** expected rate cuts, stop of remuneration of minimum reserves in CZ and euro zone
- **Tailwinds:** volume growth, increased income from bond portfolio
- Timing and magnitude of central bank rate cuts primarily in the euro zone and the Czech Republic will be key driver

- Allocations primarily at the savings banks and Erste Bank Oesterreich due to some defaults in the corporate segment, primarily residential real estate
- Very positive development across Central and Eastern Europe
- **No release of FLI provisions and industry overlays** in Q1 24

2024 guidance confirmed at <25 bps

- Minority-owned savings banks expected to post somewhat higher risk costs, **limiting bottom line impact**
- EUR ~750m of portfolio overlays and FLI provisions available for portfolio/macro deterioration, of which **approx. EUR 200m expected for release in 2024**

NPL and NPL coverage ratios at comfortable levels

- Minor deterioration in AT/EBOe primarily driven by Corporates
- Continued excellent performance in CEE segments
