

Erste Group improves net profit to EUR 346.5 million in Q1 2012 - EBA capital requirement already met as of March 2012

30.04.2012

Highlights ^[1]

Net interest income improved by 2.7% from EUR 1,302.0 million in Q1 2011 to **EUR 1,336.9 million** in Q1 2012. At the same time, **net fee and commission income** declined by 5.5% to **EUR 430.3 million** (Q1 2011: EUR 455.2 million), mainly as a result of weaker securities business. The deterioration in **net trading result** from EUR 236.7 million to **EUR 93.6 million** was due to valuation gains in Q1 2011 which did not recur in Q1 2012. The underlying trading performance remained solid.

As a result, **operating income** declined by 6.7% from EUR 1,993.9 million in Q1 2011 to **EUR 1,860.8 million**. Reflecting continued strict cost management, **general administrative expenses** improved by 1.9% from EUR 963.0 million in Q1 2011 to **EUR 945.1 million**. This led to an **operating result** of **EUR 915.7 million** (Q1 2011: EUR 1,030.9 million), which was materially impacted by the weaker net trading result. Hence, the **cost/income ratio** was **50.8%** (Q1 2011: 48.3%).

Risk costs rose by 26.2% from EUR 460.1 million to **EUR 580.6 million** in Q1 2012 or to 172 basis points of average customer loans. This was mainly due to additional provisions in Hungary in the amount of EUR 75.6 million relating to the interest subsidy scheme for performing FX loans imposed by legislation as well as in Romania in the amount of EUR 98.6 million, leading to a rise in the NPL coverage ratio. Asset quality remained stable in Austria, the Czech Republic and Slovakia. Overall, the **NPL ratio** rose to **8.8%** as of 31 March 2012 (year-end 2011: 8.5%), while the **NPL coverage ratio** improved to **61.9%** (31 December 2011: 61.0%).

The strong improvement in **other operating result** to **EUR 131.2 million** was exclusively due to one-off income of EUR 250.6 million from the buy-back of tier 1 and tier 2 instruments.

Net profit after minorities^[2] rose by 7.8% to **EUR 346.5 million** in Q1 2012, while **return on equity** also improved from 9.6% in Q1 2011 to **11.2%**.

Supported by a strong bottom-line performance and a positive development in the available-for-sale reserve, **shareholders' equity**^[3] rose significantly to **EUR 12.8 billion** (year-end 2011: EUR 12.0 billion). **Core tier 1 capital** (excluding retained earnings for Q1 2012) improved markedly, to **EUR 11.4 billion** (year-end 2011: EUR 10.7 billion), due to the recognition of collateral in Romania in line with international rules (IFRS) and the Austrian Banking Act. Continued reductions in non core business and successful RWA optimisation resulted in a decline of **total risk-weighted assets** to **EUR 111.8 billion** as of 31 March 2012 (year-end 2011: EUR 114.0 billion). This resulted in an **EBA capital ratio** of **9.7%** as of 31 March 2012 (year-end 2011: 8.9%) and a **core tier 1 ratio** (total risk; Basel 2.5) of **10.2%** (year-end 2011: 9.4%).

Total assets, at **EUR 216.7 billion**, were up 3.2% from EUR 210.0 billion at year-end. The **loan-to-deposit ratio** improved to **110.2%** as of 31 March 2012 (year-end 2011: 113.3%) on the back of increased customer deposits. Overall lending volume remained stable at EUR 134.8 billion.

"With a first quarter net profit of EUR 346 million Erste Group made a strong start to 2012. The operating performance was equally satisfactory, when allowing for the exceptionally strong net trading result in the first quarter of 2011", said Andreas Treichl, Chief Executive Officer of Erste Group Bank AG, when presenting the results for the first quarter of 2012. "We also made excellent progress on the capital front. Even adjusted for the Romanian effect and excluding retained earnings, the EBA capital ratio - at 9.1% - surpassed the regulatory requirement of 9% for 30 June 2012", Treichl continued. "While the business environment continued to be difficult in Romania and Hungary, the important core markets Austria, Czech Republic

and Slovakia continued to perform very well", Treichl concluded.
