VII. Summary of the Analysis and Conclusions

a) An explanation of the relative importance the firm gave to the execution factors of price, costs, speed, likelihood of execution or any other consideration including qualitative factors when assessing the quality of execution:

For obtaining the best possible result, Erste Group Bank AG takes into account different execution factors, such as price, costs, speed and likelihood of execution. For retail clients the respective analysis is focused on consideration of the price of the financial instrument and the costs relating to the order. Further information about the relative importance of factors can be found in the applicable execution policy of Erste Group Bank AG (available via [MiFID | Erste Group Bank AG](#))

b) A description of any close links, conflicts of interests, and common ownerships with respect to any execution venues used to execute orders:

Regarding the description of common ownerships and close links, we refer to the details of the companies wholly or partly owned by Erste Group Bank AG (available via [MiFID | Erste Group Bank AG](#)). Regarding potential conflicts of interest, internal policies and controls of Erste Group Bank AG ensure that such conflicts cannot arise.

c) A description of any specific arrangements with any execution venues regarding payments made or received, discounts, rebates or non-monetary benefits received:

Erste Group Bank AG does not have in place any specific arrangements with any execution venues regarding payments made or received, discounts, rebates or non-monetary benefits. The fees are according to the fee models published by the execution venues.

d) An explanation of the factors that led to a change in the list of execution venues listed in the firm's execution policy, if such a change occurred:

Compared to the previous year, Erste Group Bank AG has added two additional MTFs to the list of execution venues (MTF Tradegate, MTF OTC Markets US) as well as New Zealand and Taiwan Stock exchange can be accessed via broker, mainly based on considerations of the factors price/costs and speed/likelihood of execution.

e) An explanation of how order execution differs according to client categorisation, where the firm treats categories of clients differently and where it may affect the order execution arrangements:

Order Execution differs per client categorization as Erste Group Bank AG applies different weights to execution factors for retail and professional clients. The relative importance of those factors for the different client categories can be found in Erste Group Bank AG's execution policies (available via [MiFID | Erste Group Bank AG](#)).

f) An explanation of whether other criteria were given precedence over immediate price and cost when executing retail client orders and how these other criteria were instrumental in delivering the best possible result in terms of the total consideration to the client:

Under very rare circumstances the results pertaining to the relative weights of execution factors may be overridden or changed. Such circumstances may materialize when listing information has been wrongly delivered by our external data providers or when the selected market lacks liquidity. Such rare circumstances are specifically documented.

g) An explanation of how the investment firm has used any data or tools relating to the quality of execution, including any data published under Delegated Regulation (EU) 2017/575:

Erste Group Bank AG uses reports on the quality of execution for specific venues by comparing the values given in these reports between each other and with market data within our general factor-weighting procedure.

h) Where applicable, an explanation of how the investment firm has used output of a consolidated tape provider established under Article 65 of Directive 2014/65/E:

Erste Group Bank AG uses reports on the quality of execution for specific venues by comparing the values given in these reports between each other and with market data within our general factor-weighting procedure.
