Independent auditor's report

To the Supervisory Board and Shareholders of Sparkasse Banka AD Skopje

Report on the consolidated financial statements

We have audited the accompanying consolidated financial statements of Sparkasse Banka AD Skopje and its subsidiary (the "Group"), which comprise the consolidated balance sheet as of 31 December 2024 and the consolidated income statement and the consolidated statement of comprehensive income, consolidated statement of changes in equity and reserves and consolidated statement of cash flows for the year then ended, and a summary of significant accounting policies and other explanatory information.

Management's responsibility for the consolidated financial statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with the regulation of the National Bank of the Republic of North Macedonia and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audit. We conducted our audit in accordance with Standards on auditing applicable in the Republic of North Macedonia (the "Standards"). The Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control.

An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Group as of 31 December 2024, and of its financial performance and its cash flows for the year then ended in accordance with the regulations of the National Bank of the Republic of North Macedonia.

Report on other legal and regulatory requirements

Consolidated Annual report prepared by the Management in accordance with the requirement of the article 384 of the Company Law.

Management is also responsible for the preparation of the consolidated Annual accounts and consolidated Annual Report of the Group, which were approved by the Supervisory Board of the Group.

As required by the Audit Law, we report that the historical information presented in the consolidated Annual Report prepared by Management of the Group in accordance with article 384 of the Company Law, is consistent, in all material respects, with the financial information presented in the consolidated Annual Accounts and audited consolidated financial statements of the Group as of 31 December 2024 and for the year then ended..

NOTES TO THE SEPARATE FINANCIAL STATEMENTS

December 31, 2024

1. INTRODUCTION

a) General Information

Sparkasse Bank AD Skopje (hereinafter referred to as "The Group") is a shareholding company established in the Republic of North Macedonia. The company is headquartered at st.Vasil Iljovski 14, Skopje, Republic of North Macedonia.

The Group is licensed by the National Bank of the Republic of North Macedonia for performing the following activities:

- Collecting deposits and other recurrent sources of funds;
- Lend in the country, including factoring and financing commercial transactions;
- Lend abroad, including factoring and financing commercial transactions;
- Issuance and administration of payment instruments (payment cards, cheques, traveler's cheques, bills of exchange);
- Financial leasing;
- Foreign exchange operations;
- Domestic and international payment operations, including purchase/sale of foreign currency funds;
- Issuing payment guarantees, backing guarantees and other forms of security;
- Providing services of renting safe deposit boxes, depositories and depot;
- Trade in instruments at the money market;
- Foreign exchange operations (including commodities trading);
- Trading with securities;
- Trading with financial derivatives;
- Safeguarding of securities for clients;
- Giving advices to legal entities in relation to the structure of capital, business strategy or other related issues, or providing services related to merging or acquisition of legal entities;
- Sale of insurance policies;
- Intermediating in concluding agreements for loans and borrowings;
- Data collection and analysis of companies' credit rating;
- Economic and financial consulting;
- Intermediating in selling insurance policies;
- Purchasing and selling, guaranteeing or placement of securities issuance;
- Rendering services of custody bank to investments and pension funds;
- Marketing and sale of capital-funded pension insurance.

The Group operates in the Republic of North Macedonia with a network of 36 branches. (2023:36 branches).

The Group is a member of Steiermärkische SPARKASSE headquartered in Graz, Austria, owing 96,55% (2023: 96,55%) of The Group's capital. Indirect and ultimate owner of The Group is ERSTE Bank, Republic of Austria.

As of December 31, 2024, The Group owns 49% of the voting shares of SPARKASSE LEASING DOO Skopje, as well as 100% of the shares of the company for construction, trade and services S-AMC 1 DOOEL Skopje, which until June 3, 2016 was previously owned by SPARKASSE LEASING DOO Skopje.

S-AMC 1 DOOEL Skopje is a company which operates with buying and selling of own real estate. It was initially founded on December 16, 2014 by SPARKASSE LEASING DOO Skopje with a special purpose of completion and sale of residential buildings, set as collateral by the legal entity to which The Group had dysfunctional claim.

The shares of The Group are listed on the official market on the Macedonian Stock Exchange and are traded in the sub-segment of joint stock companies with special reporting obligations, the ID quotation code is the following:

<u>Symbol</u>	<u>ISIN code</u>

NOTES TO THE SEPARATE FINANCIAL STATEMENTS
December 31, 2024

1. INTRODUCTION (continued)

a) General Information (continued)

The audited financial statements were approved by the Supervisory Board of The Group on April 24, 2025.

b) Basis of Preparation of the Consolidated Financial Statements

Standards and Interpretations effective in the current period for Consolidated Financial Statements

The Group's Consolidated financial statements (unconsolidated) were prepared in accordance with the Company Law (Official Gazette of the Republic of Macedonia No, 28/04, 84/05, 71/06, 25/07, 87/08, 42/10, 48/10, 24/11, 166/12, 70/13, 119/13, 120/13, 187/13, 38/2014, 41/2014, 138/14, 88/15, 192/15, 6/16, 30/16, 61/16, 64/18, 120/18 and 290/20 and Official Gazette of the Republic of North Macedonia No 215/2021 и 99/22), Banking Law (Official Gazette of the Republic of Macedonia No 67/07, 90/09, 67/10, 26/13, 15/15, 153/15, 190/16 and 7/19 and Official Gazette of the Republic of North Macedonia No. 101/19, 122/21), the by laws issued by the National Bank of the Republic of North Macedonia (hereinafter referred to as "the NBRNM"), and in accordance with the Decision on the Methodology for Recording and Valuation of Accounting Items and Preparation of Financial Statements (hereinafter referred to as "Methodology") (Official Gazette of the Republic of North Macedonia No 83/17) and the Decision on the Types and Contents of Banks' Financial Statements, and the notes to those statements (Official Gazette of the Republic of North Macedonia No 83/17 and 149/18) as prescribed by the NBRNM, applicable since January 1, 2018.

The criteria for classification of active balance sheet and off-balance sheet items according to the degree of risk are defined in the Decision on the methodology for credit risk management. As of January 1, 2024, a new decision Official Gazette 57/23 and 27/24 will be in force.

Application of the principle of continuity in the preparation of financial statements

The financial statements are prepared on the basis of the principle of continuity. In its assessment, The Group's management takes into account The Group's financial position, current intentions, profitability of the business as well as the availability of financial resources.

Standards that have been published, but are not yet in force

As of the date when these consolidated financial statements were approved for issue by The Group's Supervisory Board, there are no standards published by the NBRNM that are not yet applicable.

The Consolidated financial statements of The Group are presented in accordance with the form prescribed in the Decision on the Types and Contents of the Financial Statements of The Groups ("Official Gazette of the Republic of North Macedonia" No.83/17, 149/18)

The Group's management estimates the impact of the changes in IAS, new IFRS, and their interpretations on the financial statements in a way as it's incorporated in the Methodology, as well as the requirements for the form and contents of certain balance sheet schemes under the Decision and the valuation of assets, liabilities, revenues and expenses under the Methodology requirements.

As of 1.1.2025, the application of International Financial Reporting Standard (IFRS) 16 "Leases" as amended by the Decision on the Methodology for Recording and Valuation of Accounting Items and for the Preparation of Financial Statements ("Official Gazette of the RSM" No. 275/2024) will come into force, according to which banks using leased assets, which, in accordance with the provisions of the previous methodology, were classified as operating leases, are obliged, upon commencement of the application of the amendments to the Methodology, to re-evaluate all leases as of December 31, 2024, and on January 1, 2025, to classify and measure them in accordance with the provisions of this Resolution. The Group has made a revaluation of all lease agreements and the effect of the application of the amendments to the regulation for active lease agreements on 1.1.2025, the value of the right-of-use assets is MKD 100.692 thousand and the value of the liabilities is MKD (100.692) thousand.

NOTES TO THE SEPARATE FINANCIAL STATEMENTS

December 31, 2024

These financial statements have been prepared in accordance with the historical cost principle, except for the valuation of investment in financial assets available for sale which have been stated at fair value, based on the assumption of the principle of continuity.

1. INTRODUCTION (continued)

b) Basis of Preparation of the Consolidated Financial Statements (continued)

Presentation of the Consolidated financial statements

The presentation of the Consolidated financial statements in accordance with the Decision on the Types and Contents of Banks' Financial Statements, and the notes to those statements, prescribed by NBRNM, requires the use of best estimates and reasonable assumptions by The Group's management, that affects the presented values of assets and liabilities, as well as revenues and expenses within the reporting period. These estimates and assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis for estimation of the carrying amounts of assets and liabilities for which no other data is available. Actual results in subsequent period may differ from these estimates. The presented Consolidated financial statements are expressed in thousands of Denars (MKD thousand). The Denar represents the functional and reporting currency of The Group for the purpose of reporting to NBRNM.

The Group has also prepared consolidated financial statements for The Group and its subsidiary ("Group"). In consolidated financial statements, the subsidiary is fully consolidated. Consolidated financial statements are available on The Group's website.

Use of estimates and assumption

The preparation of the Consolidated financial statements pursuant to the Decision on the Methodology for Recording and Valuation of accounting Items and for Preparation of the Financial Statements and the Decision on the Types and Contents of Banks' Financial Statements, prescribed by NBRNM, requires management to make judgements, estimates and assumptions that affect the reported amounts of assets, liabilities, contingent assets and contingent liabilities on the date of the financial statements and income and expenses during the reporting period. These estimates and assumption are based on the management's best knowledge of the current events and actions, and previous experience as well.

Impairment losses on loans and advances

The Group is considering a portfolio of loans and demands to assess the impairment on a monthly basis. In determining whether an impairment should be expressed in the consolidated Income Statement, The Group is considering whether there is noticeable data suggesting that there is a measurable reduction in the estimated future cash flow from a loan portfolio before the reduction can be identified by an individual loan in that portfolio. This evidence may include notable data indicating that there is an unfavorable change in the payment of The Group's recipients, or in state or local economic conditions relating to non-compliance with The Group's asset obligations. Management uses estimates based on experience of historically recorded asset losses at credit risk and objective evidence of impairment similar to those in the portfolio when the future cash flow is projected. The methodology and assumptions used for estimating both the amount and timing of future cash flows are reviewed on a continuous basis to reduce any differences between loss estimates and actual loss occurred.

An individual review is carried out for Group 3 assets that have been assessed as non-functional, based on information about significant financial problems faced by the client in connection with breach of contractual obligations, such as arrears in the settlement of obligations, restructured credit obligations, and the likelihood that the client will initiate bankruptcy proceedings. For the rest of the portfolio, group value adjustments are made that are not evaluated on an individual basis. The financial asset group determines whether the expected loss of the loan should be taken into account for 12 months or for the entire life of the loan. The calculation of expected credit loss is based on the probability of default and loss due to default, which is calculated using historical data and statistical modeling, as well as predicted macroeconomic parameters. The models used to estimate future risk parameters are validated on a regular annual basis.

During 2022 as a result of the current geopolitical crisis, The Group implemented new Stage Overlay criteria for industries that, according to the analysis by the Steiermaerkische Sparkasse Group, can potentially be affected by this crisis, namely Cycle consumer products, Energy, Metals and Chemicals. The same criteria continued to apply during 2023 until 30.06.2024. In June, the Stage Overlay and Stage 2 customer transfer was lifted for energy industry clients and they were classified into appropriate risk categories in accordance with The Group's IFRS 9 methodology. The Group continued to apply only

NOTES TO THE SEPARATE FINANCIAL STATEMENTS
December 31, 2024

the Stage Overlay measure as a result of future economic uncertainty and a potential recession from the Ukraine crisis (applied to the portfolio as of 30.06.2022). The measure covers the credit rankings of legal

1. INTRODUCTION (continued)

b) Basis of Preparation of the Consolidated Financial Statements (continued)

Use of estimates and assumption(continued)

entities in industrial activity Cyclical consumer products and their calculated probabilities of non-collection for the first year is higher than 250 basis points. Included in this measure were also customers in the Metals and Chemical industries and simultaneously falling into a cyclical industry, and the criterion of calculating the probability of non-charge for the first year higher than 250 basis points was applied. As of November 2024, the Stage Overlay measure for the credit ratings of entities in the Cyclical Consumer Products industry has been replaced by the new Industry Stage Overlay measure. According to the categorized risk profile of the industry and the criterion applied, the calculated probability of non-charge for the first year higher than 250 basis points is applied, the "Industry Stage Overlay" rule applies.

That is, according to the current assessment and categorization of the risk of industrial activity

- Risk profile "high" or
 - A risk profile of 'medium' and a bank's 'hold' or 'decrease' risk strategy would be categorized for Stage Overlay only if the criterion of probability of default for the first year is higher than 250 basis points.
- The Group used FLI (forward looking information) to measure Expected credit losses. The most important assumptions in the FLI (forward looking information) concept and which correlate with the level of Expected credit losses and their assigned average values are as follows for December 31, 2024.

Macro Variable	Scenario	Assigned weight	2025	2026	2027
GDP growth	Downside	49%	0,40	0,39	0,42
	Baseline	50%	2,60	3,30	3,10
	Upside	1%	4,95	5,65	5,45
Inflation rate	Downside	49%	4,60	6,81	5,45
	Baseline	50%	2,70	3,50	3,20
	Upside	1%	0,70	1,50	1,20
Unemployment rate	Downside	49%	14,90	14,54	14,05
	Baseline	50%	11,70	11,40	11,00
	Upside	1%	10,65	10,35	9,95

To include different macro scenarios, The Group uses three different scenarios (Negative, Basic, Positive).

The basic scenarios are taken from IMF forecast data. The negative scenario is expertly stressed according to the expected stressed economic movements of macro variables. During 2024, The Group has implemented two FLI (forward-looking information) scenarios in June and November 2024.

Off-Balance Sheet Records

In the normal course of business, The Group enters into credit commitments recorded on off-balance sheet accounts, which primarily include financial guarantees and letters of credit. These financial liabilities are recorded in the Consolidated Balance Sheet when they can be recovered. Provision for impairment of off-balance contingent liabilities is presented within the "Impairment of Financial Assets" section within this Note and is presented as a liability in the Consolidated Balance Sheet.

Changing the ponder from negative to basic scenario will lead to a decrease in the reservation of damage losses.

Fair Value of Financial Instruments

Fair value is defined as the price that would be received to sell an asset or paid to settle a liability under market conditions. Detailed information on the fair value of the financial instruments is given in Note 5.

NOTES TO THE SEPARATE FINANCIAL STATEMENTS
December 31, 2024

1. INTRODUCTION (continued)

b) Basis of Preparation of the Consolidated Financial Statements (continued)

Use of estimates and assumption(continued)

The estimates and assumptions are reviewed on a continuing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if it affects only that period, or in the period of estimation and future periods if the revised estimation affects both current and future periods.

Information regarding the significant areas of estimation uncertainty and critical judgments in applying the accounting policies with the most significant impact on the amounts disclosed in the financial statements are presented in Note 1 d) to the financial statements.

The Group's financial statements are prepared in accordance with the accounting policies disclosed in Note 1 c) to the Consolidated financial statements.

The accounting policies presented below have been applied consistently to all periods presented in these Consolidated financial statements, unless otherwise indicated.

Foreign Currency Transactions

Transactions denominated in foreign currencies have been translated into Denars at exchange rates set by NBRNM at the dates of the transactions.

Assets and liabilities denominated in foreign currencies are denominated in Denars using the official exchange rates ruling as of the date of compilation of the Consolidated Balance Sheet, while all positive and negative exchange rate differences arising from the conversion of foreign currency amounts are included in the Consolidated Income Statement in the period in which they are incurred. The average exchange rates that were applied to show the positions of the Consolidated Balance Sheet denominated in foreign currency are the following:

	<u>31.12.2024</u>	<u>31.12.2023</u>
1 EUR	61,4950 MKD	61,4950 MKD
1 USD	58,8807 MKD	55,6516 MKD
1 CHF	64,1775 MKD	66,4093 MKD

Offsetting

Financial assets and liabilities are offset, and net amount is presented in the Consolidated Balance Sheet statement when The Group has a legal right to offset the recognized amounts and it intends either to settle them on a net basis or to realize the asset and settle the liability simultaneously.

Comparative Figures

Where necessary, certain prior-year figures are reclassified to conform with changes to the current year's presentation for comparative purposes.

c) Summary of Significant Accounting Policies

Interest Income and Expenses

Interest income and expenses are recognized in the Consolidated Income Statement for all interest-bearing financial instruments on an accrual basis, measured at amortized cost using the effective interest rate method.

The effective interest rate method is a method of calculating the amortized cost of a financial asset or a financial liability and allocating the interest income or interest expense over the relevant period.

The effective interest rate is the rate that discounts estimated future cash payments or receipts through the expected life of the financial instrument or, when appropriate, a shorter period to the net carrying amount of the financial asset or financial liability. When calculating the effective interest rate, The Group estimates cash flows considering all contractual terms of the financial instrument (for example, prepayment options) but does not consider future credit losses. The calculation includes all fees and commissions paid or received between parties to the contract that are an integral part of the effective interest rate, transaction costs and all other premiums or discounts.

NOTES TO THE SEPARATE FINANCIAL STATEMENTS
December 31, 2024

1. INTRODUCTION (continued)

c) Summary of Significant Accounting Policies (continued)

Interest Income and Expenses (continued)

If, during the lifetime of the financial instrument, any significant changes in the contractual cash flow (except impairment) occur, but not leading to de-recognition of the financial asset (example: prolongation of contractual period of payment, change in interest rate etc.), and for which The Group has determined that the conditions for classification and measurement at amortized cost are still met, The Group recalculates a new carrying amount of the changed asset, which is equal to the present value of future changes cash flows, discounted with the original effective interest rate.

The difference between the new and the old carrying amount is recognized as gain or loss in the Income statement in the position net interest income, as well as in the accumulated depreciation position within the balance sheet receivables.

Fee and Commission Income

Fee and commission income mainly consists of financial services provided by The Group and includes issuing letters of guarantee, letters of credit, payment operations in the country or abroad and other services. Fee and commission income is recorded on an accrual basis when the service has been provided.

Dividend Income

Dividends are recognized in the Consolidated statement of profit or loss when Bank's right to receive payment is established and inflow of economic benefits is probable.

Net Trading Income

Net trading income includes all realized and unrealized fair value changes during the subsequent measurement, profit or loss on disposals, dividends, interest income and interest expenses relating to trading assets and trading liabilities as well as trading derivatives.

Net trading income is measured at fair value changes of trading assets and trading liabilities, which is a difference between their carrying amount and fair value as of the Consolidated balance sheet date.

Net Foreign Exchange Gains/Losses

Net foreign exchange gains/(losses) are realized or unrealized exchange differences arising from:

- offsetting foreign currency transactions, cash and non-cash items, throughout the entire financial year, and
- converting cash items denominated in foreign currency on the Consolidated balance sheet date.

Other Operating Income

Other operating income consists of:

- gains from sale of available-for-sale financial assets;
- income from dividends of available-for-sale financial assets;
- gains from sale of property and equipment and intangible assets, which is the difference between sale inflows and their carrying amount on the disposal date;
- gains from collection of previously written-off loans and receivables;
- operating lease income;
- income from previous years;
- net release of provisions by type (for pension and other employees' benefits, potential liabilities of court proceedings and other provisions), and
- other income.

Income is recognized and measured by the relevant standard referred to the asset based on which the income is realized.

NOTES TO THE SEPARATE FINANCIAL STATEMENTS
December 31, 2024

1. INTRODUCTION (continued)

c) Summary of Significant Accounting Policies (continued)

Impairment Losses / Impairment of Financial Assets

Impairment losses are measured as the difference between the financial asset carrying amount and its recoverable amount, which is a present value of estimated future cash flows, discounted using the financial asset's original effective interest rate:

- loans and advances to banks and other clients;
- held-to-maturity financial assets; and
- available-for-sale financial assets

Impairment losses are recognized when there is evidence that the financial asset carrying amount is higher than its estimated recoverable amount. Impairment losses are recorded in the Consolidated statement of profit or loss as allowance for impairment (impairment losses) of financial assets, on a net basis.

In the case where the causes for the impairment loss cease to exist, it is necessary to annul previously recognized impairment loss through the Consolidated income statement item "Net impairment loss of financial assets". Subsequent release of allowance for impairment of financial asset is recognized only for financial asset recorded at depreciated cost and available-for-sale debt instruments.

Subsequent releases of the impairment loss are not recognized for financial assets measured at cost and available-for-sale equity instruments as well.

Impairment allowance (impairment loss) is measured and recognized as follows:

- on individual base, for financial assets that are individually significant items/exposures;
- on group base, for a group of similar financial assets for which individual impairment loss may not be determined or has not been determined.

Impairment Loss of Non-financial Assets

Impairment loss of non-financial assets is a difference between the carrying amount and recoverable amount of:

- property and equipment;
- intangible assets;
- foreclosed assets based on outstanding receivables;
- non-current assets held for sale and disposal group; and
- other assets.

The Group assesses, on each Consolidated Balance Sheet date, whether objective evidence exists that the non-financial asset or a group of non-financial assets is impaired.

Impairment loss is recognized once there is evidence that the carrying amount is higher than the estimated recoverable amount of the non-financial asset and it is recognized in the Consolidated Income Statement as net impairment loss of the non-financial assets.

When the causes for impairment loss have ceased, previously recognized loss through the Consolidated Income Statement item net impairment loss of non-financial assets, should be annulated, but only up to the amount of the previously recognized impairment loss. Subsequent release of the impairment loss is not recognized in the case of foreclosed assets.

Expenses for Employees

Expenses for employees include:

- short-term benefits for the employees (salaries, compulsory allowances for social and health insurance, personal tax, short-term paid leaves, bonuses and etc.);
- long-term benefits for the employees (jubilee rewards, pension benefits and etc.); and
- defined contribution plan (payment of contributions in special fund).

NOTES TO THE SEPARATE FINANCIAL STATEMENTS
December 31, 2024

1. INTRODUCTION (continued)

c) Summary of Significant Accounting Policies (continued)

Expenses for Employees (continued)

Short-term benefits are recognized at the period when they have been incurred and when obtaining the relevant service. Short-term benefits are measured at the undiscounted amount, which is expected to be paid off based on employment and is recognized in the Consolidated Income Statement as expenses. Long-term benefits are measured at the present value of the defined benefit liability on the Consolidated Balance Sheet date, reduced for the fair value of the planned assets on the Consolidated Balance Sheet date, which are to be paid directly. Each actuarial gain or loss is recognized in the Consolidated Income Statement in the period in which it was incurred.

Amortization of Intangible Assets

Amortization of intangible assets is distributed on systematic base in the time of the best respective life assessment. The Group assesses whether the useful life of the intangible asset is finite or indefinite and, if finite, then the length of the application is its respective useful life.

The calculation of amortization begins when the asset is available for use and ceases when the assets is classified as held-for-sale or is derecognized. Amortization continues to be calculated for intangible assets placed out of use. The Group will amortize all intangible assets individually, classifying the assets with equivalent useful life and amortization method in amortization groups.

Amortization rates are determined in a way that the value of tangible assets is allocated to costs in the estimated period of their usefulness.

Amortization is calculated by straight-line method, and the amortization expense for each period is recognized as cost in the Consolidated Income Statement item "Depreciation and amortization". The estimated useful life of intangible assets is as follows:

- Intangible assets (software and license): 4 years.

The amortization period (residual value and useful life of the asset) and the amortization method is revised at the end of each financial year and if a change is determined it should be recorded as a change of accounting assessment, prospectively in the current and future periods.

Depreciation of Tangible Assets

Depreciation of tangible assets is distributed on systematic base during the best estimate of their useful life. The Group assesses whether the useful life of the tangible asset is definite or indefinite and if definite, the length of usage represents its useful life. The calculation of depreciation begins when the asset is available for use and ends when the asset has been classified as held for sale and is derecognized. Depreciation continues to be calculated for tangible assets placed out of use. The Group will depreciate all tangible assets individually, classifying the assets with equivalent useful life and depreciation method in depreciation groups.

Land has indefinite useful life and is not depreciated, Works of art are not depreciated.

Depreciation rates are determined so that the value of tangible assets is allocated to costs in the estimated period of their usefulness.

Depreciation is calculated according to the straight-line method, and the depreciation expense for each period is recognized as cost in the Consolidated Income Statement item "Depreciation". Estimated useful life of tangible assets is as follows:

- Buildings: 20-40 years
- Transport vehicles: 4 years
- Furniture and other equipment: 4-10 years

The depreciation period (residual value and useful life of the asset) and the depreciation method is revised at the end of each financial year and if a change is determined it should be recorded as a change of accounting estimation, prospectively in the current and future periods.

1. INTRODUCTION (continued)

c) Summary of Significant Accounting Policies (continued)

Other Operating Expenses

The group of other operating expenses includes: administrative expenses, loss from sales of financial assets available-for-sale, loss from disposal of property and equipment, loss from disposal of intangible assets, expenses for special reserve and provisions on net base and other expenses that may not be categorized in a specific item.

Other operating expenses are recognized based on the matching principle.

Other operating expenses are recognized and recorded based on the actually incurred expenses presented in credible accounting documents (invoices, agreements, calculations).

Financial Assets

In compliance with the new Methodology for recording and valuation of the accounting items and for preparation of the financial statements, The Group classifies its financial instruments in the following categories: financial assets measured at amortized cost, financial assets measured at fair value through other comprehensive income and financial assets measured at fair value through profit or loss. The Group classifies its investments at initial recognition, based on The Group's business model for managing financial assets and the characteristics of the contractual cash flows of the assets.

Financial assets measured at amortized cost

In this category, The Group classifies the financial assets which are held with intention to collect contractual cash flows and the criteria for only collection of principal and interest (SPPI) is met. The Group's loan portfolio meets the criteria for measurement at amortized cost.

Loans and advances are initially measured at fair value, increased for any transactional cost directly connected to acquisition or issuance of the financial asset. Loans and advances are initially recognized at cost only when becoming contractual party of the financial instrument. After initial recognition, loans and advances are measured at amortized cost using the effective interest rate method. Any gain or loss occurred at subsequent measurement is recognized in profit or loss only when the asset is impaired or derecognized, as well as through the process of amortization.

This category also includes cash, trade receivables, lease receivables, fee and commission receivables and all other financial assets which are treated as credit risk exposure in accordance with the Decision for credit risk management and for which the SPPI criteria is not applicable. For these assets the SPPI criteria is not mandatory.

Financial assets measured at fair value through other comprehensive income

The Group classifies in this category those financial assets which are held for collection and/or sale for liquidity management, maintaining certain interest yield, maturity matching of financial assets with maturity of financial liabilities (funding) etc. and which meet the SPPI criteria.

Acquisitions and sales of financial assets are recognized at the transaction date i.e. the date at which The Group has the obligation to buy or sale the asset. Subsequently, after initial recognition financial assets available for sale are measured at fair value without reducing the transactional costs that may occur at sale or disposal. Gains or losses that occur from changes in fair value are recognized directly in equity, until the moment of de-recognition or in case of impairment, in which accumulated gains or losses previously recognized in equity, are now recognized as current gains or losses. However, the interest income calculated by using the effective interest rate method, positive or negative foreign exchange differences, as well as dividends are recognized in Income statement for the current period.

Financial assets measured at fair value through profit or loss

In order to classify its instruments in this category The Group needs to manage these assets through active and frequent trading with purpose of gaining from change in fair value, realization of the fair value and having decision making process based on their fair value. The category includes: trading assets,

NOTES TO THE SEPARATE FINANCIAL STATEMENTS
December 31, 2024

1. INTRODUCTION (continued)

c) Summary of Significant Accounting Policies (continued)

Financial Assets (continued)

derivatives held for risk hedging, financial assets at fair value through profit or loss designated upon initial recognition. The Group does not hold such type of financial instruments. Quantitative information on the classification of The Group's financial instruments is given in Note 1.

Impairment of Financial Assets

The Group assesses, on a continuous basis, the expected credit loss (ECL) for debt instruments and loans to customers, measured at AC and FVOCI, and for the exposures arising from loan commitments and financial guarantee contracts (off balance sheet exposures), as well as lease receivables, trade receivables and any other receivables subject to credit risk exposure as defined in the Decision for credit risk management.

The measurement of ECL reflects the following principles: measurement and recognition of expected credit loss for the lifetime of the financial asset and/or off-balance sheet credit exposure; should reflect expectations for credit quality, deterioration and improvement during the entire lifetime of the asset; should react to information on changes in credit quality of the financial asset and/or off-balance sheet credit exposure, in such manner that in case of information for expected significant deterioration of credit quality, it shall be shifted to riskier category.

Financial assets with low credit risk (Stage 1) are those which fulfill following criteria:

- have low risk of default
- the debtor is assessed on short-term as capable for settlement of its obligations
- bank's expectations on long-term are positive regarding the negative changes in economic and business conditions may, but insignificantly reduce the capability to fulfill his obligations.

Stage 2 is characterized by assets with significant deterioration of the credit quality after initial recognition, but still there is no objective evidence for default.

Stage 3 is intended for those financial assets to which one or more objective evidence for impairment exists. Objective evidence for impairment is:

- significant financial difficulties of debtor or issuer of the debt instrument
- Failure to fulfill the contract terms and conditions, such as: significant delay of payment or missing payment;
- Creditors have approved certain facilitating terms due to the worsen financial condition;
- Possibility of opening bankruptcy or other type of financial reorganization of the debtor;
- non-existence (lack) of active market for the financial asset due to financial difficulties of the issuer;
- buy or issuance of financial asset at significant discount due to occurred credit losses

The Group assesses whether an objective evidence of impairment exists individually for financial assets that are individually significant as well as individually or collectively for financial assets which are not individually significant.

If The Group determines that no objective evidence exists for impairment of individually assessed financial asset, whether significant or not, it shall include that asset in the group of financial assets with similar credit risk characteristics and collectively assess the impairment.

Impairment loss of functional accounts receivable is the amount determined as a difference between the book value of the financial asset and the present value of the expected future cash flows.

The present value of functional accounts receivable is obtained by discounting expected future cash flows of those accounts receivable applying the initial effective interest rate determined based on the contract.

The special reserve for functional off-balance sheet positions on individual base is equal to the present value of the expected future cash flows based on The Group's payments of the potential obligations and collection from the client, discounted under current market price of the risk-free securities issued in same

NOTES TO THE SEPARATE FINANCIAL STATEMENTS

1. INTRODUCTION (continued)

c) Summary of Significant Accounting Policies (continued)

Impairment of Financial Assets (continued)

currency and maturity term as those of the expected payment or collection, or unless such price exists, current market price of risk-free securities is taken with closest maturity term to that of the expected payment.

If the loan or asset held to maturity has flexible interest rate, measurement rate of any impairment loss is effective interest rate determined under the contract, valid on the present value determination date of the expected cash flows.

The calculation of the present value of expected future cash flows of the financial asset secured by collateral is expressed by the cash flows that may arise from the realization of the collateral reduced for the costs of acquiring and selling the collateral, only if the conditions from the Credit Risk Management Decision that refer to the collateral are met.

For the purpose of group assessment of impairment loss, the financial assets are classified on the grounds of similar credit risk characteristics (i.e. based on The Group's policy on financial assets classification, taking into consideration the type of asset, industrial and geographic locations, type of collateral, the status of overdue period and other relevant factors).

These characteristics are relevant for the assessment of the future cash flows for the given group, as they are indicators of debtors' ability to service their debt in accordance with the agreed terms and conditions.

Restructuring of Receivables

Restructuring of receivables means establishing credit exposure by The Group to substitute one or more existing receivables or to modify the existing credit exposure, with changes in the contractual terms and conditions as a result of the client's deteriorated financial state, which, among others, includes:

- Extending the maturity period;
- Reducing the interest rate;
- Reducing the amount of receivable (principal and/or due interest and commission) through write-off;
- Capitalization of Interest;
- Consolidation of more than one receivable in one by changing the contract terms and conditions; or
- Other similar activities.

Interest capitalization is converting the interest receivable into a principal receivable.

When restructuring a receivable, The Group is obliged to observe the credit exposure classification criteria occurred as a result of the restructuring.

The net effect of a restructuring receivable must not lead to increase of The Group financial result, other than in cases of reducing the credit exposure as a result of collection. Within a six-month period after the restructuring, The Group must not record income based on impairment release/special reserve, which is not a result of collection of the credit exposure.

As exemption, The Group may determine a better risk category and/or calculate lower impairment risk/special reserve amount, only if the credit exposure occurred as a result of restructuring is secured by first-class collateral.

The Group may capitalize the interest only if it is a part of restructured receivable.

The Group is obliged to make an analysis of the causes for restructuring for each restructured receivable.

NOTES TO THE SEPARATE FINANCIAL STATEMENTS
December 31, 2024

1. INTRODUCTION (continued)

c) Summary of Significant Accounting Policies (continued)

Impairment of Financial Assets (continued)

Writing-off of Receivables

When a loan becomes non-performing, it is written off against the relevant provision for impairment. Such loans are written off after all necessary procedures have been completed and loss amount determined.

The Group may perform partial or full write-off of receivables in which case the written-off receivable should be transferred to a special off-balance sheet account and The Group should keep special records for it for a period of at least ten years.

The Group is obligated to write off credit exposure if one year is passed from the date when The Group had recognized impairment or special reserve of 100%.

Subsequent reimbursements of previously written-off amounts reduce the provision for loan impairment in favor of current gains. If subsequently the impairment loss amount is decreased, and this decrease can objectively be related to an event that occurred following the recognition of the impairment (such as improvement in the debtor's credit rating), the previously recognized impairment loss is reduced by adjusting the provision account. The reduction amount is recognized in the current gains. Impairment for investments in equity instruments is not being calculated.

Intangible Assets

Intangible assets acquired by The Group are initially recognized at cost, and subsequently are measured at cost less accumulated amortization and accumulated losses due to impairment.

Computer Software

Expenses related to upgrade or maintenance of computer software programs are recognized as such in the period they are incurred. Expenses directly related to distinguishable and unique software products controlled by The Group, which are likely to create economic benefits, which will exceed the expenses one year later, are recognized as intangible assets.

All other expenses are recognized in the Consolidated Income Statement in the period they are incurred. Upgrade expenses incurred for computer software recognized as assets are amortized by applying the straight-line method within a period of four years.

Other Intangible Assets

Expenses for acquiring rights and licenses are capitalized and amortized by applying the straight-line method within a period of four years.

Property and Equipment

Property includes land and buildings. Property and equipment are recognized at cost less accumulated depreciation and accumulated impairment loss. The cost value includes expenses directly related to the acquisition of the assets.

Subsequent costs are included in the asset book value or are recognized as a Consolidated asset as appropriate, as long as there is a probability of inflow of future economic benefits for The Group related to the item and when its purchase value can be measured reasonably. All other regular maintenances and repairs are recorded as expense in the Consolidated Income Statement during the financial period in which they are incurred.

NOTES TO THE SEPARATE FINANCIAL STATEMENTS
December 31, 2024

1. INTRODUCTION (continued)

c) Summary of Significant Accounting Policies (continued)

Property and Equipment (continued)

The gain or loss arising on the disposal or retirement of an item of property and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognized in the Consolidated Income Statement.

Impairment of Non-Financial Assets

The Group's management regularly assesses the carrying amount of non-current assets and intangible assets. If there is any indication that such assets are impaired, the recoverable amount of the asset is calculated to determine the impairment. In cases where the asset carrying amount is higher than its estimated recoverable amount, it is immediately written off against its recoverable amount. The recoverable amount is the higher of the asset's net selling price, or its value in use.

Foreclosed Assets

Foreclosed assets include land, buildings, equipment and other valuables acquired through foreclosure proceedings in full or partial recovery of a related loan.

Foreclosed assets are recognized when the legal rights for asset's ownership are given to The Group or the following criteria are met: the loan or other receivable is legally considered as collected when the asset pledged as collateral is foreclosed so that the loan/receivable de-recognition criteria are satisfied; all foreclosed asset's rights and risks are assigned to The Group; foreclosed asset will provide future economic benefits for The Group and its cost value can be reliably measured.

Initially, these assets are measured at the initial carrying amount i.e. the lower of cost of the loan (book value) before the impairment on the date of foreclosure i.e. the value of the foreclosed asset referred to in the legal act passed by the authority in the foreclosure proceeding, which represents the legal basis for acquiring the ownership rights and the appraised fair value less estimated cost to sell (notary fees, taxes, etc.) which will be borne by The Group.

The Group is obliged to appraise the fair value of the foreclosed asset on the foreclosure date and to recognize an allowance for impairment in the Consolidated balance sheet by at least 20% of the initial carrying amount of the foreclosed asset.

In case where the allowance for impairment/special reserve is higher than the impairment recorded as of the foreclosure date, The Group shall recognize the difference as a revaluation reserve, which is a part of The Group's additional capital.

If the previously impaired certain receivable is collected by securities or shares than the allowance for impairment (impairment loss) shall be released through Consolidated statement of profit or loss.

The part of receivable which is not collected by the foreclosed asset, could be written-off.

Foreclosed assets (other than acquired securities and shares) are subsequently measured at the lower of carrying amount and fair value less costs to sell. At least once in a period of twelve-months, The Group is obliged to appraise the fair value and recognize an impairment loss in the Consolidated income statement equal to at least the higher between: 1) negative difference between the appraised value and the carrying amount of the foreclosed asset; and 2) 20% of the carrying amount of the foreclosed asset.

In the period between two appraisals of the foreclosed assets' market value, The Group recognizes an additional amount of impairment loss in the Consolidated income statement equal to the negative difference between the net book value and the amount of the announced reduced selling price of the foreclosed asset.

If The Group fails to sell the foreclosed asset until the date on which the Decision on the Accounting and Regulatory Treatment of Foreclosed Assets" become effective ("Official Gazette of RNM No, 50/13 26/17"), The Group is obliged to reduce its carrying amount to zero at the end of the fifth year.

NOTES TO THE SEPARATE FINANCIAL STATEMENTS
December 31, 2024

1. INTRODUCTION (continued)

c) Summary of Significant Accounting Policies (continued)

Foreclosed Assets (continued)

The Group derecognizes the foreclosed asset and the amount of impairment recorded in the balance sheet when the asset is sold, permanently called in or in case it is reallocated into fixed asset in favor of The Group. Depending on the sales value of the foreclosed asset, The Group shall record a capital gain in the Consolidated Income Statement under the item "Other Operating Income" or capital loss in the Consolidated Income Statement under the item "Other Operating Expenses" for the difference between market value and net book value of the foreclosed asset.

The Group will derecognize the revaluation reserve on foreclosed asset by releasing the impairment loss on non-financial assets through the Consolidated Income Statement, as well as in case of excluding the revaluation reserve from the additional capital of The Group only for an amount that is equal to the amount of after-tax profit, for which Bank's General Meeting of Shareholders decided to allocate to the reserve requirement (reserve fund) or the retained earnings.

Cash and Cash Equivalents

For the purpose of the Cash Flow Statement, cash and cash equivalents include balances with maturity up to three months as of the date of acquisition including cash in hand and balances with the NBRNM.

For the purpose of preparing the Consolidated Cash Flow Statement, the mandatory reserve requirement in foreign currency and the restricted deposits are excluded.

Investment in Subsidiaries

Subsidiaries are legal entities in which The Group, directly or indirectly has control, has the right of return of the investment and may use its controlling power to influence the amount of return on investment.

Investments in subsidiaries are recorded at their cost, less impairment.

Investments in Associates

An associate is an entity, in which The Group participates in the financial and operating policy decisions of the investee but is not controlled by The Group. Participation is a direct or indirect ownership of at least 20% of the total number of shares of other legal entities, unless significant influence is evidenced.

Investment in an associate in these Consolidated financial statements are initially recognized at cost less any impairment. The Investment in Associates is an equity investment in SPARKASE LISING DOO Skopje, with 49% of the voting shares and the right of profit distribution. The equity investment in the associated company was made in December 2016.

Other Assets

This group of assets includes: receivables from customers, prepaid expenses, receivables from employees, advance payments, assets for other purposes, receivables in and on behalf of others, fees and commissions receivables and other assets not presented in any other items of the assets in the Consolidated Balance Sheet.

Short-term receivables without indicated interest rate are usually measured at their initial invoiced amount, unless the imputed interest effect is significant.

Assets acquired without purchase shall be recognized under their fair value, unless the transaction is made on non-commercial base, or their fair value (supplied or provided) cannot be accurately measured. In that case, the assets are recognized under their purchase value.

Subsequently, the asset is measured at the lower of the carrying amount and the net realizable value. The net realizable value is equal to the estimated selling price less estimated costs of completion, repairs and estimated costs necessary to make the sale.

NOTES TO THE SEPARATE FINANCIAL STATEMENTS
December 31, 2024

1. INTRODUCTION (continued)

c) Summary of Significant Accounting Policies (continued)

Other Assets (continued)

Future expenses that have been paid in advance are recognized as deferrals and they are calculated as expenses in the period they refer to based on a relevant accounting document. Such costs are the following: paid insurance premiums, rents, subscription for magazines and official gazettes etc.

Income related to the current accounting period that is due in a future period is recognized as deferral. Such income is the accrued income not due yet, other than accrued interest income. In a future period when those deferrals are due, they are transferred in the accounts receivable.

The Group classifies equity instruments as financial liabilities or capital instrument in accordance with the contractual terms of the instrument.

Provisions

Provisions are recognized when The Group has a present obligation (legal or constructive) as a result of a past event, and it is probable that The Group will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation. The amount recognized as a provision is the best estimate of the consideration required to settle the present obligation at the end of reporting period, taking into account the risks and uncertainties surrounding the obligation. Where a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows.

Employee Benefits

The pension plan contributions for the employees are paid by The Group in accordance with the national legislation on social security. Salary-based contributions are paid to the State Pension Fund and the mandatory private pension funds. There is no additional liability related to these pension plans.

In addition, all employers in the Republic of North Macedonia are obliged to pay to their employees a special minimum sum for retirement in an amount defined by laws, currently totaling to two average monthly salaries paid off in the Republic of North Macedonia. The Group calculates provision for employee benefits to allocate the expense through the relevant periods. In compliance with IAS 19, these benefits are determined as defined benefits for employees and the book value of the liabilities arising from employees' benefits is calculated at the end of the reporting period. The amount of these liabilities at the end of the reporting period is the discounted value of the future payments. Other long-term benefits for employees include jubilee awards.

The Group does not operate with retirement plans or plans for other retirement benefits, so there are no pension liabilities. The Group is not obliged to provide additional compensation for current or previous employees.

Income Tax

The tax expense for the period comprises current and deferred tax. Current income tax is calculated and paid in accordance with the Macedonian Income Tax Law, according to which The Group calculated income tax for 2024 to the gross profit determined as a difference between the total income and total expenses determined pursuant to the accounting regulations and standards increased for non-deductible expenses defined by the Law. The income tax rate is 10% (2023: 10%).

Global tax

On 27.12.2024, the Assembly of the Republic of North Macedonia passed the Minimum Global Income Tax Bill and the same was published in the Official Gazette of the RSM No. 3/2025 of 03.01.2025. The Minimum Global Income Tax Act comes into effect on the date of publication – 03.01.2025 and applies to fiscal years commencing on 01.01.2024. The by-laws provided for in the Act are to be enacted by 31.12.2025. The law harmonizes with Council Directive (EU) 2022/2523 of 14 December 2022 on providing for a global minimum level of taxation for groups of multinational companies and large domestic groups in the Union (CELEX number: 32022L2523).

NOTES TO THE SEPARATE FINANCIAL STATEMENTS
December 31, 2024

1. INTRODUCTION (continued)

c) Summary of Significant Accounting Policies (continued)

Global tax (continued)

This law applies to constituent entities that are members of a group of multinational companies (hereinafter referred to as: "group of MNCs") or of a large domestic group whose annual income in the consolidated financial statements of the ultimate parent company in at least two of the four fiscal years immediately preceding the fiscal year under review amounts to EUR 750 million or more.

The minimum effective taxation of the profits of these entities shall be provided by applying the rules for the payment of additional tax, determined under the provisions of this Act, as follows:
 (a) a rule for determining a qualified domestic surcharge, according to which additional tax is calculated and paid on the excess profits of all constituent entities subject to a low tax rate located in the Republic of North Macedonia;

(b) the profit inclusion rule, whereby the parent company of an MNC group or a large domestic group calculates and pays its assigned share of the additional tax in respect of the group's constituent entities subject to a low tax rate;

(c) the less-taxed profit rule, according to which a constituent entity of an MNC group is subject to an additional tax equal to its share of the additional tax that was not levied on the basis of the profit inclusion rule for constituent entities of the group subject to a low tax rate.

The less-taxed profit rules apply for fiscal years beginning on January 1, 2025.

A Consolidated application for information on additional tax as well as an application for domestic supplemental tax shall be submitted no later than 15 months after the end of the last day of the fiscal year by electronic data transmission. A Consolidated application for payment of additional tax shall be filed within 30 days after the deadline for filing a Consolidated application for information on additional tax as well as an application for domestic supplemental tax.

In the calculated income tax for 2024, an amount of MKD 81,647 thousand of qualified domestic additional tax is included in accordance with the Minimum Global Income Tax Act.

Financial Liabilities

Financial liabilities are classified in accordance with the substance of the contractual arrangement. Financial liabilities are classified as deposits from banks, financial institutions and customers, loans payable, other payables, subordinated liabilities and securities issued.

Deposits, loan payables, subordinated liabilities and securities issued are major sources for financing The Group's activities. The Group initially recognizes the deposits, loans payables, subordinated liabilities and securities issued on the date of their occurrence.

The deposits, loan payables, subordinated liabilities and securities issued are initially measured at their cost value increased for the transaction costs, and they are subsequently measured at amortized cost by using the effective interest rate method.

Amortized cost of the financial liability is the amount at which it is initially recognized, less repayments of the principal, decreased or increased for the accumulated depreciation of each difference between the initial amount and the amount at maturity.

Other Liabilities

The Other liabilities line item includes the following: MKD and foreign currency fees and commission liabilities, gross salary and other liabilities to employees, dividends, liabilities to customers, liabilities arising from given payment instrument, liabilities in and on behalf of others, received advances, non-matured calculated liabilities, deferred income and other liabilities that are not presented in any other liability item of the Consolidated Balance Sheet.

NOTES TO THE SEPARATE FINANCIAL STATEMENTS
December 31, 2024

1. INTRODUCTION (continued)

c) Summary of Significant Accounting Policies (continued)

Other Liabilities (continued)

Other liabilities are recorded at their nominal value based on a relevant accounting document (invoice, agreement, calculation) in compliance with The Group regulations and decisions. Inflows from assets that are not recognized as income in the current period are deferred for a future period and recorded as accrued liabilities. When the income is earned then the accrued liability is debited, and the income is credited.

The expenses which can be certainly determined that refer to the current accounting period, and represent a liability in the future are recorded as accrued liabilities. When liabilities become due and payable, accrued liabilities are derecognized and liabilities are presented.

Derecognition of Financial Liabilities

The Group derecognizes financial liabilities when, and only when, The Group's obligations are discharged, cancelled or have expired.

Borrowings

Borrowings are initially recognized at fair value, which means received inflows (fair value of received considerations) less transaction costs incurred. Borrowings are subsequently recorded at amortization cost.

Equity, Reserves and Dividend payments

(a) Share capital

Share capital is the nominal value of shares issued (subscribed and paid-in capital).

(b) Share premium

Share premium is the difference between the nominal value and the realizable price of the shares.

(c) Share Issue Costs

The costs for issue of new shares, options or acquiring business are presented in the equity as a deduction, net of tax returns.

(d) Equity Shares

When The Group purchases its own equity, paid considerations are deducted from the total equity as equity shares, until they are sold. When such shares are subsequently sold, the received considerations are included in the equity.

(e) Reserves

Reserves consist of statutory reserves, allocated in accordance with the local regulations. The Group is obliged each year to allocate statutory reserve fund as a percentage from the net profit, which cannot be less than 5% of the profit until the reserve of The Group reaches an amount equal to one tenth of the capital. If the reserve generated in this way decreases, it has to be supplemented in the same manner. Until the legal reserve exceeds the minimum amount, it can only be used to cover losses. When the legal reserve exceeds the minimum level and after the recovery of all losses of annual financial statements, with a decision by the Shareholders Assembly, the excess can be used for distribution of dividend, if within that business year it had not reached the minimum amount prescribed by the Law or the Statute. The amount recorded in the reserve based on additional payments by the shareholders, cannot be used for dividend distribution.

NOTES TO THE SEPARATE FINANCIAL STATEMENTS
December 31, 2024

1. INTRODUCTION (continued)

c) Summary of Significant Accounting Policies (continued)

(f) Revaluation reserves and other revaluation differences

These reserves comprise net cumulative change in the fair value of assets directly recognized in equity.

Gains and losses from change in the fair value of financial instruments available for sale are recorded in revaluation reserve (except for gains and losses from foreign-exchange differences, which are directly recognized in income statement). When the decreased value of the financial asset available for sale is recognized directly in revaluation reserve and when an objective evidence for impairment exists, the cumulative loss should be eliminated from equity and reserves and recognized in the income statement.

(g) Undistributed Profit

Undistributed profit includes retained earnings from current and past periods.

(h) Dividends on Ordinary Shares

Dividends on ordinary shares are recognized as liabilities within the period when The Group's shareholders have approved them. Current year dividends declared following the Consolidated balance date are disclosed in the Subsequent Events Note (1e).

Fiduciary Activities

The Group usually acts as a creditor and has other fiduciary functions which results in safekeeping or placement of assets on behalf of individuals or other institutions. Those assets and the income resulting thereof are not included in these financial statements as they are not Bank's assets.

Off-balance sheet potential and assumed liabilities

The Group undertakes liabilities during its business activities on the basis of credit placements recorded on the off-balance sheet accounts, which primarily include guarantees and letters of credit. These financial liabilities are recognized in the Consolidated Balance Sheet when they can be recovered. Impairment loss related to off-balance sheet contingent liabilities is stated under "impairment of financial assets" in this Note, and is included in the Consolidated Balance Sheet as a liability.

d) Change in Accounting Policies, Accounting Estimates and Correction of Errors

During 2024, The Group did not make any additional changes to its accounting policies and estimates, nor did it record any correction of an error.

e) Compliance with Regulation

The Group complies with the legal regulations, i.e., The Grouping Law (Official Gazette of the Republic of North Macedonia No 67/2007, 90/2009, 67/2010, 26/2013, 15/15, 153/15, 190/16, 7/19 and "Official Gazette of the Republic of North Macedonia" No. 101/19, 122/21), as well as with all other bylaws governing its operations.

f) Risk Management Disclosures

The nature and The Group's exposure to different types of risk, as well as The Group's objectives, policies and processes for risk management are disclosed in Note 2 and 3.

g) Events After the Reporting Date

These subsequent events, which provide additional information about The Group's financial position at the reporting date (adjusting events) are reflected in the Consolidated financial statements. Those subsequent events that are not adjusting events, if material, are disclosed in certain notes.

2. RISK MANAGEMENT

Description of the Risk Management Systems of The Group

Risk management operations are run by the three main pillars of risk management of The Group, under the competence of three Directorates, as follows: Credit Risk Management Directorate, Collection and Collateral Management Directorate and Strategic Risk Management Directorate.

Departments, units and teams within the mentioned risk management directorates are staffed with professional personnel contributing to adequate lending management process in terms of managing the risk of individual placements, implementing and managing the provisioning process, implementing and managing the liquidity risk, market risk, operational risk, managing the collection of non-performing loans and collateral.

In 2024, the focus of the risk management was put primarily on the credit risk management as the main risk exposure of The Group. Nevertheless, other risks such as the market risk, liquidity risk and operational risk were appropriately observed as well. During 2024, in compliance with the regulations, The Group was also monitoring the Internal Capital Adequacy Assessment Process (ICAAP).

2.1 Credit Risk

In order to monitor credit risk, The Group has established adequate organization of the lending process in terms of client segmentation, pouvoir decision-making process (loan authorizations, minimum standards and rules on financing retail and corporate loans; retail and corporate rating models, lending policy of The Group, collateral management and collection of non-performing loans).

The Strategic Risk Directorate has focused its risk management activities identifying, measuring and monitoring credit risk. Monitoring is performed by observing The Group loan portfolio quality and its divisional and geographic dispersion. This involves continuous monitoring of the credit exposure to single entities or a group of related entities and for that purpose on a monthly basis The Group performs a risk assessment of placements and classification according to the level of risk. This Directorate regularly fulfills the obligation to inform the Risk Management Committee, the Supervisory Board and other stakeholders and functions in The Group about the movement of the loan portfolio in terms of its risk.

The total assets of The Group exposed to credit risk include the loans and advances to customers, regular interest-based receivables, The Group's off-balance sheet credit exposure as well as other receivables which besides The Group capital investments in other companies, comprise of receivables from customers, commission and fee receivables and other receivables for which a credit risk is assessed by The Group.

Description of the Level and Changes in the Value Adjustment and the Consolidated Special Provision

The Group classifies each functional balance sheet and off-balance sheet item by the level of credit risk exposure in a manner and criteria determined in the Credit Risk Management Decision.

Credit risk exposure subject to classification by The Group covers functional balance sheet receivables based on: matured and not-matured loans, non-performing loans, deposits with banks and other financial institutions, interest-bearing receivables, non-performing interest, commission and fee receivables, other matured and non-performing receivables as well as other receivables exposing The Group to a credit risk.

The Group is not obliged to classify the credit risk exposure of the following functional balance sheet items: cash, Bank's accounts in the National Bank, intangible assets, property and equipment, natural resources, operational assets and inventories; Items exposing The Group to market and/or other type of risk, other than the credit risk – investments in securities and in other types of financial instruments held for trading, investments in securities and in other types of financial instruments measured at their fair value through the Consolidated income statement.

2. RISK MANAGEMENT (continued)

2.1 Credit Risk (continued)

Description of the Level and Changes in the Value Adjustment and the Consolidated Special Provision (continued)

When classifying the credit risk exposure, The Group considers the following criteria:

- client's creditworthiness.
- client's regular settling of its obligations.
- quality of the collateral,

The Credit Risk Exposure Classification complies with the Credit Risk Management Decision and the same for 2024 move within the following parameters:

- From 0% to 5% of the credit risk exposure classified in risk category A;
- Over 5% to 20% of the credit risk exposure classified in risk category B;
- Over 20% to 45% of the credit risk exposure classified in risk category V;
- Over 45% to 70% of the credit risk exposure classified in risk category G;
- Over 70% to 100% of the credit risk exposure classified in risk category D,

In 2024, The Group continued calculating credit risk provisions by applying the requirements of the Methodology, which assumes use of 1 year default rate for portfolio with lowest risk, and lifetime default rates in case of increased credit risk in loans. According this, The Group's portfolio is divided by risk groups: Stage 1, Stage 2 and Stage 3.

2. RISK MANAGEMENT (continued)

2.2. Liquidity Risk

Liquidity risk is a risk that The Group may be unable to provide sufficient monetary assets to settle its short-term liabilities when they come due, i.e. a risk that the necessary liquid assets will be provided at much higher cost.

2.2.1. Liquidity Risk Management

The main objective of The Group's liquidity management is to maintain adequate liquid assets, primarily cash and cash equivalents, to enable normal business operation of The Group. The matching and controlled mismatch of asset maturity and liability maturity is fundamental to the management of The Group.

The Group manages its liquidity risk through the constant monitoring of the maturity of its asset and liability components.

The Group actively monitors, manages and controls the liquidity risk exposure including management of assets and resources in accordance with the cash flows and their concentration for harmonization of cash inflows and outflows. Liquidity risk exposure is measured through externally and internally determined limits, i.e. The Group's compliance with them.

Besides external liquidity indicators, The Group calculates and monitors the internal liquidity indicators that are part of the liquidity management process and imply compliance with the Group Requirements and the Requirements of European Regulation (LCR, NSFR).

The new methodology from the NBRSM for liquidity risk management is in force from 01.01.2021.

As a part of the liquidity risk management process, The Group analyzes the level of concentration and participation of the 10 largest depositors in the average deposit base as well as their compliance with the internally established limits.

The Group continuously fulfilled the legal requirements related to mandatory reserve in MKD and foreign currencies fully complying with the legislation governing this area.

In the tables below, there is an analysis of The Group's assets and liabilities grouped by their maturity, or the remaining period from the reporting date to the contractual date. Reported amounts are reduced by the amounts of accumulated depreciation, impairment and allocated special reserve. There are indications of maturity non-compliance for the period from 1 to 12 months, and the reason for maturity non-compliance mostly refers to the off-balance sheet exposure. The main reason for this discrepancy is that short-term sources of funds have been engaged for loans with longer maturities. For the purposes of liquidity risk management, The Group prepares expected maturity structure in which an element of prediction is integrated and having in mind the experience from the previous years, it indicates a stable liquidity position.

A negative gap of up to 1 month is not a realistic liquidity situation, and arises from deposits from principals for which the contractual terms provide for early withdrawal at any time, as well as all deposits at sight without a defined term. The real maturity of these positions is higher and The Group monitors the stability of the deposit base of customers by monitoring the deposit rearrangement rate of the population as well as monitoring the movement of deposits by sight. The Group maintains an appropriate level of liquidity according to the actual expected maturity of the positions and the appropriate level of liquidity coverage rate.

2. RISK MANAGEMENT (continued)

2.3 Market Risk

The Group is exposed to market risks. Market risks derive from The Group open position in relation to the effect of the market interest rate fluctuations, as well as in relation to the effect of the exchange rate fluctuations. The Group Management determines acceptable risk limits based on their daily monitoring.

For the purpose of interest rate risk monitoring, The Group has developed internal acts as an integral part of the market risk management process. In addition to internal documents, the interest rate risk analysis and duration of equity is performed at least on a quarterly basis. Main objective is to limit the potential loss due to fluctuations in market interest rate level, to maintain the level of profitability, operational stability, and The Group's equity market value.

Interest rate risk, as part of market risk, is an important part of the risk management process and it is under constant monitoring and control in order to be enabled an efficient management and the planned financial results to be achieved, as well as to increase the economic and the market value of The Group's assets and capital.

The Group manages active interest rate policy based on the Strategic Plan of The Group, as well on the competitive position as compared to the other banks in the market. Throughout the year, continuous analyses of the interest-bearing assets and liabilities are conducted; the level of sensitivity to interest rate fluctuations, average weighted active and passive interest rate, value of interest-bearing assets and liabilities with internal and external determination of the interest rates as well as other relevant indicators. Based on all those analyses, ALCO makes further decisions on interest rates fluctuations.

Currency risk management, which is also a part of the market risk management process, is achieved in conditions of stable MKD rate, or in conditions of continuous restrictive monetary policy at state level. The Group takes effective activities for adequate identification, measurement, monitoring and control of the currency risk exposure, which cover determination of currency risk sources, measurement methods, establishing limits and other control measures.

The basic currency risk management instrument, open foreign currency position of The Group, is calculated on aggregate level as well as consolidated by currencies and by monitoring their compliance with the externally and internally determined limits. The Group also assesses the potential maximal loss from currency risk by applying VaR - Value at Risk method according Group standards.

2. RISK MANAGEMENT (continued)

2.3 Market Risk (continued)

2.3.2 Sensitivity analysis of Changes in Interest Rates of Financial Assets and Liabilities (Excluding Trading Assets) (continued)

Interest Rates gap analysis

The Group is exposed to various risks associated with the effects of fluctuation in the prevailing level of market interest rates on its financial position and cash flows. Interest margins may increase as a result of such changes but may decrease or create losses in the event of unexpected movements. Assets and liabilities management is performed based on Bank's sensitivity to changes in interest rates. The Group is always careful not to reduce the interest margin. However, the actual effect will depend on various factors, including economic stability, environment and inflation rate.

The table presents gap analysis of interest rates of financial assets and liabilities as at December 31, 2024 and 2023.

2. RISK MANAGEMENT (continued)

2.3 Market Risk (continued)

2.3.3. Foreign Currency Risk

Currency risk management, which is also part of the market risk management process, is achieved in conditions of stable exchange rate of Denar, in conditions of continuation of the restrictive monetary policy at the state level. The Group actively undertakes activities for adequate identification, measurement, monitoring and control of currency risk exposure, which include determining the sources of currency risk, methods of measuring it, establishing limits and other control mechanisms.

The basic instrument for currency risk management, the open foreign exchange position of The Group, is calculated on an aggregate level as well as separately by currencies and their compliance with the externally and internally determined limits.

NOTES TO THE SEPARATE FINANCIAL STATEMENTS

December 31, 2024

2. RISK MANAGEMENT (continued)

2.4 Operational Risk

Within its own internal acts, The Group defines operational risks as risks arising from deficiencies or mistakes in conducting internal processes, systems and personnel or from external events. Operational Risk includes the legal risk also, but does not include strategic risk and reputational risk. However, reputational risk is still considered in operational risk management due to its importance.

Operational risk management objective is to limit the number of potential losses and probability of their realization at a level that is acceptable for The Group from a financial point of view, as well as from the aspect of The Group's reputation. The Group accepts those operational risks which, if realized, will not have a significant effect on the Consolidated financial results i.e. they will not jeopardize the further operation of The Group. The policy and the acts arising from this objective have established consistent approach to the operational risk management.

In 2024, The Group applied Key Risk Indicators (KRI) to control and assess the level of operational risk as well as the Risk Control Self Assessment method for assessing key risks.

The Group makes estimation of the capital requirement to cover the operational risks by applying standardized approach under the local legislation.

3. CAPITAL ADEQUACY

Capital Management

Main objective of The Group is to maintain its equity capital at an optimum level, thus observing stipulated regulatory minimum requirement. The Group is obliged to constantly maintain the capital adequacy rate at a level not less than 8%.

According to the amendments of the Decision on methodology for capital adequacy as of 2017, the structure of own funds has changed, with greater emphasis on the regular core capital (improved quality), stricter requirements for the capital instruments in the primary and additional capital; an appropriate change in the minimum capital requirements in accordance with the new structure:

- Regular capital ratio - 4,5% (Common Equity Tier 1 Capital ratio);
- Core capital ratio - 6% (Tier 1 Capital ratio);
- Own funds ratio - 8%,

In addition, in accordance with the amendments to The Grouping Law from October 2016, NBRNM also introduced new bylaws for the purposes of alignment with the Basel Capital Accord Basel 3, as well as with the relevant European regulations. With the amendments banks are obliged to maintain an adequate amount of capital for covering the protective four layers of capital: protective layer for capital maintenance at the level of 2.5% of the risk weighted assets; counter-cyclic protective layer of capital in the amount up to 2.5% of the risk weighted assets or more, depending on other systemic factors / indicators; protective layer of capital for systemically significant banks in the range between 1% - 3.5% of the risk weighted assets; and a systemic protective layer of capital in the range between 1% - 3% of the risk weighted assets, The new regulation refers to the following:

- Decision on methodology for debt risk management;
- Decision on methodology for determining the maximum amount for distribution of the profit;
- Decision on the methodology for determining the rate of counter-cyclic protective layer of capital for exposures in the Republic of North Macedonia.
- Decision on methodology for identifying systemically significant banks;
- Decision on methodology for plan development for recovery of systemically significant banks;

NOTES TO THE SEPARATE FINANCIAL STATEMENTS
December 31, 2024

3. CAPITAL ADEQUACY (continued)

Capital Management (continued)

The Group was identified as a systemically significant bank by NBRNM and therefore is obliged to allocate a regular core capital of 2% of the risk-weighted assets. In addition, according to the supervisory assessment of the risk profile of The Group, The Group is obliged to allocate an additional capital allowance of 3.25%, which can be met with any quality of capital i.e. any component of the own funds. As of December 31, 2024, the minimum capital adequacy rate for The Group was 17.00% and by the end of 2023, the minimum rate was 16.25%.

The Group strives to reliably measure the current risk, to estimate the future risk and the need of own funds for maintaining an optimum capital adequacy level.

The Group has established a system for maintaining adequate level of own funds in relation to the risk-weighted assets and continuously maintains a high level of capital adequacy.

If asset risk increases, The Group may increase its own funds capital or take measures to reduce risk-weighted assets to maintain an optimal level of capital adequacy.

The Group's policy of reinvesting profits is an instrument for increasing its own funds.

The capital required to cover the risks is the sum of the capital required to cover the credit risk, the currency risk, the risk of change in commodity prices, the market risks and the operational risk. The Group is required to have an adequate level of capital required to cover all these risks.

In the risk management process, The Group introduces procedures and methodology for determining capital adequacy and calculates it on a quarterly basis. The Group performs a stress test of the capital adequacy where it checks whether the capital adequacy ratio maintains the prescribed level according to the legislation i.e. the set business policy of The Group and the recommendation from the regulator.

The capital adequacy as of December 31, 2024 and December 31, 2023 is shown in the tables below.

Own Funds

The table below gives an overview of the Report on the own funds (Form "SS") prepared in accordance with the "Instructions for enforcing the Decision on the Methodology for determining the capital adequacy" in compliance with the applicable regulation prescribed by the NBRNM as of December 31, 2024 and 2023.

4. SEGMENT REPORTING

Segment reporting is carried out by The Group's operating segments.

Operating segment is a component of the activities of The Group for which the following conditions have been fulfilled:

- Performs activities as a result based on which incomes are generated and expenditures arise;
- Reviews from The Group's Supervisory Board, in order to assess the accomplishments and decision making for future business activities of the segment; and
- Financial information for the segment is available.

The Group primary business segments are as follows:

- Retail operation (retail banking and sole traders) – granted loans, letters of guarantee and letters of credit, services related to payment operations, credit cards, current and term deposits, and etc.
- Corporate banking (operations with non-financial and financial companies) – granted loans, letters of guarantee and letters of credit, current and time deposits, payment operations, derivatives, and etc.

Secondary geographic segments are the following:

- Member countries of the European Union.
- Other European countries, outside the EU.
- Countries outside Europe, members of the Organization for Economic Cooperation and Development (OECD); and other countries

The following table shows the Consolidated Balance Sheet and Consolidated Income Statement by individual business segments identifying income/expenses among the segments.

5. FAIR VALUE OF FINANCIAL ASSETS AND FINANCIAL LIABILITIES

Fair value represents the amount at which an asset could be replaced, or a liability settled on regular, market conditions. Fair value is based on the Management assessment depending on the type of assets and liabilities.

The table below summarizes the carrying amount and the fair value of financial assets and liabilities that are not presented in the Consolidated Balance Sheet by their fair value.

A. Fair Value of Financial Assets and Financial Liabilities

	current year 2024		previous year 2023	
	carrying amount	fair value	carrying amount	fair value
<i>In MKD thousand</i>				
Financial assets				
Cash and cash equivalents	24.729.404	24.729.404	20.014.631	20.014.631
Trading assets				
Financial assets carried at fair value through Consolidated statement of profit or loss upon initial recognition	-	-	-	-

Other liabilities	668.984	668.984	664.913	664.913

NOTES TO THE SEPARATE FINANCIAL STATEMENTS
December 31, 2024

5. FAIR VALUE OF FINANCIAL ASSETS AND FINANCIAL LIABILITIES

A. Fair Value of Financial Assets and Financial Liabilities

a) Cash and cash equivalents

The carrying amount of cash and cash equivalents equals their fair values as they include cash and nostro accounts representing unrestricted demand deposits and placements with NBRNM, which mature in short periods.

b) Loans and advances to banks

Loans and advances to banks include interbank placements. The fair value of the placements and the so-called "overnight" deposits is equivalent to their carrying amount due to their short-term maturity.

c) Loans and advances to other customers

Loans and advances to customers are carried at amortized cost less impairment. The major part of the loans and advances to customers have variable interest rate. Their fair value is approximately equal to their carrying amount.

d) Investments in Held-to-maturity securities

Held-to-maturity securities are measured at fair value. Their fair value is based on market prices or on brokers'/dealers' listing prices. If such information is unavailable, their fair value is estimated by using market prices for listing securities with similar nature in relation to loan, maturity and earnings.

e) Other financial assets

The fair value of monetary assets comprising cash and cash equivalents, due to their short-term maturity, is considered to be approximately equal to their carrying amount.

f) Other receivables

Taking into consideration their short-term maturity, the carrying amount of the other receivables is equivalent to their fair value.

g) Deposits and loan payables

Assessed fair value of sight deposits, including interest-free bearing deposits, is the amount repayable at sight.

The fair value of time deposits at variable interest rates is their recorded value on the Consolidated balance sheet date.

The carrying amount of loan payables does not significantly differ from their fair value, mainly due to the variable interest rates and their adjustments.

h) Other liabilities

Taking into consideration their short-term maturity, the carrying amount of other liabilities is equivalent to their fair value.

5. FAIR VALUE OF FINANCIAL ASSETS AND FINANCIAL LIABILITIES (continued)

B. Levels of Fair Value of Financial Assets and Liabilities, Measured at Fair Value (continued)

B.1 Levels of Fair Value of Financial Assets and Liabilities, Measured at Fair Value (continued)

The Group classifies all financial assets and liabilities in line with the hierarchy of valuation techniques and information whether the necessary valuation inputs are publicly available or not. The fair value hierarchy includes the following levels:

- Level 1 - Fair value is determined directly with reference to quoted market prices of the financial instruments in active markets. Level 1 includes government bonds issued by the Republic of Austria;
- Level 2 - fair value is determined by applying valuation techniques that include active markets inputs (the inputs can be directly or indirectly confirmed and followed in the active markets such as quoted market prices of similar financial instruments, or all significant inputs in the model determining fair value may be verified and followed in the active market). In 2024 there is no transfer from Level 2 to Level 1 of equity instrument (2023: none);
- Level 3 - fair value is determined by applying valuation techniques containing inputs that cannot be directly or indirectly verified and followed in active markets, i.e. based on valuation techniques mainly containing information on the risks of the financial instruments. In 2024 there is no transfer from Level 3 to Level 1 of equity instrument (2023: none);

Note 5 B.1 presents quantitative information on financial assets and liabilities classification by hierarchy level.

The current income tax for the year is MKD 292,537 thousand and the amount of MKD 16,270 thousand is deferred tax which is recognized during the year through equity.

NOTES TO THE SEPARATE FINANCIAL STATEMENTS
December 31, 2024

17. INCOME TAX EXPENSE (continued)

B. Reconciliation between the Average Effective Tax Rate and the Applicable Tax Rate

Pursuant to the Law on Income Tax, the basis for calculating the profit tax is the gross profit determined as a difference between the total income and total expenses determined pursuant to the accounting regulations and standards increased for non-deductible expenses and reduced for deductible revenue. The tax base is reduced for tax incentives (investments in development and donations).

The basis for the reserve requirement is calculated as the average of the liabilities for each day of the calendar month that is established as the basis in the Indicative Calendar.

Mandatory reserve in foreign currency in the amount of MKD 5.535.737 thousand (2023: MKD 5.033.912 thousand) represents the prescribed amount of deposits allocated in accordance with the Decision on reserve requirement adopted by NBRNM.

The mandatory reserves in foreign currency are based on the average amount of deposits in foreign currencies during one calendar month. According to the amendments to the Decision which became effective on March 2024, the mandatory reserves in foreign currency is set at 85% of the amount calculated from foreign currency liabilities and 100% of the amount determined by domestic currency liabilities by currency clause.

Mandatory reserve in denars are calculated as the sum of the amount determined by the liabilities in local currency and 15% of the amount determined by the liabilities in foreign currency.

Accounts and deposits in the NBRSM, amounting to MKD 8,225,092 thousand (2023: MKD 7,468,222 thousand) include the balance of The Group's gyro account in the NBRSM, as well as an overnight deposit in the NBRSM.

The Group has recorded provisions for impairment losses for all known and foreseeable risks as of the date of the Consolidated financial statements.

The Group's portfolio contains a number of debtors whose ability to service and repay their debts has been impacted by economic developments in the Republic of North Macedonia.

The Group continues to be collateralized primarily by real estate, buildings and equipment for corporate loans and in the case of retail loans depending on the type of loan product.

Depending on the classification of loans, The Group strives for timely realization of the collateral instruments. In case it proves to be unsuccessful, it will be necessary to make an additional provisioning for impairment losses.

During 2024, The Group written-off receivables in amount of MKD 215.455 thousand (2023: MKD 296.329 thousand).

37. SUBORDINATED DEBT (continued)

Subordinated debt in the amount of MKD 1.931.362 thousand refers to a subordinated debt granted by the parent company, Steiermärkische Bank und Sparkassen AG, approved on 28 June 2013, with an initial total amount of EUR 10,000 thousand with maturity date 31.03.2027, of which EUR 5,000 thousand are with variable interest rate of Euribor +3% p.a. and the other half of EUR 5,000 thousand has fixed interest rate of 4.37%, EUR 6,000 thousand approved on 24.06.2013 with a fixed interest rate of 6.465% with maturity date 29.06.2026, EUR 15,000 thousand approved on 29.09.2017 with a fixed interest rate of 7.08% with maturity date 29.09.2027 and EUR 8,000 thousand approved on 29.09.2011 with a fixed interest rate of 5.11% and maturity date 30.09.2024.

Interest is payable semi-annually. It is mutually agreed with the creditor that the subordinated loan shall:

- be fully and readily available for covering The Group's risk and losses during The Group's operations;
- not be covered by other type of collateral by The Group or a person connected to The Group;
- in the case of bankruptcy or liquidation of The Group, the subordinated debt will be paid before settling the liabilities to The Group's shareholders;
- not be used for claims and contingent liabilities of The Group;
- not be treated as deposit.

(Special reserve)	(313.914)	(348.758)
Total contingent liabilities, less the special reserve	36.176.084	33.831.617

The contingent liabilities consist of potential liabilities regarding loans, guarantees, letters of credit issued to corporate entities, potential liabilities regarding retail loans, unused overdrafts on current accounts and unused limits on credit cards. The unused overdrafts have short-term maturity.

The contingent liabilities arising from overdrafts on current accounts and unused limits on credit cards are unsecured and are revocable in case of deterioration in the creditworthiness of the borrower.

The contingent liabilities of The Group to legal entities arising from guarantees and letters of credit are irrevocable. Unused credit limits granted to legal entities are subject to annual revision. Apart from the covered guarantees and letters of credit secured by a deposit, the remaining uncovered guarantees, letters of credit and unused credit limits granted to legal entities are secured by pledge of property, movable property, guarantees etc.

The Group is involved in litigation arising from its regular operations. As of 31 December 2024 The Group is involved in a total of 27 court proceedings with a total value of MKD 188,053,408 where The Group is sued and which do not result from the collection of demands. Below is a notice of more significant litigation.

The court proceedings on the lawsuit of minority shareholders Beta Farm DOOEL and others – first proceedings:

On 15 June 2020, the application was filed by four minority shareholders (three shareholders legal entities Beta Farm Dooel Skopje, Soloprom LTD Skopje, Seism Capital DOOEL Skopje and one person shareholder), to determine the nothingness/rebuttal of the Decision to increase share capital by issuing ordinary voting shares from the 13th show by a private offer from an institutional investor, brought to the Shareholders' Assembly (session held on 08 May 2021), the nothingness of the entry of the increase in the CR and the return of the situation in the shareholder book to the CDHV with a condition as before the entry of the increase, worth the dispute MKD 1,500,010.00, which was later determined by a decision of the Court at MKD 40,000.00. The Group responded to the lawsuit by proposing to the court that it reject it in its entirety as unfounded. The Group's management considers that the lawsuit filed by minority shareholders is unfounded, that the decision to increase the basic principal was taken by the Shareholders' Assembly in a manner and procedure under the applicable regulation and the Statute of The Group, and therefore this litigation is expected to be completed in favour of The Group.

NOTES TO THE SEPARATE FINANCIAL STATEMENTS
December 31, 2024

42. CONTINGENT LIABILITIES AND CONTINGENT ASSETS (continued)

42.1 CONTINGENT LIABILITIES (continued)

The lawsuit against minority shareholders Beta Farm DOOEL and other second proceedings:

On 24 June 2020, the application was filed by three minority shareholders (two shareholders legal entities Beta farm Dooel Skopje and Soloprom LTD S and one person shareholder), for determining the nothingness/rebuttal of decisions made at the Shareholders' Assembly (session held on 30 June 2020), the nothingness of the entry of the increase in the Central Register and the return of the situation in the shareholder book to the Central Securities Depository with a condition as before the entry of the increase, with a value of MKD 1,500 thousand, which was later determined by the Court at MKD 40,000, and a termination of proceedings was determined until the first court proceedings initiated by the plaintiffs were legally completed. The Group's management considers that the lawsuit filed by minority shareholders is unfounded, that the decisions under this lawsuit were taken by the Shareholders' Assembly in a manner and procedure in accordance with the applicable regulation and the Statute of The Group, and this litigation will end in favour of The Group.

The lawsuit against minority shareholders Beta Farm DOOEL and other third proceedings:

On 18.11.2020, the application was filed by three minority shareholders (two shareholders legal entities Beta Farm Dooel Skopje and Soloprom DOO Skopje and one shareholder physically (session held on 05.10.2020) with a value of MKD 40,000.00. The Court's decision determines the termination of proceedings. The Group's management considers that the lawsuit filed by minority shareholders is unfounded, that the decisions under this lawsuit were taken by the Shareholders' Assembly in a manner and procedure in accordance with the applicable regulation and the Statute of The Group, and this litigation will be completed in favour of The Group.

Court proceedings on lawsuits by minority shareholders Beta Farm DOOEL and others - compensation for damages:

On May 16, 2023, the application was filed by Beta Farm DOOEL Skopje, Soloprom DOO Skopje, Gjorge Jovanov and Sesame Capital DOOEL Skopje against sued Sparkase Banka AD Skopje and Steiermarkische Bank und Sparkassen AG Graz, for compensation of damages and value of MKD 39,162,148.00, filed under 58 TS1-115/23 before the Skopje Basic Civil Court. With the lawsuit, the plaintiffs demand that the plaintiffs in solidarity compensate the plaintiffs for a total of MKD 39,162,148.00, of which MKD 22,214,099.00 in the name of damages due to a dividend difference and an amount of MKD 16,948,049.00 in the name of damages due to a difference in participation in capital with legal penalty interest as of 09 May 2020. The court decided that the proceedings should be adjourned until the first proceedings were resolved.

NOTES TO THE SEPARATE FINANCIAL STATEMENTS
December 31, 2024**47. TAX RISKS**

Financial statements and accounting records of The Group are subject to tax audit by the tax authorities for a period of 5 years subsequent to the reported tax returns for the financial year and may impose additional tax liabilities. According to the estimates of The Group's management, they are not aware of any additional conditions that may cause potential materially significant liabilities on this basis.

48. EVENTS AFTER THE DATE OF THE CONSOLIDATED BALANCE SHEET

After the balance sheet date, no significant events have occurred that should be disclosed in the financial statements.
