

Erste Group Issues 58 New Bonus Certificates

14.02.2014

Maturities Between 4 and 14 Months

Return Potential of up to 35%

Underlying Instruments are Austrian Stocks, Indexes and Precious Metals

With immediate effect, Erste Group enlarges its product offerings by 58 new bonus certificates. The selection includes underlying instruments such as gold and silver, as well as the CECE index, the ATX real estate index, Erste Group, Immofinanz, OMV and many more. "With this, our selection of bonus certificates will be significantly enhanced. The focus is on short maturities of between 4 months up to slightly over a year", explains Andre Albrecht, expert for structured products at Erste Group.

How Does a Bonus Certificate Work?

Bonus certificates provide investors with interesting profit opportunities: If the price of the relevant underlying instrument doesn't touch the specified barrier price during the term, the bonus amount is paid out. In case the underlying instrument's price declines below the barrier, the bonus lapses, and the investor is credited the price of the underlying at the maturity date. This results in two advantages: in a prolonged sideways trend, the investor benefits from the bonus. In addition, he or she is protected against price losses up to the barrier.
