The Issuer hereby declares that, having taken all reasonable care to ensure that such is the case, the information contained in, or incorporated by reference into, this Prospectus is, to the best of its knowledge, in accordance with the facts and does not omit anything likely to affect the import of such information.

IMPORTANT NOTICE

This Prospectus has been approved by the Austrian Financial Market Authority (*Finanzmarktaufsichtsbehörde – "FMA"*) in its capacity as competent authority under the Austrian Capital Market Act (*Kapitalmarktgesetz*), as amended (the "**KMG**") for the approval of this Prospectus. **The accuracy of the information contained in this Prospectus does not fall within the scope of examination by the FMA under the KMG and the Prospectus Directive. The FMA has examined this Prospectus only in respect of its completeness, coherence and comprehensibility pursuant to § 8a KMG.**

In addition, the Issuer has requested the FMA to provide the *Autoritatea de Supraveghere Financiară – Sectorul Instrumentelor și Investițiilor Financiare* (the "**Romanian Financial Supervisory Authority**"), in its capacity as competent authority in Romania under the Romanian capital markets law (*Legea nr. 24/2017 privind emitentii de instrumente financiare si operatiuni de piata*) dated 21 March 2017 (the "**Capital Markets Law**") and the Romanian Emergency Government Ordinance no. 93/2012 on the establishment, organisation and functioning of the Romanian Financial Supervisory Authority, as amended, transforming the Prospectus Directive into law in Romania with a certificate of approval attesting that this Prospectus has been drawn up in accordance with Article 5 (4) of the Prospectus Directive and the KMG (a "**Notification**"). The Issuer may request the FMA to provide competent authorities in additional member states (the "**Member States**") of the European Economic Area (the "**EEA**") with similar Notifications.

Notes may, after such Notification, be admitted to trading on the regulated market of any stock exchange or on a multilateral trading facility located in a Member State of the EEA and/or may be publicly offered in a Member State within the EEA, all as may be agreed between the Issuer and the relevant Dealer (as defined below). The Issuer may also issue unlisted Notes and/or Notes not admitted to trading on any market and/or Notes not publicly offered.

The Dealers (other than Banca Comercială Română S.A.) have not independently verified the information contained in this Prospectus. Accordingly, the Dealers (other than Banca Comercială Română S.A.) make no representation, express or implied, or accept any responsibility, with respect to the accuracy or completeness of any of the information in this Prospectus. Neither this Prospectus nor any Final Terms nor any financial statements nor any other information supplied in connection with the Programme or any Notes constitutes an offer or an invitation to subscribe for or purchase any Notes or is intended to provide the basis of any credit or other evaluation and should not be considered as a recommendation by either the Issuer, the Dealers or any of them that any recipient of this Prospectus or any Final Terms or any financial statements or any other information supplied in connection with the Programme or the Notes should subscribe for or purchase any of the Notes. Each investor contemplating subscribing for or purchasing Notes should make its own independent investigation of the financial condition and affairs and its own appraisal of the creditworthiness of the Issuer and each recipient of this Prospectus or any Final Terms shall be taken to have made its own investigation and appraisal of the condition (financial or otherwise) of the Issuer.

None of the Dealers undertakes to review the financial condition or affairs of the Issuer during the life of the arrangements contemplated by this Prospectus nor to advise any investor or potential investor in the Notes of any information coming to the attention of any Dealers. Investors should review, *inter alia*, the most recently published financial statements of the Issuer when deciding whether or not to subscribe for or purchase any Notes.

Neither the delivery of this Prospectus nor the offering, sale, issue or delivery of any Notes shall, in any circumstances, imply that the information contained herein is correct at any time subsequent to the date hereof or that any other information supplied in connection with the Programme is correct as of any time subsequent to the date indicated in the document containing the same.

No person has been authorised to give any information or to make any representation other than those contained in this Prospectus in connection with the issue or sale of the Notes and, if given or made, such information or representation must not be relied upon as having been authorised by the Issuer or the Dealers. Neither the delivery of this Prospectus nor any sale made in connection herewith shall, under any circumstances, create any implication that there has been no change in the affairs of the Issuer since the date hereof or the date upon which this Prospectus has been most recently supplemented or that there has been no adverse change in the financial position of the Issuer since the date hereof or the date upon which this Prospectus has been most recently supplemented or that any other information supplied in connection with the Programme is correct as of any time subsequent to the date on which it is supplied or, if different, the date indicated in the document containing the same.

The distribution of this Prospectus and the offering or sale of the Notes in certain jurisdictions may be restricted by law. Persons into whose possession this Prospectus comes are required by the Issuer and the Dealers to inform themselves about and to observe any such restriction. The Notes have not been and will not be registered under the United States Securities Act of 1933, as amended (the "**Securities Act**"), and may include Notes in bearer form that are subject to US tax law requirements. The Notes may not be offered, sold or delivered within the United States or to US persons except in certain transactions permitted by US tax regulations and the Securities Act. For a description of certain restrictions on offers and sales of Notes and on the distribution of this Prospectus, see the section entitled "*Subscription and Sale*".

If the relevant Final Terms in respect of any Notes include a legend entitled "*Prohibition of Sales to Retail Investors in the European Economic Area*", the Notes are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in the EEA. For these purposes, a retail investor means a person who is one (or more) of: (i) a retail client as defined in point (11) of Article 4(1) of MiFID II; (ii) a customer within the meaning of Directive 2002/92/EC ("**IMD**"), where that customer would not qualify as a professional client as defined in point (10) of Article 4(1) of MiFID II; or (iii) not a qualified investor as defined in the Prospectus Directive. If the relevant Final Terms include the above-mentioned legend, no key information document required by Regulation (EU) No. 1286/2014 (the "**PRIIPs Regulation**") for offering or selling the Notes or otherwise making them available to retail investors in the EEA has been prepared and therefore offering or selling the Notes or otherwise making them available to any retail investor in the EEA may be unlawful under the PRIIPs Regulation.

If the relevant Final Terms in respect of any Notes specify "*Prohibition of Sales to Retail Investors in the European Economic Area*" as "*Not Applicable*", except to the extent sub-paragraph (i) below may apply, in relation to each Member State of the EEA which has implemented the Prospectus Directive (each, a "**Relevant Member State**") any offer of Notes will only be made pursuant to the rules for public offers under the Prospectus Directive, as implemented in that Relevant Member State, or according to an exemption under the Prospectus Directive, as implemented in that Relevant Member State, from the requirement to publish a prospectus for offers of Notes. Accordingly any person making or intending to make an offer in that Relevant Member State of Notes which are the subject of an offering contemplated in this Prospectus as completed by the Final Terms in relation to the offer of those Notes may only do so (i) if a prospectus for such offer has been approved by the competent authority in that Relevant Member State or, where appropriate, approved in another Relevant Member State and notified to the competent authority in that Relevant Member State and (in either case) published, all in accordance with the Prospectus Directive, provided that any such prospectus has subsequently been completed by the Final Terms which specify that offers may be made other than pursuant to Article 3(2) of the Prospectus Directive in that Relevant Member State and such offer is made in the period beginning and ending on the dates specified for such purpose in such prospectus or the Final Terms, as applicable, and the Issuer has consented in writing to its use for the purpose of such offer or (ii) in circumstances in which no obligation arises for the Issuer or any Dealer to publish a prospectus pursuant to Article 3 of the Prospectus Directive or supplement a prospectus pursuant to Article 16 of the Prospectus Directive, in each case, in relation to such offer. Except to the extent sub-paragraph (i) above may apply, neither the Issuer nor any Dealer has authorised, nor do they authorise, the making of any offer of Notes in circumstances in which an obligation arises for the Issuer or any Dealer to publish or supplement a prospectus for such offer.

Each Dealer and/or further financial intermediary subsequently reselling or finally placing Notes to be issued under the Programme may be entitled to use this Prospectus as set out in the section entitled "*Consent to the Use of this Prospectus*".

The relevant Final Terms in respect of any Notes may include a legend entitled "MiFID II product governance" which will outline the target market assessment in respect of the Notes and which channels for distribution of the Notes are appropriate. Any person subsequently offering, selling or recommending the

Notes (a "Distributor") should take into consideration the target market assessment; however, a Distributor subject to MiFID II is responsible for undertaking its own target market assessment in respect of the Notes (by either adopting or refining the target market assessment) and determining appropriate distribution channels.

A determination will be made in relation to each issue about whether, for the purpose of the Product Governance Rules under EU Delegated Directive 2017/593 (the "**MiFID II Product Governance Rules**"), any Dealer subscribing for any Notes is a manufacturer in respect of such Notes, but otherwise neither the Arranger nor the Dealers nor any of their respective affiliates will be a manufacturer for the purpose of the MiFID II Product Governance Rules.

In connection with the issue of any Tranche of Notes, the Dealer or Dealers (if any) named as the Stabilising Manager(s) (or persons acting on behalf of any Stabilising Manager(s)) in the applicable Final Terms may over-allot Notes or effect transactions with a view to supporting the market price of the Notes at a level higher than that which might otherwise prevail. However, stabilisation may not necessarily occur. Any stabilisation action may begin at any time after the adequate public disclosure of the terms of the offer of the relevant Tranche of Notes and, if begun, may cease at any time, but it must end no later than the earlier of 30 days after the issue date of the relevant Tranche of Notes and 60 days after the date of the allotment of the relevant Tranche of Notes. Any stabilisation action or over-allotment must be conducted by the Stabilising Manager(s) (or persons acting on behalf of any Stabilising Manager(s)) in accordance with all applicable laws and rules.

This Prospectus contains certain forward-looking statements. Forward-looking statements are statements that do not relate to historical facts and events. They are based on the analyses or forecasts of future results and estimates of amounts not yet determinable or foreseeable. These forward-looking statements are identified by the use of terms and phrases such as "anticipate", "believe", "could", "estimate", "expect", "intend", "may", "plan", "predict", "project", "will" and similar terms and phrases, including references and assumptions. This applies, in particular, to statements in this Prospectus containing information on future earnings capacity, plans and expectations regarding each of the Issuer's business and management, its growth and profitability, and general economic and regulatory conditions and other factors that affect it.

Forward-looking statements in this Prospectus are based on current estimates and assumptions that the Issuer makes to the best of its present knowledge. These forward-looking statements are subject to risks, uncertainties and other factors which could cause actual results, including the Issuer's financial condition and results of operations, to differ materially from and be worse than results that have expressly or implicitly been assumed or described in these forward-looking statements. The Issuer's business is also subject to a number of risks and uncertainties that could cause a forward-looking statement, estimate or prediction in this Prospectus to become inaccurate. Accordingly, potential investors are strongly advised to read the following sections of this Prospectus: "*Summary*", "*Risk Factors*" and "*Banca Comercială Română S.A.*". These sections include more detailed descriptions of factors that might have an impact on each of the Issuer's business and the markets in which it operates.

In light of these risks, uncertainties and assumptions, future events described in this Prospectus may not occur. In addition, the Issuer does not assume any obligation, except as required by law, to update any forward-looking statement or to conform these forward-looking statements to actual events or developments.

Any websites referred to in this Prospectus are for information purposes only and do not form part of this Prospectus.

As at the date of this Prospectus, the specific benchmark(s) are not yet determined. The Final Terms may set out the name of the specific benchmark(s) and the relevant administrator. In such a case they will further specify if the relevant administrator appears or does not appear on the register of administrators and benchmarks (the "**Register**") established and maintained by ESMA pursuant to Article 36 of the Regulation (EU) 2016/1011 (the "**Benchmark Regulation**").

B. The Issuer

B.1	The legal and commercial name of the Issuer.	The legal name of the Issuer is "Banca Comercială Română S.A.", its commercial name is "BCR".
B.2	The domicile and legal form of the Issuer, the legislation under which the Issuer operates and its country of incorporation.	BCR is a joint stock corporation (<i>societate pe acțiuni</i>) with a two-tier board system, incorporated and domiciled in Romania and operating under Romanian law.
B.4b	Any known trends affecting the Issuer and the industries in which it operates.	According to the National Institute of Statistics (" INS ") ¹ , the real Romanian gross domestic product increase by 4.3 per cent. year on year in the third quarter of 2018 driven by household consumption and change in inventories. The inflation rate was 3.4 per cent. year on year in November 2018 according to the INS ² and

		<p>entered the National Bank of Romania ("NBR") target. Fresh fruits, vegetables and also fuels were cheaper in November 2018 compared with the previous month, while the leu remained stable in the market, contributing to a decline in the inflation rate. Core inflation which is closely followed by the NBR was also on a downward trend in the autumn of 2018, removing the pressure on the NBR to increase rates.</p> <p>On 31 August 2018, Standard & Poor's ("S&P") affirmed Romania's credit rating at 'BBB-' with stable outlook. The stable outlook reflects S&P's opinion that although Romanian politics remains turbulent and is becoming increasingly interventionist, existing checks and balances will still be robust enough to withstand political attempts to interfere in the independence of institutions. In addition, while S&P foresees that twin deficits will remain elevated as a result of the government's pro-cyclical fiscal stance, it expects that general government and external debt will increase only gradually over the next two years, barring a major economic slowdown. In November 2018, Fitch maintained Romania's credit rating at 'BBB-' with stable outlook, but noted that there was a limit in how much the government could squeeze capital expenditure and rely on ad-hoc fiscal measures for keeping the budget afloat. Romania's investment grade rating is supported by its moderate level of public debt, while rising budget and current account deficits were seen as vulnerabilities by the credit rating agency.</p> <p>Asset quality in the banking sector improved significantly following the start of the non-performing loans ("NPL") reduction process in 2014. As a result of consistent efforts from banks to clean-up balance sheets, the NPL ratio (EBA methodology) fell to 5.6 per cent. as of September 2018. The NPL clean-up progress also paved the way for enhanced profitability: the banking sector reported a return on equity of 16.4 per cent. as of September 2018, the highest level since 2008, due to higher market interest rates and loan volumes, as well as very low underlying risk costs.</p>
B.5	If the Issuer is part of a group, a description of the group and the Issuer's position within the group.	BCR group (the " Group ") consists of the following companies: Banca Comercială Română S.A., BCR Leasing IFN S.A., BCR Banca pentru Locuințe S.A., BCR Pensii Societate de Administrare a Fondurilor de Pensii Private S.A., Suport Colect S.R.L., CIT One S.R.L., BCR Payments Services S.R.L., BCR Fleet Management S.R.L. (a direct subsidiary of BCR Leasing IFN S.A.) and Banca Comercială Română Chișinău S.A. RISK FACTORS

Prospective investors should consider carefully the risks set forth below and the other information contained in this Prospectus prior to making any investment decision with respect to the Notes. Prospective investors should note that the risks described below are not the only risks the Issuer faces. The Issuer has described only those risks relating to its business, operations, financial condition or prospects that it considers to be material and of which it is currently aware. There may be additional risks that the Issuer currently considers not to be material or of which it is not currently aware, and any of these risks could have the effects set forth above.

Prospective investors should also read the detailed information set out elsewhere in this Prospectus and should consult with their own professional advisers (including their financial, accounting, legal and tax advisers) and reach their own views prior to making any investment decision.

Words and expressions defined in the section entitled "Terms and Conditions of the Notes" or elsewhere in this Prospectus shall have the same meanings in this section "Risk Factors".

Factors that may affect the Issuer's ability to fulfil its obligations under Notes to be issued pursuant to this Prospectus

Each of the Issuer related risks highlighted below could have a material adverse effect on the Issuer's business, operations, financial condition or prospects which, in turn, could have a material adverse effect on the amount of principal and interest, if any, which investors will receive in respect of the Notes. In addition, each of the Issuer related risks highlighted below could adversely affect the trading price of the Notes or the rights of investors under the Notes and, as a result, investors could lose some or all of their investment.

The Issuer believes that the following factors may affect its ability to fulfil its obligations under Notes to be issued pursuant to this Prospectus. Most of these factors are contingencies which may or may not occur and the Issuer is not in a position to express a view on the likelihood of any such contingency occurring.

In addition, factors which are material for the purposes of assessing the market risks associated with Notes to be issued pursuant to this Prospectus are described below.

The Issuer believes that the factors described below represent the principal risks inherent in investing in Notes to be issued pursuant to this Prospectus, but the inability of the Issuer to pay interest, principal or other amounts on or in connection with any Notes may occur for other reasons which may not be considered significant risks by the Issuer based on information currently available to it or which it may not currently be able to anticipate.

Risks related to the Issuer and its business

BCR operates in markets that are highly competitive and its business and results of operations may be adversely affected.

BCR competes with a number of large international financial institutions and local competitors and it faces significant competition in all aspect of its business.

The competitive landscape of credit institutions and other financial institutions in Romania and throughout the rest of Europe is subject to rapid change and recent regulatory and legal changes are likely to result in changed competitive dynamics in certain key areas, such as retail banking.

Certain competitors of BCR may have access to lower cost funding and/or be able to attract deposits on more favourable terms than BCR and may have stronger and more efficient operations. Furthermore, BCR's competitors may be better in attracting and retaining clients and key employees, which may have a negative impact on BCR's performance and future prospects.

The trend towards consolidation in the global financial services industry, which has increased due to the financial and economic crisis, is creating competitors with large financial, technical and operating resources as well as extensive ranges of product and service offerings, increased access to capital and greater efficiency and pricing power. These global financial institutions may be more appealing to customers, especially large corporate customers, because of their larger international presence or financial resources.

If BCR is unable to respond to the competitive environment with products and service offerings that are profitable, it may lose market shares in important parts of its business or incur losses on some or all of its activities.

Difficult macroeconomic and financial market conditions may have a material adverse effect on BCR's business, financial condition, results of operations and prospects.

By 2017, the Euro-zone was growing strongly again and several Euro-zone countries got upgraded. A new sovereign debt crisis in any Euro-zone country could have material adverse effects on the European financial system and potentially spill over into other Euro-zone countries. Many European economies continued to face structural challenges as unemployment and structural debt levels remain elevated which constantly results in unusually high political risk and polarization for European standards.

The still ultra-low interest environment creates further pressure on the financial sectors globally. The impact of the European Central Bank's ("ECB") or any other entity's actions in the future is currently unknown and these actions may or may not result in the expected benefits for the relevant economies in the long-run. Monetary policy in the future will depend on inflation and due to these unprecedented policies could vary from the foreseen path in either direction fast and without prior notice. Variances in monetary policy may result also in increased volatility in debt and foreign exchange markets. Moreover, excesses in both advanced and particularly emerging economies, may be extended. Global monetary policy might have helped to build significant exaggeration in various asset classes such as equity, housing and bonds and these asset prices could also correct swiftly and markedly.

The strong recovery of the Euro-zone could already be fading as growth rates and leading indicators have been trending lower in 2018. Financial markets volatility may be increasing further as well due to but not limited to erratic policy making in the U.S. and geopolitical uncertainties over North Korea, Russia, Ukraine, Turkey, Iran and Syria and the high total debt levels in China. The still unresolved Brexit negotiations are a further risk factor as a disorderly Brexit could potentially cause large disruptions to financial markets as well as a sizeable macroeconomic shock.

In 2018, U.S. President Trump re-started to hit on global trade and imposed tariffs on certain goods and countries. Thus, there is a significant risk for a global trade conflict with potentially grave consequences for international trade and economic growth. Protectionism and nationalism are still on the rise worldwide and multilateral institutions and policymaking are under constant attack from nationalist forces. There is a risk that BCR's performance might be hit as BCR's general strategy is based on further European integration and global trade and not the opposite of it. This global economic situation combined with increasing geopolitical challenges has implications on the Euro-zone and may lead to corresponding risks within the Euro-zone.

BCR's performance will continue to be influenced by conditions in the global, and especially European, economy. The outlook for the European and global economy over the near to medium term remains in general favourable, which also impacts prospects for stabilisation and improvement of economic and financial conditions in Romania and Central and Eastern Europe ("CEE"). In general, should economic conditions affecting BCR's operating market become subdued again, BCR's results and operations may be materially and adversely affected. Furthermore, unfavourable economic conditions, continued instability of the Romanian fiscal regime, special regulations and other effects of a continued economic downturn that BCR may fail to predict, could have a material adverse effect on BCR's business, prospects, results of operations and financial condition.

BCR has experienced and may in the future continue to experience deterioration in credit quality, particularly as a result of financial crises or economic downturns.

BCR is, and may in the future continue to be, exposed to the risk that borrowers may not repay their loans according to their contractual terms, that the collateral or income stream securing the payment of these loans may be insufficient, or that legislation is imposed setting fixed exchange rates for loans in foreign currencies.

In 2011, an increasing percentage of these exposures deteriorated in quality as a result of the unfavourable economic environment and a considerable number of these exposures continued to deteriorate. This is particularly true for customer loans in currencies other than the local currency (Romanian leu, "RON"). As the value of RON declines versus the foreign currencies of such loans, as occurred in Romania during the economic downturn, the effective cost of the foreign currency denominated loan to the local customer may increase substantially, which can lead to delinquent payments on customer loans, migration of previously highly rated loans into lower rated categories and, ultimately, increases in non-performing loans and impairment charges.

The effects of the global economic and financial crisis, such as stagnating or declining growth rates or negative gross domestic product ("GDP") development, significantly reduced private consumption and corporate investment, rising unemployment rates and decreasing private and commercial property values in

certain regions, have had in recent years a particularly negative effect on the credit quality of BCR's loan portfolio.

Deterioration in BCR's credit quality and increases in non-performing loans may result in increased risk costs for BCR. BCR's risk costs are based on, among other things, its analysis of current and historical probabilities of default and loan management methods and the valuation of underlying assets and expected available income of clients, as well as other management assumptions. BCR's analyses and assumptions may prove to be inadequate and might result in inaccurate predictions of credit performance.

The new impairment model under IFRS 9 (adopted as of 1 January 2018) requires recognition of credit loss allowances ("CLA") based on expected credit losses ("ECL") rather than only incurred credit losses as is the case under IAS 39. It applies to credit risk exposures stemming from debt instruments classified at amortized cost ("AC") or fair value through other comprehensive income (FVOCI), lease receivables, financial guarantee contracts and certain loan commitments.

For credit risk exposures that are not credit-impaired at initial recognition, BCR will recognise CLA at an amount equal to 12-month ECL (referred to as stage 1) for as long as no significant increase in credit risk since initial recognition (SICR) is identified at the reporting date. In the other cases, the CLA is measured at lifetime ECL and the related instruments are referred to as stage 2, unless they are found to be credit-impaired at the reporting date (referred to as stage 3). For purchased or originated credit-impaired financial assets ("POCI"), only adverse changes in lifetime ECL after the initial recognition are distinctly recognised as CLA, whilst favourable changes are recognized as impairment gains increasing the carrying amount of the related POCI assets. The measurement of ECL reflects a probability-weighted outcome, the time value of money and reasonable and supportable forward-looking information.

For lease receivables and trade receivables containing a significant financing component (where BCR also includes its factoring receivables), IFRS 9 allows a simplified impairment approach, whereby CLA are always measured at lifetime ECL. BCR will not apply this simplification.

The changes and the impact triggered by the transition to IFRS 9 are detailed in BCR's Unaudited Interim IFRS-EU Financial Statements as at 30 June 2018. The impairment remeasurement had a negative impact in accounting equity of RON 57.7 million at BCR individual level, respectively of RON 61.9 million at BCR Group consolidated level. Overall the impact from reclassification and remeasurement of impairment resulting from IFRS 9 implementation was of RON 48.5million decrease in Banks's own funds (individual level) and RON 51.2 million decrease in Group's own funds (consolidated level).

Due to the constant efforts in recent years for the overall reduction of the non-performing loans ("NPL") book through recoveries, sales of selected NPL portfolios and write-offs, the NPL ratio stood at 8.1 per cent. as at 31 December 2017, significantly lower as compared with 11.8 per cent. as at 31 December 2016 and continued to decrease to 6.7 per cent. as at 30 June 2018. The Group's non-performing NPL provision coverage ratio (which refers to risk provisions for loans and advances to customers as a percentage of non-performing loans and advances to customers) of the Group has improved throughout the year 2017. In addition, the NPL coverage ration maintained its level above 90.0 per cent. after the transition to IFRS 9, reaching the value of 93.9 per cent. as of September 2018 as compared with 92.9 per cent. as of December 2017. BCR seeks to maintain a NPL coverage ratio that, in management's judgement, is appropriate to cover potential credit losses. However, the current NPL coverage ratio may decline in the future or may not prove to be sufficient. The relatively high non-performing loan ratio contributes further to a great extent to maintaining a fragile pace of lending to customers.

Deterioration in credit quality may continue in Romania and could even intensify if economic conditions turn difficult or if improving business climates are temporary. In addition, unanticipated political events or a continued lack of liquidity could result in credit losses which exceed the amount of BCR's loan loss provisions.

Each of the above factors has had in the past and could have in future periods a material adverse effect on BCR's results of operations, financial condition and capital base.

BCR is subject to significant counterparty risk, and defaults by counterparties may lead to losses that exceed BCR's provisions.

In the ordinary course of its business, BCR is exposed to the risk that third parties who owe BCR money, securities or other assets will not perform their obligations. This exposes BCR to the risk of counterparty defaults, which have historically been higher during periods of economic downturn.

In the ordinary course of its business, BCR is exposed to a risk of non-performance by counterparties in the financial services industry. This exposure can arise through trading, lending, clearance and settlement and many other activities and relationships. These counterparties include brokers and dealers, custodians, commercial credit institutions, investment banks, mutual and hedge funds, and other institutional clients. Many of these relationships expose BCR to credit risk in the event of a counterparty default. In addition, BCR's credit risk may be exacerbated when the collateral it holds cannot be realised or is liquidated at prices below the level necessary to recover the full amount of the loan or cover the full amount of derivative exposure. Many of the hedging and other risk management strategies utilised by BCR also involve transactions with financial services counterparties. A weakness or insolvency of these counterparties may impair the effectiveness of BCR's hedging and other risk management strategies. BCR will incur losses if its counterparties default on their obligations. If a higher than expected proportion of BCR's counterparties default, or if the average amount lost as a result of defaults is higher than expected, actual losses due to counterparty defaults will exceed the amount of provisions already taken and results of operation will be adversely affected. To mitigate the impact of such events, BCR calculates and holds a capital buffer, meaning that potential losses are covered by BCR's own funds.

Counterparty risk between financial institutions has increased from time to time in recent years as a result of volatility in the financial markets. Concerns about potential defaults by one financial institution can lead to significant liquidity problems, losses or defaults by other financial institutions as the commercial and financial soundness of many financial institutions is interrelated due to credit, trading and other relationships. Even a perceived lack of creditworthiness may lead to market-wide liquidity problems. This risk is often referred to as "systemic risk", and it affects credit institutions and all different types of intermediaries in the financial services industry. Systemic risk could lead to a need for BCR as well as other credit institutions in the markets in which BCR operates to raise additional capital while at the same time making it more difficult to do so. Systemic risk could therefore have a material adverse effect on BCR's business, financial condition, results of operations, liquidity and/or prospects.

BCR is exposed to declining values of the collateral supporting commercial and residential real estate loans.

Presently, the economic surroundings are relative stable in the CEE region and therefore, the collateral values are steady. The real estate market prices have shown in general an upward trend in the last years. Collateral values, however, are strongly correlated to the real estate market price development. If the market conditions take a turn for the worse, collateral values will be negatively influenced. BCR's real estate loan portfolios could suffer in the future impairment losses if property values would decline. Additional risks include: collateral cannot be enforced or, as a result of weaknesses in BCR's collateral management or work-out processes, collateral values prove to be insufficient. Increasing unemployment rates could also lead to higher default rates and impairment losses on non-property commercial and consumer loans. If either of these risks were to materialise, it could have a material adverse effect on BCR's business, financial condition, results of operations, liquidity or prospects.

Changes in interest rates are caused by many factors beyond BCR's control, and such changes can have significant adverse effects on its financial results, including net interest income.

BCR derives the majority of its operating income from net interest income. Interest rates are sensitive to many factors beyond BCR's control, such as inflation, monetary policies set by the National Bank of Romania (the "NBR") and the Romanian government, the liberalisation of financial services and increased competition in the market in which BCR operates, domestic and international economic and political conditions, as well as other factors. Changes in interest rates can affect the spread between the rate of interest that a credit institution pays to borrow funds from its depositors and other lenders and the rate of interest that it charges on loans it extends to its customers. While the competitive pressure on the margins is a rather obvious factor, also changes in the absolute level of the interest rate environment can affect the spread between the rate of interest that a credit institution pays to borrow funds from its depositors and other lenders and the rate of interest that it charges on loans it extends to its customers. If the interest margin decreases, net interest income will also decrease unless BCR is able to compensate such decrease by increasing the total amount of funds it lends to its customers. Ultra-low interest rate monetary policy accompanied by quantitative easing brings additional challenge to interest margin stability as the potential to re-price customers' deposits might be exhausted sooner than lending rates find their new equilibrium. Additionally, in a very low or negative interest rate environment, BCR will have increased costs of maintaining the regulatory and prudential liquidity buffers held in cash and low yield highly liquid assets. An increase in rates charged to customers can also negatively impact interest income if it reduces the amount of customer borrowings. For competitive reasons, BCR may choose to raise rates of interest it pays on deposits without being allowed to make a corresponding increase in the interest rates it charges to its customers,

except those situations when the raise is mandatory given to a legal provision. Finally, a mismatch in the structure of interest-bearing assets and interest-bearing liabilities in any given period could, in the event of changes in interest rates, reduce BCR's net interest margin and have a material adverse effect on its net interest income and, thereby, its business, financial condition, results of operations liquidity or prospects.

Changes in monetary policy are beyond BCR's control and difficult to predict.

BCR is affected by the monetary policies adopted by the NBR. The actions of NBR directly impact BCR's costs of funds for lending, capital raising and investment activities and may impact the value of financial instruments BCR holds and the competitive and operating environment for the financial services industry. BCR cannot predict whether these actions will have a material adverse effect for the Bank and its operations. In addition, changes in monetary policy may affect the credit quality of BCR's customers. Any changes in monetary policy are beyond BCR's control and difficult to predict.

Since the majority of BCR's operations, assets and customers are located in Romania which is not part of the Euro-zone, BCR and its customers are exposed to currency risks.

The majority of BCR's operations, assets and customers are located in Romania which is not part of the Euro-zone (i.e. it does not use the Euro as its legal tender), and financial transactions in currencies other than local currency (RON) give rise to foreign currency risks. In addition to loans denominated in RON, many of BCR's retail and corporate customers in Romania have taken out loans which are denominated in currencies other than their local currency (primarily in EUR). To the extent that the local currency (RON) will decline in value in the future relative to the currency in which such loans were made, borrowers will need to convert a larger amount of local currency (RON) into the currency in which the loan is denominated in order to make payments of principal and interest on the loan. In this scenario, BCR anticipates a higher number of loan defaults. Alternatively, the local government may undertake measures that affect currency levels and exchange rates and impact BCR's credit exposure to such currencies.

These and other effects of currency devaluation could have a material adverse effect on BCR's business, financial condition, results of operations, liquidity or prospects.

Market fluctuations and volatility may adversely affect the value of BCR's assets, reduce profitability and make it more difficult to assess the fair value of certain of its assets.

Financial markets could face periods of significant stress conditions, with steep falls in perceived or actual values of assets held by credit institutions and other financial institutions which could be accompanied by a severe reduction in market liquidity. These events have negatively affected the value of the financial assets available for sale and the financial assets held-to-maturity particularly in 2011, adversely affecting BCR's results of operations for that period. Future deteriorations in economic and financial market conditions could lead to additional impairment charges or revaluation losses in future periods. Despite a recovery in economic and financial market conditions over the last five years in Romania, the value of financial assets may continue to fluctuate significantly or materially impact BCR's capital and comprehensive income if the fair value of financial assets declines.

Market volatility and illiquidity may make revaluation of certain exposures difficult, and the value ultimately realised by BCR may be materially different from the current or estimated fair value. In addition, BCR's estimates of fair value may differ materially both from similar estimates made by other financial institutions and from the values that would have been used if a market for these assets had been readily available. Any of these factors could require BCR to recognise further revaluation losses or realise impairment charges, any of which may adversely affect its business, financial condition, results of operations, liquidity or prospects.

BCR's hedging strategies may prove to be ineffective.

BCR utilises a range of instruments and strategies to hedge risks. Unforeseen market developments may have a significant impact on the effectiveness of hedging measures. Instruments used to hedge interest and currency risks can result in losses if the underlying financial instruments are sold or if valuation adjustments must be undertaken. Gains and losses from ineffective risk-hedging measures can increase the volatility of the results generated by BCR, which could have a material adverse effect on BCR's business, financial condition, results of operations, liquidity or prospects.

BCR's business entails operational risks.

BCR is exposed to operational risk, which is the risk of loss resulting from inadequate or failed internal processes, people and systems or from external events, including in particular legal, regulatory, compliance and outsourcing risks. BCR is susceptible to, among other things, fraud by employees or outsiders, including unauthorised transactions and operational errors, clerk or record-keeping errors and errors resulting from

faulty computer or telecommunication systems. Given BCR's high volume of transactions, fraud or errors may be repeated or compounded before they are discovered and rectified. Consequently, any inadequacy of BCR's internal processes or systems in detecting or containing such risks could result in unauthorised transactions and errors, which may have a material adverse effect on BCR's business, financial condition, results of operations, liquidity or prospects. BCR may also suffer service interruptions from time to time due to failures by third-party service providers and natural disasters, which are beyond its control. Such interruptions may result in interruptions in services to BCR's branches and may impact customer services.

Any failure or interruption in or breach of BCR's information systems, and any failure to update such systems, may result in lost business and other losses.

BCR relies heavily on information systems to conduct its business. Any failure or interruption or breach in security of these systems could result in failures or interruptions in its risk management, general ledger, deposit servicing or loan origination systems. If BCR's information systems, including its back-up systems, were to fail, even for a short period of time, or its business continuity plans for cases of emergency would prove ineffective, it could be unable to serve customers' needs on a timely basis and could thus lose their business.

Likewise, a temporary shutdown of BCR's information systems could result in costs that are required for information retrieval and verification. Such failure or interruptions could have a material adverse effect on its business, financial condition, results of operations, liquidity or prospects.

Changes in consumer protection laws as well as the application or interpretation of such laws might limit the fees and other pricing terms that BCR may charge for certain banking transactions and might allow consumers to claim back certain of those fees already paid in the past.

Changes in consumer protection laws or the interpretation of consumer protection laws by courts or governmental authorities could limit the fees and/or interest that BCR may charge for certain of its products and services and thereby result in lower commission and/or interest income. Moreover, as new laws and amendments to existing laws are adopted in order to keep pace with the continuing transition, existing laws and regulations as well as amendments to such laws and regulations may be applied inconsistently or interpreted in a manner that is more restrictive. BCR stands as defendant in a number of lawsuits and in regulatory proceedings filed by individual customers, consumer protection regulatory authorities or consumer protection agencies and associations in Romania. Some of the lawsuits are (similar to) class actions. The lawsuits mainly relate to allegations that certain contractual provisions, particularly in respect of consumer loans, violate mandatory consumer protection laws and regulations. The allegations relate to the enforceability of certain fees as well as of contractual provisions for the adjustment of interest rates and currencies. Moreover, any such changes in consumer protection laws or the interpretation of such laws by courts or governmental authorities could impair BCR's ability to offer certain products and services or to enforce certain clauses and reduce BCR's net commission and/or interest income and have an adverse effect on its results of operations. In particular, according to a legal provision of the Romanian consumer protection law, if the court finds that a contract between a consumer and a professional (such as BCR) contains unfair terms from a consumer protection perspective, the court may oblige the professional to amend all of its pending contracts concluded with consumers that contain such unfair terms. This may have an adverse effect on BCR's results of operations that is more rapid and severe than expected under the previous civil procedure framework when a court ruling declaring a clause in a consumer contract as unfair applied only to the claimant(s) in the respective court file.

BCR's exposure to litigation and reputational risks is increased.

BCR is involved in a number of legal proceedings (see the subsection entitled "*Banca Comercială Română S.A. – Legal Proceedings*"), among which a significant number of litigations have been commenced by BCR's customers claiming that the nature of the interest, fees and commissions imposed by BCR in the loan agreements are allegedly abusive in nature and hence null and void.

Generally, independently of the merits of information being disseminated, unfavourable opinions about BCR could have adverse effects on its business and competitive position. As BCR's integrity in the relationship with its customers is critical to its ability to attract and retain customers, should the outcome of the pieces of litigation filed by customers (regarding the annulment of certain clauses included in the loan agreements as being abusive) be negative, it might harm BCR's reputation.

The negative impact of the litigations above could impact BCR's business, financial position, results of operations, liquidity or prospects.

BCR's risk management strategies, techniques and internal control procedures may leave it exposed to unidentified or unanticipated risks.

Many quantitative tools and metrics for managing risks used world-wide are based on observed historical market behaviour. BCR applies statistical and other tools to these observations to arrive at quantifications of risk exposures. During the financial crisis, the financial markets experienced unprecedented levels of volatility (rapid changes in price direction) and the breakdown of historically observed correlations (the extent to which prices move in tandem) across asset classes, compounded by extremely limited liquidity. In this volatile market environment, some risk management tools and metrics failed to predict some of the losses the banks experienced. In addition, quantitative modelling does not take all risks into account and makes numerous assumptions regarding the overall environment, which may or may not materialise. As a result, risk exposures have arisen and could continue to arise from factors not anticipated or correctly evaluated in statistical models.

If circumstances arise that BCR did not identify, anticipate or correctly evaluate in developing its statistical models, losses could be greater than the maximum losses envisaged under its risk management system. Furthermore, the quantifications do not take all risks or market conditions into account. If the measures used to assess and mitigate risks prove insufficient, BCR may experience material unanticipated losses, which could have a material adverse effect on its business, financial condition, results of operations liquidity or prospects.

New governmental or regulatory requirements and changes in perceived levels of adequate capitalisation and leverage could subject BCR to increased capital requirements or standards and require it to obtain additional capital or liquidity in the future.

There are numerous ongoing initiatives for developing new, implementing, amending and more strictly enforcing existing regulatory requirements applicable to European credit institutions, including BCR, at national and international levels. Such initiatives which aim to continuously enhance the banking regulatory framework (also in response to the past global financial crisis and the European sovereign debt crisis), *inter alia*, include the following:

- ***BCBS' Reviews of Banking Regulatory Framework.***

As part of its continuous effort to enhance the banking regulatory framework, the Basel Committee of Banking Supervision ("BCBS") has reviewed different aspects and approaches under the Basel III framework. In this regard, on 7 December 2017, the BCBS announced to have finalised the Basel III framework reforms. A key objective of the revisions incorporated into the framework is to reduce excessive variability of risk weighted assets ("RWA") which will help restoring credibility in the calculation of RWA by: (i) enhancing the robustness and risk sensitivity of the standardised approaches for credit risk and operational risk, which will facilitate the comparability of credit institutions' capital ratios; (ii) constraining the use of internally modelled approaches; and (iii) complementing the risk-weighted capital ratio with a finalised leverage ratio and a revised and robust capital floor. The revised standards will take effect from 1 January 2022 (which will constitute both the implementation and regulatory reporting date for the revised framework) – parts of the reform including the output floor, will be phased in over a period of five years commencing in 2022. As the agreed standards constitute minimum standards, jurisdictions may elect to adopt more conservative standards. Accordingly, the implementation of the amendments to the Basel III framework within the European Union may go beyond the Basel standards and provide for European specificities. Moreover, jurisdictions will be considered compliant with the Basel III framework if they do not implement any of the internally modelled approaches and instead implement the standardised approaches. In addition, BCBS also announced that a high-level task force set up to review the regulatory treatment of sovereign exposures in the Basel III framework and to recommend potential policy options has not reached a consensus at this stage to make any changes to the treatment of sovereign exposures, but for the time being only has published a discussion paper. Therefore, currently no firm conclusions regarding the impact on the future capital requirements and their impact on the capital requirements for BCR can be made.

- ***Changes in Recognition of Own Funds.***

Due to regulatory changes implemented by Directive 2013/36/EU as amended (*Capital Requirements Directive IV* – "CRD IV"), certain existing capital instruments (issued in the past) will be subject to (gradual) exclusion from own funds (grandfathering) or reclassification as a lower category of own funds.

- *Capital buffers.*

NBR Regulation 5/2013 requires institutions to maintain newly defined specific capital buffers in addition to the Common Equity Tier 1 ("CET 1") capital maintained to meet the own funds requirements imposed by the Regulation (EU) No 575/2013, as amended (*Capital Requirements Regulation – "CRR"*) and potentially any Pillar II additional own funds requirements.

Pursuant to the recommendation of the National Committee for Macroprudential Supervision, the following requirements on capital buffers are applied as of the date of the Prospectus:

- Capital conservation buffer: As of 1 January 2019, the capital conservation buffer is 2.5 per cent. of the total risk exposure amount in accordance with Article 92 (3) CRR;
- Countercyclical buffer: until further notice from the NBR, the countercyclical buffer rate for exposures situated in Romania is 0 per cent. At this stage, while some jurisdictions have already implemented the countercyclical buffer in their respective legislation, the countercyclical buffer rates are set to zero in all cases relevant for BCR. The countercyclical buffer at Group level will vary from period to period depending on the composition of underlying risk relevant exposures;
- Global systemically important institutions ("G-SII") / Other systemically important institutions ("O-SII") buffer: the Group is classified as an O-SII in Romania and the applicable buffer stands at 2.00 per cent. as of 1 January 2019. The buffer is revised annually.
- Systemic risk buffer: for O-SII institutions, the maximum between the systemic risk buffer and the O-SII buffer is to be applied. Based on this, as of 1 January 2019, BCR is subject to a 2.00 per cent. capital charge, as the systemic risk buffer is 1 per cent. and the O-SII buffer is 2 per cent.

For BCR, the cumulative capital requirements applicable as of the date of the Prospectus (CET 1) amounts to 9.0 per cent. (as compared to 7.375 per cent. in 2018), due to the phasing in of the capital conservation buffer.

- *Liquidity coverage requirements.*

The Commission Delegated Regulation (EU) 2015/61 with regard to liquidity coverage requirement for credit institutions imposes a minimum level for the high quality liquid assets. The liquidity buffer determined based on fixed rules has to cover the net cash outflows under a defined liquidity crisis.

- *Stricter and Changing Accounting Standards.*

Prospective changes in accounting standards as well as those imposing stricter or more extensive requirements to carry assets at fair value, could also impact BCR's capital needs.

- *EU Banks Recovery and Resolution Directive.*

The Directive 2014/59/EU as amended (*Bank Recovery and Resolution Directive - "BRRD"*) institutes a single EU framework for the resolution of failing credit institutions and large investment firms, as well as cross-border cooperation arrangements for the resolution of financial holding companies. The BRRD provides the resolution authorities with a set of instruments for intervening in all stages of a banking crisis, namely prevention, early intervention and resolution measures. Credit institutions should draw up "recovery plans" in case of financial distress. The BRRD has been implemented in Romania into national law by Law no. 312/2015 on recovery and resolution of credit institutions (the "**Recovery and Resolution Act**"). The BRRD as implemented through the Recovery and Resolution Act requires, *inter alia*, that credit institutions draw up "recovery plans" in case of financial distress, which set out certain arrangements and measures that may be taken to restore the long-term viability of the financial institution in the event of a material deterioration of its financial position. The recovery plans are submitted for review by the competent authorities who will assess the appropriateness of the plans, taking into consideration the appropriateness of the institution's capital and funding structure to the level of complexity of the organisational structure and the risk profile of the institution. In order to manage the failure of any credit institution, resolution authorities have a set of instruments and measures for the orderly restructuring of those credit institutions, which ensure that shareholders and creditors bear losses, in line with a previously established resolution plan, thereby ensuring the continuity of critical functions. In addition, institutions have to meet, at all times, minimum requirements of own funds and of eligible liabilities ("**MREL**") set by the resolution authority on a case-by-case basis and shall be calculated as the amount of own funds and eligible liabilities

expressed as a percentage of the total liabilities and own funds of the institution. There is a risk that the Issuer may not be able to meet these minimum requirements for own funds and eligible liabilities which could materially adversely affect the Issuer's ability to make payments on the Notes. Measures undertaken under the Recovery and Resolution Act may also have a negative impact on debt instruments (in particular subordinated notes, but under certain circumstances also senior notes) by allowing resolution authorities to order the write-down of such instruments or convert them into CET 1 instruments (see also the risk factor "*The Notes may be subject to write down or conversion to equity upon the occurrence of a certain trigger event, which may result in Holders losing some or all of their investment in the Notes (statutory loss absorption).*"). Apart from potentially being subject to resolution tools and exercise of other powers as set out under the Recovery and Resolution Act, the Issuer may also be subject to the regime instituted by the general national insolvency proceedings.

- **Single Resolution Mechanism for European Banks.**

The Single Resolution Mechanism ("SRM") which became operational in January 2016 is, alongside the Single Supervisory Mechanism ("SSM") and a common deposit guarantee scheme, one of the components of the Banking Union. The SRM is set to centralise key competences and resources to manage failure of any credit institution in the participating Member States of the Banking Union. Under the SRM, the Single Resolution Board ("SRB") is, in particular, responsible for adopting resolution decisions in close cooperation with the ECB, the European Commission and the national resolution authorities in case of a failing (or likely failing) of a significant entity subject to direct supervision of the ECB. The SRM complements the SSM and aims to ensure that if a credit institution subject to the SSM faces serious difficulties, its resolution can be managed efficiently with minimal costs to taxpayers and to the real economy.

The SRM is governed by: (i) the Regulation (EU) No 806/2014 (Single Resolution Mechanism Regulation – "SRM Regulation") covering the main aspects of the mechanism and broadly replicating the BRRD rules on the recovery and resolution of credit institutions; and (ii) an intergovernmental agreement related to some specific aspects of the Single Resolution Fund ("SRF").

Romania is not a member of the Euro-zone and therefore has no obligation to participate in the SRM or other pillar of the Banking Union. As an EU Member State, Romania may participate voluntarily in the Banking Union, through the mechanism of close cooperation, which would mean joining both the SSM and the SRM (and in the future the envisaged European deposit insurance scheme).

As per the BRRD/the Recovery and Resolution Act, the NBR, as resolution authority at individual level, participates in the drawing up of the resolution plan of Erste Group (as defined in section "*Banca Comercială Română S.A. – Background*") in the respective resolution college with the SRB and other national resolution authorities and in the approval of such resolution plan (there currently is no separate BCR resolution plan).

- **MREL.**

In order to ensure the effectiveness of bail-in and other resolution tools introduced by the BRRD, the BRRD requires that all institutions must meet an individual MREL requirement, currently to be calculated as a percentage of total liabilities and own funds and set by the relevant resolution authorities, with effect from 1 January 2016. In this regard, the European Commission issued the Commission Delegated Regulation (EU) 2016/1450 supplementing the BRRD, which specifies the current criteria for setting MREL ("MREL Delegated Regulation"). The MREL Delegated Regulation requires each resolution authority to make a separate determination of the appropriate MREL requirement for each group or institution within its jurisdiction, depending on the institution's resolvability, risk profile, systemic importance and other characteristics. As of the date of this Prospectus, no MREL has been set for BCR.

On 9 November 2015, the Financial Stability Board ("FSB") published its final principles and term sheet containing an international standard to enhance the loss absorbing capacity of global systemically important banks ("G-SIBs"). In the most recent updated G-SIB list published by the FSB on 16 November 2018, BCR is not included and therefore, currently would not be subject to the total loss-absorbing capacity ("TLAC") standard as such. However, on-going work on the EU level intended to align TLAC implementation with the existing MREL framework may have an impact on BCR.

The EU banking reform package of the European Commission published on 23 November 2016 also includes proposals for the revision of the CRR, the BRRD and the SRM Regulation in order to implement the TLAC standard rules by avoiding the application of two parallel requirements. Although

TLAC and MREL pursue the same regulatory objective, there are some differences between them in the way they are constructed. The European Commission proposals intend to integrate the TLAC requirements into the existing MREL requirements and intend to ensure that both requirements are met with mainly similar instruments defined for TLAC and MREL in the revised CRR and via reference to the revised CRR in the revised BRRD and SRM Regulation respectively, except for the subordination requirement, which, for the purposes of MREL, will be institution-specific and determined by the resolution authority. The proposals require the introduction of limited adjustments to the existing MREL rules ensuring technical consistency with the structure of any requirements for G-SIBs. In particular, technical amendments to the existing rules on MREL are needed to align them with the TLAC standard regarding inter alia the denominators used for measuring loss-absorbing capacity, the interaction with capital buffer requirements, disclosure of risks to investors, and their application in relation to different resolution strategies.

On 20 December 2017, the European Banking Authority (the "EBA") has published an updated quantitative analysis on the MREL, based on the same methodology and assumptions developed in the context of its (final) MREL report published in December 2016.

While the general goal of these proposals is now well understood, it is too early to confirm the exact amendments that will be introduced, the timing of their introduction and consequently the precise impact on the Issuer.

It is possible that the Issuer has to issue additional eligible liabilities, which qualify for MREL purposes (including, potentially, Tier 2 instruments, other subordinated debt and/or certain other types of debt ranking senior to subordinated notes) in order to meet the additional requirements (see also the risk factor "*The Issuer may not be able to meet the minimum requirement for own funds and eligible liabilities.*").

- *European Banking Authority's 2018 EU-wide Stress Test.*

One of EBA's responsibilities is to ensure the orderly functioning and integrity of financial markets and the stability of the financial system in the EU. To this end, the EBA is mandated to monitor and assess market developments as well as to identify trends, potential risks and vulnerabilities stemming from the micro-prudential level. One of the primary supervisory tools to conduct such an analysis is the EU-wide stress test exercise. The EBA's EU-wide stress tests are conducted in a bottom-up fashion, using consistent methodologies, scenarios and key assumptions developed in cooperation with the European Systemic Risk Board (ESRB), the ECB and the European Commission.

None of the Romanian credit institutions was assessed directly. However, BCR's parent company Erste Group Bank AG was among the credit institutions that participated in the 2018 EU-wide stress test initiated by EBA. The 2018 EU-wide stress test exercise was launched on 31 January 2018. The application of the adverse scenario covering a three-year time horizon (2018 – 2020) resulted in a fully loaded CET 1 ratio of 8.5% (year-end 2020) in the case of Erste Group versus actually fully loaded starting point of 12.9 per cent. at the end of 2017.

- *EU Banking Reform Package of the European Commission and the European Council.*

On 23 November 2016, the European Commission published proposals for the revision of the CRD IV and the CRR as well as of the BRRD and the SRM Regulation. The proposal builds on existing EU banking rules and aims to complete the post-crisis regulatory agenda of the European Commission. The proposals, which have been submitted to the European Parliament and to the Council for their consideration and adoption, include the following key elements: (i) more risk-sensitive capital requirements, in particular in the area of market risk, counterparty credit risk, and for exposures to central counterparties; (ii) a binding leverage ratio to prevent institutions from excessive leverage; (iii) a binding net stable funding ratio to address the excessive reliance on short-term wholesale funding and to reduce long-term funding risk; and (iv) the TLAC requirement for G-SIIIs which will be integrated into the MREL logic applicable to all credit institutions. It also proposes a harmonised national insolvency ranking of unsecured debt instruments to facilitate credit institutions' issuance of such loss absorbing debt instruments.

Currently, no firm conclusions regarding the impact on the potential future capital requirements and consequently how this will affect the capital requirements for BCR can be made.

- *MiFID II and MiFIR.*

The regulatory framework for investment services and regulated markets is updated by MiFID II and by Regulation (EU) No 600/2014 (*Markets in Financial Instruments Regulation - "MiFIR"*) and applies since 3 January 2018. In Romania, MiFID II has been implemented by the law no. 126/2018 on markets in financial instruments. Due to increased regulatory requirements, there are also increased costs for the Issuer. As many issues with regard to the application of these changes currently remain unclear in practice, the full impact of MiFID II and MiFIR remains uncertain for BCR.

- *New budgetary and fiscal measures imposing additional taxes on credit institutions.*

The Romanian Government has recently passed legislation imposing a tax on financial assets of credit institutions. Based on the Government Emergency Ordinance 114/2018 regarding the establishment of measures in the public investments sector and certain fiscal – budgetary measures and the amendment of certain enactments ("Act 114/2018"), as of 1 January 2019, Romanian credit institutions and the Romanian branches of foreign credit institutions must pay a tax on financial assets if the quarterly average of the Romanian Interbank Offer Rate ("ROBOR") exceeds the threshold of 2 per cent. (the "Financial Assets Tax").

The Financial Assets Tax is variable, depending on the percentage by which the average quarterly ROBOR exceeds the threshold reference, as set out below:

Tax rate	Amount by which the average quarterly ROBOR exceeds the threshold reference
0.1 per cent.	up to 0.5 percentage point (inclusive)
0.2 per cent.	between 0.51 and 1 percentage point (inclusive)
0.3 per cent.	between 1.01 and 1.5 percentage points (inclusive)
0.4 per cent.	between 1.51 and 2.0 percentage points (inclusive)
0.5 per cent.	above 2.01 percentage points

The quarterly average ROBOR shall be established based on the rates of ROBOR at three months and ROBOR six months (as calculated and published by NBR) for the last quarter / semester prior to the quarter of calculation.

The Financial Assets Tax shall be calculated by reference to the financial assets existing as at the end of a quarter, as such assets are registered in the accounting books and adjusted, as the case may be, in accordance with the applicable accounting rules. Based on Act 114/2018, the Romanian Ministry of Finance shall issue application guidelines.

Act 114/2018 is subject to challenge before the Romanian Constitutional Court, on numerous grounds that may be considered to be in breach of the Romanian Constitution. Further, Act 114/2018 is subject to review by the Romanian Parliament, following which a law is passed which may: (i) approve Act 114/2018 as such; (ii) approve Act 114/2018 with amendments; or (iii) reject Act 114/2018.

As a result of the above changes, the profits as well as the levels of adequate capitalization of the Issuer may be negatively affected. Further, as many issues with regard to the application of these changes currently remain unclear in practice, the full impact of Act 114/2018 remains uncertain for the Issuer.

Additional, stricter and/or new regulatory requirements may be adopted in the future, and the existing regulatory environment in which BCR operates continues to evolve. BCR is subject to ECB banking supervision via Erste Group Bank AG. The substance and scope of any such new or amended laws and regulations as well as the manner in which they are or will be adopted, enforced or interpreted may increase BCR's financing costs and could have an adverse effect on BCR's business, financial condition, results of operations, liquidity or prospects.

Legislative and/or regulatory changes in the current definitions of what is deemed to qualify as own funds could reduce BCR's eligible capital and/or require reducing the RWA of BCR. In the event of any further changes of the applicable rules, adequate grandfathering or transition periods may be implemented to allow

BCR to repay or replace such derecognised own funds instruments in a timely fashion or on favourable terms.

BCR may therefore need to obtain additional capital in the future which may not be available on attractive terms or at all. Further, any such regulatory development may expose BCR to additional costs and liabilities, which may require BCR to change how it conducts its business strategy or otherwise have a negative impact on its business, the offered products and services it offers and the value of its assets. BCR may not be able to increase its capital ratios sufficiently or on time. If BCR is unable to increase its capital ratios sufficiently and/or comply with (other) regulatory requirements, its credit ratings may drop and its cost of funding may increase, and/or the competent authorities may impose fines, penalties or other regulatory measures, the occurrence of all such consequences could have a material adverse effect on BCR's business, financial condition and results of operations.

The Issuer may not be able to meet the minimum requirement for own funds and eligible liabilities.

Each institution has to ensure that it meets the MREL at all times. Such minimum requirement currently shall be determined by the resolution authority and shall be calculated as the amount of own funds and eligible liabilities expressed as a percentage of the total liabilities and own funds of the institution. The scope, calculation and composition of the MREL is currently under review (see also the risk factor "*New governmental or regulatory requirements and changes in perceived levels of adequate capitalisation and leverage could subject BCR to increased capital requirements or standards and require it to obtain additional capital or liquidity in the future.*"). There is a risk that BCR may not be able to meet the MREL which could result in higher refinancing costs, regulatory measures and, if resolution measures were imposed on the Issuer, could significantly affect its business operations, could lead to losses for its creditors (including the Holders of the Notes) and could result in restrictions on, or materially adversely affect the Issuer's ability to make payments on the Notes.

The Issuer is obliged to contribute to the Single Resolution Fund (SRF) and to ex ante financed funds of the deposit guarantee scheme of the savings bank sector on an annual basis.

The SRF shall be composed of contributions from credit institutions and certain investment firms in the participating Member States. The SRF shall be gradually built up during the first eight years (2016 - 2023) and shall reach the target level of at least 1 per cent. of the amount of covered deposits of all credit institutions within the Banking Union by 31 December 2023.

Furthermore, Directive 2014/49/EU (*Directive on Deposit Guarantee Schemes – "DGSD"*) forms part of the measures adopted in the aftermath of the financial crisis in an effort to establish the Banking Union and aims to further strengthen the protection of depositors. In principle, the target level of *ex-ante* financed funds for Deposit Guarantee Schemes ("DGS") is 0.8 per cent. of covered deposits to be collected from credit institutions until the final date (3 July 2024). In Romania the DGSD has been implemented through the Deposit Guarantee Act no. 311/2015 ("*Legea nr. 311/2015 privind schemele de garantare a depozitelor și Fondul de garantare a depozitelor bancare*").

In addition to *ex-ante* contributions, if necessary, credit institutions will have to pay additional (*ex post*) contributions to a certain extent, which will be limited in order to avoid pro-cyclicality and worsening the financial situation of healthy credit institutions.

The obligation to contribute amounts for the establishment of the SRF and the *ex ante* funds to the DGS could result in additional financial burdens for the Issuer and thus, could adversely affect the financial position of the Issuer and the results of its business, financial condition, results of operations liquidity or prospects.

Credit rating agencies may suspend, downgrade or withdraw a credit rating of BCR or of Romania, and such action might negatively affect the refinancing conditions for BCR, in particular its access to debt capital markets.

BCR's credit ratings are important to its business. A credit rating is the opinion of a credit rating agency on the credit standing of an issuer, i.e. a forecast or an indicator of a possible credit loss due to insolvency, delay in payment or incomplete payment to the investors. It is not a recommendation to buy, sell or hold securities.

Such credit ratings have been issued, at the request of the Issuer, by Fitch Ratings Ltd ("**Fitch**"), a credit rating agency established in the European Community and registered under Regulation (EC) No. 1060/2009 of the European Parliament and of the Council of 16 September 2009, as amended. BCR's current long-term credit rating assigned by Fitch is BBB+, its short-term credit rating is F2 and its outlook is negative.

BCR has also been rated by Moody's Deutschland GmbH ("Moody's") on an unsolicited basis, i.e. exclusively based on publicly available information. Thus, the credit ratings assigned by Moody's to BCR were not performed at the request or with the co-operation of BCR in the credit rating process. In August 2018, Moody's affirmed the credit ratings and changed the outlook to positive. BCR's current long-term foreign-currency credit rating assigned by Moody's is Baa3, its short-term foreign-currency bank deposits rating is Prime-3 and its outlook is stable.

A credit rating agency may in particular suspend, downgrade or withdraw a credit rating. A solicited credit rating may also be suspended or withdrawn if BCR were to terminate the agreement with the credit rating agency or to determine that it would not be in its interest to continue to supply financial data to a credit rating agency. A downgrading of a credit rating may lead to a restriction of access to funds and, consequently, to higher refinancing costs. A credit rating could also be negatively affected by the soundness or perceived soundness of other financial institutions.

A credit rating agency may also suspend, downgrade or withdraw a credit rating or may publish unfavourable reports or outlooks on Romania which may lead to an increase of the funding costs of BCR.

Rating actions of credit rating agencies may also be triggered by changes in their respective rating methodology, their assessment of government support, as well as by regulatory activities (e.g. introduction of bail-in regimes).

Any downgrade of a credit rating of BCR or of Romania could have a material adverse effect on BCR's liquidity and competitive position, undermine confidence in BCR, increase its borrowing costs, limit its access to funding and capital markets or limit the range of counterparties willing to enter into transactions with BCR and would as a consequence have a material adverse effect on its business, financial condition, results of operations, liquidity or prospects.

BCR is subject to the risk that liquidity may not be readily available.

BCR, like many other credit institutions, relies on customer deposits (corporate and individuals) to meet a substantial portion of its funding requirements. The majority of BCR's deposits are retail deposits, a significant proportion of which are demand deposits. Such deposits are subject to fluctuation due to factors outside BCR's control, and BCR may experience a significant outflow of deposits within a short period of time. Because a significant portion of BCR's funding comes from its deposit base, any material decrease in deposits could have a negative impact on BCR's liquidity unless corresponding actions were taken to improve the liquidity profile of other deposits or to reduce liquid assets, which may not be possible on economically beneficial terms, if at all. At the same time, funding from the parent company could be limited in case the Austrian financial market regulator will consider changing or implementing stricter rules on funding by the Erste Group Bank AG of its subsidiaries (which include BCR).

As credit providers, BCR and its subsidiaries are exposed to market liquidity risk, which arises from an inability to easily sell an asset because there is inadequate market liquidity or market disruption. They are also exposed to funding liquidity risk, which is an exposure to losses arising out of a change in the cost of refinancing, or from a spread over a certain horizon and confidence level, or from insolvency of counterparties, which may result in difficulties in meeting future payment obligations, either in full, on time or on economically beneficial terms.

Credit and money markets worldwide have experienced and continue to experience a reluctance of credit institutions to lend to each other because of uncertainty as to the creditworthiness of the borrowing credit institution. Even a perception among market participants that a financial institution is experiencing greater liquidity risk may cause significant damage to the institution, since potential lenders may require additional collateral or other measures that further reduce the financial institution's ability to secure funding. This increase in perceived counterparty risk has led to further reductions in the access of BCR, along with other credit institutions, to traditional sources of liquidity, and may be compounded by further regulatory restrictions on capital structures and calculation of regulatory capital and liquidity ratios.

If BCR has difficulty in securing adequate sources of short- and long-term liquidity or if there were material deposit outflows this would have a material adverse effect on its business, financial condition and results of operations,.

BCR may have difficulty recruiting new talent or retaining qualified employees.

BCR's existing operations and ability to offer new products depend on its ability to retain existing employees and to identify and recruit additional talents with the necessary qualifications and level of experience in banking. In Romania, as in many of the other Central and Eastern Europe markets, the pool of individuals

with the required set of skills is smaller than in most Western European countries, however growing due to increased focus of local universities and governments on implementation of competitive educational programs and development of a skilled workforce. If hiring should not be the outcome of a qualitative staff plan but happen more on an ad hoc or short term basis, the risk of high staff turnover or not creating a valid succession pool would be high. Furthermore, nominations of employees as talents without overall valid high quality criteria may prove wrong and cause the risk of false investments and higher costs.

Increasing competition for labour in Romania from other international financial institutions may also make it more difficult for BCR to attract and retain qualified employees and may lead to rising labour costs in the future. Moreover, if caps or further restrictions under CRD III or CRD IV were to be imposed on salaries or bonuses paid to executives of BCR or its subsidiaries, BCR's ability to attract and retain high-quality personnel could be limited and could result in losses of qualified personnel. If BCR is unable to attract and retain new talent or if competition for qualified employees increases its labour costs, this could have a material adverse effect on BCR's business, financial condition and results of operations.

BCR's major shareholder may be able to control shareholder actions.

As of the date of this Prospectus, the majority of voting rights in BCR is held by Erste Group Bank AG (99.8776 per cent.). Hence, Erste Group Bank AG exercises direct control over BCR through the majority of voting rights and, implicitly, through the right to appoint most of the members in the Supervisory Board of BCR.

As a result, Erste Group Bank AG is able to control the outcome of most decisions requiring shareholder approval. Therefore, it is possible that Erste Group Bank AG may exercise or be expected to exercise control over BCR in ways that may not be in the interest of other shareholders and which may also affect BCR.

Compliance with applicable rules and regulations, in particular on anti-money laundering, anti-corruption and anti-terrorism financing anti-corruption and fraud prevention, economic sanctions and tax as well as capital markets (securities and stock exchange related) involve significant costs and efforts and non-compliance may have severe legal and reputational consequences for BCR.

BCR is subject to rules and regulations regarding money laundering, corruption and the financing of terrorism, anti-corruption and fraud prevention, economic sanctions and tax as well as capital markets (securities and stock exchange related). These rules and regulations have been tightened, in particular by the implementation of the "Directive (EU) 2015/849 of the European Parliament and of the Council of 20 May 2015 on the prevention of the use of the financial system for the purposes of money laundering or terrorist financing, amending Regulation (EU) No 648/2012 of the European Parliament and of the Council, and repealing Directive 2005/60/EC of the European Parliament and of the Council and Commission Directive 2006/70/EC" (4th AML-Directive).

Monitoring compliance with such rules can result in a significant financial burden on credit institutions and other financial institutions and can pose significant technical problems. BCR cannot guarantee that it is in compliance with all applicable anti-money laundering, anti-corruption and anti-terrorism financing rules at all times or that its Group-wide anti-money laundering, anti-corruption and anti-terrorism financing standards are being consistently applied by its employees in all circumstances. Any violation of anti-money laundering, anti-corruption or anti-terrorism financing rules, or even alleged violations, may have severe legal, monetary and reputational consequences and could have a material adverse effect on BCR's business, financial condition, results of operations, liquidity or prospects.

Risks relating to investments in Romania as emerging market

Romania is still an emerging market and may pose higher risks than developed markets.

Investors in companies operating in emerging markets such as Romania should be aware that these markets pose higher risks than developed markets. Romania may be subject to rapid and sometimes unpredictable political, legal, social and economic changes, including economic recessions, high inflation rates, fluctuations of the exchange rate, material market disruptions and significant and frequent changes in legislation and that the information included in this section may become outdated relatively quickly. At the same time, Romania may be subject to spill-over effects radiating from political, legal, social and economic changes occurring in the European Union or in neighboring countries.

Accordingly, investors should exercise particular care in evaluating the risks involved and must decide for themselves whether, in light of those risks, their investment is appropriate. Generally, investment in emerging markets is only suitable for sophisticated investors who fully appreciate the significance of the risks involved,

and investors are urged to consult their own legal and financial advisers before making an investment in the Notes.

Furthermore, Romania's economy is vulnerable to market downturns and economic slowdowns elsewhere in the world. The impact of global economic developments is often felt more strongly in emerging markets such as Romania than it is in more mature markets. As it has happened in the past, financial problems or an increase in the perceived risks associated with investing in emerging economies could dampen foreign investment in Romania and its economy could face severe liquidity constraints, with a significant impact on BCR's activities. In particular, BCR's business activities are dependent on the level of banking, finance and financial services required by its customers. Levels of borrowing are dependent on customer confidence, employment trends, the state of the economy, the housing market and market interest rates at the time. As BCR currently conducts almost all of its business in Romania, its performance is influenced by the level and cyclical nature of business activity in Romania, which is in turn affected by both domestic and international economic and political events. The deterioration of the general economic situation in Romania or of the global economy may have a material adverse effect on BCR's business, financial condition, results of operations, liquidity or prospects.

Romania may face difficulties related to its post-accession process to the European Union.

Romania joined the European Union in January 2007. During the post-accession process, to smoothen the entry of Romania, the European Union decided to establish a special "cooperation and verification mechanism" to help Romania address certain outstanding shortcomings in various fields such as judicial reform and the fight against corruption¹. For Romania, the European Commission has established the following four benchmarks on which the Commission regularly verifies progress:

- ensuring a more transparent and efficient judicial process notably by enhancing the capacity and accountability of the Superior Council of Magistracy; reporting and monitoring the impact of the new civil and criminal procedures codes; and
- establishing an integrity agency with responsibilities for verifying assets, incompatibilities and potential conflicts of interest, and for issuing mandatory decisions on the basis of which dissuasive sanctions can be taken; and
- continuing to conduct professional, non-partisan investigations into allegations of high level corruption; and
- taking further measures to prevent and fight against corruption, in particular within the local government.

Failure by Romania to address these benchmarks adequately entitles the European Commission to apply safeguard measures based on the acts for admission of Romania to the European Union, including the suspension of Member States' obligation to recognise and execute, under the conditions laid down in Community law, Romanian judgments and judicial decisions, such as European arrest warrants.

The latest European Commission progress report on the Co-operation and Verification Mechanism ("CVM")² with Romania approved and published by the European Commission on 15 November 2017 pointed that despite the commitment of the Government to seek to close the CVM as soon as possible, progress in addressing the January 2017 CVM recommendations has been affected by the political situation. Within a nine months period since the January 2017 report, Romania has seen two governments, while growing tensions between State powers (Parliament, Government and Judiciary) made the cooperation between them increasingly difficult. The same Report also noted that the capacity of the Government and the Parliament to ensure an open, transparent and constructive legislative process on the justice laws will be crucial. In general, a process in which the judicial independence and the opinion of the judiciary is valued and given due account, as well as drawing on the opinion of the Venice Commission, is a prerequisite for sustainability of reform and is an important element in fulfilling the CVM benchmarks.

² Report from the Commission to the European Parliament and the Council - On Progress in Romania under the Co-operation and Verification Mechanism, Brussels, 15.11.2017 COM(2017) 751 final (ec.europa.eu/info/sites/info/files/comm-2017-751_en.pdf).

Applying any safeguard measures according to the above may result in a loss of investor confidence in the Romanian economical and financial climate which could have a material adverse effect on BCR's business, financial conditions, results of operations, liquidity or prospects.

The Romanian legal system and procedural safeguards are not yet fully developed.

BCR's operations in Romania are subject to, and must comply with, a variety of Romanian laws and regulations governing a number of matters, including banking, data protection, labour relations, welfare, competition and tax. In Romania, primary legislation often takes effect immediately and before the preparation of secondary regulations. Any failure to comply with applicable laws and regulations may result in fines or other sanctions by the relevant regulator and may have negative reputation consequences.

The legal and judicial systems in Romania are not as developed as in some other European countries. Civil law, competition law, securities law, company law, bankruptcy law and other areas of law in these countries have been and continue to be subject to constant changes as new laws are being adopted in order to keep pace with the transition to market economies. Existing laws and regulations, including legislation existing at the level of the EU, may be implemented and/or applied inconsistently and it may not be possible, in certain circumstances, to obtain legal remedies in a reasonably timely manner. The relatively limited experience of a significant number of the magistrates and the existence of a number of issues relating to the independence of the judiciary system may lead to ungrounded decisions or to decisions based on non-legal considerations. Because Romania is not a Common law jurisdiction, but a civil one, judicial decisions under law generally have no precedential effect. For the same reason, courts themselves are generally not bound by earlier decisions taken under the same or similar circumstances, which can result in the inconsistent application of Romanian legislation to resolve the same or similar disputes. The Romanian judicial system may at times generate unjustified delays in the resolution of cases. The enforcement of judgments sometimes proves difficult which in the past meant that the enforcement of rights through the Romanian court systems may be laborious.

Recently there has been an increasing number of legislative initiatives on consumer protection focused on financial and banking regulation that entail retroactive changes to bank-customer contracts or are supposed to support borrowers.

The law implementing Directive 2014/92/EU ("Law 258/2017") was adopted by the Romanian Parliament and is in force since January 2018. The Law 258/2017 imposes to credit institutions to offer the main banking services free of charge to the "vulnerable consumers" - whose income is lower than 60 per cent. from the national medium gross wage, without an existing current account. Nevertheless, for the non-vulnerable consumers the legislator also provided some free of charge services.

Moreover, in 2018 (i) the General Data Protection Regulation (25 May 2018) for which the Romania State also adopted a law for applying some of its measures (this law is in force starting with August 2018) entered into force and (ii) the revised Payment Services Directive (PSD 2) is to be implemented by the Member States. In this respect, the Romanian Ministry of Economy has published the draft law for implementation, which is expected to be adopted by the Romanian Parliament at the beginning of 2019.

Also, the Romanian Parliament is reviewing on an ongoing basis various legal initiatives meant to support the consumers of financial services, such as (i) introducing a cap to both the current and the penalty interest rate, and (ii) write-off execution of the enforceable title of the banking contracts concluded with the consumers.

On 18 December 2018, the Romanian Parliament adopted a law allowing bank customers to write off/cancel their debt by paying twice the assignment price to a third party collection agency which had acquired the payment claims under a customer loan from the bank. However, such law is not in force at the date hereof as it is to be reviewed by the Romanian Constitutional Court. Following such review, the law may be amended.

The legislative uncertainty associated with the banking sector also leads to tighter credit standards and lower financial intermediation.

Applicable Romanian bankruptcy law and other laws and regulations governing creditors' rights may limit BCR's ability to obtain payments on defaulted loans and advances.

Romanian bankruptcy and enforcement laws may not offer in all respect the same level of rights, remedies and protections that creditors enjoy under the legal regimes in other EU jurisdictions. In particular, Romanian bankruptcy and enforcement laws and practice may make it comparatively more difficult and time-consuming for BCR to recover amounts in respect of its secured and unsecured claims before the Romanian courts. In

2015, insolvency in Romania witnessed mixed dynamics, i.e. the number of companies having declared themselves insolvent shrank by half, yet this favourable evolution was offset by a larger incidence of such cases among large companies. At the same time, the volume of major payment incidents generated by non-financial corporations continued to contract, especially in the second part of 2015. Insolvent companies, as well as the companies reporting net losses, have largely been responsible for the worsening payment discipline across the economy. Considering that a significant part of BCR's assets are due from debtors and/or secured by assets that are or are likely to be in the future subject to Romanian bankruptcy and enforcement laws, the above could adversely affect BCR's business, financial condition, results of operations, liquidity or prospects and its ability to make payment under the Notes.

Furthermore, as of 1 January 2018, a new personal insolvency law is applicable to Romanian individuals (acting as bank consumers).

In addition to the aforementioned, the Parliament is also considering whether to eliminate the writ of execution feature of loan documentation. This might have a significant impact against the debt collection process, by delaying the claim recovery.

Inability to obtain effective legal remedies in a reasonably timely manner may adversely affect BCR's business, financial condition, results of operations, liquidity or prospects and the trading price of the Notes.

Committed EU funds may not be released or further aid programmes may not be adopted by the EU.

Romania has been promised funds for infrastructure and other projects in substantial amounts by the EU and international credit institutions, including the European Bank for Reconstruction and Development ("EBRD"), the International Monetary Fund (IMF) and the European Investment Bank ("EIB"). If these funds are not released, are released only in part or with delay (including because of Romania's up to present very poor track record of accessing such funds), or if no further aid will be made available by the EU and the international credit institutions, the Romanian national economy could be adversely affected, which would, in turn, negatively affect BCR's business. The departure of Great Britain, the second largest net contributor to the EU budget, could cause a substantial reduction in the EU's budget and therefore the funds available for such programmes.

Loss of customer confidence in BCR's business or in banking businesses generally could result in unexpectedly high levels of customer deposit withdrawals, which could have a material adverse effect on BCR's results, financial condition and liquidity.

The availability of BCR's customer deposits to fund its loan portfolio and other financial assets is subject to potential changes in certain factors outside BCR's control, such as a loss of confidence of depositors in either the economy in general, the financial services industry or BCR specifically, ratings downgrades and significant deterioration in economic conditions. These factors could lead to a reduction in BCR's ability to access customer deposit funding on appropriate terms in the future and to sustained deposit outflows, both of which would adversely impact BCR's ability to fund its operations. Any loss in customer confidence in BCR's banking businesses, or in banking businesses generally, could significantly increase the amount of deposit withdrawals in a short period of time. Should BCR experience an unusually high level of withdrawals, this may have an adverse effect on BCR's results, financial condition and prospects and could, in extreme circumstances, prevent BCR from funding its operations. In such extreme circumstances BCR may not be in a position to continue to operate without additional funding support, which it may be unable to access. A change in the funding structure towards less stable and more expensive funding sources would also result in higher liquidity buffer requirements.

Liquidity problems experienced by certain CEE countries may adversely affect Romania and the broader CEE region and could negatively impact BCR's business results and financial condition.

In the past, Romania (like other countries in the CEE) turned to international institutions for assistance with liquidity problems, and other countries in the CEE may be forced to do the same. If such liquidity problems should occur (again), this could have significant consequences throughout the region, including foreign credit institutions withdrawing funds from their CEE subsidiaries (including their Romanian subsidiaries), thereby weakening local economies and affecting customers of BCR who borrow from a number of different credit institutions. This could also lead to an increase of defaults throughout the economy or by BCR customers and, accordingly, could have a material adverse effect on BCR's business, financial condition, results of operations, liquidity or prospects.

Governments in CEE countries, including Romania, may react to financial and economic crises with increased protectionism, nationalisations or similar measures.

Governments in CEE countries, including Romania, could take various protectionist measures to protect their national economies, currencies or fiscal income in response to financial and economic crises, including among other things:

- order loans denominated in foreign currencies like EUR, USD or CHF to be converted into local currencies at set interest and/or exchange rates, in some cases below market rates, such as the law recently adopted by the Romanian Parliament and which is currently with the Romanian President for promulgation, or allow loans to be assumed by government entities, potentially resulting in a reduction in value of such loans;
- set limitations on the repatriation of profits (either through payment of dividends to their parent companies or otherwise) or export of foreign currency;
- set out regulations limiting interest rates and fees for services that can be charged and other terms and conditions;
- prohibit money transfers abroad by credit institutions receiving state support measures (e.g., loans granted to credit institutions from sovereigns or covered by sovereign deposit guarantees);
- introduce or increase banking taxes or legislation imposing levies on financial transactions or income generated through banking services or extend such measures previously introduced on a temporary basis; and
- nationalise local credit institutions, with or without compensation, in order to stabilise the banking sector and the economy.

Any of these or similar state actions could have a material adverse effect on BCR's business, financial condition, results of operations, liquidity or prospects.

BCR may be adversely affected by slower growth or recession in the banking sector.

Banking sector growth in Romania has significantly declined compared to years prior to 2008. Economic growth in Romania and the region may be further constrained in the coming years by continuing effects of the last financial crisis and recession, as well as a slowing expansion of the Euro-zone and the EU and increasing constraints on the EU budget, which may reduce various subsidies to CEE countries including Romania. In addition, EU legal, fiscal and monetary regulations may limit Romania's ability to respond to local economic conditions.

Factors which are material for the purpose of assessing the market risks associated with Notes issued under the Programme

The Notes may not be a suitable investment for all investors if they do not have sufficient knowledge and/or experience in the financial markets and/or access to information and/or financial resources and liquidity to bear all the risks of an investment and/or a thorough understanding of the terms and conditions of the Notes and/or the ability to evaluate possible scenarios for economic, interest rate and other factors that may affect their investment.

Each potential investor in the Notes must determine the suitability of that investment in light of its own circumstances. In particular, each potential investor should:

- (i) have sufficient knowledge and experience to make a meaningful evaluation of the Notes, the merits and risks of investing in the Notes and the information contained or incorporated by reference in this Prospectus or any applicable supplement hereto;
- (ii) have access to, and knowledge of, appropriate analytical tools to evaluate, in the context of its particular financial situation and the investment(s) it is considering, an investment in the Notes and the impact the Notes will have on its overall investment portfolio;
- (iii) have sufficient financial resources and liquidity to bear all of the risks of an investment in the Notes, including Notes with principal or interest payable in one or more currencies, or where the currency for principal or interest payments is different from the potential investor's currency;
- (iv) understand thoroughly the terms and conditions of the Notes and be familiar with the behaviour of any relevant indices and financial markets; and

- (v) be able to evaluate (either alone or with the help of a financial adviser) possible scenarios for economic, interest rate and other factors that may affect its investment and its ability to bear the applicable risks.

Risks related to the trading of the Notes

A liquid trading market for the Notes may not develop or, if it does develop, it may not continue. In an illiquid market, a Holder may not be able to sell his Notes at fair market prices.

Application may be made for the Programme and/or the Notes to the Markets, each of which appears on the list of regulated markets issued by the European Commission. In addition, the Programme provides that Notes may not be listed at all.

Regardless of whether the Notes are listed or not, Notes issued under the Programme will be new securities which may not be widely distributed and for which there is currently no active and/or liquid trading market and it may not develop or, if it does develop, it may not continue. The fact that the Notes may be listed does not necessarily lead to greater liquidity as compared to unlisted Notes. If the Notes are not listed on any stock exchange, pricing information for such Notes may, however, be more difficult to obtain, which may adversely affect the liquidity of the Notes. In an illiquid market, a Holder might not be able to sell its Notes at any time at fair market prices or at prices that will provide them with a yield comparable to similar investments that have a developed trading market. This is particularly the case for Notes that are especially sensitive to interest rate, currency or market risks or general economic conditions and financial condition of BCR, are designed for specific investment objectives or strategies or have been structured to meet the investment requirements of limited categories of investors. Generally, these types of Notes would have a more limited trading market and more price volatility than conventional debt securities. Illiquidity may have a material adverse effect on the market price of Notes. The possibility to sell the Notes might additionally be restricted by country-specific reasons.

The Issuer may be unable to have the Notes admitted to trading on the Markets.

The admission of International Notes to trading on the Vienna Stock Exchange requires that this Prospectus is approved by the FMA as the competent authority in Austria under the Prospectus Directive and that the Vienna Stock Exchange approves the listing and trading of the International Notes. Admission to trading on the Vienna Stock Exchange is subject to certain requirements. The admission of the Domestic Notes to trading on the BVB requires that this Prospectus is approved by the FMA and that the Romanian Financial Supervisory Authority receives a certificate from the FMA confirming that this Prospectus has been approved by it (fulfilling the European passporting formalities), and that the BVB approves the listing and trading of the Domestic Notes. Admission to trading on the BVB is subject to certain requirements. BCR intends to take all necessary steps to ensure that all International Notes are admitted to trading on the Vienna Stock Exchange and that all Domestic Notes are admitted to trading on the BVB as soon as possible after the issuance of the Notes, if at all. However, there is no guarantee that, should the admission conditions change, all of such listing conditions will be met. Consequently, should the applicable admission conditions change, the International Notes may not be admitted to trading on the Vienna Stock Exchange and the Domestic Notes may not be admitted to trading on the BVB on the estimated dates or at all.

There is a lack of liquidity on the Bucharest Stock Exchange for the corporate bond market.

As of the Date of Approval, ten corporate bond issues were registered for trading on the Romanian Market operated by BVB. A very small number of debt securities represent the gross majority of the debt trading volumes of BVB. There is no guarantee that the Domestic Notes, even though expected to be listed on the Romanian Market operated by the BVB, will be actively traded, and if they are not, this is likely to increase their price volatility and/or adversely affect the market price of the Domestic Notes.

There is a risk that the Notes will be suspended or excluded from trading, which may have an adverse effect on the market price of such Notes.

The Vienna Stock Exchange and the BVB have the right to suspend trading in listed bonds if BCR fails to comply with the regulations of the exchange (such as, for example, specific disclosure requirements) or if such suspension is necessary to protect the interests of market participants or the orderly functioning of the market is temporarily endangered. Thus, trading in the Notes may be suspended. Any suspension of trading could adversely affect the trading price of the Notes. Moreover, if BCR fails to fulfil certain requirements or obligations under the applicable laws and regulations relevant to companies whose securities are listed on the Vienna Stock Exchange or on the BVB, or if the orderly stock exchange trading, the safety of trading thereon or investors' interests are endangered, the Notes can be excluded from trading on the respective stock exchange. Such a situation may occur in relation to the Domestic Notes and/or the International Notes.

In particular, Holders may not be able to sell their Notes where trading is suspended and the stock exchange quotations of such Notes may not adequately reflect the market price of such Notes. Finally, even if trading in Notes is suspended or the Notes are excluded from trading, Holders should note that such measures may neither be sufficient nor adequate nor in time to prevent price disruptions or to safeguard the Holders' interests; for example, where trading in Notes is suspended after price-sensitive information relating to such Notes has been published, the market price of such Notes may already have been adversely affected. All these risks would, if they materialise, have a material adverse effect on the Holders.

Risks related to the Notes generally

Set out below is a brief description of certain risks relating to the Notes generally.

The interest payments on the Notes may not be made free and clear of Romanian withholding tax.

Under Romanian tax law, the Issuer is required to withhold tax on gross interest obtained by the following categories of Holders:

- 10 per cent to resident individuals;
- 16 per cent to non-resident individuals and non-resident legal entities

(without prejudice to the applicability of any treaties for avoidance of double taxation in force between Romania and the state of tax residency of a Holder, subject to the conditions set out in the Terms and Conditions of the Notes).

If the applicable Terms and Conditions of the Notes specify that no withholding tax gross-up is applicable, the Issuer is not obliged to gross up any payments in respect of the Notes and will not be liable for or otherwise obliged to pay any tax, duty, withholding or other payment which may arise as a result of the ownership, transfer, presentation and surrender for payment, or enforcement of any Notes and all payments made by the Issuer will be made subject to any such tax, duty, withholding or other payment which may be required to be made, paid, withheld or deducted.

Even if BCR chooses generally to pay additional amounts with respect to any Notes as a result of the imposition of withholding tax on interest payments on the Notes in accordance with Romanian tax law, Holders should note that in accordance with the Terms and Conditions of the Notes, certain exemptions may apply pursuant to which BCR will be exempt from paying such additional amounts.

Consequently, with respect to the non-resident Holder, payment of interest on the Notes shall be made to the paying agent, net of the tax withholding applied in accordance with the Romanian law (without prejudice to the applicability of any treaties for avoidance of double taxation in force between Romania and the state of tax residency of a Holder providing for no deduction or withholding in Romania, or for a lower rate of deduction or withholding in Romania than the rate imposed under Romanian law for such income payment).

Interest obtained and profits realised upon the sale or repayment of Notes by a Holder, resident individual, may be subject to social health insurance contribution.

Interest obtained and profits realised upon the sale or repayment of Notes are considered to be income from investments, subject to social health insurance contribution, irrespective of other income for which the social health insurance contribution is paid, if the level of 12 times the value of the national minimum gross wage is exceeded, individually or cumulated with other types of income such as: other income from investments, income from independent activities, income from other sources, income from the use of goods, etc.

Credit ratings of Notes may not adequately reflect all risks of the investment in such Notes and may be suspended, downgraded or withdrawn which could have an adverse effect on the market price and trading price of the Notes.

A credit rating of Notes may not adequately reflect all risks of the investment in such Notes. Credit rating agencies could decide to assign credit ratings to the Notes on an unsolicited basis. Equally, credit ratings may be suspended, downgraded or withdrawn. Any such suspension, downgrading or withdrawal may have an adverse effect on the market price and trading price of the Notes. A credit rating is not a recommendation to buy, sell or hold securities and may be revised, suspended or withdrawn by the credit rating agency at any time.

The Notes are governed by Austrian law or Romanian law, and changes in applicable laws, regulations or regulatory policies may have an adverse effect on BCR, the Notes and the Holders.

The Terms and Conditions of the Notes will be governed either by Austrian or Romanian law. Holders should thus note that the governing law may not be the law of their own home jurisdiction and that the law

applicable to the Notes may not provide them with similar protection as their own law. Furthermore, the impact of any possible judicial decision or change to Austrian or Romanian law, or administrative practice after the date of this Prospectus is unclear.

The statutory prescription period to claim payments of principal provided under Austrian law will be reduced under the Terms and Conditions applicable to the Notes in which case Holders may have less time to assert claims under the Notes.

Pursuant to the Terms and Conditions of the Notes the statutory prescription period of 30 years to claim payments of principal shall lapse 3 years after the respective due date unless such claim has been filed with court before such time. Due to the abbreviation of the prescription period the likelihood that the Holder will not receive the amounts due to him increases since the Holder will have less time to assert his claims under the Notes in comparison to holders of debt instruments the Terms and Conditions of which do not shorten the statutory prescription period at all or to a lesser degree than the Terms and Conditions of the Notes.

Risks related to the market generally

Set out below is a brief description of the principal market risks, including liquidity risk, exchange rate risk, interest rate risk and credit risk:

Holders are exposed to the risk of partial or total failure of the Issuer to make interest and/or redemption payments under the Notes.

Holders are subject to the risk of a partial or total inability of the Issuer to make interest and/or redemption payments that the Issuer is obliged to make under the Notes. Any deterioration of the creditworthiness of the Issuer would increase the risk of loss (see also "*Factors that may affect the Issuer's ability to fulfil its obligations under Notes to be issued pursuant to this Prospectus*" above). A materialisation of the credit risk may result in partial or total failure of the Issuer to make interest and/or redemption payments.

Holders assume the risk that the credit spread of the Issuer widens resulting in a decrease in the market price of the Notes.

A credit spread is the margin payable by the Issuer to the Holder of Notes as a premium for the assumed credit risk. Credit spreads are offered and sold as premiums on current risk-free interest rates or as discounts on the price.

Factors influencing the credit spread include, among other things, the creditworthiness and credit rating of the Issuer, probability of default, recovery rate, remaining term to maturity of the Notes and obligations under any collateralisation or guarantee and declarations as to any preferred payment or subordination. The liquidity situation of the market, the general level of interest rates, overall economic developments, and the currency, in which the relevant obligation is denominated may also have a negative effect.

Holders are exposed to the risk that the credit spread of the Issuer widens resulting in a decrease in the market price of the Notes.

The Holder may be exposed to the risk that due to future money depreciation (inflation), the real yield of an investment may be reduced.

Inflation risk describes the possibility that the market price of assets such as the Notes or income therefrom will decrease as higher (expected) inflation reduces the purchasing power of a currency. Higher (expected) inflation causes the rate of return to decrease in value. If the inflation rate exceeds the interest paid on any Notes (if any) the yield on such Notes will become negative.

Holders are exposed to the risk of an unfavourable development of market prices of their Notes which materialises if the Holder sells the Notes prior to the final maturity of such Notes.

The development of market prices of the Notes depends on various factors, such as changes of market interest rate levels, the policies of central banks, overall economic developments, inflation rates or the lack of or excess demand for the relevant type of Notes. The Holder is therefore exposed to the risk of an unfavourable development of market prices of its Notes which materialises if the Holder sells the Notes prior to the final maturity of such Notes. Holders should also be aware that Notes may be issued at a price higher than the market price at issue and/or the redemption amount. This will increase the impact that unfavourable market price developments may have on the Notes.

Exchange rate risks may occur, if a Holder's financial activities are denominated in a currency or currency unit other than the Specified Currency in which BCR will make principal and interest payments. Furthermore, government and monetary authorities may impose exchange controls that could adversely affect an applicable exchange rate.

BCR will pay principal and interest on the Notes in the Specified Currency. This presents certain risks relating to currency conversions if a Holder's financial activities are denominated principally in a currency or currency unit (the "**Holder's Currency**") other than the Specified Currency. These include the risk that exchange rates may significantly change (including changes due to devaluation of the Specified Currency or revaluation of the Holder's Currency) and the risk that authorities with jurisdiction over the Holder's Currency may impose or modify exchange controls. An appreciation in the value of the Holder's Currency relative to the Specified Currency would decrease (i) the Holder's Currency-equivalent yield on the Notes, (ii) the Holder's Currency-equivalent value of the principal payable on the Notes, and (iii) the Holder's Currency-equivalent market price of the Notes.

Government and monetary authorities may impose (as some have done in the past) exchange controls that could adversely affect an applicable exchange rate. As a result, Holders may receive less interest or principal than expected, or no interest or principal.

If a loan or credit is used to finance the acquisition of the Notes, the loan or credit may significantly increase the amount of a loss.

If a loan is used to finance the acquisition of the Notes by a Holder and the Issuer is subsequently unable to repay any or all of the principal and interest otherwise payable under the Notes, or if the trading price diminishes significantly, the Holder may not only have to face a potential loss on its investment, but it will also have to repay the loan and pay interest thereon. A loan may therefore significantly increase the amount of a potential loss. Holders should not assume that they will be able to repay the loan or pay interest thereon from the proceeds of a transaction. Instead, Holders should assess their financial situation prior to an investment, as to whether they are able to pay interest on the loan, repay the loan on demand, and that they may suffer losses instead of realising gains.

Incidental costs related in particular to the purchase and sale of the Notes may have a significant impact on the profit potential of the Notes.

When Notes are purchased or sold, several types of incidental costs (including transaction fees) may be incurred in addition to the purchase or sale price of the Notes. These incidental costs may significantly reduce or eliminate any profit from holding the Notes. Credit institutions may charge fees which are either fixed minimum fees or pro-rata fees, depending on the order value. To the extent that additional - domestic or foreign - parties are involved in the execution of an order, including but not limited to domestic dealers or brokers in foreign markets, Holders may also be charged for the brokerage fees and other fees and expenses of such parties (third party costs).

In addition to such costs directly related to the purchase of Notes (direct costs), investors must also take into account any follow-up costs (such as custody fees). Investors should inform themselves about any additional costs incurred in connection with the purchase, custody or sale of the Notes before investing in the Notes.

Potential investors should note that the purchase price applicable to the Notes on a given day will often include a bid-ask spread so that the purchase price will be higher than the price at which Holders are able to sell any such Notes on that given day.

Holders have to rely on the functionality of the relevant clearing system.

The Notes are purchased and sold through different clearing systems, such as OeKB CSD GmbH ("**OeKB**") or Depozitarul Central S.A. (the "**Romanian Central Depository**"). BCR does not assume any responsibility as to whether the Notes are actually transferred to the securities portfolio of the relevant investor. Holders have to rely on the functionality of the relevant clearing system. There is the risk that due to the use of the clearing system any credits on the investors' account will not be processed, will not be processed within the time expected by the investor or will be delayed. Thus, the investor may suffer economic disadvantages.

The applicable tax regime may change to the disadvantage of the Holders and, therefore, the tax impact of an investment in the Notes should be carefully considered.

Interest payments on Notes, or profits realised by a Holder upon the sale or repayment of Notes, may be subject to taxation in the Holder's state of residence or in other jurisdictions in which the Holder is subject to tax. The tax consequences which generally apply to Holders may, however, differ from the tax impact on an individual Holder. Prospective investors, therefore, should contact their own tax advisors on the tax impact of

an investment in the Notes. Furthermore, the applicable tax regime may change to the disadvantage of the investors in the future.

Legal investment considerations may restrict certain investments.

The investment activities of certain Holders are subject to investment laws and regulations, or review or regulation by certain authorities. Each potential investor should consult its legal advisers to determine whether and to what extent (i) Notes are legal investments for it, (ii) Notes can be used as collateral for various types of borrowing and (iii) other restrictions apply to its purchase or pledge of any Notes. Financial institutions should consult their legal advisers or the appropriate regulators to determine the appropriate treatment of Notes under any applicable risk-based capital or similar rules.

Furthermore, the Terms and Conditions of the Notes may contain certain exclusions or restrictions of liability for negligent acts or omissions in connection with the Notes, which could result in the Holders not being able to claim (or only to claim partial) indemnification for damage that has been caused to them. Holders should therefore inform themselves about such exclusions or restrictions of liability and consider whether these are acceptable for them.

The Issuer is exposed to conflicts of interest which might adversely affect the Holders.

The Issuer may from time to time act in other capacities with regard to the Notes, such as calculation agent, which allows the Issuer to make calculations in respect of the Notes (e.g. the amount of interest to be paid) which are binding for the Holders. This fact could generate conflicts of interest and may affect the market price of the Notes.

The Issuer may use all or some of the proceeds received from the sale of the Notes to enter into hedging transactions which may affect the market price of the Notes.

It is usual for employees of financial institutions such as BCR to undertake deals on their own behalf subject to securities laws on personal transactions and market abuse as well as statutory or internal compliance standards. Employees and connected parties are permitted to take part in securities offerings of BCR. Furthermore, when purchasing the Notes, the employee receives a discount from the value of the market price. BCR's sales employees may be motivated to sell these Notes, due to the value of incentives received by them (in case the sale is successful) subject to securities and banking laws applicable to any such incentives. Despite measures taken by the Issuer to ensure compliance with applicable laws and internal procedures, this could create a conflict with the duties owed to the Holders.

Furthermore, members of the Issuer's Management and Supervisory Boards may serve on management or supervisory boards of various different companies (others than BCR), including customers of and investors in BCR, which may also compete directly or indirectly with the Issuer. Directorships of that kind may expose such persons to potential conflicts of interest if the Issuer maintains active business relations with said companies, which could have a material adverse effect on the Issuer's business, financial position and results of operations.

Risks related to the structure of particular Notes

A wide range of Notes may be issued under the Programme. A number of these Notes may have features which contain particular risks for prospective investors. Set out below is a description of the most common such features.

Holders of Fixed Rate Notes are exposed to the risk that the price of such Notes falls as a result of changes in the market interest rate.

A Holder of Fixed Rate Notes is exposed to the risk that the market price of such Notes falls as a result of changes in the market interest rate. While the nominal interest rate of Fixed Rate Notes as specified in the applicable Final Terms is fixed during the life of such Notes, the current interest rate on the capital markets for issues of the same maturity (the "**market interest rate**") typically changes on a daily basis. As the market interest rate changes, the market price of Fixed Rate Notes also changes, but in the opposite direction. If the market interest rate increases, the market price of Fixed Rate Notes typically falls, until the yield of such Notes is approximately equal to the market interest rate. If the market interest rate falls, the market price of Fixed Rate Notes typically increases, until the yield of such Notes is approximately equal to the market interest rate. The same risk applies to Step-Up Notes and Step-Down Notes if the market interest rates in respect of comparable Notes are higher than the rates applicable to such Notes.

Holders of Floating Rate Notes and Fixed to Floating Rate Notes may be exposed to the risk of fluctuating interest rate levels which make it impossible to determine the yield of such Notes in advance, and are exposed to the risk of uncertain interest income.

Floating Rate Notes tend to be volatile investments. A Holder of Floating Rate Notes is exposed to the risk of fluctuating interest rate levels and uncertain interest income. Fluctuating interest rate levels make it impossible to determine the profitability of Floating Rate Notes in advance. Neither the current nor the historical value of the relevant floating rate should be taken as an indication of the future development of such floating rate during the term of any Floating Rate Notes.

The interest of Floating Rate Notes and Fixed to Floating Rate Notes will be calculated by reference to one or several specific benchmark indices.

The interest of Floating Rate Notes and Fixed to Floating Rate Notes will be calculated by reference to one or several specific benchmark indices (each a "**Benchmark**" and together, the "**Benchmarks**") such as the Euro Interbank Offered Rate ("**EURIBOR**"). EURIBOR and other Benchmarks each are provided by an administrator. Benchmarks have become the subject of regulatory scrutiny and recent national and international regulatory guidance and proposals for reform. Some of these reforms are already effective while others are still to be implemented. These reforms may cause such Benchmarks to perform differently than in the past, or to disappear entirely, or have other consequences which cannot be predicted. Any such consequence could have a material adverse effect on any Notes linked to such a Benchmark.

International proposals for reform of Benchmarks include the Benchmark Regulation which is fully applicable since 1 January 2018. According to the Benchmark Regulation, a Benchmark may only be used if its administrator obtains authorisation or is registered and in case of an administrator which is based in a non-EU jurisdiction, if the administrator's legal benchmark system is considered equivalent (Article 30 of the Benchmark Regulation), the administrator is recognised (Article 32 of the Benchmark Regulation) or the Benchmark is endorsed (Article 33 of the Benchmark Regulation) (subject to applicable transitional provisions).

The Benchmark Regulation could have a material impact on Notes linked to a Benchmark, including any of the following circumstances:

- a rate or an index which is a Benchmark could not be used as such if its administrator does not obtain authorisation or is based in a non-EU jurisdiction which (subject to applicable transitional provisions) does not satisfy the 'equivalence' conditions, is not 'recognised' pending such a decision and is not 'endorsed' for such purpose. In such event, depending on the particular Benchmark and the applicable terms of the Notes, the Notes could be de-listed, adjusted, redeemed prior to maturity or otherwise impacted;
- the methodology or other terms of the Benchmark could be changed in order to comply with the terms of the Benchmark Regulation, and such changes could have the effect of reducing or increasing the rate or level or affecting the volatility of the published rate or level; and
- under the Terms and Conditions certain fall-back provisions will apply in case a Benchmark used as a reference for calculation of amounts payable under the Notes issued under the Programme has ceased to be calculated or administered. Depending on the relevant Benchmark, the application of these fall-back provisions could result in (i) either the Independent Advisor or other parties (as the case may be) in its due discretion determines a Substitute Reference (Interest) Rate so that the Calculation Agent can determine the amounts payable under the Notes or (ii) the relevant Notes effectively becoming fixed rate instruments if no Substitute Reference (Interest) Rate is determined.

In addition to the aforementioned Benchmark Regulation, there are numerous other proposals, initiatives and investigations which may impact Benchmarks.

Following the implementation of any such potential reforms, the manner of administration of Benchmarks may change, with the result that they may perform differently than in the past, or Benchmarks could be eliminated entirely, or there could be other consequences which cannot be predicted. For example, on 27 July 2017, the Chief Executive of the U.K. Financial Conduct Authority ("**FCA**") announced that it does not intend to continue to persuade, or use its powers to compel banks to submit rates for the calculation of the LIBOR benchmark to the administrator of LIBOR after 2021 (the "**FCA Announcement**"). The FCA Announcement indicates that the continuation of LIBOR on the current basis cannot and will not be guaranteed after 2021. It is not possible to predict whether, and to what extent, panel banks will continue to provide LIBOR submissions to the administrator of LIBOR going forwards. This may cause LIBOR to perform differently than it did in the past and may have other consequences which cannot be predicted.

Any changes to a Benchmark as a result of the Benchmark Regulation or other initiatives, could have a material adverse effect on the costs of refinancing a Benchmark or the costs and risks of administering or otherwise participating in the setting of a Benchmark and complying with any such regulations or requirements. It is uncertain whether or to what extent any of the above-mentioned changes and/or any further changes in the administration or method of determining a Benchmark could have an effect on the market price of any Notes linked to the relevant Benchmark. Thus, investors should be aware that any changes to a relevant Benchmark may have a material adverse effect on the market price of any Notes linked to such Benchmark.

Fixed to Fixed and Fixed to Floating Rate Notes bear interest at a rate that converts from a fixed rate to a different fixed rate or from a fixed rate to a floating rate, respectively. A Holder bears the risk that after such conversion, the new interest rate may be lower than the then prevailing interest rates or the spread on the Fixed to Floating Rate Notes may be less favourable than the then prevailing spreads on comparable Floating Rate Notes relating to the same reference rate(s).

Fixed to Fixed Rate Notes and Fixed to Floating Rate Notes bear interest at a rate that converts from a fixed rate to a different fixed rate or from a fixed rate to a floating rate, respectively. The conversion of the interest rate will affect the market price of the Notes. If the interest rate converts from a fixed rate to a different fixed rate, such fixed rate may be lower than the then prevailing interest rates payable on fixed rate notes. If the interest rate converts from a fixed rate to a floating rate, the spread on the Fixed to Floating Rate Notes may be less favourable than then prevailing spreads on comparable Floating Rate Notes relating to the same reference rate. In addition, the new floating rate at any time may be lower than the interest rates payable on other Notes. Furthermore, the risks set out above with regard to Fixed Rate Notes and Floating Rate Notes also apply in relation to the period for which a fixed rate of interest is being paid and the risks set out above with regard to Floating Rate Notes also apply in relation to the period for which a floating rate of interest is being paid.

A Holder of Zero Coupon Notes is exposed to the risk that the market price of such Notes falls as a result of changes in the market interest rate. Market prices of Zero Coupon Notes are more volatile than market prices of Fixed Rate Notes and are likely to respond to a greater degree to market interest rate changes than interest bearing Notes with a similar maturity.

Zero Coupon Notes do not pay current interest but are issued at a discount from their nominal value. Instead of periodical interest payments, the difference between the redemption price and the issue price constitutes interest income until maturity and reflects the market interest rate. A Holder of Zero Coupon Notes is exposed to the risk that the market price of such Notes falls as a result of changes in the market interest rate. Market prices of Zero Coupon Notes are more volatile than prices of Fixed Rate Notes and are likely to respond to a greater degree to market interest rate changes than interest bearing Notes with a similar maturity.

In the event that any Notes are redeemed prior to their maturity, a Holder of such Notes may be exposed to risks, including the risk that his investment will have a lower than expected yield (Risk of Early Redemption).

The applicable Final Terms will indicate whether the Issuer may have the right to call the Notes prior to maturity (an optional call right) or whether the Notes will be subject to early redemption upon the occurrence of an event specified in the applicable Final Terms (an early redemption event). The Issuer will under certain circumstances have the right to early redeem the Notes if there is a change in the applicable tax treatment of the Notes. If the Issuer redeems the Notes prior to maturity or the Notes are subject to early redemption due to an early redemption event, a Holder of such Notes is exposed to the risk that, due to early redemption, its investment will have a lower than expected yield. The Issuer might exercise its optional call right if the yield on comparable Notes in the capital markets falls, which means that the investor may only be able to reinvest the redemption proceeds from the Notes with a lower yield or with a similar yield of a higher risk.

Holders should note that where the Terms and Conditions of the Notes provide for a right of early redemption by the Issuer only, Holders usually receive a higher yield on their Notes than they would if they were also granted a right to early redeem the Notes reflecting the higher risk of early redemption the Holders of such Notes are exposed to. Excluding the Holders' right to redeem Notes prior to their maturity is often a precondition for the Issuer being able to hedge its exposure under the Notes. Thus, without early redemption by Holders being excluded, the Issuer would not be able to issue Notes at all, or the Issuer would factor the potential hedging break costs into the redemption amount of the Notes, thus reducing the yield Holders receive from the Notes. Investors should therefore carefully consider whether they think that a right of early redemption only for the Issuer would be to their detriment, and should, if they think that this is the case, not invest in the Notes.

In the case of a cap, a Holder will not be able to benefit from any actual favourable development beyond the cap.

If the interest rate of an issue of Notes is not fixed but will be determined according to the structure of Notes as set out in the relevant Final Terms of the Notes, such an issue may also incorporate a cap. The effect of a cap is that the amount of interest and/or the redemption amount will never rise above the predetermined cap, so that the Holder will not be able to benefit from any actual favourable development beyond the cap. The yield could therefore be considerably lower than that of similarly structured Notes without a cap.

An Austrian court could appoint a trustee for the Notes to exercise the rights and represent the interests of Holders on their behalf in which case the ability of Holders to pursue their rights under the Notes individually may be limited.

Pursuant to the Austrian Notes Trustee Act (*Kuratorengegesetz*) and the Austrian Notes Trustee Supplementation Act (*Kuratorennergänzungsgesetz*), a trustee (*Kurator*) could be appointed by an Austrian court upon the request of any interested party (e.g. a Holder) or upon the initiative of a competent court, for the purposes of representing the common interests of the Holders in matters concerning their collective rights to the extent the rights are endangered due to a lack of joint representation. In particular, this may occur if insolvency proceedings are initiated against the Issuer, in connection with any amendments to the Terms and Conditions of the Notes or changes relating to the Issuer, or under other similar circumstances. If a trustee is appointed, it will exercise the collective rights and represent the interests of the Holders and will be entitled to make statements on their behalf which shall be binding on all Holders. Where a trustee represents the interests of and exercises the rights of Holders, this may conflict with or otherwise adversely affect the interests of individual or all Holders.

If the relevant Terms and Conditions of the Notes provide for the appointment of a Joint Representative, a Holder may be deprived of its individual right to pursue and enforce its rights under the relevant Terms and Conditions of the Notes against the Issuer.

If the relevant Terms and Conditions of the Notes provide for the appointment of a Joint Representative, either in the relevant Terms and Conditions of the Notes or by a majority resolution of the Holders, it is possible that a Holder may be deprived of its individual right to pursue and enforce its rights under the relevant Terms and Conditions of the Notes against the Issuer, such right passing to the Joint Representative who is then exclusively responsible to claim and enforce the rights of all Holders.

The Notes may be subject to write-down or conversion to equity upon the occurrence of a certain trigger event, which may result in Holders losing some or all of their investment in the Notes (statutory loss absorption).

The powers provided to "resolution authorities" (in Romania, a separate division within the NBR) include write-down and conversion powers which may be used prior to or on entry into resolution to ensure that, *inter alia*, relevant capital instruments fully absorb losses at the point of non-viability (defined below) of the issuing institution and/or the group. The relevant resolution authority may also apply the bail-in tool in resolution with the objective of restoring the capital of the failing institution to enable it to continue to operate as a going concern. Accordingly, resolution authorities will be required to order the write-down of such capital instruments on a permanent basis, or convert them into CET 1 items (such as ordinary shares or other instruments of ownership), at the point of non-viability and before any resolution tool other than the bail-in tool is made use of (statutory loss absorption). Resolution authorities shall exercise the write-down or conversion in relation to statutory loss absorption in a way that results in: (i) CET 1 items being reduced first in proportion to the relevant losses; and (ii) thereafter, if CET 1 is not sufficient to cover the relevant losses, the principal amount of Additional Tier 1 instruments ("AT 1") being reduced or converted to cover the relevant losses and recapitalise the entity; and (iii) thereafter, if CET 1 and AT 1 are not sufficient, the principal amount of Tier 2 instruments ("Tier 2") (such as the subordinated Notes) being reduced or converted; and in case of a bail-in tool also: (iv) thereafter, if CET 1, AT 1 and Tier 2 are not sufficient to cover the relevant losses and recapitalise the entity, other subordinated debt (in accordance with the hierarchy of claims in the normal insolvency proceedings); and (v) if still insufficient, the rest of eligible liabilities including certain senior debt (such as the senior Notes) (in accordance with the hierarchy of claims in the normal insolvency proceedings) being reduced down to zero on a permanent basis or converted. When the bail-in tool is applied for the purpose of restoring the capital of the institution, write-down or conversion of non-equity instruments into CET 1 items is to be made in the same order.

For the purposes of statutory loss absorption, the point of non-viability is the point at which the following conditions are met:

1. the competent authority or the resolution authority determines that the institution is failing or likely to fail, i.e.:
 - (a) the conditions for the withdrawal of the authorisation by the competent authority are met or there are objective elements to support a determination that this will be the case in the near future, including but not limited to because the institution has incurred or is likely to incur losses that will deplete all or a significant amount of its own funds;
 - (b) the assets of the institution are or there are objective elements to support a determination that the assets of the institution will, in the near future, be less than its liabilities;
 - (c) the institution is or there are objective elements to support a determination that the institution will, in the near future, be unable to pay its debts or other liabilities as they fall due;
 - (d) extraordinary public financial support is required except when the extraordinary public financial support takes certain forms in order to remedy a serious disturbance in the economy of a Member State and preserve financial stability; and
2. having regard to timing and other relevant circumstances, there is no reasonable prospect that any alternative private sector measures, including measures by an institutional protection scheme, or supervisory action, including early intervention measures or the write-down or conversion of relevant capital instruments pursuant to Section 1, Chapter VI, Title IV of Law 312/2015 under Romanian law, taken in respect of the institution, would prevent the failure of the institution within a reasonable timeframe; and
3. in case of the application of the bail-in tool, a resolution action is necessary in the public interest; or
4. in case of exercising the power to write down or conversion of capital instruments, a group shall be deemed to be failing or likely to fail where the group infringes, or there are objective elements to support a determination that the group, in the near future, will infringe, its consolidated prudential requirements in a way that would justify action by the competent authority including but not limited to because the group has incurred or is likely to incur losses that will deplete all or a significant amount of its own funds.

Any write-down or conversion of all or part of the principal amount of any instrument, including accrued but unpaid interest in respect thereof, in accordance with the bail-in tool or the write-down and conversion powers would not constitute an event of default under the terms of the relevant instruments. Consequently, any amounts so written down or converted would be irrevocably lost and the holders of such instruments would cease to have any claims thereunder, regardless whether or not the institution's financial position is restored.

Hence, the Notes may be subject to write-down or conversion into CET 1 upon the occurrence of the relevant trigger event, which may result in Holders losing some or all of their investment in the Notes. The exercise of any such power is highly unpredictable and any suggestion or anticipation of such exercise could materially adversely affect the market price of the Notes.

Apart from potentially being subject to resolution tools and powers as set out above, the Issuer may also be subject to national insolvency proceedings.

In the case of the Issuer's insolvency, deposits have a higher ranking than the claims of the Holders under the Notes.

Pursuant to Article 234 of Law 85/2014 on insolvency prevention procedures and on insolvency procedure (the "**Insolvency Act**"), which implements Article 108 BRRD in Romania, the following insolvency hierarchy for deposits applies in insolvency proceedings opened in relation to the Issuer:

- (a) The following claims have the same ranking, which is higher than the ranking of the claims of ordinary unsecured, non-preferred creditors: (i) that part of eligible deposits from natural persons and micro, small and medium-sized enterprises which exceeds the coverage level provided for in the Deposit Guarantee Act no. 311/2015 ("Legea nr. 311/2015 privind schemele de garantare a depozitelor și Fondul de garantare a depozitelor bancare"); and (ii) deposits that would be eligible deposits from natural persons, micro, small and medium-sized enterprises if they are not made through branches (located outside the EU) of institutions established within the EU.

- (b) The following claims have the same priority ranking, which is higher than the ranking of claims provided for under point (a) above: (i) covered deposits; and (ii) deposit guarantee schemes subrogating to the rights and obligations of covered depositors in insolvency.

Furthermore, the implementation of Directive (EU) 2017/2399 in the Insolvency Act leads to a change in the ranking of certain debt instruments so that unsecured claims have a higher ranking in insolvency proceedings than unsecured claims under debt instruments with certain features that in turn have a higher ranking than subordinated claims. Therefore, Holders of senior Notes should bear in mind that in case of insolvency proceedings opened in relation to the Issuer their claims will also be junior to the claims listed above in points (a) and (b), and that therefore, they will only receive payment of their claims if and to the extent that such claims listed above in points (a) and (b) have been discharged in full. Holders of subordinated Notes and Holders of senior Notes where eligible liabilities format and non-preferred senior status are applicable should bear in mind that in case of insolvency proceedings their claims are junior to claims under senior Notes (including those which constitute eligible debt instruments without non-preferred senior status).

Moreover, according to a proposal for a European Directive amending the BRRD published by the European Commission on 23 November 2016, ordinary senior unsecured claims should be given preference over certain other (senior unsecured) claims under the national insolvency hierarchy (the latter category being referred to as a new "non-preferred" senior class of debt instruments"). Senior Notes where eligible liabilities format and non-preferred senior status are applicable are intended to refer to such hierarchy in a way that claims on their principal amount are expressed to be subordinated to other unsecured and unsubordinated obligations to the extent such other unsecured and unsubordinated obligations enjoy preferred treatment by law in the event of the insolvency of the Issuer (unless the same effect is achieved by a corresponding contractual clause on the ranking of the senior Notes where eligible liabilities format and non-preferred senior status are applicable), all in a view to be eligible for MREL.

Therefore, Holders of senior Notes where eligible liabilities format and non-preferred senior status are applicable should be prepared that in case of insolvency proceedings opened in relation to the Issuer and in any comparable proceedings, their claims will, in accordance with the terms of such Notes, be junior to the claims of Holders of senior Notes where eligible liabilities format is applicable and non-preferred senior status is not applicable and other senior claims (including senior claims preferred by law as described above).

The Notes may be subject to other resolution powers which may result in the non-payment of distributions and/or the principal of the Notes.

Provided that the Issuer meets the applicable conditions for resolution, the resolution authority has certain resolution powers which it may exercise either individually or in any combination together with or in preparation of applying a resolution instrument. Such resolution powers in particular include:

- (i) the power to transfer to another entity rights, assets or liabilities of the Issuer (such as the Notes);
- (ii) the power to reduce, including to reduce to zero, the nominal value of or outstanding amount due in respect of eligible liabilities of the Issuer;
- (iii) the power to convert eligible liabilities of the Issuer into ordinary shares or other instruments of ownership of the Issuer, a relevant parent institution or a bridge institution to which assets, rights or liabilities of the Issuer are transferred;
- (iv) the power to cancel debt instruments issued by the Issuer (such as the Notes);
- (v) the power to require the Issuer or a relevant parent institution to issue new shares or other instruments of ownership or other capital instruments, including preference shares and contingent convertible instruments; and/or
- (vi) the power to amend or alter the maturity of debt instruments (such as the Notes) and other eligible liabilities issued by the Issuer or the amount of interest payable under such debt instruments and other eligible liabilities, or the date on which the interest becomes payable, including by suspending payment for a temporary period.

The exercise of such resolution powers could have a negative impact on the Issuer and/or the Notes.

The Issuer is not prohibited from issuing further debt instruments or incurring further liabilities.

The Terms and Conditions of the Notes place no restriction on the amount of debt that the Issuer may issue, incur and/or guarantee. Furthermore, the Issuer is not obliged to inform Holders about issuing

further debt. Issuing or incurring further debt may have a negative impact on the market price of the Notes and the Issuer's ability to meet all obligations under the issued Notes and may also reduce the amount recoverable by Holders upon the Issuer's insolvency. If the Issuer's financial situation were to deteriorate, the Holders could suffer direct and materially adverse consequences, including cancellation of interest payments and reduction of the principal amount of the Notes and, in case of the Issuer's liquidation, loss of their entire investment. All of these factors may have a negative impact on the Holders.

Additional Risks in connection with subordinated Notes

The obligations of the Issuer under subordinated Notes constitute unsecured and subordinated obligations which are subordinated to the claims of all unsubordinated creditors of the Issuer.

The Issuer may issue subordinated Notes. The obligations of the Issuer in respect of subordinated Notes constitute unsecured and subordinated obligations. Any claim for repayment of the principal amount of the subordinated Notes is subordinated to the claims of all unsubordinated creditors. In the event of an insolvency or liquidation of the Issuer, no amounts will be payable under such subordinated obligations until the claims of all unsubordinated creditors of the Issuer will have been satisfied in full. Furthermore, the Terms and Conditions of the subordinated Notes do not give the Holder the right to accelerate the future scheduled payment of interest or principal.

Claims of the Issuer are not permitted to be offset with and against payment obligations of the Issuer under the subordinated Notes which are not, and may not become secured or subject to a guarantee or any other arrangement that enhances the seniority of the claim.

The Holders are exposed to the risk that the Issuer may issue subordinated debt instruments or incur subordinated liabilities which are senior to the subordinated Notes.

Holders of subordinated Notes are exposed to the risk of subordination not only in respect of unsubordinated obligations of the Issuer (including, without limitation, senior Notes), but also in respect of subordinated debt instruments or other subordinated liabilities which the Issuer may (have to) issue or incur and which rank or are expressed to rank senior to subordinated Notes. This could in particular apply in respect of contractual bail-in instruments which the Issuer would have to issue for MREL purposes.

To qualify as contractual bail-in instrument, it is required that the instrument (i) contains a contractual term providing that, where a resolution authority decides to apply the bail-in tool to that institution, the instrument shall be written down or converted to the extent required before other eligible liabilities are written down or converted; and (ii) is subject to a binding subordination agreement, in the event of normal insolvency proceedings ranks below other eligible liabilities and cannot be repaid until other eligible liabilities outstanding at the time have been settled.

In the event of an insolvency of the Issuer, no amounts will be payable under subordinated Notes until the claims of any and all such subordinated creditors of the Issuer ranking senior to subordinated Notes will have been satisfied in full. Similarly, where the resolution authority applied the bail-in tool, subordinated Notes issued under the Programme would be subject to write down or conversion prior to such other subordinated creditors of the Issuer ranking senior to subordinated Notes, in accordance with the statutory sequence of write-down and conversion.

Subordinated Notes may not be early redeemed at the option of the Holders, and any rights of the Issuer to early redeem or repurchase subordinated Notes are subject to the prior permission of the competent authority and/or the resolution authority.

The Holders of the subordinated Notes will have no rights to call for the early redemption of their subordinated Notes and should not invest in the subordinated Notes in the expectation that any early redemption right will be exercised by the Issuer.

The Issuer may at its sole discretion, early redeem the subordinated Notes at any time either for tax or regulatory reasons at the Early Redemption Amount plus interest accrued until the date fixed for redemption. In addition, if such right is foreseen in the Terms and Conditions, the Issuer may at its sole discretion redeem the subordinated Notes before their stated maturity, but not before five years after the date of their issuance, on a specified Call Redemption Date at the applicable Call Redemption Amount plus accrued interest.

Any early redemption and any repurchase of the subordinated Notes is subject to the prior permission of the Competent Authority and/or the Resolution Authority and compliance with regulatory capital rules applicable from time to time to the Issuer. Under the CRR, the Resolution Authority may only permit

institutions to early redeem or repurchase Tier 2 instruments such as the Notes if certain conditions prescribed by the CRR are complied with. These conditions, as well as a number of other technical rules and standards relating to regulatory capital requirements applicable to the Issuer, should be taken into account by the Resolution Authority in its assessment of whether or not to permit any early redemption or repurchase. It is uncertain how the Resolution Authority will apply these criteria in practice and such rules and standards may change during the maturity of the Notes. It is therefore difficult to predict whether, and if so, on what terms, the Resolution Authority will grant its prior permission for any early redemption or repurchase of the Notes.

Furthermore, even if the Issuer would be granted the prior permission of the Resolution Authority, any decision by the Issuer as to whether it will early redeem the subordinated Notes will be made at the absolute discretion of the Issuer with regard to external factors such as the economic and market impact of exercising an early redemption right, regulatory capital requirements and prevailing market conditions. The Issuer disclaims, and investors should therefore not expect, that the Issuer will exercise any early redemption right in relation to the subordinated Notes.

Holders of the subordinated Notes should therefore be aware that they may be required to bear the financial risks of an investment in the subordinated Notes until their final maturity.

Additional Risks in connection with senior Notes where eligible liabilities format is applicable

The qualification of the senior Notes where eligible liabilities format is applicable as MREL-eligible instruments is subject to uncertainty.

Senior Notes where eligible liabilities format is applicable are intended to be MREL-eligible instruments under the Recovery and Resolution Act. However, there is uncertainty regarding the final substance of applicable regulation and on how such regulation, once enacted, is to be interpreted and applied and it is unclear whether senior Notes where eligible liabilities format is applicable will be (or thereafter remain) MREL-eligible instruments.

As of the date of the Prospectus, no European laws or regulations have been adopted to align MREL with the TLAC concept as intended by the European Commission. However, the European Commission proposed directives and regulations (see also the risk factor "*New governmental or regulatory requirements and changes in perceived levels of adequate capitalisation and leverage could subject BCR to increased capital requirements or standards and require it to obtain additional capital or liquidity in the future.*") . While the Terms and Conditions of senior Notes where eligible liabilities format is applicable are intended to be consistent with the European Commission's proposals, these proposals have not yet been interpreted and when finally adopted, applicable regulation in this respect may be different from regulation set forth in these proposals.

Because of the uncertainty surrounding the substance of final regulation on MREL eligibility, it is unclear whether the senior Notes where eligible liabilities format is applicable will ultimately be MREL-eligible instruments. If for any reasons they are not MREL-eligible instruments or if they initially are MREL-eligible instruments and subsequently become ineligible, then the Issuer may be required to issue other capital instruments or eligible liabilities to fulfil its MREL (see also the risk factor "*The Issuer may not be able to meet the minimum requirement for own funds and eligible liabilities.*") and the senior Notes where eligible liabilities format is applicable may be redeemed by the Issuer, in accordance with the Terms and Conditions of the senior Notes where eligible liabilities format is applicable and applicable regulation (see also the risk factor "*Senior Notes where eligible liabilities format is applicable may be redeemed prior to maturity for regulatory reasons.*") .

Senior Notes where eligible liabilities format is applicable may be redeemed prior to maturity for regulatory reasons.

The Issuer may, at its option, redeem senior Notes where eligible liabilities format is applicable in whole, but not in part, at any time at their Early Redemption Amount, together with interest (if any) accrued to the date fixed for redemption (exclusive), if the senior Notes where eligible liabilities format is applicable are excluded from the liabilities eligible for MREL pursuant to the Recovery and Resolution Act on an unlimited and uncapped basis.

The early redemption of Notes which qualify as eligible liabilities may be subject in the future to the prior permission of the Resolution Authority. The proposals published by the European Commission provide that the redemption of eligible liabilities prior to the date of their contractual maturity is subject to the prior permission of the Competent Authority and/or the Resolution Authority. According to these

proposals (intended to be reflected under the Terms and Conditions of the senior Notes where eligible liabilities format is applicable), such consent will be given only if either of the following conditions are met:

- (i) on or before such redemption, the institution replaces the instruments with own funds or eligible liabilities instruments of equal or higher quality at terms that are sustainable for the income capacity of the institution; or
- (ii) the institution has demonstrated to the satisfaction of the Resolution Authority that the own funds and eligible liabilities of the institution would, following such redemption, exceed the requirements laid down in the CRR, the CRD IV and the BRRD by a margin that the Competent Authority and/or the Resolution Authority considers necessary.

It is not possible to predict whether or not senior Notes where eligible liabilities format is applicable will qualify as MREL-eligible instruments (see the risk factor "*The qualification of the senior Notes where eligible liabilities format is applicable as MREL-eligible instruments is subject to uncertainty.*") or if any further change in the laws or regulations of Romania or the European Union will occur and so lead to the circumstances in which the Issuer is able to elect to redeem the senior Notes where eligible liabilities format is applicable, and, if so, whether or not the Issuer will elect to exercise such option to redeem the senior Notes where eligible liabilities format is applicable or any prior consent of the Competent Authority and/or the Resolution Authority, if required, will be given. The Issuer may be expected to redeem senior Notes where eligible liabilities format is applicable on this basis, when its cost of borrowing is lower than the interest rate on the senior Notes where eligible liabilities format is applicable. At those times, an investor generally would not be able to reinvest the redemption proceeds at an effective interest rate as high as the interest rate on the senior Notes where eligible liabilities format is applicable being redeemed and may only be able to do so at a significantly lower rate. Potential investors should consider reinvestment risk in light of other investments available at that time. Early redemption features are also likely to limit the market price of the senior Notes where eligible liabilities format is applicable. During any period when the Issuer can redeem the senior Notes where eligible liabilities format is applicable, the market price of the senior Notes where eligible liabilities format is applicable generally will not rise substantially above the price at which they can be redeemed. This may also be true prior to any redemption period if the market believes that the senior Notes where eligible liabilities format is applicable may become eligible for redemption in the near term.

Senior Notes where eligible liabilities format is applicable and acceleration is not applicable provide for limited events of default.

Holders have no ability to accelerate the maturity of their senior Notes where eligible liabilities format is applicable and acceleration is not applicable. The Terms and Conditions of the senior Notes where eligible liabilities format is applicable and acceleration is not applicable do not provide for any events of default or right to demand for repayment, except that each Holder shall be entitled, if insolvency proceedings are commenced against assets of the Issuer, to file an application in such court demanding payment of all principal amounts due under the senior Notes where eligible liabilities format is applicable and acceleration is not applicable together with accrued interest and any additional amounts payable under the Terms and Conditions of the senior Notes where eligible liabilities format is applicable and acceleration is not applicable.

'Non-preferred' senior securities are new types of instruments for which there is no trading history.

To the Issuer's knowledge, Romanian financial institutions have not yet made any public offers of 'non-preferred' senior debt instruments. Accordingly, there is no trading history for securities of Romanian financial institutions with this ranking. Market participants, including credit rating agencies, are in the initial stages of evaluating the risks associated with 'non-preferred' senior liabilities. The credit ratings assigned to 'non-preferred' senior securities such as the senior Notes where eligible liabilities format and non-preferred senior status are applicable may change as the credit rating agencies refine their approaches, and the value of such securities may be particularly volatile as the market becomes more familiar with them. It is possible that, over time, the credit ratings and value of 'non-preferred' senior securities such as the senior Notes where eligible liabilities format and non-preferred senior status are applicable will be lower than those expected by investors at the time of issuance of the senior Notes where eligible liabilities format and non-preferred senior status are applicable. If so, Holders may incur losses in respect of their investments in senior Notes where eligible liabilities format and non-preferred senior status are applicable.

GENERAL DESCRIPTION OF THE PROGRAMME

The following description provides an overview of certain terms and conditions of the Notes and possible features of the Notes. Potential investors should note that information relating to a specific issue of Notes **that is not yet known at the date of this Prospectus**, including, but not limited to, the issue price, the date of the issue, the level of the interest rate (if any), the type of interest payable (if any), the maturity date and other details significantly affecting the economic assessment of the Notes is not contained in this section of the Prospectus but in the relevant Final Terms. **Consequently, the following description does not contain all information relating to the Notes. Any investment decision by an investor should therefore be made only on the basis of full information on the Issuer and on the Notes to be offered which is set out in this Prospectus, any supplement hereto and the relevant Final Terms for such Notes, which have to be read together with this Prospectus (including the relevant Terms and Conditions of the Notes).**

Capitalised terms used and not otherwise defined in this section "*General Description of the Programme*" shall have the respective meanings assigned to such terms in the section entitled "*Terms and Conditions of the Notes*". Under the Programme, and subject to any applicable legal or regulatory restrictions and requirements of relevant central banks, monetary or other authorities, the Issuer may from time to time issue Notes denominated in Euro ("EUR") or RON, which term refers to the legal currency of Romania) (each, a "**Specified Currency**").

The maximum aggregate principal amount of all Notes from time to time outstanding under the Programme will not exceed Euro 3,000,000,000 (or its equivalent in any other currency, calculated as described in the programme agreement dated 28 January 2019 and made between the Issuer and the Dealers (the "**Programme Agreement**") (the "**Programme Limit**"). The Issuer may increase the Programme Limit in accordance with the terms of the Programme Agreement and the provision of such conditions precedent (including the preparation of a supplement to this Prospectus or a new prospectus) as the Dealers or the relevant competent authority may require for the purpose of listing any Notes to be issued under the increased Programme on the regulated market of a stock exchange located in a Member State of the EEA.

The Notes may be issued on a continuous basis and placed either directly by the Issuer or by one or more of the Dealers specified on the cover page of this Prospectus and any additional Dealer appointed under the Programme from time to time by the Issuer, which appointment may be for a specific issue or on an ongoing basis (each a "**Dealer**" and, together, the "**Dealers**"). References in this Prospectus to the "**relevant Dealer**" shall, in the case of an issue of Notes being (or intended to be) subscribed by one Dealer only, refer to such Dealer and, in the case of an issue of Notes being (or intended to be) subscribed by more than one Dealer, to all Dealers agreeing to subscribe such Notes.

The Notes will be issued in any denomination, save that the minimum denomination of any Notes will be Euro 1,000 or its foreign currency equivalent on the relevant date of issue or such amount as may be allowed or required from time to time by the relevant central bank (or equivalent body) or any laws or regulations applicable to the relevant Specified Currency. In the following, Notes with a minimum denomination of at least Euro 100,000 or its foreign currency equivalent will be referred to as "**Wholesale Notes**".

Notes may, subject to certain selling restrictions, be distributed by way of public offers or private placements and, in each case, either directly by the Issuer or on a syndicated or non-syndicated basis. The Issuer may offer Notes to all types of investors, including eligible counterparties, professional clients and retail clients using all available distribution channels taking into account requirements to conduct an appropriateness test (if applicable) (all as more fully set out/described in MiFID II and the MiFID II Product Governance Rules) in any jurisdiction where the legal and further requirements for offering securities are fulfilled. If offers are being made simultaneously in the markets of two or more countries, the Issuer generally does not reserve any tranches of Notes for certain of these.

Under the Programme, the Issuer may issue Notes which bear (i) a fixed rate income throughout their entire term (the "**Fixed Rate Notes**"), (ii) floating rate income throughout their entire term determined on the basis of a reference interest rate or a reference rate (the "**Floating Rate Notes**"), (iii) a fixed rate income followed by (a) another fixed rate income, which shall be determined on the basis of a reference rate (the "**Fixed to Fixed Rate Notes**"), or (b) a floating rate income, which shall be determined on the basis of a reference interest rate or a reference rate (the "**Fixed to Floating Rate Notes**"), or (iv) without periodic interest payments ("**Zero Coupon Notes**"). The International Notes are governed by Austrian law and the Domestic Notes are governed by Romanian law.

International Notes will be issued in bearer form and Domestic Notes will be issued in registered form. The Notes will be issued as (i) senior notes where eligible liabilities format is not applicable; (ii) senior notes where eligible liabilities format is applicable and non-preferred senior status is not applicable; (iii) senior notes where eligible liabilities format and non-preferred senior status are applicable; and (iv) subordinated notes.

International Notes will and Domestic Notes may be issued in tranches (each a "**Tranche**"), each Tranche consisting of Notes which are identical in all respects. One or more Tranches, which are expressed to be consolidated and form a single series and are identical in all respects except that (i) International Notes may have different issue dates, issue prices, interest commencement dates and dates for first interest payments (if any) and (ii) Domestic Notes may have different issue dates only, shall form a series (the "**Series**") of Notes. Further tranches of Notes may be issued as part of existing Series of Notes.

The terms and conditions applicable to each Tranche of Notes (the "**Conditions**") will be set out in a document specific to such Tranche referred to as the Final Terms, a form of which is set out in this Prospectus. Each set of Final Terms prepared in connection with Notes that are publicly offered or admitted to trading on a Market will be available, during usual business hours on any weekday (Saturdays, Sundays and public holidays excepted), for inspection at the registered office of the Issuer and the specified offices of the Paying Agents.

Notes may be issued at an issue price which is at par or at a discount to, or premium over, par (as specified in the relevant Final Terms). The issue price and the amount of the relevant Notes will be determined before filing of the relevant Final Terms of each Tranche, based on then prevailing market conditions. Where for a particular Tranche the issue price or aggregate principal amount are not fixed at the time of issue, the Final Terms shall describe the procedures for calculation and publication of such information.

Application may be made for the Programme and/or the Notes to be admitted to the Austrian Market of the Vienna Stock Exchange (*Wiener Börse*). Application may also be made to admit such Notes to trading on the Romanian Market of the BVB (*Bursa de Valori Bucureşti S.A.*). Notes to be issued under the Programme may also be included in a multilateral trading facility of BVB or the Vienna Stock Exchange or may not be listed at all.

Notes will be accepted for clearing through the Clearing System as specified in the applicable Final Terms. The Clearing System for Domestic Notes is operated by the Romanian Central Depository. For International Notes, the Clearing System is operated by OeKB. If the Notes are intended to be held in a manner which would allow Eurosystem eligibility, the International Notes will be deposited upon issue as a classical global note with OeKB. Depositing the Notes in a manner which would allow Eurosystem eligibility does not necessarily mean that the Notes will be recognised as eligible collateral for Eurosystem monetary policy and intra-day credit operations by the Eurosystem either upon issue or at any or all times during their life. Such recognition will depend upon satisfaction of the Eurosystem eligibility criteria.

The Notes will be freely transferable in accordance with the applicable provisions of the relevant Clearing System.

In general, and unless specified otherwise in the relevant Final Terms, Erste Group Bank AG, Am Belvedere 1, 1100 Vienna, Austria will act as fiscal agent and principal paying agent (the "**Fiscal Agent**") in relation to International Notes and Banca Comercială Română S.A., 15 Calea Victoriei, 030023 Bucharest 3, Romania will act as principal paying agent (the "**Principal Paying Agent**") in relation to Domestic Notes.

Option IV - Terms and Conditions for Notes without periodic interest payments.

Documentation of the Conditions

The Issuer shall document the Conditions in any of the following ways:

- The Final Terms shall determine whether Option I, Option II, Option III or Option IV and whether certain further options contained in Option I, Option II, Option III or Option IV shall be applicable to the individual issue of Notes by replicating the relevant provisions of, and completing the relevant placeholders set out in, Option I, Option II, Option III or Option IV in the Final Terms. The replicated and completed provisions of the set of Terms and Conditions alone shall constitute the Conditions (the "**Integrated Conditions**"). The Issuer shall document the Conditions in this way if the Notes shall be publicly offered, in whole or in part, or initially distributed, in whole or in part, to non-qualified investors. In case of International Notes, the Integrated Conditions shall be attached to each global note representing the Notes of the relevant Tranche. In case of Domestic Notes, the Final Terms containing the Integrated Conditions will be made available by publication on the website of BVB (www.bvb.ro) and on the website of the Issuer (www.bcr.ro) and will be obtainable free of charge during usual business hours on any weekday (Saturdays, Sundays and public holidays excepted) at the registered office of the Issuer.
- Alternatively, the Final Terms shall determine whether Option I, Option II, Option III or Option IV and whether certain further options contained in Option I, Option II, Option III or Option IV shall be applicable to the individual issue of Notes by only making reference to the specific sections of the relevant set of Terms and Conditions. The Final Terms and the relevant set of Terms and Conditions (the "**Long-form Conditions**"), taken together, shall constitute the Conditions. In case of International Notes, the Final Terms and the Long-form Conditions shall be attached to each global note representing the Notes of the relevant Tranche. In case of Domestic Notes, the Final Terms and the Long-form Conditions will be obtainable free of charge during usual business hours on any weekday (Saturdays, Sundays and public holidays excepted) at the registered office of the Issuer and, in case the Domestic Notes are admitted to trading on the Romanian Market operated by BVB, will be made available by publication on the website of BVB (www.bvb.ro).

Determination of Options / Completion of Placeholders

The Final Terms shall determine whether Option I, Option II, Option III or Option IV shall be applicable to the individual issue of Notes. Each set of Terms and Conditions constituting Option I, Option II, Option III or Option IV contains certain further options (indicated by instructions and explanatory notes set out in square brackets within the text of the relevant Option) as well as placeholders (characterised by square brackets which include the relevant items) which shall be determined by the Final Terms as follows:

Determination of Options

The Issuer shall determine which options shall be applicable to the individual issue of Notes by either replicating the relevant provisions in the Final Terms or by making reference in the Final Terms to the relevant sections of the relevant set of Terms and Conditions. If the Final Terms do not replicate or make reference to an alternative or optional provision (as set out in the relevant set of Terms and Conditions) such provision shall be deemed to have been deleted from the Conditions.

Completion of Placeholders

The Final Terms shall specify the information completing the placeholders in the relevant set of Terms and Conditions. In case the provisions of the Final Terms and the relevant set of Terms and Conditions, taken together, shall constitute the Conditions the relevant set of Terms and Conditions shall be deemed to have been completed by the information contained in the Final Terms as if such information were inserted in the placeholders of such provisions.

In that case, all instructions and explanatory notes and text set out in square brackets in the relevant set of Terms and Conditions and any footnotes and explanatory text set out in the Final Terms shall be deemed to have been deleted from the Conditions.

- Produkt aus (x) der Anzahl der Kalendertage in der Variablen Feststellungsperiode und (y) der Anzahl der Variablen Feststellungstermine (wie nachstehend angegeben) in einem Kalenderjahr; oder
2. falls der Variable Zinsberechnungszeitraum länger ist als die Variable Feststellungsperiode, in die das Ende des Variablen Zinsberechnungszeitraums fällt, die Summe aus

Kalendertag eines Monats, während der erste Kalendertag des Variablen Zinsberechnungszeitraums weder auf den 30. noch auf den 31. Ein Ersatz-Referenz[zins]satz gilt ab dem vom Unabhängigen Berater oder von [der] [Emittentin] [Berechnungsstelle] [●] (je nachdem) im billigen Ermessen bestimmten Feststellungstag (einschließlich), frühestens jedoch ab dem Feststellungstag, der mit dem Benchmark-Ereignis zusammenfällt oder auf dieses folgt, erstmals mit Wirkung für die Zinsperiode, für die an diesem Feststellungstag der Zinssatz festgelegt wird. Der "Ersatz-Referenz[zins]satz" ist ein Satz (ausgedrückt als Prozentsatz *per annum*), der sich aus einem vom Unabhängigen Berater oder von [der] [Emittentin] [Berechnungsstelle] [●] (je nachdem) im billigen Ermessen festgelegten Alternativ-Referenz[zins]satz (der "Alternativ-Referenz[zins]satz"), der von einem Dritten bereitgestellt wird und der alle anwendbaren rechtlichen Voraussetzungen erfüllt, um ihn zur Bestimmung von Zahlungsverpflichtungen aus den Schuldverschreibungen zu verwenden, mit den vom Unabhängigen Berater oder von [der] [Emittentin] [Berechnungsstelle] [●] (je nachdem) im billigen Ermessen gegebenenfalls bestimmten Anpassungen (z.B. in Form von Auf- oder Abschlägen) ergibt.

Bestimmt der Unabhängige Berater oder [die] [Emittentin] [Berechnungsstelle] [●] (je nachdem) einen Ersatz-Referenz[zins]satz, so besteht auch das Recht, nach billigem Ermessen diejenigen verfahrensmäßigen Festlegungen in Bezug auf die Bestimmung des aktuellen Ersatz-Referenz[zins]satzes (z.B. The "**Substitute Reference [Interest] Rate**" shall be a rate (expressed as a percentage rate *per annum*) which corresponds to an alternative reference [interest] rate (the "**Alternative Reference [Interest] Rate**") provided by a third party and meeting any applicable legal requirements for being used for determining the payment obligations under the Notes determined by the Independent Advisor or [the] [Issuer] [Calculation Agent] [●] (as the case may be) in its due discretion, as modified by applying the adjustments (e.g. in the form of premiums or discounts), if any, that may be determined by the Independent Advisor or [the] [Issuer] [Calculation Agent] [●] (as the case may be) in its due discretion.

Notwithstanding the generality of the foregoing, the Issuer may in particular, but without limitation implement an Official Substitution Concept, an Industry Solution or a Generally Accepted Market Practise.

If the Independent Advisor or [the] [Issuer] [Calculation Agent] [●] (as the case may be) determines a Substitute Reference [Interest] Rate, it shall also be entitled to make, in its due discretion, any such procedural determinations relating to the determination of the current Substitute Reference [Interest] Rate (e.g. the determination day, the relevant time, the relevant screen page for obtaining the Alternative Reference [Interest] Rate and the fallback provisions in the event that the relevant screen page is not available) and to make such adjustments to the definition of "Business Day" in § 1 and the business day convention provisions in

- (c) the applicability of any law or any other legal provision, or of any administrative or judicial order, decree or other binding measure, pursuant to which the Reference [Interest] Rate may no longer be used as a reference rate to determine the payment obligations under the Notes, or pursuant to which any such use is subject to not only immaterial restrictions or adverse consequences.

The Holders irrevocably agree that the Issuer may, on any relevant interest payment date, by giving at least 30 days' notice in accordance with § [11] and any applicable legal provisions and on or after the date on which (i) Romania has introduced Euro as its legal currency (as provided in the Treaty on the Functioning of the European Union, as amended from time to time (the "Treaty")) or (ii) events have occurred which have substantially the same effects, redenominate all, but not some only, of the Notes into Euro and adjust the aggregate principal amount and the Specified Denomination of the Notes accordingly, as described below. The date on which such redenomination becomes effective shall be referred to in this § 4 as the "**Redenomination Date**".

The redenomination of the Notes shall be made by converting the Specified Denomination of each Note from RON into Euro using the applicable RON/Euro conversion mechanism established by the Council of the European Union and the European Parliament pursuant to Article 133 of the Treaty and, unless otherwise provided under the above-mentioned conversion mechanism, rounding the resultant figure to the nearest Euro 0.01 (with Euro 0.005 being rounded upwards). Unless otherwise provided under the above-mentioned conversion mechanism and if the Issuer so elects, the figure resulting from conversion of the Specified Denomination of each Note using the applicable RON/Euro conversion rate shall be rounded down to the nearest Euro. The specified denomination of the Notes in Euro so determined shall be notified to the Holders in accordance with § [11] and any applicable legal provisions. Any balance remaining from the redenomination with a denomination higher than Euro 0.01 shall be paid by way of cash adjustment rounded to the nearest Euro 0.01 (with Euro 0.005 being rounded upwards). Such cash adjustment will be payable in Euro on the Redenomination Date in the manner notified to the Holders by the Issuer.

Upon redenomination of the Notes, any reference in these Terms and Conditions to RON shall be construed as a reference to Euro.

(1) *Amendment of the Terms and Conditions.* In accordance with subsequent provisions the Holders may agree with the Issuer on amendments of these Terms and Conditions by resolution with the majority specified below. Majority resolutions of the Holders shall be binding on all Holders alike. A majority resolution of the Holders which does not provide for identical conditions for all Holders is void, unless Holders who are disadvantaged have expressly consented to their being treated disadvantageously.

(2) *Powers of the Holders' Meeting.* A Holders' meeting legally assembled may:

(a) appoint one Joint Representative (as defined below) of the Holders and one or more substitute Joint Representatives, having the right to represent the Holders in relation to the Issuer and in front of courts of law;

(b) carry out all acts for the supervision and the protection of the common interests of the Holders or to authorise a representative to carry out such acts;

(c) create a fund out of *inter alia* amounts representing the interest amounts to which the Holders are entitled, that will be used to cover the expenses incurred in connection with the protection of their rights, and establish the rules for the management of such fund;

(d) oppose or consent to any amendments to the Issuer's articles of association ("AoAs") or to these Terms and Conditions which may affect the rights of the Holders; and

For Notes admitted to trading on the spot regulated market or an alternative trading system operated by Bursa de Valori Bucureşti S.A., the convening notice shall also comply with the minimum content requirements set out in the regulations issued by the regulatory authority. The convening notice for the meeting shall be (i) published in the Official Gazette and in a newspaper of general circulation in Bucharest or (ii) served through registered mail at the addresses indicated in the Holders' Registry, in either case at least 30 calendar days prior to the date on which the meeting is scheduled to take place. The convening notice shall also be posted on the Issuer's website (www.bcr.ro) for convenience only. This provision is without prejudice to any applicable capital markets laws publication requirements.

(5) *Convening Period, Entitlement to Attend and Vote.* The Holders' meeting shall be called by publication in accordance with paragraph (4) above at least 30 calendar days before the date of the meeting. The Holders registered in the Holders' Registry on the Meeting Reference Date are entitled to participate and vote in the Holders' meeting. The Holders' meeting may be validly held without the observance of the convening formalities, if the Holders representing the entire issued and outstanding principal amount of the Notes are present or represented at the meeting and none of them opposes to the waiver of the convening formalities.

(6) *Agenda.* The convening party shall propose the agenda of the meeting that will include explicitly all items on which the Holders' meeting is to pass a resolution. One or more Holders who hold at least 5 per cent. of the issued and outstanding principal amount of the Notes may request that new items are added to the agenda of the Holders' meeting within 15 calendar days as of the date when the convening notice was published in the required manner. The convening notice containing the agenda updated with the new items must be published at least 10 calendar days prior to the Holders' meeting.

(7) *Registration of Holders for the Meeting.* The Issuer shall appoint from among the Issuer's employees one or more technical secretaries of the meeting who will register the Holders participating in the meeting and will draw up the list of the Holders' attendance that shall include the Holders' names, their registered offices or places of residence and the number of voting rights represented by each Holder and percentage of the issued and outstanding principal amount of the Notes represented by the Notes held by each Holder. The technical secretary shall also draw up and sign minutes attesting: (i) the total number of Notes issued and outstanding that have been registered to attend the meeting and the percentage thereof in the issued and outstanding principal amount of the Notes and (ii) fulfilment of all requirements imposed by law for the valid holding of the Holders' meeting. Voting rights are suspended with respect to the Notes attributable to the Issuer or any of its Subsidiaries or held for the account of the Issuer or any of its Subsidiaries. The Issuer may not make available Notes for which the voting rights have been suspended to any third party for the purposes of exercising the voting rights in lieu of the Issuer. This shall also apply to any Subsidiaries of the Issuer. Exercise of voting rights for the purposes specified above are prohibited. It is prohibited to offer, promise or grant any advantage as consideration to any person entitled to vote not to vote, or to vote in a particular way, in a Holders' meeting or a vote. The minutes shall be signed by the secretary of the meeting, if one was appointed by the Holders' meeting, and by the Chairperson.

(13) *Publication of Resolutions.* Upon request, each Holder will be informed about the result of the votes for the resolutions passed by a Holders'

meeting. Furthermore, the Issuer shall publish the resolutions passed by the Holders in appropriate form and at its own expense. The resolutions shall be published without undue delay pursuant to § [11]. In addition, for a period of at least one month commencing on the calendar day following the Holders' meeting, the Issuer shall make available to the public on its website (www.bcr.ro) the resolutions passed by the Holders and, if these Terms and Conditions are amended by a Holders' resolution, the wording of the original Terms and Conditions. The Chairperson shall inform the Issuer in writing about the resolutions passed by the Holders' meeting within 3 calendar days as of the date when such resolutions have been passed.

(14) *Implementation of Resolutions.* The resolutions validly adopted by the Holders' meeting shall be binding upon all Holders, including upon Holders who were not present at the meeting or who voted against the resolutions so adopted.

BANCA COMERCIALĂ ROMÂNĂ S.A.

Introduction

The legal name of the Issuer is Banca Comercială Română S.A.. The Issuer also operates under the commercial name "BCR". The Issuer is a joint stock company with a two-tier board system, is incorporated and domiciled in Romania, has its registered office and principal place of business at 15 Calea Victoriei, 030023 Bucharest district 3, Romania (telephone number: +40 21 3126185), is registered at the Bucharest Trade Registry Office under registration number J40/90/1991 and its sole registration code (*cod unic de înregistrare*) is 361757. BCR operates under Romanian law.

BCR was established on 1 December 1990 as a state owned joint stock company pursuant to Government Resolution no. 1195/1990 concerning the establishment of Banca Comercială Română S.A. (*Hotărârea Guvernului nr. 1195/1990 privind organizarea Băncii Comerciale Române-S.A.*).

In 1991, as part of the overall reform of the Romanian banking system, the commercial banking activities of the NBR were transferred to BCR. On 10 September 1999, the Romanian Bank for Foreign Trade (*Banca Română de Comerț Exterior – Bancorex – S.A.*) ("Bancorex"), which was placed under special administration, was merged by absorption into BCR. As part of the merger, Bancorex's liabilities and most of its assets (in each case, provided they satisfied BCR's risk management policies) were transferred to BCR, and the Romanian Government set up an indemnity scheme (subject to certain conditions) in respect of Bancorex's material liabilities, including those claims against Bancorex which were the subject of litigation. As part of the merger, BCR also took over many of Bancorex's employees.

In 2004, the length of the Issuer's life was extended from 99 years to an indefinite period of time.

In 2005, as a result of the privatisation process of BCR organised by the Romanian Government, Erste Bank der österreichischen Sparkassen AG ("Erste Bank") purchased 490,399,321 nominative shares with a face value of RON 1.3 per share or 61.8825 per cent. of the share capital of BCR from the Authority for State Assets Recovery (*Autoritatea pentru Valorificarea Activelor Statului*) ("AVAS"), the EBRD and the International Finance Corporation ("IFC"), pursuant to a share purchase agreement dated 21 December 2005, for a total consideration of EUR3.75 billion. On 14 October 2009, Erste Bank transferred its participation in BCR (i.e. 549,230,910 nominative shares representing 69.3063 per cent. of BCR's share capital) to EGB Ceps Holding GmbH, a wholly owned indirect subsidiary of Erste Bank.

In April 2011, BCR's general shareholders meeting approved the change of the face value of BCR shares from RON 1.3 to RON 0.1 per share. As a result of several subsequent share capital increases, BCR's share capital has been increased to RON 16,253,416,145.

In 2011, EGB Ceps Holding GmbH acquired shares from both, private individuals and SIFs (i.e. the Romanian special financial investment companies). As a result of this transaction and of the 2011 share capital increase operations, EGB Ceps Holding GmbH's participation in BCR increased to 89.1295 per cent.

As a result of finalizing the two step merger process between (i) EGB Ceps Holding GmbH which merged into EGB Ceps Beteiligungen GmbH and (ii) EGB Ceps Beteiligungen GmbH which merged into Erste Group Bank AG, and following the fulfilment of the publication requirements in relation to the merger process on 25 March 2015 with the Austrian companies register, Erste Group Bank AG became a direct shareholder of BCR.

In November 2016, BCR's extraordinary general shareholders meeting approved the merger by absorption of BCR as an absorbing company with BCR Real Estate Management SRL and Bucharest Financial Plaza SRL as absorbed companies and the increase of the share capital of BCR with the amount of RON 10.9 by issuing 109 shares with a nominal value of RON 0.1 each. These shares were acquired by the minority shareholder of BCR Real Estate Management, respectively BCR Leasing IFN SA. As a result, as at the date of this Prospectus, the subscribed and paid-up share capital of BCR is of RON 1,625,341,625.40 divided into 16,253,416,254 nominative shares each with a value of RON 0.1.

As at the date of this Prospectus, Erste Group Bank AG holds 16,233,523,442 nominative shares representing 99.8776 per cent. of BCR's share capital. Please refer to section "*Shareholders of BCR*" for further information on BCR's shareholding structure.

BCR is licensed by the NBR to conduct banking activities.

BCR aims to create an omni-channel experience, where branches still will play a key role in advisory activities in medium term. Micro customers are served by advisors, complemented by digital offering.

Following 2017, BCR continued its organic growth, with an emphasis being laid on digitization and simplification of processes, together with the relevant risk management, which is reflected by the Bank's profitability in the year 2017. By releasing also in October 2018 the new digital platform of Erste Group (George), BCR aims to capitalize on the main benefits: brand equity, customer advocacy and competitive differentiation.

In April 2018, BCR outlined a 3-years strategy to build on the core strengths of its business model and client franchise.

The implementation of these strategies depends on various factors and uncertainties, including those described in the section "Risk Factors" in this Prospectus.

(GSM)), investment and savings products, consulting and sale of financial market and treasury products to private banking customers.

- SMEs as well as large corporations: BCR offers customised products, specialised programmes and consulting for SMEs, large corporations as well as micro entrepreneurs.
- Municipalities, public and non-profit sector: Due to its historically strong relationship with local municipalities as well as with the public and non-profit sector, BCR offers relevant financial solutions (including special financing for national, regional and municipal infrastructure projects).

The Group also offers many other financial products and services, such as leasing, asset management, real estate services and financial consultancy services.

In terms of developments in the area of card-related business, BCR has implemented an improved card-related system, based on improved functionalities and on centralised automated teller machine ("ATM") and point of sale ("POS") networks. As at 30 June 2018, BCR had a network of over 2,000 ATMs and around 15,000 POS terminals, while providing to its customers comprehensive electronic banking services, including internet banking, mobile banking, phone banking and e-commerce services.

Since the summer of 2009, mortgage lending has been supported by the Romanian Government through the "Prima Casa" (First Home) Programme (the "**Prima Casa Programme**"). This is a loan scheme, under which the Romanian Government is guaranteeing each year mortgages up to a certain capped guarantee amount (40 or 50 per cent. of the loan amount) for first time buyers of residential houses. As at 30 September 2018, BCR has a 34.28 per cent. share in the total loans granted by local credit institutions under the Prima Casa Programme (based on the aggregate data released to BCR by the National Credit Guarantee Fund for Small and Medium Enterprises).

The Prima Casa Programme is currently in its ninth stage and a very important enacted amendment to the legislation governing the programme limits the currency in which the loans may be granted only to the local currency RON as of August 2013. BCR has adapted to this change, as already during the fifth stage of the programme BCR granted loans under the programme only in local currency RON due to its strategy for secured loans. Another important enacted amendment to the legislation governing the Prima Casa Programme takes into account the percentage of state guarantee relating to the age of the purchased dwelling (40 per cent. for dwellings older than five years and 50 per cent. for dwellings newer than five years at the date of the loan request).

BCR is one of the main lenders of the Romanian municipalities with a market share as at 30 September 2018 of 29.30 per cent.¹, providing specific products, services and expertise relating to public sector projects, social infrastructure (i.e. roads, waste and sewage) through a specialized team ensuring national coverage.

In the commercial real estate segment, BCR has a conservative approach focusing on upscale offices and logistics projects.

BCR is involved in the financing business under the European Union (the "**EU**") funding programmes that allow Romania to access, during EU post-accession period 2007-2013 and 2014-2020, funds amounting to approximately EUR65 billion as structural, cohesion and agriculture funds.² In terms of co-financing projects with EU funds, the total loans granted amount to more than EUR 1.8 billion. In order to tap the opportunities offered in this field, BCR has established a countrywide presence, with financing specialists located in all development regions of Romania. For this specific sector, BCR offers relevant products and services: co-financing of eligible and non-eligible project costs, bridge financing for pre-financing the grant, bank guarantees for grant advances, trade finance products, special accounts for the project, financial instruments, products with financing/guarantees from international financial institutions (EIF, EBRD, EIB, IFC, etc.), and assistance to clients during the entire life of the project.

On the treasury and investment banking side, in addition to raising funds from the capital markets (either through bond issues or structured transactions), BCR offers to its clients:

- syndicated loans (to commercial companies or banks) on the international and domestic markets;
- debt and equity finance transactions (origination, execution, securities sales);

The 2017 audited BCR consolidated and separate financial statements (the Group and BCR) (the "**Audited IFRS-EU Financial Statements 2017**") and the 2016 audited BCR consolidated and separate financial statements (the Group and BCR) (the "**Audited IFRS-EU Financial Statements 2016**") are incorporated by reference in this Prospectus.

In comparison to the presentation of the Audited IFRS-EU Financial Statements 2016, the following changes have been made in the presentation of the 2017 financial statements of the Group:

- Repurchase agreements (Repo) positions have been disclosed separately on the face of the Balance Sheet i.e. a "of which" line will be added for the balance sheet positions impacted (i.e. placements with credit institutions).
- Interest income/interest expense and fee income/fee expense have been disclosed separately on the face of the Profit and Loss account (instead of the previous net presentation, i.e. net interest income and respectively net fees and commissions).

Interim and Other Financial Information

The unaudited interim condensed consolidated and separate financial statements (the Group and BCR) (the "**Unaudited Interim IFRS-EU Financial Statements as at 30 June 2018**") are incorporated by reference in this Prospectus. The Unaudited Interim IFRS-EU Financial Statements as at 30 June 2018 have not been audited or reviewed.

The interim consolidated financial results prepared in accordance with IFRS-EU of BCR (the Group and BCR) as of and for the first nine months of 2018 ending on 30 September 2018 are incorporated in this Prospectus by reference and have not been audited or reviewed.

On 21 August 2018, the Group published the Unaudited Interim IFRS-EU Financial Statements as at 30 June 2018, which were prepared in accordance with IFRS 9. IFRS 9 introduces a new impairment model based on the concept of "expected credit losses", changes to the rules of classification and measurement of financial instruments (particularly of financial assets) as well as a new approach towards hedge accounting. The Group has utilised the provisions of IFRS 9 that permit exemption from the obligation to transform comparative data for prior periods in relation to changes resulting from classification, measurement and impairment. The Group also introduced changes to the financial statements to adjust the presentation of financial data to reflect the new categories introduced by IFRS 9.

As at 1 January 2018, differences in the carrying amount of financial assets and liabilities resulting from the application of IFRS 9 were recognised as a part of undistributed financial result from previous years and other components of equity in the Group's equity. As a result the Group's total equity as of 1 January 2018 decreased by RON 51.2 million.

Recent developments, trends and changes in the financial position of the Group

According to the National Institute of Statistics ("INS")¹, the real GDP increased by 4.3 per cent. year on year in the third quarter of 2018 driven by household consumption and change in inventories. Gross fixed capital formation was weak because public investments in infrastructure were pressured by limited budgetary resources available for new investment projects. Net exports contributed negatively to the growth of real GDP in the third quarter of 2018 as imports of goods and services grew much faster than exports.

The inflation rate was 3.4 per cent. year on year in November 2018 according to the INS² and entered the NBR target. Fresh fruits, vegetables and also fuels were cheaper in November 2018 compared with the previous month, while the Romanian leu remained stable in the market, contributing to a decline in the inflation rate. Core inflation which is closely followed by the NBR was also on a downward trend in the autumn of 2018, removing the pressure on the NBR to increase rates.

Cumulative budget deficit was 2.2 per cent. of GDP in the first ten months of 2018 according to the monthly budget execution data presented by the Romanian Ministry of Finance³. Public expenditures increased more rapidly than revenues due to the wage and pension rises carried out by the Romanian Government. Capital expenditures were on the rise, but a large part of this increase was explained by the acquisition of modern military equipment. In the first ten months of 2018, the revenue side of the Romanian state budget benefitted from special dividends distributed by state-owned companies in the energy sector based on previous years' profits, but even in these circumstances the budget deficit increased.

On 31 August 2018, Standard & Poor's ("S&P") affirmed Romania's rating at "BBB-" with stable outlook. The stable outlook reflects S&P's opinion that although Romanian politics remains turbulent and is becoming increasingly interventionist, existing checks and balances will still be robust enough to withstand political attempts to interfere in the independence of institutions. In addition, while S&P foresees that twin deficits will remain elevated as a result of the government's pro-cyclical fiscal stance, it expects that general government and external debt will increase only gradually over the next two years, barring a major economic slowdown. In November 2018, Fitch maintained Romania's credit rating at 'BBB-' with stable outlook, but noted that there was a limit in how much the Romanian Government could squeeze capital expenditure and rely on ad-hoc fiscal measures for keeping the budget afloat. Romania's investment grade rating is supported by its moderate level of public debt, while rising budget and current account deficits were seen as vulnerabilities by the credit rating agency.

Asset quality in the banking sector improved significantly following the start of the NPLs reduction process in 2014. As a result of consistent efforts from banks to clean-up balance sheets, the NPL ratio (EBA methodology) fell to 5.6 per cent. as of September 2018. The NPL clean-up progress also paved the way for enhanced profitability: the banking sector reported a return on equity of 16.4 per cent. as of September 2018, the highest level since 2008, due to higher market interest rates and loan volumes, as well as very low underlying risk costs.

The non-governmental gross loan stock was up 6.8 per cent. in October 2018 as compared with October 2017, due to a +9.6 per cent. year on year increase in retail lending primarily.

No severe systemic risks regarding the financial sector were identified by the NBR as of December 2018 (NBR Financial Stability Report, December 2018 Issue). However, some macro prudential measures meant to curb excessive retail lending will come into force starting 2019, as the regulator sees vulnerabilities accumulating for lower income debtors.

As further described in section "*Banca Comercială Română S.A. – Historical Financial Information*" the presentation of the Audited IFRS-EU Financial Statements 2017 of the Group differs in certain positions from the presentation of the Audited IFRS-EU Financial Statements 2016.

Since 31 December 2017, the date of its last published audited financial statements, there has been no material adverse change in the prospects of the Bank.

Since 30 September 2018, the end of the last financial period for which interim financial information has been published, there has been no significant change in the financial position of the Group.

There are no recent events particular to the Issuer that are to a material extent relevant to the evaluation of the Issuer's solvency.

Legal Proceedings

Apart from the proceedings described below, during the previous 12 months preceding the date of this Prospectus BCR has been involved in one case of arbitration proceedings in connection with the joint venture agreement concluded between BFP Bucharest Financial Plaza ("BFP") and Bucharest Municipality having as object the construction and exploitation by BFP of a building on the land plot owed by Bucharest Municipality in Bucharest, 15 Calea Victoriei, 3rd District.

In 1993, Bucharest Municipality and Bouygues Romania SRL entered into a joint venture agreement having as object the construction and exploitation by Bouygues Romania SRL of a building on the land plot owed by Bucharest Municipality in Bucharest, at 15 Calea Victoriei, 3rd District. In 1994, BFP took over all Bouygues Romania SRL's rights and duties arising from the joint venture agreement. BFP undertook the duty to pay Bucharest Municipality an annual quota from the total generated net income, which under any circumstances could be less than 1/25 out of the definitive value of the land plot. Starting with 2001, there have been some disagreements between BFP and Bucharest Municipality between the amounts due by BFP to Bucharest Municipality, which lead to several claims filed by Bucharest Municipality against BFP.

In order to settle all the existing litigations with Bucharest Municipality and to transfer of the ownership right over a building (the "**Lipscani Building**") located in Bucharest, 18-20 Lipscani street, Bucharest 3 to Bucharest Municipality, on 4 December 2013, BFP and Bucharest Municipality entered into:

- a settlement agreement involving, among others, the termination of the joint venture agreement concluded on 1 September 1993;
- an exchange agreement having as object the transfer of the ownership right over the land located in Bucharest, 15 Calea Victoriei (land under BFP Building) from Bucharest Municipality to BCR and the ownership right over Lipscani Building from BCR to Bucharest Municipality.

Pursuant to the settlement agreement, Bucharest Municipality waived all present and future claims against BFP under the joint venture agreement.

However, starting with an inspection performed by the Court of Accounts at Bucharest Municipality in 2014, followed by an inspection at BFP of the National Agency for Fiscal Administration notified by the Court of Accounts, related to the execution of the joint venture agreement, the issue was reopened.

In December 2016, BFP received an arbitration request submitted by Bucharest Municipality at the International Chamber of Commerce in Paris for a total value of RON 72.5 million, comprised of RON 15,458,507 representing the main debt and the difference of duly owed quota under the joint venture agreement for the period 2001-2013 and RON 57,029,409 representing surcharges for late payment related to the main claim, calculated until 5 September 2016.

In May 2017, Bucharest Municipality increased the initial claims based on different scenarios to be taken into consideration by the arbitration court depending on different legal grounds applicable for computing the interest, as follows:

- RON 78,718,187 – penalties and deferred interest according to the legal provisions of Law no. 76/1992 on measures for repayment of credits resulting from the action of clearing, payments to businesses, preventing the failure of payment and financial deadlock; or
- RON 8,656,712 – legal interest calculated until 5 September 2016 under the Civil Code of 1864; or
- RON 8,656,712 – legal interest calculated until 5 September 2016 as per Decree no. 311/1954 regarding the legal interest set-up.

Currently, the proceedings are within the phase related to submitting evidences asked by the Burcharest Municipality to be provided by BFP.

As a direct consequence of the merger by absorption process between BCR as absorbing company and BCR Real Estate Management SRL and Bucharest Financial Plaza SRL as absorbed companies, BCR became a part of the arbitration proceedings due to the fact that pursuant to the merger, all the rights and obligations of the absorbed companies were taken over by BCR.

Apart from the proceeding already described, BCR is not involved in any governmental, legal or arbitration proceedings (including any such proceedings which are pending or threatened of which BCR is aware) which may have, or have had in the recent past, significant effects on BCR and/or the Group's financial positions or profitability.

Consumer protection claims

The Bank is involved in legal disputes, most of which have arisen in the course of its ordinary banking business, including consumer protection claims filed by individual customers, regulatory authorities or consumer protection agencies and associations, mainly relating to allegations that certain contractual provisions, particularly in respect of consumer loans, violate mandatory consumer protection laws and regulations. The allegations relate to the enforceability of certain fees as well as of contractual provisions for the adjustment of interest rates and currencies.

Historical liabilities

When Bancorex merged with BCR in 1999 (please see subsection entitled "*Description of Banca Comercială Română S.A. – Introduction*" above), the losses and liabilities of Bancorex were transferred to BCR, alongside its assets, based on two government ordinances⁷. According to these government ordinances:

- (a) Bancorex' net losses (after carrying out certain acts of compensation and annulment of debt specifically provided by law) have been registered into the merger balance sheet and covered by treasury bills up to an amount of RON 300 million (Romanian Leu (the "ROL", which term refers to the legal currency of Romania before redenomination on 1 July 2005) 3 billion) issued in favour of BCR;
- (b) Receivables under off balance sheet positions shall, upon becoming due and payable, be transferred by BCR to the Agency for Enhancement of Banking Assets, at nominal value, without BCR being entitled to recover such receivables from the debtors of such receivables; in exchange for the assets taken over by the Agency for Enhancement of Banking Assets, BCR will receive treasury bills of equal value, in local or foreign currency, as applicable. The value of the treasury bills so issued shall be deducted from the guarantee ceiling referred to in (c) below;
- (c) Payables under off-balance sheet positions, within the limits of RON 32,500,000,000 (ROL 325 billion) and of the equivalent of USD 875.6 million shall be guaranteed by the Romanian State and are to be collected by BCR; with respect to litigations arising from the activity carried out by Bancorex until the date of the deregistration thereof from the trade registry, upon request of BCR, the Government approved by means of a government decision a guarantee ceiling referred to above, and the Ministry of Public Finance issued (a) guarantee letter(s) upon BCR's request in this respect, accompanied by justifying documents (subject to certain requirements and limitations); such letters of guarantee were issued provided that: (i) such letters of guarantee are issued in connection with (x) the off-balance sheet positions resulting from or in relation to Bancorex and (y) all obligations, including direct and indirect damages, resulting from or in connection with the litigations arising from Bancorex's activity prior to deregistration of Bancorex from the trade registry for which BCR is liable and provided that such claims are notified to the Ministry of Public Finance prior to 31 December 2013 and (ii) the total value of such guarantee letters to not exceed 50 per cent. of the total acquisition price paid by Erste Bank for the shares acquired in BCR in the privatisation process, as set out in the sale purchase agreement signed in this respect. No letters of guarantee or other indemnity shall be issued/granted for claims notified to the Ministry of Public Finance after 31 December 2013.

A notification was issued prior to 31 December 2013 for the amount of RON 1.4 million and because BCR's request remained without answer, BCR has continued the legal proceedings in order to obtain the guarantee for the aforementioned amount.

In respect of liabilities arising out of claims made in legal proceedings, in many cases BCR has been indemnified by the Romanian Government and in addition was given the right to require AVAS to replace BCR as defendant in the relevant court proceedings. In light of these arrangements, the management of BCR believes that BCR's financial condition is not susceptible to be adversely affected by any of the losses or liabilities that BCR acquired from Bancorex.

As at 30 September 2017, BCR was involved in 4,665 litigations, out of which it was involved in 4,124 litigation cases as defendant. BCR recorded provisions for litigations in a total amount of RON 6.56 million for various cases, RON 79.54 million for individual consumer protection cases and RON 534 million for

⁷ Government Ordinance no. 39/1999 on the finalisation of the restructuring process of Romanian Bank for Foreign Trade (Banca Română de Comerț Exterior – Bancorex – S.A.) and merger thereof into Banca Comercială Română S.A as amended to date and Government Ordinance no. 33/2006 on certain measures for the finalisation of the privatisation of Banca Comercială Română S.A as amended to date.

cross-portfolio cases. All litigations are monitored and all the cases with loss risk are evaluated and provisioned.

Material Contracts

BCR has not entered into any material contracts, other than those entered into in the ordinary course of business, which could result in any Group member being under an obligation or entitlement that is material to BCR's ability to meet its obligation to Holders in respect of the Notes to be issued under the Programme.

Credit Ratings

The Issuer is rated:

- (a) upon request by BCR, by Fitch Rating Ltd ("Fitch") with seat in 30 North Colonnade, Canary Warf, London E14 5GN, United Kingdom; and
- (b) on an unsolicited basis, by Moody's Deutschland GmbH ("Moody's") with registered office at An der Welle 5, 60322 Frankfurt am Main, Germany.

Moody's and Fitch are registered under Regulation (EC) No. 1060/2009 as amended (the "CRA Regulation") as registered rating agencies. The ESMA publishes on its website (www.esma.europa.eu) a list of credit rating agencies registered in accordance with the CRA Regulation. That list shall be updated within five working days following the adoption of a decision under Articles 16, 17 or 20 of the CRA Regulation. The European Commission publishes that updated list in the Official Journal of the European Union within 30 days following the updates.

Fitch Credit Ratings

On 25 January 2019, Fitch has revised the outlook on BCR to negative from stable, while affirming BCR's Long term Issuer Default Rating at "BBB+". The revision of the outlook on BCR reflects the significant probability that Fitch will in future cap the ratings of Romanian banks at one notch above the Romanian sovereign (BBB-/Stable), rather than two notches at present. This in turn reflects the potentially greater risk of government intervention in the Romanian banking sector, in case of a sovereign default, that would negatively affect the banks' ability to service their obligations. This possible change in Fitch's view is driven by a series of recently proposed or adopted legislative measures, which could have a significant negative impact on banks, the most acute being a special tax on bank assets.

Fitch has also affirmed the Viability Rating (VR) of BCR at "bb+", based on the view that the banks' financial profiles should be reasonably resilient, at least in the short term, to a weakening of profitability driven by the aforementioned tax. However, over the longer term, weaker earnings and internal capital generation capacity could erode banks' headroom to absorb cyclically increasing credit charges and/or to support growth. The Viability Rating could be downgraded if a punitively high tax is maintained indefinitely and if its impact cannot meaningfully be mitigated by the banks' adapting business strategies.

In May 2018, Fitch affirmed BCR's Long-Term Issuer Default Ratings (IDRs) to "BBB+", with stable outlook. Fitch also affirmed BCR's Viability Rating (VR) to "bb+" which reflects the Bank's strong capitalisation and funding and liquidity profiles, which help mitigate risks from the Bank's remaining stock of legacy non-performing assets.

Long term Issuer Default Rating	Short Term Issuer Default Rating	Outlook
BBB+	F2	negative

According to the rating definitions as published by Fitch (www.fitchratings.com) as at the date of this Prospectus, the above ratings have the following meanings:

"BBB" – Good credit quality. "BBB" ratings indicate that expectations of default risk are currently low. The capacity for payment of financial commitments is considered adequate but adverse business or economic conditions are more likely to impair this capacity.

The modifiers "+" or "-" may be appended to a credit rating to denote relative status within major rating categories.

"F2" – Good short-term credit quality. Good intrinsic capacity for timely payment of financial commitments.

Outlooks indicate the direction a credit rating is likely to move over a one- to two-year period. They reflect

financial or other trends that have not yet reached the level that would trigger a rating action, but which may do so if such trends continue. The majority of outlooks are generally stable, which is consistent with the historical migration experience of ratings over a one- to two-year period. Positive or negative outlooks do not imply that a credit rating change is inevitable and, similarly, credit ratings with stable outlooks can be raised or lowered without a prior revision to the outlook, if circumstances warrant such an action. Occasionally, where the fundamental trend has strong, conflicting elements of both positive and negative, the outlook may be described as evolving.

Moody's Credit Ratings

BCR is rated by Moody's on an unsolicited basis, i.e. exclusively based on publicly available information. Thus, the rating assigned by Moody's to BCR was not performed at the request or with the co-operation of BCR in the credit rating process. In August 2018, Moody's upgraded BCR's local-currency deposit rating to Baa2/Prime-2 from Baa3/Prime-3 with positive outlook. The positive outlook on BCR's long-term local-currency deposit rating reflects Moody's expectation of further improvement in the Bank's credit profile over the next 12-18 months, based on a projected continued NPL reduction and growth of the loan book on the back of a more favorable operating environment and stronger credit demand in Romania. At the same time, the foreign-currency deposit rating was affirmed at Baa3/Prime-3, with stable outlook, as it is constrained by the foreign currency deposit ceiling applicable in Romania based on the Baa3 sovereign rating.

Long Term Local-Currency Bank Deposits Rating	Short Term Local-Currency Bank Deposits Rating	Outlook
Baa2	Prime-2	positive
Long Term Foreign-Currency Bank Deposits Rating	Short Term Foreign-Currency Bank Deposits Rating	Outlook
Baa3	Prime-3	stable

According to the rating symbols and definitions as published by Moody's (www.moodys.com) as at the date of this Prospectus, the above ratings have the following meanings:

"Bank deposit ratings" – opinions of a bank's ability to repay punctually its foreign and/or domestic currency deposit obligations and also reflect the expected financial loss of the default. Bank deposit ratings do not apply to deposits that are subject to a public or private insurance scheme; rather, the ratings apply to the most junior class of uninsured deposits, but they may in some cases incorporate the possibility that official support might in certain cases extend to the most junior class of uninsured as well as preferred and insured deposits. Foreign currency deposit ratings are subject to Moody's country ceilings for foreign currency deposits. This may result in the assignment of a different (and typically lower) rating for the foreign currency deposits relative to the bank's rating for domestic currency deposits.

"Baa" – Obligations rated Baa are judged to be medium-grade and subject to moderate credit risk and as such may possess certain speculative characteristics.

Note: Moody's appends numerical modifiers 1, 2 and 3 to each generic rating classification from Aa through Caa. The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category.

"Prime-2" – Issuers (or supporting institutions) rated Prime-2 have a strong ability to repay short-term debt obligations.

"Prime-3" – Issuers (or supporting institutions) rated Prime-3 have an acceptable ability to repay short-term obligations.

An outlook is an opinion regarding the likely credit rating direction over the medium term. Outlooks fall into four categories: Positive, negative, stable, and developing. A stable outlook indicates a low likelihood of a credit rating change over the medium term. A positive outlook indicates a higher likelihood of an upward credit rating change over the medium term. A negative, positive or developing outlook indicates a higher likelihood of a credit rating change over the medium term. A credit rating committee that assigns an outlook of stable, negative, positive, or developing to an issuer's rating is also indicating its belief that the issuer's credit profile is consistent with the relevant credit rating level at that point in time.

Information on the credit ratings can be retrieved on the Issuer's website (www.bcr.ro/en/investors/rating-bcr). General information regarding the meaning of the credit ratings and the qualifications which have to be observed in connection therewith can be found on the websites of Moody's (www.moodys.com) and Fitch Ratings Ltd (www.fitchratings.com).

Employees

As at 31 December 2018, BCR had 6,747 employees (compared with approximately 5,000 in December 1990, when it was established). Approximately 41.34 per cent. of BCR's employees belong to one of the four trade unions established in BCR. Over recent years, relations between BCR and these trade unions have generally been good, with no working days lost due to industrial action. There is a collective labour agreement in place today. On 29 March 2018, the new collective labour agreement was registered with a duration of two years. Employees are provided with retirement bonuses, severance packages, childbirth bonuses and meal vouchers.

At present, the procedure for collective redundancy schemes in Romania and employee dismissals is slow and bureaucratic, since both trade unions and the labour authorities must be consulted in advance, and strict legal provisions must be observed.

The 2018 training plan for BCR employees has been designed in accordance with their individual training needs as well as the Bank's business objectives, with a view to maintaining high quality professional standards.

General remarks

Individuals having a domicile (*Wohnsitz*) and/or their habitual abode (*gewöhnlicher Aufenthalt*), both as defined in § 26 of the Austrian Federal Fiscal Procedures Act (*Bundesabgabenordnung*), in Austria are subject to income tax (*Einkommensteuer*) in Austria on their worldwide income (unlimited income tax liability; *unbeschränkte Einkommensteuerpflicht*). Individuals having neither a domicile nor their habitual abode in Austria are subject to income tax only on income from certain Austrian sources (limited income tax liability; *beschränkte Einkommensteuerpflicht*).

Corporations having their place of management (*Ort der Geschäftsleitung*) and/or their legal seat (*Sitz*), both as defined in § 27 of the Austrian Federal Fiscal Procedures Act, in Austria are subject to corporate income tax (*Körperschaftsteuer*) in Austria on their worldwide income (unlimited corporate income tax liability; *unbeschränkte Körperschaftsteuerpflicht*). Corporations having neither their place of management nor their legal seat in Austria are subject to corporate income tax only on income from certain Austrian sources (limited corporate income tax liability; *beschränkte Körperschaftsteuerpflicht*).

Both in case of unlimited and limited (corporate) income tax liability Austria's right to tax may be restricted by double taxation treaties.

Income taxation

Pursuant to § 27(1) of the Austrian Income Tax Act (*Einkommensteuergesetz*), the term investment income (*Einkünfte aus Kapitalvermögen*) comprises:

- income from the letting of capital (*Einkünfte aus der Überlassung von Kapital*) pursuant to § 27(2) of the Austrian Income Tax Act, including dividends and interest; the tax basis is the amount of the earnings received (§ 27a(3)(1) of the Austrian Income Tax Act);
- income from realised increases in value (*Einkünfte aus realisierten Wertsteigerungen*) pursuant to § 27(3) of the Austrian Income Tax Act, including gains from the alienation, redemption and other realisation of assets that lead to income from the letting of capital (including zero coupon bonds); the tax basis amounts to the sales proceeds or the redemption amount minus the acquisition costs, in each case including accrued interest (§ 27a(3)(2)(a) of the Austrian Income Tax Act); and
- income from derivatives (*Einkünfte aus Derivaten*) pursuant to § 27(4) of the Austrian Income Tax Act, including cash settlements, option premiums received and income from the sale or other realisation of forward contracts like options, futures and swaps and other derivatives such as index certificates (the mere exercise of an option does not trigger tax liability); e.g., in the case of index

certificates, the tax basis amounts to the sales proceeds or the redemption amount minus the acquisition costs (§ 27a(3)(3)(c) of the Austrian Income Tax Act).

Also the withdrawal of the Notes from a securities account (*Depotentnahme*) and circumstances leading to a restriction of Austria's taxation right regarding the Notes *vis-à-vis* other countries, e.g. a relocation from Austria (*Wegzug*), are in general deemed to constitute a sale (cf. § 27(6)(1) and (2) of the Austrian Income Tax Act). In case of a relocation of an individual to a Member State of the European Union or to an EEA state, a deferral of taxation may be available. The tax basis amounts to the fair market value at the time of withdrawal/restriction of Austria's taxation right minus the acquisition costs (§ 27a(3)(2)(b) of the Austrian Income Tax Act).

Individuals holding the Notes as non-business assets

Individuals subject to unlimited income tax liability in Austria holding the Notes as non-business assets (*Privatvermögen*) are subject to income tax on all resulting investment income pursuant to § 27(1) of the Austrian Income Tax Act. Investment income from the Notes with an Austrian nexus (*inländische Einkünfte aus Kapitalvermögen*), basically meaning income paid by an Austrian paying agent (*auszahlende Stelle*) or an Austrian custodian agent (*depotführende Stelle*), is subject to withholding tax (*Kapitalertragsteuer*) at a flat rate of 27.5 %; no additional income tax is levied over and above the amount of tax withheld (final taxation pursuant to § 97(1) of the Austrian Income Tax Act). Investment income from the Notes without an Austrian nexus must be included in the investor's income tax return and is subject to income tax at the flat rate of 27.5 %. In both cases upon application the option exists to tax all income subject to income tax at a flat rate pursuant to § 27a(1) of the Austrian Income Tax Act at the lower progressive income tax rate (option to regular taxation pursuant to § 27a(5) of the Austrian Income Tax Act). The acquisition costs must not include ancillary acquisition costs (*Anschaffungsnebenkosten*; § 27a (4)(2) of the Austrian Income Tax Act). Expenses, such as bank charges and custody fees, must not be deducted (§ 20(2) of the Austrian Income Tax Act); this also applies if the option to regular taxation is exercised. § 27(8) of the Austrian Income Tax Act, *inter alia*, provides for the following restrictions on the offsetting of losses: negative income from realised increases in value and from derivatives may be neither offset against interest from bank accounts and other non-securitized claims *vis-à-vis* credit institutions (except for cash settlements and lending fees) nor against income from private foundations, foreign private law foundations and other comparable legal estates (*Privatstiftungen, ausländische Stiftungen oder sonstige Vermögensmassen, die mit einer Privatstiftung vergleichbar sind*); income subject to income tax at a flat rate of 25 % or 27.5 % may not be set off against income subject to the progressive income tax rate (this equally applies in case of an exercise of the option to regular taxation); negative investment income not already set off against positive investment income may not be set off against other types of income. The Austrian custodian agent is generally obliged to automatically effect the setting off of losses by taking into account all of a taxpayer's securities accounts with the custodian agent (cf. § 93(6) of the Austrian Income Tax Act) and to issue a written confirmation on the offsetting of losses to the taxpayer. Losses may not be carried forward.

Individuals holding the Notes as business assets

Individuals subject to unlimited income tax liability in Austria holding the Notes as business assets (*Betriebsvermögen*) are subject to income tax on all resulting investment income pursuant to § 27(1) of the Austrian Income Tax Act. Investment income from the Notes with an Austrian nexus is subject to withholding tax at a flat rate of 27.5 %. While withholding tax has the effect of final taxation for income from the letting of capital, income from realised increases in value and income from derivatives must be included in the investor's income tax return (nevertheless income tax at the flat rate of 27.5 %). Investment income from the Notes without an Austrian nexus must always be included in the investor's income tax return and is subject to income tax at the flat rate of 27.5 %. In both cases upon application the option exists to tax all income subject to income tax at a flat rate pursuant to § 27a(1) of the Austrian Income Tax Act at the lower progressive income tax rate (option to regular taxation pursuant to § 27a(5) of the Austrian Income Tax Act). The flat tax rate does not apply to income from realised increases in value and income from derivatives if realizing these types of income constitutes a key area of the respective investor's business activity (§ 27a(6) of the Austrian Income Tax Act). Expenses such as bank charges and custody fees must not be deducted (§ 20(2) of the Austrian Income Tax Act); this also applies if the option to regular taxation is exercised. Pursuant to § 6(2)(c) of the Austrian Income Tax Act, depreciations to the lower fair market value and losses from the alienation, redemption and other realisation of financial assets and derivatives in the sense of § 27(3) and (4) of the Austrian Income Tax Act, which are subject to income tax at the flat rate of 27.5 %, are primarily to be offset against income from realised increases in value of such financial assets and derivatives and with appreciations in value of such assets within the same business unit (*Wirtschaftsgüter desselben Betriebes*); only 55 % of the remaining negative difference may be offset against other types of income (the negative difference remaining after such setting off may be fully carried forward).

Corporations

Pursuant to § 7(2) of the Austrian Corporate Income Tax Act (*Körperschaftsteuergesetz*), corporations (*Körperschafter*) subject to unlimited corporate income tax liability in Austria are subject to corporate income tax on income in the sense of § 27(1) of the Austrian Income Tax Act from the Notes at a rate of 25 %. Income in the sense of § 27(1) of the Austrian Income Tax Act from the Notes with an Austrian nexus is subject to withholding tax at a flat rate of 27.5 %. However, a 25 % rate may pursuant to § 93(1a) of the Austrian Income Tax Act be applied by the withholding agent, if the debtor of the withholding tax is a corporation. Such withholding tax can be credited against the corporate income tax liability. Under the conditions set forth in § 94(5) of the Austrian Income Tax Act withholding tax is not levied in the first place. Losses from the alienation of the Notes can be offset against other income (and carried forward).

Pursuant to § 13(3)(1) in connection with § 22(2) of the Austrian Corporate Income Tax Act, private foundations (*Privatstiftungen*) pursuant to the Austrian Private Foundations Act (*Privatstiftungsgesetz*) fulfilling the prerequisites contained in § 13(3) and (6) of the Austrian Corporate Income Tax Act and holding the Notes as non-business assets are subject to interim taxation at a rate of 25 % on interest income, income from realised increases in value and income from derivatives (*inter alia*, if the latter are in the form of securities). Pursuant to the Austrian tax authorities' view, the acquisition costs must not include ancillary acquisition costs. Expenses such as bank charges and custody fees must not be deducted (§ 12(2) of the Austrian Corporate Income Tax Act). Interim tax is generally not triggered insofar as distributions subject to withholding tax are made to beneficiaries in the same tax period. Investment income from the Notes with an Austrian nexus is in general subject to withholding tax at a flat rate of 27.5 %. However, a 25 % rate may pursuant to § 93(1a) of the Austrian Income Tax Act be applied by the withholding agent, if the debtor of the withholding tax is a corporation (which is the case for Austrian private foundations). Such withholding tax can be credited against the tax triggered. Under the conditions set forth in § 94(12) of the Austrian Income Tax Act withholding tax is not levied.

Individuals and corporations subject to limited (corporate) income tax liability

Individuals and corporations subject to limited (corporate) income tax liability in Austria are taxable on income from the Notes if they have a permanent establishment (*Betriebsstätte*) in Austria and the Notes are attributable to such permanent establishment (cf. § 98(1)(3) of the Austrian Income Tax Act, § 21(1)(1) of the Austrian Corporate Income Tax Act). In addition, individuals subject to limited income tax liability in Austria are also taxable on interest in the sense of § 27(2)(2) of the Austrian Income Tax Act and accrued interest (including from zero coupon bonds) in the sense of § 27(6)(5) of the Austrian Income Tax Act from the Notes if the (accrued) interest has an Austrian nexus and if withholding tax is levied on such (accrued) interest. This does not apply to individuals being resident in a state with which automatic exchange of information exists. Interest with an Austrian nexus is interest the debtor of which has its place of management and/or its legal seat in Austria or is an Austrian branch of a non-Austrian credit institution; accrued interest with an Austrian nexus is accrued interest from securities issued by an Austrian issuer (§ 98(1)(5)(b) of the Austrian Income Tax Act). The Issuer understands that no taxation applies in the case at hand.

Inheritance and gift taxation

Austria does not levy inheritance or gift tax.

Certain gratuitous transfers of assets to private law foundations and comparable legal estates (*privatrechtliche Stiftungen und damit vergleichbare Vermögensmassen*) are subject to foundation transfer tax (*Stiftungseingangssteuer*) pursuant to the Austrian Foundation Transfer Tax Act (*Stiftungseingangssteuergesetz*) if the transferor and/or the transferee at the time of transfer have a domicile, their habitual abode, their legal seat and/or their place of management in Austria. Certain exemptions apply in cases of transfers *mortis causa* of financial assets within the meaning of § 27(3) and (4) of the Austrian Income Tax Act (except for participations in corporations) if income from such financial assets is subject to income tax at a flat rate pursuant to § 27a(1) of the Austrian Income Tax Act. The tax basis is the fair market value of the assets transferred minus any debts, calculated at the time of transfer. The tax rate generally is 2.5 %, with higher rates applying in special cases.

In addition, there is a special notification obligation for gifts of money, receivables, shares in corporations, participations in partnerships, businesses, movable tangible assets and intangibles if the donor and/or the donee have a domicile, their habitual abode, their legal seat and/or their place of management in Austria. Not all gifts are covered by the notification obligation: In case of gifts to certain related parties, a threshold of EUR 50,000 per year applies; in all other cases, a notification is obligatory if the value of gifts made exceeds an amount of EUR 15,000 during a period of five years. Furthermore, gratuitous transfers to foundations falling under the Austrian Foundation Transfer Tax Act described above are also exempt from the notification

obligation. Intentional violation of the notification obligation may trigger fines of up to 10 % of the fair market value of the assets transferred.

Further, gratuitous transfers of the Notes may trigger income tax at the level of the transferor pursuant to § 27(6)(1) and (2) of the Austrian Income Tax Act (see above).

Romania

This section on taxation contains a brief summary of the Issuer's understanding with regard to certain important principles which are of significance in connection with the purchase, holding or sale of the Notes in Romania. This summary does not purport to exhaustively describe all possible tax aspects and does not deal with specific situations which may be of relevance for certain potential investors. The following comments are rather of a general nature and included herein solely for information purposes. These comments are not intended to be, nor should they be construed to be, legal or tax advice. It is based on the currently valid tax legislation, case law and regulations of the tax authorities, as well as their respective interpretation, all of which may be amended from time to time. Such amendments may possibly also be effected with retroactive effect and may negatively impact on the tax consequences described. It is recommended that potential purchasers of the Notes consult with their legal and tax advisers as to the tax consequences of the purchase, holding or sale of the Notes. Tax risks resulting from the Notes shall in any case be borne by the purchaser.

General Remarks - Romanian Tax Withholding on Interest Payments on the Notes

In relation to International Notes, based on the currently applicable Romanian tax legislation (as detailed below) and the fact that the Issuer will not know on the relevant due dates the identity and tax status of the final beneficial recipients of interest payments on the International Notes, the Issuer shall withhold tax at a rate of 16 per cent. on all interest payments on International Notes. The final beneficial recipients of interest payments on the International Notes may receive a refund of such tax withheld by the Issuer subject to certain requirements described below. As an exception, no withholding tax shall be retained for Romanian legal entities provided that certain notification procedures are fulfilled within the requested deadline, as described below.

In relation to Domestic Notes, the Issuer shall determine the fiscal status of the relevant Holders and withhold tax on the interest payments on Domestic Notes (as detailed below) based on the information available on the Holders shown in the Holders' Registry on the Payment Reference Date (as provided by the Romanian Central Depository to the Issuer) and the information provided by the Holders to the Issuer in accordance with the relevant provisions of the section entitled "Terms and Conditions of the Notes" of this Prospectus. The final beneficial recipients of interest payments on the Domestic Notes may receive a refund of tax withheld by the Issuer subject to certain requirements described below.

Taxation of Holders resident in Romania for tax purposes

Under Law No. 227/2015 on the Fiscal Code as subsequently amended and supplemented (the "**Romanian Fiscal Code**"), a Romanian "resident individual" means an individual that either (a) has his/her domicile in Romania, or (b) has his/her centre of vital interests (*centrul intereselor vitale*) located in Romania, or (c) is present in Romania for a period or several periods exceeding in aggregate 183 days during any twelve consecutive months, and that period(s) end(s) in the calendar year relevant for tax purposes, or (d) is a Romanian citizen who works abroad as an officer or an employee of the Romanian state. A Romanian "resident" means any Romanian legal entity, any foreign legal entity which has its place of effective management in Romania, any legal entity having its headquarters in Romania, incorporated according to European legislation and any resident individual.

Taxation on interest

According to the Romanian Fiscal Code in force, interest is defined as "any amount required to be paid or received for the use of money, irrespective if this amount must be paid or received as a debt, in relation to a deposit account or in accordance with a financial leasing agreement, an installment sale or any late payment sale".

Income received on the Notes by Romanian resident legal entities in the form of interest on the Notes will be subject to corporate income tax (profit tax) at the rate of 16 per cent, at the level of said entity.

For the purposes of taxation of individuals, the interest income comprises, without being limited to, income from bonds, interest on current accounts, escrow accounts, demand deposits, collateral and fixed-term, including deposit certificates, interest related to loans granted, interest derived from alternative investment

instruments of the type of structures in which a derivative instrument is related to a deposit account, as well as other income derived from receivables. Interest income received by Romanian resident individuals on interest-bearing products, including saving instruments ("instrumente de economisire"), such as the Notes is subject to income tax at the rate of 10 per cent. The tax is withheld at source, at the moment of interest payment and resident individuals receive only the net amount. If there are elements determining the modification of the interest income and/or of the taxable base of a resident individual, for which the income payer made the calculation of the income tax, the income tax difference resulted from the elements determining the modification is made at the date of determining these elements. The adjustment of income tax is made by the income payer starting with the month of determining these elements.

Additionally, the individuals deriving income from interest are required to pay the social health insurance contribution, excepting the case when the annual level of investment incomes (including interest incomes) and (if the case), *inter alia*, income from other sources, as defined by the Romanian Fiscal Code, is below the level of 12 times the value of the national minimum gross wage.

Holders who are Romanian resident legal entities will receive the gross interest, provided they provide the Issuer either (i), in case of Domestic Notes, the information set out in § 4 paragraph (1) letter (c) (*Payments - Payment Logistics*) and § 11 paragraph (3) (*Notices - Form of Notice to Be Given by any Holder*) of the section entitled "Terms and Conditions of the Notes" of this Prospectus, subject to the terms and conditions set out therein or (ii) in case of International Notes, the corporate name, registered seat, sole identification code or fiscal code, registration number with the Trade Registry (if any) and tax residence, at least 5 calendar days prior to the relevant due date, as the case may be (in each case the respective information shall be referred to as the **"Relevant Information on Residents"**). The gross interest will be subject to corporate income tax (profit tax) at the rate of 16 per cent., if the beneficiary qualifies as a corporate income tax payer and is in a profits tax position (and 1 per cent./3 per cent. if the beneficiary qualifies as microenterprise tax payer).

Based on the Relevant Information on Residents, BCR will determine the fiscal status, the applicable tax regime and the payment of interest shall be made accordingly.

Should the Holders who are resident Romanian legal entities not provide the Relevant Information on Residents set out above, the interest payments would be subject to a 16 per cent withholding tax.

Refund procedure

Interest payments to Holders who are Romanian resident legal entities (and final beneficial owners) that could not provide the Relevant Information on Residents on time are subject to a 16 per cent. withholding tax, but they can submit a claim to the Issuer to recover the withheld amount. Such claim must be submitted by the respective Holder to the Issuer no later than the 20th day of the calendar month following the calendar month of the relevant due date, as applicable.

In case the aforementioned deadline (20th day of the following calendar month) cannot be complied with, upon the request of the respective Holder the Issuer may, on a reasonable efforts basis and as long as it does not, nor is it reasonably likely to, suffer any prejudice, apply for the standard refund procedure with the competent tax authorities subject to the five year status of limitation period. It should be noted that in this case the Issuer would withhold and pay the taxes to the fiscal authorities, without knowing the identity of the final beneficial recipient of the interest payments, so if the final beneficial recipient will request the Issuer to apply for the standard refund procedure, it will be difficult to prove that the Issuer withheld and paid the taxes in the name of the respective final beneficial recipient.

Taxation on capital gains

Capital gains are not defined as such in the Romanian Fiscal Code. In general, the taxable income resulted from the transfer of securities is computed as the positive difference between the sale price and the acquisition price, less the costs related to the transaction.

Income received by Romanian resident legal entities as capital gains from the transfer of Notes, will be subject to corporate income tax (profit tax) at the rate of 16 per cent, at the level of said entities, provided that they qualify as corporate income tax payers and are in a profits tax position (and 1 per cent./3 per cent. if the the said entities qualify as microenterprise tax payer).

Capital gains obtained by Romanian resident individuals from the transfer of Notes will be subject to a tax at the rate of 10 per cent. The tax is not withheld at source, the owner of the income being responsible for declaring and paying the tax. The annual tax due by individuals for the net taxable gain will be determined by the competent tax authority based on the annual income tax return filed by the individuals.

Additionally, the Romanian resident individuals deriving income from the transfer of Notes are required to pay the social health insurance contribution, excepting the case when the annual level of investment incomes (including incomes from transfer of Notes) and (if the case), *inter alia*, income from other sources, as defined by the Romanian Fiscal Code, is below the level of 12 times the value of the national minimum gross wage.

Taxation of Holders not resident in Romania for tax purposes

Under the Romanian Fiscal Code, certain types of income from Romanian sources earned by non-residents are subject to Romanian tax at the rates prescribed by the Romanian Fiscal Code, irrespective of whether the income is received in Romania or abroad.

For the purposes of the Romanian Fiscal Code, "non-residents" are defined as any foreign legal entities, any foreign individuals and any other foreign entities, including undertakings for collective investments in transferable securities without legal persona, which are not registered in Romania, according to the law. Non-resident individuals are defined as individuals which do not meet the conditions for being considered resident individuals (as presented in the previous section), as well as any foreign citizens working as diplomats or consular officers in Romania, foreign citizens working as officials or employees of an international and intergovernmental body, foreign citizens working as officials or employees of a foreign state in Romania and their family members.

Taxation on interest

Interest income to be obtained by a non-resident legal entity or non-resident individual is subject to withholding tax in Romania if it qualifies as Romanian-sourced income. Interest paid by a Romanian resident, i.e. the Issuer, to a non-resident is taxable in Romania as Romanian-sourced income. Such interest income is subject to 16 per cent. tax rate to be withheld at source by the Issuer.

At the date of issuance of this prospectus, interests on notes/debt securities, issued by Romanian companies, are exempt if notes/debt securities are issued under a prospectus approved by a competent regulatory authority and interest is paid to a person who is not an affiliated person to the issuer of the notes/debt securities.

Depending on the country in which the non-resident has its tax residence, the tax on interest may be reduced or eliminated based on a double tax treaty concluded between Romania and the country in which that individual or legal entity is a tax resident. In order to benefit from the favourable provisions of a double tax treaty, the non-resident should obtain and provide to the Issuer a fiscal residency certificate (valid for the respective fiscal year) issued by the tax authorities of its country of residence, in original or notarised photocopy form, and a certified Romanian translation thereof and any other documentary evidence as may be required from time to time by Romanian law and as notified by the Issuer in accordance with § 11 (Notices) of the section entitled "Terms and Conditions of the Notes" of this Prospectus (the "**Relevant Information on Non-Residents**"). In relation to Domestic Notes, the Relevant Information on Non-Residents should be provided to the Issuer at least five (5) calendar days prior to the relevant due date, as applicable.

Payments of interest on the Notes may be made without withholding on account of Romanian tax, if the interest income is attributable to a permanent establishment of the non-resident Holder in Romania, in which case such income will be taxed as explained above at "*Taxation of Holders resident in Romania for tax purposes*" for corporate income tax payers.

Refund procedure

Should the Holders not provide the Relevant Information on Non-Residents on time (including in case of International Notes where the Relevant Information on Non-Residents may be provided only after the relevant due date, as applicable, to be able to evidence holdings of Notes on the respective due date), the interest will be subject to a 16 per cent. withholding tax.

Nevertheless, the respective Holders can submit a claim to the Issuer to recover the withheld amount. Such claim must be submitted by the respective Holder to the Issuer no later than the 20th day of the calendar month following the calendar month of the relevant due date, as applicable.

In case the aforementioned deadline (20th day of the following calendar month) cannot be complied with, upon the request of the respective Holder the Issuer will, on a reasonable efforts basis and as long as it does not, nor is it reasonably likely to, suffer any prejudice, apply for the statutory refund procedure with the competent tax authorities subject to the five year status of limitation period.

Taxation on capital gains

No capital gains tax is applicable to non-resident legal persons.

Capital gains obtained by non-resident individuals from the transfer of Notes will be subject to tax as described above under "*Taxation of Holders resident in Romania for tax purposes - Taxation on capital gains*", unless the capital gains are derived from the transfer of Notes traded on a foreign capital market, in which case no tax on capital gains will be levied in Romania.

The non-resident individual having tax obligations in Romania must (or may, in certain cases) appoint a Romanian resident fiscal representative/empowered person to declare and settle any tax liabilities in the name and on behalf of the non-resident individual.

Depending on the country in which the non-resident has its tax residence, the capital gains tax may be eliminated based on a double tax treaty. In order to benefit from the favourable provisions of a double tax treaty, the non-resident should obtain and provide to its fiscal representative a fiscal residency certificate (valid for the respective fiscal year) issued by the tax authorities of its country of residence, in original or in notarised photocopy form, and the certified Romanian translation thereof.

FATCA Disclosure

Foreign Account Tax Compliance Act

Pursuant to certain provisions of the U.S. Internal Revenue Code of 1986 ("Code"), U.S. Treasury regulations and guidance issued thereunder, an agreement with the U.S. Internal Revenue Service pursuant to such sections of the Code, or an intergovernmental agreement between the United States and another jurisdiction in furtherance of such sections of the Code (including any non-U.S. laws implementing such an intergovernmental agreement), commonly known collectively as FATCA, a "**foreign financial institution**" (as defined by FATCA) may be required to withhold on certain payments it makes ("**foreign passthru payments**") to persons that fail to meet certain certification, reporting, or related requirements. The Issuer is a foreign financial institution for these purposes. A number of jurisdictions (including Romania) have entered into, or have agreed in substance to, intergovernmental agreements with the United States to implement FATCA ("**IGAs**"), which modify the way in which FATCA applies in their jurisdictions. Certain aspects of the application of the FATCA provisions and IGAs to instruments such as the Notes, including whether withholding would ever be required pursuant to FATCA or an IGA with respect to payments on instruments such as the Notes, are uncertain and may be subject to change. Even if withholding would be required pursuant to FATCA or an IGA with respect to payments on instruments such as the Notes, such withholding would not apply prior to the date that is two years after the date on which final U.S. Treasury regulations defining foreign passthru payments are filed with the U.S. Federal Register. Further, Notes issued on or prior to the date that is six months after the date on which final U.S. Treasury regulations defining foreign passthru payments are filed with the U.S. Federal Register generally would be grandfathered for purposes of FATCA withholding unless materially modified after such date. However, if additional Notes (as described under "*Terms and Conditions of the Notes — Further Issues of Notes, Repurchase and Cancellation*") that are not distinguishable from previously issued Notes are issued after the expiration of the grandfathering period and are subject to withholding under FATCA, then withholding agents may treat all Notes, including the Notes offered prior to the expiration of the grandfathering period, as subject to withholding under FATCA.

Potential investors should be aware that the effective date for withholding on foreign passthru payments noted above reflects recently proposed U.S. Treasury regulations ("**Proposed FATCA Regulations**") which delay the effective date for withholding on such payments. The effective date for withholding on foreign passthru payments otherwise would have been the date on which final U.S. Treasury regulations defining the term "foreign passthru payments" are published. The U.S. Treasury have indicated that taxpayers may rely on the Proposed FATCA Regulations until final regulations are issued. The discussion above assumes that the Proposed FATCA Regulations will be finalised in their current form. No assurance can be given that the Proposed FATCA Regulations will be finalised in their current form.

Holders should consult their own tax advisors regarding how these rules may apply to their investment in the Notes. In the event any withholding would be required pursuant to FATCA or an IGA with respect to payments on the Notes, no person will be required to pay additional amounts as a result of the withholding.

SUBSCRIPTION AND SALE

The Dealers have in the Programme Agreement agreed with the Issuer a basis upon which they or any of them may from time to time agree to purchase Notes. Any such agreement will extend to those matters stated in the sections entitled "*Form of the Notes*" and "*Terms and Conditions of the Notes (German and English Language Versions)*". In the Programme Agreement, the Issuer has agreed with the Dealers to indemnify the Dealers against certain liabilities incurred by them in connection with the issuance of any Notes.

General

Each Dealer has represented and agreed and each further Dealer appointed under the Programme will be required to represent and agree that it will (to the best of its knowledge and belief) comply with all applicable laws and regulations in force in any jurisdiction in which it purchases, offers, sells or delivers Notes or possesses or distributes this Prospectus or any offering material in relation to this Prospectus or the Notes and will obtain any consent, approval or permission required from it for the purchase, offer, sale or delivery by it of Notes under the laws and regulations in force in any jurisdiction to which it is subject or in which it makes such purchases, offers, sales or deliveries of Notes and neither the Issuer nor any other Dealer shall have any responsibility therefor.

Neither the Issuer nor any of the Dealers represents that Notes may at any time lawfully be sold in compliance with any applicable registration or other requirements in any jurisdiction, or pursuant to any exemption available thereunder or assumes any responsibility for facilitating such sale.

With regard to each Tranche of Notes, the relevant Dealer will be required to comply with such other additional restrictions as the Issuer and the relevant Dealer shall agree and as shall be specified in the relevant Final Terms.

United States of America

The Notes have not been and will not be registered under the Securities Act. Except in certain transactions exempt from the registration requirements of the Securities Act, the Notes may not be offered or sold within the United States or to, or for the account or benefit of, U.S. persons (as defined in Regulation S under the Securities Act ("**Regulation S**")).

Each Dealer has represented and agreed and each further Dealer appointed under the Programme will be required to represent and agree that, except as permitted by the Programme Agreement, it has not offered, sold or delivered the Notes, and it will not offer, sell or deliver the Notes (i) as part of their distribution at any time or (ii) otherwise until 40 days after the later of the commencement of the offering and the closing date within the United States or to, or for the account or benefit of, U.S. persons, and it will have sent to each distributor, dealer or person receiving a selling concession, fee or other remuneration that purchases Notes from it during the distribution compliance period a confirmation or notice setting forth the restrictions on offers and sales of the Notes within the United States or to, or for the account or benefit of, U.S. persons to substantially the following effect:

"The securities covered hereby have not been and will not be registered under the Securities Act and may not be offered or sold within the United States or to, or for the account or benefit of, U.S. persons (i) as part of their distribution at any time or (ii) otherwise until 40 days after the later of the date of the commencement of the offering and the closing date, except in either case in accordance with Regulation S under the Securities Act. Terms used above have the meanings given to them in Regulation S."

Terms used above have the meanings given to them by Regulation S.

In addition, until 40 days after the commencement of the offering of the Notes of the Tranche of which such Notes are a part, an offer or sale of the Notes within the United States by any dealer (whether or not participating in the offering) may violate the registration requirements of the Securities Act if such offer or sale is made otherwise than in accordance with an available exemption from registration under the Securities Act.

Each Dealer has represented and agreed and each further Dealer appointed under the Programme will be required to represent and agree that it, its affiliates or any persons acting on its or their behalf have not engaged and will not engage in any directed selling efforts (as defined in Regulation S) with respect to any Note, and it and they have complied and will comply with the offering restrictions requirement of Regulation S.

Bearer Notes which are subject to U.S. tax law requirements may not be offered, sold or delivered in the United States or its possessions or to a U.S. person, except in certain transactions permitted by U.S. tax regulations. Terms used in this paragraph have the meaning given to them by the U.S. Internal Revenue Code of 1986, as amended, and regulations promulgated thereunder.

Prohibition of Sales to Retail Investors in the EEA

If the relevant Final Terms in respect of any Notes specify "*Prohibition of Sales to Retail Investors in the European Economic Area*" as "*Applicable*", each Dealer has represented and agreed, and each further Dealer appointed under the Programme will be required to represent and agree, that it has not offered, sold or otherwise made available and will not offer, sell or otherwise make available any Notes which are the subject of the offering contemplated by this Prospectus as completed by the final terms in relation hereto to any retail investor in the EEA. For the purposes of this provision:

- (a) the expression "**retail investor**" means a person who is one (or more) of the following:
 - (i) a retail client as defined in point (11) of Article 4(1) of MiFID II; or
 - (ii) a customer within the meaning of IMD, where that customer would not qualify as a professional client as defined in point (10) of Article 4(1) of MiFID II; or
 - (iii) not a qualified investor as defined in the Prospectus Directive; and
- (b) the expression "**an offer**" includes the communication in any form and by any means of sufficient information on the terms of the offer and the Notes to be offered so as to enable an investor to decide to purchase or subscribe the Notes.

If the relevant Final Terms in respect of any Notes specify "*Prohibition of Sales to Retail Investors in the European Economic Area*" as "*Not Applicable*", in relation to each member state of the EAA which has implemented the Prospectus Directive (each, a "**Relevant Member State**"), each Dealer has represented and agreed, and each further Dealer appointed under the Programme will be required to represent and agree, that with effect from, and including, the date on which the Prospectus Directive is implemented in that Relevant Member State (the "**Relevant Implementation Date**") it has not made and will not make an offer of Notes which are the subject of the offering contemplated by this Prospectus as completed by the final terms in relation hereto to the public in that Relevant Member State, except that it may, with effect from, and including, the Relevant Implementation Date, make an offer of such Notes to the public in that Relevant Member State:

- (a) if the final terms in relation to the Notes specify that an offer of those Notes may be made other than pursuant to Article 3 (2) of the Prospectus Directive in that Relevant Member State (a "**Non-exempt Offer**"), following the date of publication of a prospectus in relation to such Notes which has been approved by the competent authority in that Relevant Member State or, where appropriate, approved in another Relevant Member State and notified to the competent authority in that Relevant Member State, provided that any such prospectus has subsequently been completed by the final terms contemplating such Non-exempt Offer, in accordance with the Prospectus Directive, in the period beginning and ending on the dates specified in such prospectus or final terms, as applicable, and the Issuer has consented in writing to its use for the purpose of that Non-exempt Offer;
- (b) at any time to any legal entity which is a qualified investor as defined in the Prospectus Directive;
- (c) at any time to fewer than 150 natural or legal persons (other than qualified investors as defined in the Prospectus Directive), subject to obtaining the prior consent of the relevant Dealer or Dealers nominated by the Issuer for any such offer; or
- (d) at any time in any other circumstances falling within Article 3 (2) of the Prospectus Directive or pursuant to any applicable national law of any Relevant Member State,

provided that no such offer of Notes referred to in (b) to (d) above shall require the Issuer or any Dealer to publish a prospectus pursuant to Article 3 of the Prospectus Directive, or supplement a prospectus pursuant to Article 16 of the Prospectus Directive.

For the purposes of this provision, the expression "**offer of Notes to the public**" in relation to any Notes in any Relevant Member State means the communication in any form and by any means of sufficient

information on the terms of the offer and the Notes to be offered so as to enable an investor to decide to purchase or subscribe the Notes, as the same may be varied in that Member State by any measure implementing the Prospectus Directive in that Member State, and the expression "**Prospectus Directive**" means Directive 2003/71/EC (as amended), and includes any relevant implementing measure in that Relevant Member State.

Japan

The Notes have not been and will not be registered under the Financial Instruments and Exchange Act of Japan (Act No. 25 of 1948, as amended, the "**FIEA**") and each Dealer has represented and agreed, and each further Dealer to be appointed under the Programme will be required to represent and agree that it has not offered or sold and will not offer or sell any Notes, directly or indirectly, in Japan or to, or for the benefit of, any resident of Japan (as defined under Item 5, Paragraph 1, Article 6 of the Foreign Exchange and Foreign Trade Act (Act No. 228 of 1949, as amended)), or to others for re-offering or resale, directly or indirectly, in Japan or to, or for the benefit of, any resident of Japan, except pursuant to an exemption from the registration requirements of, and otherwise in compliance with, the FIEA and other applicable laws and regulations of Japan.

United Kingdom

Each Dealer has represented and agreed, and each further Dealer appointed under the Programme will be required to represent and agree, that:

- (a) it has complied and will comply with all applicable provisions of the U.K. Financial Services and Markets Act 2000 (the "**FSMA**") with respect to anything done by it in relation to any Notes in, from or otherwise involving the United Kingdom; and
- (b) it has only communicated or caused to be communicated and will only communicate or cause to be communicated any invitation or inducement to engage in investment activity (within the meaning of Section 21 of the FSMA) received by it in connection with the issue or sale of any Notes in circumstances in which Section 21(1) of the FSMA would not, if the Issuer was not an authorised person, apply to the Issuer.

Supplement to this Prospectus

The Issuer has given an undertaking to the Dealers, and is obliged by the provisions of the Prospectus Directive and the KMG, that if at any time during the duration of the Programme there is a significant new factor, material mistake or inaccuracy relating to information contained in this Prospectus which is capable of affecting the assessment of any Notes and which arises or is noted between the time when this Prospectus is approved and the final closing of an offer of such Notes to the public or, as the case may be, the time when trading on a regulated market begins, whichever occurs later, the Issuer shall prepare a supplement to this Prospectus or publish a replacement Prospectus for use in connection with any subsequent offering of the Notes and shall supply to each Dealer and to the FMA and the stock exchange operating the Markets such number of copies of such supplement or replacement hereto as such Dealer may request and relevant applicable legislation require.

Third Party Information

Certain information included in this Prospectus is sourced from third parties. BCR has not verified the correctness of the information from third party sources which are referred to in this Prospectus. Particularly, the information and data about the industry included in this Prospectus was extracted from official third party sources considered reliable. Such information, data or statistics may include approximations, estimates, aggregate data or rounded figures. Potential investors are recommended to consider the information derived from third party sources with caution, as it has not been subject to an independent check or to an enquiry regarding the accuracy of processing such data or of the methodology based on which such information is produced. In particular, market studies are often based on assumptions or information that may not be appropriate and, implicitly, their methodology is speculative.

As far as BCR is aware and is able to ascertain from information published by third parties, such information has been accurately reproduced from such third party sources, and no facts have been omitted which would render the reproduced information inaccurate or misleading. Notwithstanding the above, the information included in this Prospectus which has been sourced from third parties was accurately reproduced in this Prospectus as of the date when such third party sources have been consulted or the information included therein has been dated. Thus, certain information included in this Prospectus from third party sources may be outdated and may not reflect the current status of facts.

Approvals

The establishment of the Programme was authorised by a resolution of the Extraordinary General Meeting of the Shareholders of BCR dated 28 June 2013 and a decision of the Management Board dated 8 October 2013. In April 2018, the Extraordinary General Meeting of the Shareholders of BCR approved the extension of the validity of the Programme and insertion of new products. The update of the Programme was approved by a decision of the Management Board dated 11 December 2018. The Issuer has obtained or will obtain from time to time all necessary consents, approvals and authorisations in connection with the issue and performance of the Notes.

Clearing Systems

International Notes will be cleared through OeKB.

Domestic Notes will in all cases be cleared through Depozitarul Central S.A., 34-36 Carol I Boulevard, floors 3, 8 and 9, district 2, Bucharest, Romania.

International Notes have been accepted for clearance by OeKB and application will be made for the acceptance of Domestic Notes for clearance by the Romanian Central Depository.

The International Securities Identification Number (ISIN) and (where applicable) the Common Code and any other identification number for each Series of Notes will be set out in the relevant Final Terms.

Dealers

The Issuer may from time to time terminate the appointment of any dealer under the Programme or appoint additional dealers either in respect of one or more Tranches or in respect of the whole Programme.

Agents

The Issuer may, subject to the terms of the Agency Agreement, from time to time, remove (in the case of International Notes) the Fiscal Agent and/or (in the case of Domestic Notes) the Principal Paying Agent, and/or may appoint other or additional paying agents either in respect of one or more Tranches or in respect of the whole Programme. Such other paying agents will be appointed in accordance with applicable statutory requirements and/or the rules of the stock exchanges where Notes of the respective Series are listed, and will either be banks or other entities licensed in the EEA or another market where BCR is active to act as paying agents.

Method for the Calculation of the Issue Yield

The yield for (i) Notes with a fixed interest rate and Notes without periodic interest payments as well as (ii) Notes with a floating interest rate and Notes with a fixed to fixed or a fixed to floating interest rate where a minimum and/or maximum rate of interest applies will be set out in the relevant Final Terms and is calculated by the following method: Calculated as the effective interest rate on the Notes on the Issue Date by reference to the internal rate of return. The internal rate of return is defined as the discount rate at which the present value of all future cash flows is equal to the initial investment. As set out above, the yield is calculated at the Issue Date on the basis of the Issue Price. It is not an indication of future yield. In case of Notes with a floating interest rate and Notes with a fixed to fixed or a fixed to floating interest rate where no minimum and/or maximum rate of interest applies, due to uncertain proceeds from the Notes no yield can be calculated.

Dealers Transacting with the Issuer

Certain of the Dealers to be appointed in connection with an issue of Notes pursuant to this Prospectus and their affiliates may in the future engage in investment banking and/or commercial banking transactions with, and may perform services for, the Issuer in the ordinary course of business. In addition, in the ordinary course of their business activities, these Dealers and their affiliates may make or hold a broad array of investments and actively trade debt and equity securities (or related derivative securities) and financial instruments (including bank loans) for their own account and for the accounts of their customers. Such investments and securities activities may involve securities and/or instruments of the Issuer. Certain of the Dealers to be appointed in connection with an issue of Notes pursuant to this Prospectus or their affiliates that have a lending relationship with the Issuer routinely hedge their credit exposure to the Issuer consistent with their customary risk management policies. Typically, such Dealers and their affiliates would hedge such exposure by entering into transactions which consist of either the purchase of credit default swaps or the creation of short positions in securities, including potentially the Notes issued under this Prospectus. Any such short positions could adversely affect future trading prices of Notes issued under this Prospectus. The Dealers to be appointed in connection with an issue of Notes pursuant to this Prospectus and their affiliates may also make investment recommendations and/or publish or express independent research views in respect of such securities or financial instruments and may hold, or recommend to clients that they acquire, long and/or short positions in such securities and instruments.
