Opening Statement

Aleš Poklop

Chairman of the Board of Directors

Ladies and gentlemen,

Let me present you the Interim Report on economic standing of Česká spořitelna – penzijní společnost. I would like to remind what the first half of 2015 brought to the ČS penzijní společnost funds and what development we are expecting in the field of the pension security.

The Transformed Fund of additional pension savings increased in the first half of the year by 3 billion CZK and reached 58.9 billion CZK as at 30th June 2015. The Transformed Fund, which follows the strategic goal of reaching the highest appreciation possible as for the financial assets management while keeping low rate of financial risks, showed the profit of 209 million CZK in the first half of the year despite the negative development on the bond market.

The appreciation of our participation funds oscillates on the average figures of the market. In the first half of 2015 the value of pension unit of the Conservative Fund grew by 0.02%, the Balanced Fund by 1.14% and the Dynamic Fund by 2.17%. All participation funds have been growing. As at 30th June 2015, the Conservative Fund reached over 1.96 million CZK and is thus the largest fund on the additional pensi-

on savings market. Česká spořitelna – penzijní společnost has been the market leader in the total number of clients. You can find more detailed information on the participation funds in the quarterly reports of the funds, which we regularly publish on www.ceskapenzijni.cz.

With regard to the fact that the pension savings plan is going to be terminated we have decided not to expose our clients to short-term investment risks. The funds of our clients in the pension funds have not been and are not going to be invested according to the long-term investment strategies, but will remain deposited mainly on the money market. They will be protected from the risk of value drop and the rates of pension funds will not drop. The expected return of all pension funds is still around on the level of money market return. The financial means of the second pillar clients are safely deposited and at the same time with as high liquidity as to be able to be paid out in accordance with legal changes. The pension funds are thus now administered only passively and management or performance fee is not applied.

In the course of the first half of 2015 we were concerned with the legal changes of the pension saving plan and additional pension savings

that are being prepared. Within the Association of Pension Funds of the Czech Republic we try to make the parameters of the additional pension savings product more attractive both for the clients and for the sellers.

In the period to come, we will focus on economic growth and professional administration of entrusted funds of our clients. The basic priority for the upcoming period is providing the best possible services, enough information to our clients and high-quality appreciation of funds administered. We want to be a good partner for those who rely on themselves.

Ladies and gentlemen, in the conclusion let me ensure you that the results we have reached are an obligation and challenge for us in the upcoming period. We work hard to gain your trust and will care of our clients well. Thank you for the favour that you show us and that is greatly appreciated by me as well as all my colleagues from the team of Česká spořitelna – penzijní společnost.

Yours truly,

Aleš Poklop
Chairman of the Board of Directors

2. Fund characteristics

Investment into a Conservative Participation Fund is suitable for those participants who are neither interested nor informed about events on capital markets and at the same time they are looking for the complex solution of their investment divided between currency and bond market. The Conservative Participation Fund is designed for those participants who prefer fixed-rate financial instruments and for less-experienced investors with minimum investment horizon of one year. The goal of the investment policy is to provide to participants a long-term appreciation of the funds invested placed mainly into the instruments of money market, government bonds, and other debt securities rated at the investment level permitted by law on additional pension savings. The interest rate risk is actively controlled, the investment denominated in foreign exchange are fully hedged.

3. Depository

Balanced Participation Fund of additional pension savings with government contribution

Česká spořitelna – penzijní společnost, a.s.

Interim Report 2015

1. Basic information

Balanced Participation Fund of the additional pension savings with government contribution Česká spořitelna – penzijní společnost, a.s. The decision upon which the permit to create pension fund was granted, was issued by the Czech National Bank on 17th December 2012, reference number 2012/12487/570.

2. Fund characteristics

Investment into a Balanced Participation Fund is suitable for those participants who seek a long-term solution for their investment, evenly distributed among currency, bond, and share market. With regard to the nature of investment, the participant should be aware of the fact that the value of the investment can – in the medium term – decrease under the initial value. The Balanced fund is thus suitable for rather experienced investors, who prefer fixed-rate financial instruments, yet want to invest also on share market with minimum investment horizon of three years. The investment into the Balanced Participation Fund is also suitable for less-experienced investors as part of broadly diversified portfolio. The goal of the investment policy is to provide to the participants long-term appreciation of funds invested placed mainly into the instruments of money market, government bonds, and other debt securities and shares or similar securities representing the share on a legal entity. The credit and interest risk is actively controlled; unhedged investment denominated in foreign exchanges can make 25% maximum of the value of fund assets.

2. Fund characteristics

Investment into the Balanced Pension Fund is suitable for those participants who are looking for the complex and long-term solution for their investment, distributed in the ratio among currency, bond, and share market. With regard to the nature of the investment, the participants should be aware of the fact that their investment can drop under the initial value in the medium term. The Balanced Pension Fund is thus suitable for rather experienced investors who prefer fixed-rate financial instruments, yet want to invest also on share markets with minimum investment horizon of three years. The investment into the Balanced Pension Fund is also suitable for less-experienced participants as part of broadly diversified portfolio. The goal of the investment policy is to provide to the participants long-term appreciation of the funds invested, allocated mainly into the money market instruments, government bonds, and other debt securities or shares or similar securities representing a share on a legal entity. The credit and interest risk is actively controlled; unhedged investment denominated in foreign exchanges can make at most 25% of the value of the fund assets.
