#### Portfolio decarbonization interim targets 2030

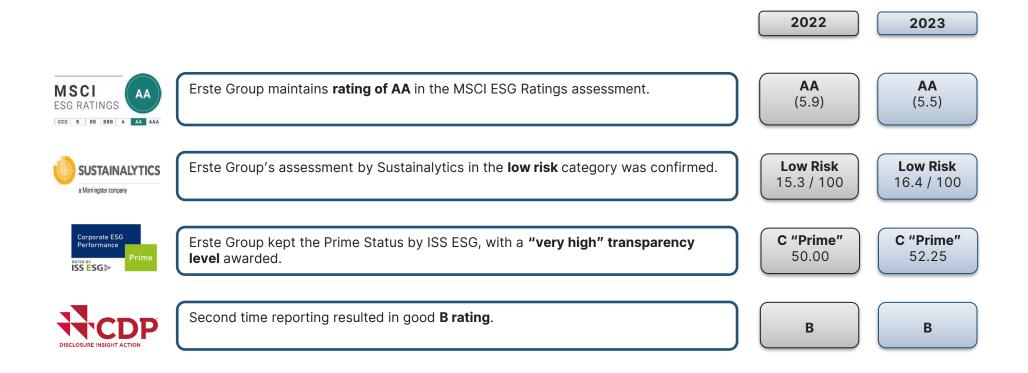

1 The EU members states' updated National Energy & Climate Plans (NECP) in acc. with the Green Deal will allow us to update our target setting for all sectors to be in line with 1.5° scenarios

2 The base year values are based on available input data, such as sustainability reports, some of which only show CO2 values. If, instead of the CO2e intensity, only the CO2 intensity per tonne of cement was available, this was used.

3 The savings bank segment was only included in the target setting for those sectors whose financed emissions were material.

- Retail business performed well, growing by 3.7% year-on-year (EUR +2.6bn), particularly in CZ and HR
- Corporate loans up 5.6% year-on-year (EUR +4.1bn), with healthy demand in SME, CRE and public sector business
- Decline in non-core business (ALM, GM) contributed negatively to overall growth
- Austrian segments, particularly savings banks, trailed CEE growth, as higher interest rates and regulatory measures impacted demand
- FX impact of EUR -0.7bn dented growth

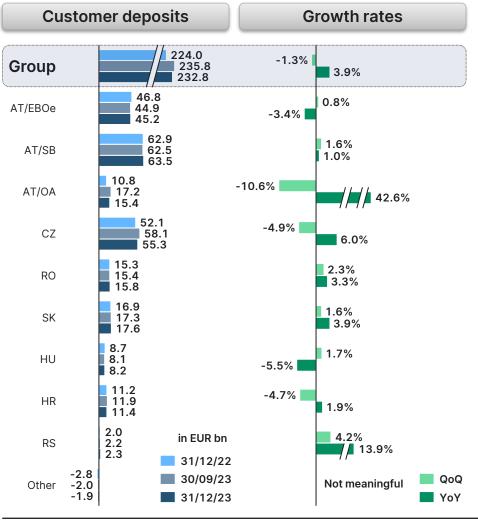

2024 loan growth guidance: ~ +5%

#### Q4 23 loan growth drivers

- Balanced, moderate growth across almost all segments

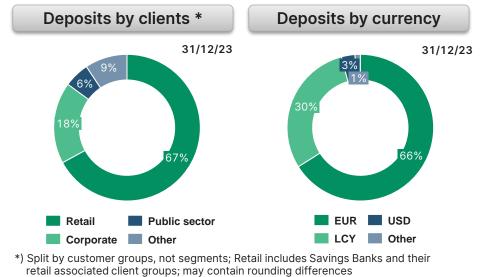

## Customer deposits up by 3.9% in 2023

# Erste Group's favourable deposit mix is a key competitive advantage – overweight retail, sight, EUR deposits

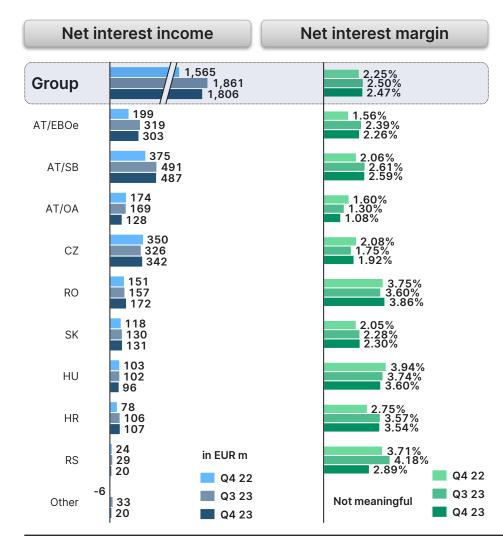

#### Key Q4 23 deposit drivers

- Core deposits (Retail, SME & Savings Banks) up qoq, stable yoy
- Share of retail current account deposits (of total Retail) slipped to 54.9% (Q3 23: 56.1%, Q4 22: 60.3%), as customers gradually diversify into term and savings deposits
- CZ: qoq decline attributable to volatility in public sector business
- AT/OA: qoq decline due to usual business volatility in Group Markets

### NII was key income driver in 2023, growing 21.5%

#### NII grows 15.3% yoy, qoq consolidation driven by:

- Moderately rising deposit pass-through rates, especially in Austria (now at 23%), led to higher interest expense
- Modification losses as a result of temporary rate caps in HU and RS
- Stop of minimum reserve remuneration in euro zone and CZ

#### Key NII drivers in Q4 23

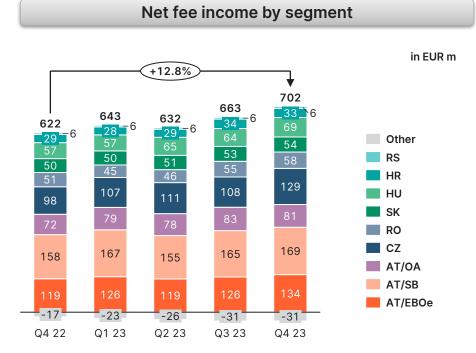

- AT/EBOe and AT/SB: moderately rising deposit pass-through rates, stop of minimum reserve remuneration
- AT/OA: mostly technical adjustment fully offset by positive impact in Other segment and lower profitability in money market business

#### 2024 NII to consolidate after historic upswing

- Current projection is for NII to slip by ~3%, with potential pressures being mostly neutral to bottom line as mainly affecting the minorityowned savings banks, which benefitted most in the up cycle
- Headwinds: expected rate cuts, stop of remuneration of minimum reserves in CZ and euro zone
- Tailwinds: volume growth, increased income from bond portfolio
- Timing and magnitude of central bank rate cuts primarily in the euro zone and the Czech Republic will be key driver
