

Account authorization with mToken

The screenshot shows the ERSTE Bank NetBanking interface. The main form is for a "Local payment" and includes fields for Debtor Data (Name: MILJKOVIC DJORDJE, Address: TRIBALSKA 5, Locality: KRUSEVAC), Creditor Data, and Payment Details (Amount, Purpose Code: 289 Transakcije po nalogu gradana, Execution Date: 26/09/2023). An "mToken" authorization overlay is positioned in the foreground, titled "Authorize". It displays a smartphone icon with the mToken logo and prompts the user to "Generate mToken via mBanking application". The overlay includes a dropdown menu for "SERIAL NUMBER OR MOBILE DEVICE NAME" with the selected value "samsung SM-A336B(8075830098)", an "OTP CODE" field with the placeholder "Enter OTP code", and "CANCEL" and "CONTINUE" buttons.

1 On the screen in the NetBanking application, select the device on which you have activated the mBanking application.

2 After that, on the device where the mBanking application is installed, on the main login page, select the "mToken" option.

3 Enter the four-digit PIN you use to access the app and sign into your account. Click the "Confirm" box.

4 This is how you generate the OTP code.

5 Enter the OTP code on the screen in the NetBanking application.
