- Information on the overview of risk-weighted exposure amount
- Information on the institution key metrics, which also includes information on Pillar 2 requirements
- Information on the institution's LCR, its liquidity buffers, cash outflows, cash inflows and high-quality liquid assets, complemented by qualitative information
- Information on comparison of own funds and capital and leverage ratios with and without the application of transitional arrangements for IFRS 9 in accordance with EBA/GL/2020/12.

For the full set of information please refer to "BCR GROUP DISCLOSURE REPORT 2022" which is available on the BCR Group website (<https://www.bcr.ro/en/investors/transparency-and-public-disclosure>).

Template EU OV1 on the overview of risk-weighted exposure amount (RWEA). This template provides an overview of the total RWEA forming the denominator of the risk-based capital requirements calculated in accordance with Article 92 of the CRR.

The regulatory capital requirements computed as of March 31st, 2023, for the credit risk, market risk and operational risk were as follows:

As of March 31st, 2023, the total RWA for BCR Group was 49,257.4 mn RON, with 1,881.6 mn RON higher as compared to December 31st, 2022 (47,375.8 mn RON). The increase in credit risk RWA (including CCR) by 1,958.6 mn RON was mainly driven by the change in risk weight for EUR sovereign exposure from 0% in 2022 to 10% in 2023 together with the positive development of loans to customers.

RWA equivalent for market risk decreased with -250.9 mn RON due to not considering the capital requirement for FX in the total capital requirement for market risk, as the materiality threshold of 2% of own funds was not exceeded as of March 31st, 2023.

Currency mismatch in the LCR

In BCR, the LCR is calculated in all major currencies that exceed 5% of the institution's total liabilities (EUR and RON). Thus, the liquidity buffer requirements must be determined for different currencies.

The distribution of the liquidity buffer in foreign currency is monitored monthly to ensure that net cash outflows in significant currencies (RON and EUR) are fully covered by liquid assets denominated in the same currency.

LCR registered a decrease compared to the previous quarter, however being significantly above the 100% regulated threshold due to the stock of high-quality liquid assets (HQLA). The HQLA registered an increase in Q1 compared to the previous period as a result of the evolution of the market value of the portfolio of securities issued by Central governments while future net cash outflows registered an increase mostly supported by higher Unsecured wholesale funding.

Other items in the LCR calculation that are not captured in the LCR disclosure template but that the institution considers relevant for its liquidity profile

The Bank considers that all the relevant information for its liquidity profile was already presented in this report.
