Assets

Assets crucial for providing discount from the Maintenance fee of selected Bank Products.

Assets include:

- the average monthly balance of Client funds on the Bank Product (in any currency),
- the average monthly value of securities registered at the Bank for the Client (the calculation base for securities value is in case of bonds their nominal value and in case of shares their market value),
- the average monthly market value of unit shares of the SPORO fund and ESPA fund registered in the Bank for the Client,
- the average monthly market value of gold in the ownership of the Client deposited at the Bank, and
- the average monthly value of the paid life insurance of the Client at Poistovňa Slovenskej sporiteľne, a.s. Vienna Insurance Group.

The average monthly balances or values are calculated as at the last date of the relevant period from the end-day balances or values during the relevant period.

Foreign currencies are converted by ECB exchange rate according to the list of exchange rates of the Bank valid on the date of the monitored period.

If the Bank Product is established for two or more Clients, for the purpose of calculating the average monthly balance the percentage share of the Client in the Bank Product is included. For determination of the number of Clients, for whom the Bank Product is maintained, the last day of the monitored period is crucial.
