# Q3'23 EBITDA below expectations; 2023-26 strategy announcement

Q3'23 results are below our expectations at the revenue/EBIT/EBITDA level. Revenue was below our expectations (PLN -0.4m) mainly due to the recognition of a lower amount of grants in the current period. The company recognized higher-than-expected cost of sales (PLN +0.16m), lower R&D costs (PLN -0.23m) and higher general and administrative expenses (PLN +0.23m), which ultimately translated into EBIT/EBITDA below our expectations. The slightly lower difference on net income is a result of recognition of higher-than-expected financial income (PLN +0.1m).

**Revenue.** Revenues from sales of products and services were in line with published preliminary estimates (-1% y/y to PLN 3.6m in Q3'23). The product sales line posted a 76% y/y increase in revenue to PLN 2.5m, and the R&D line saw a 50% y/y drop in revenue to PLN 1.1m. Sales and rental of printers generated PLN 2.3m in revenue in Q3'23 (+71% y/y), and sales of nanoinks generated PLN 0.2m in revenue in Q3'23 (-50% y/y).

**Costs.** On the cost of sales side, R&D expenses were maintained at a lower level y/y (PLN -0.19m), while cost of goods sold increased (in line with the increase in product sales). General and administrative expenses increased y/y and q/q in Q3'23 mainly due to intensified efforts to commercialize the developed technology.

**Financial activities and net profit.** The balance on financing activities amounted to PLN 0.1m in Q3'23 vs. PLN -0.1m in Q3'22. Income tax amounted to PLN 0m, resulting in a net loss of PLN 0.8m in Q3'23 vs. a net profit of PLN 0.5 million in Q3'22.

**Cash flow from operations** amounted to PLN -2.4m in Q3'23 (vs. PLN 0.9m in Q3'22), which was negatively affected by an increase in inventories (stocking up for new orders), an increase in receivables (contracted

equipment sales) and a decrease in payables. Capex was PLN -2.7m in Q3'23 (PLN +1.5m g/g vs. PLN -0.7m vs. Q3'22).

The company approved a strategy for 2023-26 which aims focus on two main business areas - business development and sales, and operational development to increase production capacity in all three business lines. The company reiterated the goal of increasing revenues to PLN 100m by the end of 2026 and achieving the first industrial-scale deployments of XTPL technology. In addition, it plans to expand the projects under development into new industries in the form of telecommunications and biosensors, as well as to further expand its international distributor network and establish stationary sales centers in key technological destinations: USA, Taiwan, South Korea.

Opinion. **NEUTRAL.** We expect a neutral investor reaction to the company's results, which are below our expectations. We note that current results have little impact on the company's valuation, and in the short term, results are likely to be burdened by investments in scale growth and product commercialization. Printer sales are taking an increasing share of the sales structure, which is a positive sign. Two industrial modules were sold in Q3'23, indicating progress in industrial deployment processes. For the full year, the company should sell 13 devices. The assumptions of the published strategy are in line with previously communicated targets. Printer sales should accelerate in the coming quarters, but we expect further investment in sales development, which could be a drag on results. Important for the company's valuation in the medium term will be information on progress in implementation projects and progress in printer sales.

### Erste Group rating definitions

Buy	> +20% from target price
Accumulate	+10% < target price < +20%
Hold	0% < target price < +10%
Reduce	-10% < target price < 0%
Sell	< -10% from target price

Our target prices are established by determining the fair value of stocks, taking into account additional fundamental factors and news of relevance for the stock price (such as M&A activities, major forthcoming share deals, positive/negative share/sector sentiment, news) and refer to 12 months from now. All recommendations are to be understood relative to our current fundamental valuation of the stock. The recommendation does not indicate any relative performance of the stock vs. a regional or sector benchmark.

A history of all recommendations within the last 12 months is provided under the following link:

https://www.erstegroup.com/en/research/research-legal

Explanation of valuation parameters and risk assessment

Unless otherwise stated in the text of the financial investment research, target prices in the publication are based on a discounted cash flow valuation and/or comparison of valuation ratios with companies seen by the analyst as comparable or a combination of the two methods. The result of this fundamental valuation is adjusted to reflect the analyst's views on the likely course of investor sentiment. Whichever valuation method is used there is a significant risk that the target price will not be achieved within the expected timeframe. Risk factors include unforeseen changes in competitive pressures or in the level of demand for the company's products. Such demand variations may result from changes in technology, in the overall level of economic activity or, in some cases, from changes in social values. Valuations may also be affected by changes in taxation, in exchange rates, in the capital market sentiment and in regulatory provisions. Investment in overseas markets and instruments such as ADRs can result in increased risk from factors such as exchange rates, exchange controls, taxation, political, economic and social conditions.

All market prices within this publication are closing prices of the previous trading day (unless otherwise mentioned within the publication).

Detailed information about the valuation and methodology of investment research by the Erste Group Bank AG is provided under the following link:

https://produkte.erstegroup.com/Retail/de/PDF/Bewertungsmethoden/index.phtml

Planned frequency of updates for recommendations

Target prices for individual stocks are meant to be 12 month target prices, starting from the date of the publication. Target prices and recommendations are reviewed usually upon release of quarterly reports, or whenever circumstances require.

Periodical publications are identified by their respective product name and indicate update frequency as such (e.g. Quarterly). Recommendations mentioned within these publications are updated in an according frequency, unless otherwise mentioned (e.g. a 12M TP is not updated on a monthly base, even when mentioned in summarizing monthly/quarterly product).
