

**Make your
own Christmas
decorations with us**

What do you need?

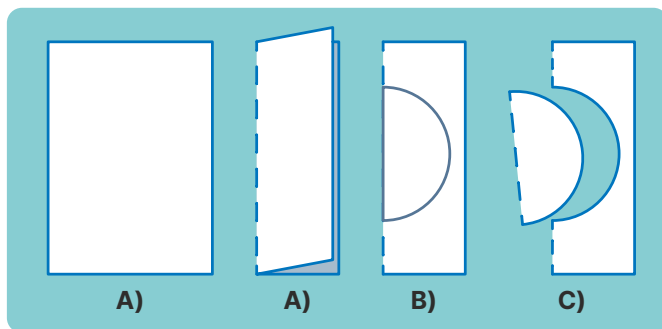

Thin paper, which can even be sufficiently large remnants of wrapping paper. Scissors, a pencil, glue, clothespins and ribbon or string.

Template

You can print out any of the included patterns, or you can come up with and draw your own shape.

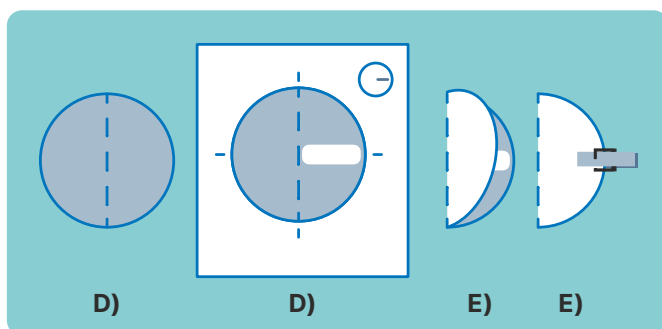

1) Let's do it

- A)** Fold the paper with the nicer side on the inside.
- B)** Apply the template and trace it with a pencil.
- C)** Cut it out. You need **20 of the same parts** for one decoration.

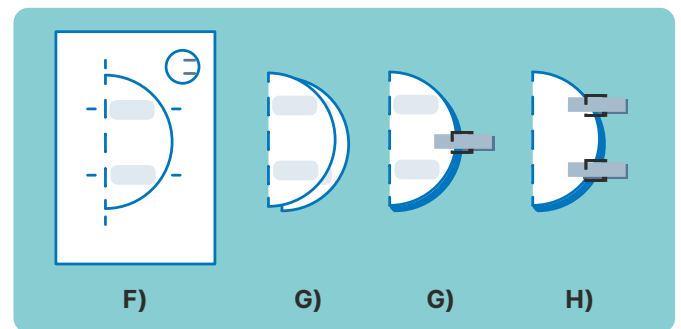

2) First gluing

- D)** Glue each piece on the inside in the middle according to the drawings on pages 4-6. The glue must not get on the outer edge, so preferably use it sparingly.
- E)** Fasten the glued parts together with the clothespins until the glue dries.

3) Second gluing

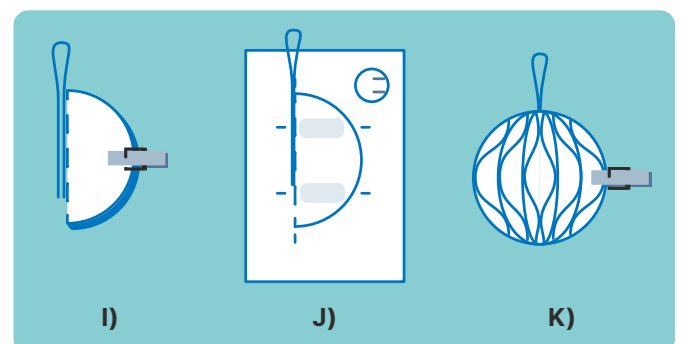

- F)** Apply the glue on the outside according to the second drawing.
- G)** Successively glue all of the parts together and fasten them in place.

- H)** Leave the last part without glue for now. Coat the ridge with glue and let it dry properly. You can colour the outer edge with a metallic marker.

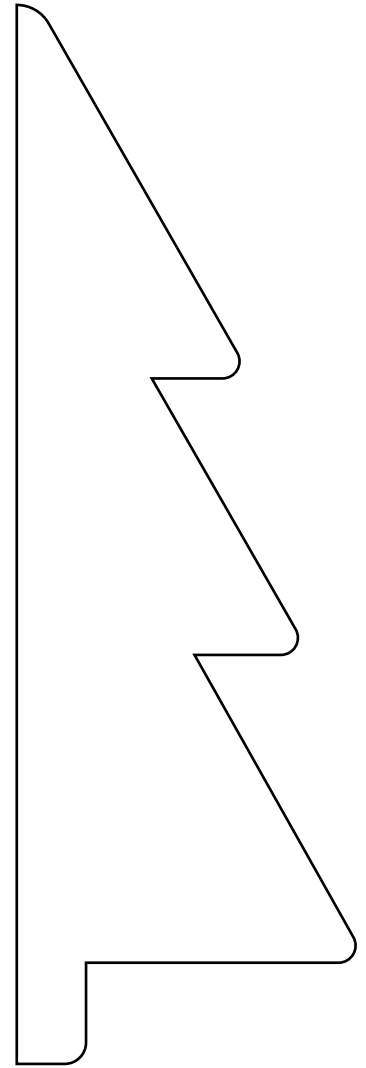

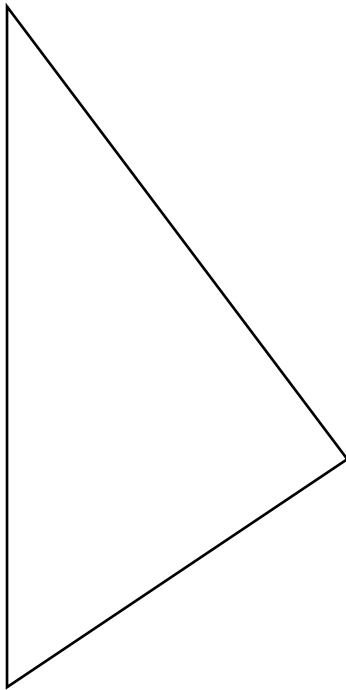

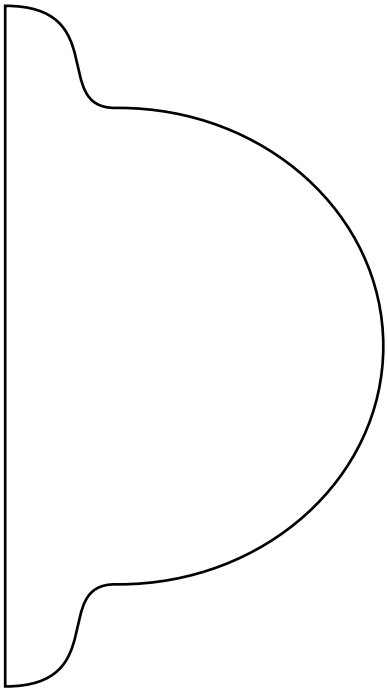

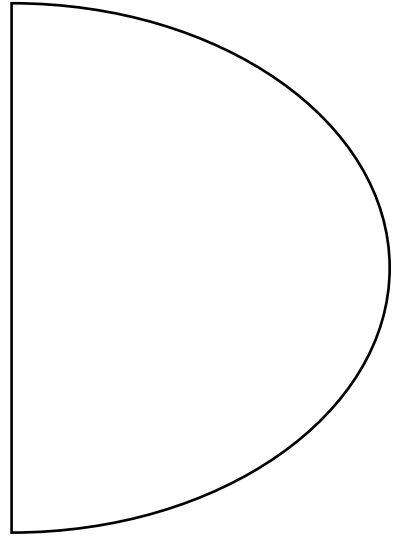

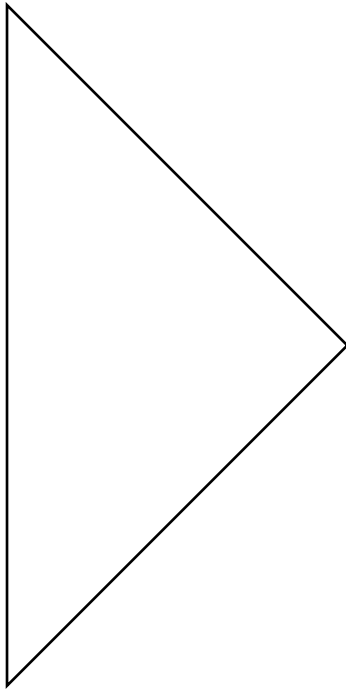

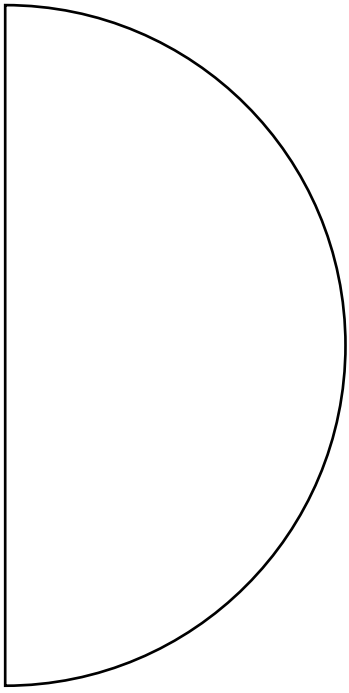

4) And we're almost done

- I)** Glue the string or ribbon to the ridge.

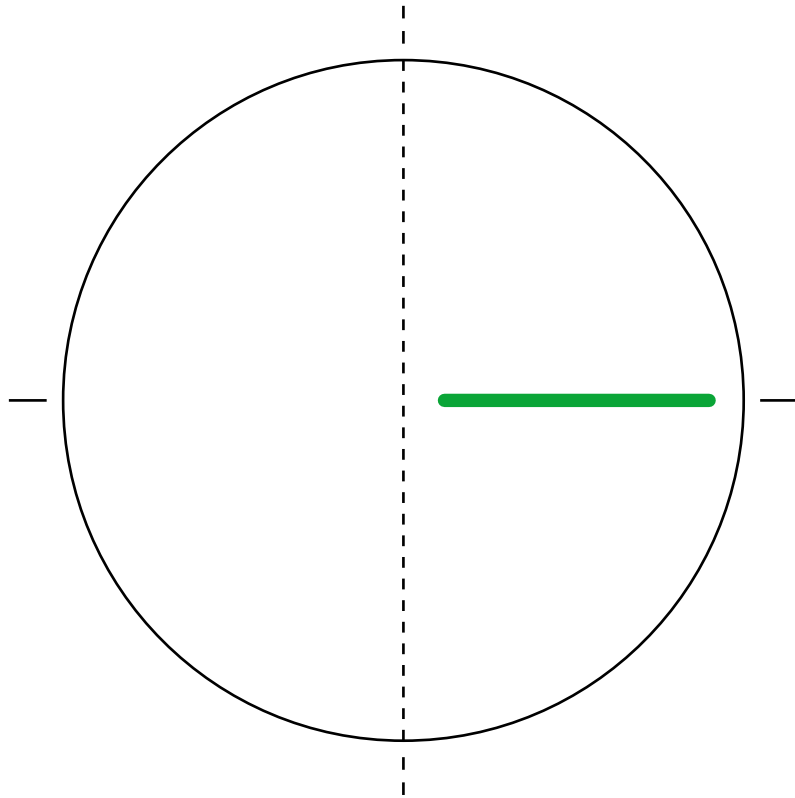

- J)** On the upper side, repeat "second gluing".
- K)** Unfold the shape, nicely join the sides together and fasten them in place.

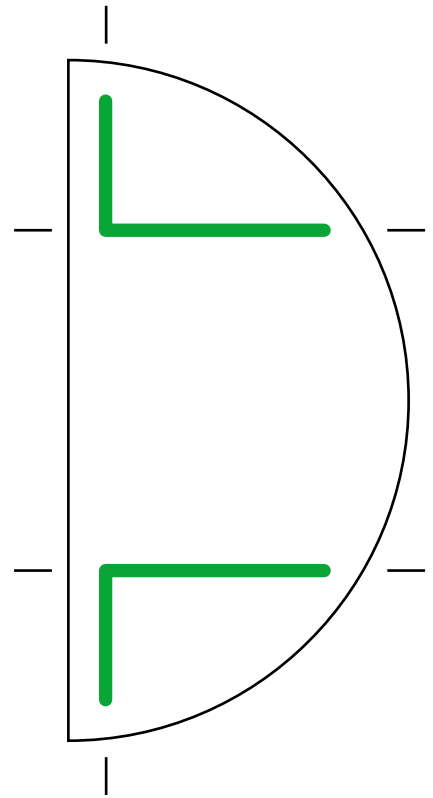

Once the glue has dried, put the decoration on your Christmas tree.
