

Disclosure of information from the Covered bond programme

in accordance with the Decree No 5/2024 of the National Bank of Slovakia from 23 September 2024 on the disclosure of information from the covered bond programme

as of 31 March 2026

General information

Slovenská sporiteľňa, a. s. (hereinafter „**SLSP**” or „**bank**”) meets the requirement to disclose the information from the covered bond programme in this document in accordance with the Decree No 5/2024 of the National Bank of Slovakia (hereinafter „**NBS**”) from 23 September 2024 on the disclosure of information from covered bond programme (hereinafter „**Decree**”), effective from 1 October 2024.

Based on the Decree the information is published on bank’s website in the section where other information about covered bond programme is published. The information is published regularly on quarterly basis, based on end of corresponding quarter status, but not later than 25 days after passing of the previous end of quarter. The information remains published at least until the information for the next calendar quarter is released.

The information in this document is compiled according to report template from the Decree, namely „Výkaz PKD 1 Hypo_CRR” for covered bond programme, consisting of primary assets in accordance with § 70 section 1 letter b) of Act on banks. In case of SLSP, the primary assets are defined in accordance with § 70 section 1 letter b) act on banks No 483/2001 Coll. (hereinafter „**AoB**”) as amended. Primary assets are solely in form of mortgage loans, which are secured by residential properties (liens) intended for living.

In the contractual documentation for the covered bond program, the bank has voluntarily committed itself to a higher than legal overcollateralization (hereinafter „**o/C**”) to the level of 2.5%, and thus the total o/C for the entire covered bond programme is at the level of 7.5%. The calculation of the coverage indicator as well as o/C is calculated on the nominal principal basis.

The rating of the entire covered bond program was assigned to the bank by the rating agency Moody’s Investors Service Ltd (Moody’s) at the level of Aaa. The cover pool includes only primary assets and liquid assets, and the cover pool does not contain supplementary assets or hedging derivatives. The cover pool also does not contain loans that are more than 30 days past due, with the maximum LTV for all loans entering the KD program being 70%.

Information as of 31 March 2026

Table 1.F Additional information on Covered bonds programme

r.n.	Indicator	Description
a	b	1
36	Assets valuation method	The bank primarily relies on the value determined by an expert appraisal (according to decree 492/2004), internal supervision, and in the case of a loan purpose "purchase," also the value according to the purchase contract, if the purchase price corresponds to market conditions. The value of the collateral is determined in accordance with NBS measure 10/2016. The value of residential properties is subject to regular revaluation through statistical models.
37	Market and interest rate risk	The cover pool is directly exposed to market and interest rate risk mainly through liquid assets, where an increase in interest rates generally leads to a decrease in their market value. Given the relatively low proportion of liquid assets in the cover pool and the bank's ability to operationally increase liquid assets, this risk is considered minimal.
38	Currency risk	Currency risk is naturally eliminated by the fact that all assets which are included in the cover pool, as well as the issued covered bonds themselves, are denominated only in EUR.
39	Credit risk	The bank credit transactions based on a thorough analysis of clients' creditworthiness, primarily through the analysis of primary repayment capacity (repayment from acceptable net income of the client, from main operational activities) and secondary repayment capacity (collateral) with the aim of minimizing the risk of loss and costs associated with potential debt recovery. All organizational units responsible for managing and executing credit transactions adhere to the credit policy principles and credit transaction approval procedures defined by SLSP's internal regulations.
40	Other important changes in the cover pool	During Q1 2026, the volume of primary assets (loans) increased by approximately EUR 780 million to EUR 6.04 billion, while liquid assets declined by EUR 454 million to EUR 460 million (nominal value). These movements primarily reflect an adjustment of the liquidity buffer requirement to cover the 180-day net liquidity outflow of the covered bond programme, driven by the upcoming maturity of covered bond ISIN SK4000015400 (EUR 500 million, maturity on 12 June 2026). In addition, the cover pool was impacted by a new covered bond issuance, ISIN SK4000028726, in the amount of EUR 750 million, issued on 22 January 2026, with a six-year maturity and a fixed annual coupon of 2.875%.
